ADDENDUM

PROPONENT: Abe Santos, City of Bellevue Utilities Department
NAME OF PROPOSAL: 2006 Exposed Sanitary Sewer Lake Line
LOCATION OF PROPOSAL: 9312 SE Shoreland Drive
FILE NUMBER: 05-128282 GC
ORIGINAL DNS PUBLICATION DATE: February 2, 2006

DESCRIPTION OF PROPOSAL AND NEW INFORMATION: A DNS was issued on February 2, 2006 for the placement of washed rock and quarry spalls on different locations of exposed sewer pipe in Lake Washington along the existing lake line. Rock material is intended to protect the exposed pipe section from boat anchors, propellers, and natural tidal or wave actions. The Addendum includes two additional project elements not originally included in the scope of the project. In order to ensure proper maintenance and prevent any sewer leaks in the Meydenbauer and Clyde Hill Beach Park areas, a sewer manhole with dual cleanouts in the beach area will be installed at these two locations. Each manhole installation will require connecting to the existing 8-inch sewer line located in Lake Washington and installing two parallel 8-inch ductile iron pipe(s) from this new connection to the new manhole in the grassy portion of the beach. The existing sewer main (i.e., new connection) in the lake is approximately 41 and 22 ft from the shoreline at the Meydenbauer and Clyde Hill Beach Park areas, respectively. If possible, native material excavated during the construction may be reused as backfill material for the new pipe. If this native material cannot be reused than a suitable backfill such as gravel borrow or crushed rock will be used. If so, approximately 23 and 12 CY of crushed rock or gravel borrow will be required to cover the new 8-inch pipe below the Ordinary High Water elevation of 19' (NAVD 88) at the Meydenbauer and Clyde Hill Beach Park areas, respectively. A silt curtain and other Best Management Practices will be utilized during construction to minimize impact to the surrounding areas. The disturbed areas will be restored to approximate their original condition.

The Environmental Coordinator of the City of Bellevue has determined that the new information provided adds analyses or information about the proposal that does not substantially change the analysis of significant impacts in the existing environmental document. This Addendum is issued under WAC 197-11-600 and WAC 197-11-625.
