DEPARTMENT OF PLANNING AND COMMUNITY DEVELOPMENT
ENVIRONMENTAL COORDINATOR
450 110th Ave NE., P.O. BOX 90012
BELLEVUE, WA 98009-9012

OPTIONAL DETERMINATION OF NON-SIGNIFICANCE (DNS) NOTICE MATERIALS

The attached materials are being sent to you pursuant to the requirements for the Optional DNS Process (WAC 197-11-355). A DNS on the attached proposal is likely. This may be the only opportunity to comment on environmental impacts of the proposal. Mitigation measures from standard codes will apply. Project review may require mitigation regardless of whether an EIS is prepared. A copy of the subsequent threshold determination for this proposal may be obtained upon request.

File No. 07 123485 LN

Project Name/Address: Trinity Short Plat
13026 N.E. 8th Street

Planner: Sally Nichols

Phone Number: (425) 452-2727

Minimum Comment Period: 14 days

Materials included in this Notice:

- [x] Blue Bulletin
- [x] Checklist
- [x] Vicinity Map

ENVIRONMENTAL CHECKLIST

6/21/07

If you need assistance in completing the checklist or have any questions regarding the environmental review process, please visit or call the Permit Center (425-452-6864) between 8 a.m. and 4 p.m., Monday through Friday (Wednesday, 10 to 4). Our TTY number is 425-452-4636.

BACKGROUND INFORMATION

Engineers: Litchfield Eng (425) 821-5038
Geotech: Assoc. Earth Sciences, Inc (425) 827-7701 Jeff Lamb

Property Owner: **Vakhtang Ulbabyants** ✓

Proponent: **Sergey Novikov – Trinity Enterprises** ✓

Contact Person: **Sergey Novikov** ✓
(If different from the owner. All questions and correspondence will be directed to the individual listed.)

Address: **14834 NE 11th Place, Bellevue, WA** ✓

Phone: **(425) 445-8513** ✓

Proposal Title: **Trinity Short Plat** ✓

Proposal Location: **13026 NE 8th St** ✓
(Street address and nearest cross street or intersection) Provide a legal description if available.

282505 107 W 100 FT OF E 413 FT OF S 564 FT OF SE 1/4 OF SE 1/4 LESS CO RD ✓

Please attach an 8 ½" x 11" vicinity map that accurately locates the proposal site. ✓

Give an accurate, brief description of the proposal's scope and nature:

1. General description: **The proposed project will be a 5 lot single family residential short plat.** short plat subdivision ✓
2. Acreage of site: **1.21 Acres** ✓ 52,417 sq. ft.
3. Number of dwelling units/buildings to be demolished: **1 single family residence** ✓
4. Number of dwelling units/buildings to be constructed: **5 single family residences** ✓
5. Square footage of buildings to be demolished: **2240** (1 home, 1 garage, 1 carport, 1 pump house) ✓
6. Square footage of buildings to be constructed: **Unknown at this time** ✓
7. Quantity of earth movement (in cubic yards): **Approximately 1200 CY cut/fill** ✓
8. Proposed land use: **single family residential (R-3.5)** ✓
9. Design features, including building height, number of stories and proposed exterior materials: ✓
   Unknown at this time.
10. Other

Estimated date of completion of the proposal or timing of phasing:

Summer 2008

RECEIVED
JUN 26 2007
PERMIT PROCESSING

SN

Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.

The project will ultimately include construction of 5 single family homes. ✓

List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal. ✓

Geotechnical Report by Assoc. Earth Sciences 5/15/2007

Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain. List dates applied for and file numbers, if known.

None known

List any government approvals or permits that will be needed for your proposal, if known. If permits have been applied for, list application date and file numbers, if known. ✓

Preliminary Short Plat UE developer ext. agreement
Final Short Plat GE plat infrastructure
Construction Permits
NPDES

Please provide one or more of the following exhibits, if applicable to your proposal.
(Please check appropriate box(es) for exhibits submitted with your proposal):

☐ Land Use Reclassification (rezone) Map of existing and proposed zoning

☒ Preliminary Plat or Planned Unit Development
Preliminary plat map

☐ Clearing & Grading Permit
Plan of existing and proposed grading
Development plans

☐ Building Permit (or Design Review)
Site plan
Clearing & grading plan

☐ Shoreline Management Permit
Site plan

SN

A. ENVIRONMENTAL ELEMENTS

See Geotech Report dated May 15, 2007 (in file)

1. Earth

a. General description of the site: ☒ Flat ☐ Rolling ☐ Hilly ☐ Steep slopes ☐ Mountains ☐ Other ✓

b. What is the steepest slope on the site (approximate percent slope)? ***Isolated area of 36% +/-*** ✓

c. What general types of soil are found on the site (for example, clay, sand, gravel, peat, and muck)? If you know the classification of agricultural soils, specify them and note any prime farmland.

Everett Gravelly Sandy Loam (EvB) per NRCS mapping. There is no prime farmland on the site. ✓

d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe. ✓

None known.

e. Describe the purpose, type, and approximate quantities of any filling or grading proposed. Indicate source of fill.

Trenching and excavation associated with utilities installation, road improvements, infiltration trenches and storm water filter, etc. Estimated earthwork quantities: 1200 CY cut/fill. ✓

f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.

Yes, some erosion will occur during construction, erosion will be controlled.

g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?

46%

max. is 50% LUC 20.20.010

h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any:

Re-vegetate exposed soils or cover with impervious surfaces. During construction - construction exit, plastic cover, catch basin inserts.

TESC plan — silt fence etc. BCC 23.76 Erosion & Sediment Control C&G code

Storm detention BCC 24.06 Utility

2. AIR

a. What types of emissions to the air would result from the proposal (i.e. dust, automobile odors, and industrial wood smoke) during construction and when the project is completed? If any, generally describe and give approximate quantities if known. ✓

Dust, auto emissions

b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe. ✓

None known.

c. Proposed measures to reduce or control emissions or other impacts to the air, if any: ✓

None at this time.

Construction Dust Supression measures per BCC 23.76 Clearing & Grading code

SN

3. WATER

a. Surface

(1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into. ✓

None known.

(2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If Yes, please describe and attach available plans. ✓

N/A

(3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material. ✓

N/A

(4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known. ✓

No.

(5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan. ✓

No.

(6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge. ✓

No.

b. Ground

(1) Will ground water be withdrawn, or will water be discharged to ground water? Give general description. ✓

No.

(2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals...; agricultural; etc.) Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.

Not applicable.

SN

c. Water Runoff (Including storm water)

(1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.

Stormwater generated by the developed site will be collected and tightlined to infiltration trenches for each individual lot and a storm filter and infiltration bed for the access road. The overflow from these trenches will be tightlined to the existing conveyance system in NE 8th St.

(2) Could waste materials enter ground or surface waters? If so, generally describe.

Unknown

d. Proposed measures to reduce or control surface, ground, and runoff water impacts, if any:

Stormwater generated by the developed site will be collected and tightlined infiltration trenches for each individual lot and a storm filter and infiltration bed for the access road. The overflow from these trenches will be tightlined to the existing conveyance system in NE 8th St. This system will be reviewed for compliance with BCC 24.06.130, Surface Water Engineering Standards.

C&G Code 23.76 TESC Std. Plan and details for erosion control during construction.

4. Plants

a. Check or circle types of vegetation found on the site:

- ☒ deciduous tree: alder, maple, aspen, other
- ☒ evergreen tree: fir, cedar, pine, other
- ☒ shrubs
- ☒ grass
- ☐ pasture
- ☐ crop or grain
- ☐ wet soil plants: cattail, buttercup, bulrush, skunk cabbage, other
- ☐ water plants: water lily, eelgrass, milfoil, other
- ☐ other types of vegetation

b. What kind and amount of vegetation will be removed or altered?

Grass, trees and dense brush

c. List threatened or endangered species known to be on or near the site.

None known.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:

Grass and landscaping with trees and shrubs.

SN

5. ANIMALS

a. Check or circle any birds and animals which have been observed on or near the site or are known to be on or near the site:

☒ Birds: hawk, heron, eagle, songbirds, other:

☐ Mammals: deer, bear, elk, beaver, other:

☐ Fish: bass, salmon, trout, herring, shellfish, other:

Animals typical to lowland forest

b. List any threatened or endangered species known to be on or near the site. ✓

None known.

Pacific northwest flyway over entire Puget Sound region

c. Is the site part of a migration route? If so, explain. ✓

Not that is known.

d. Proposed measures to preserve or enhance wildlife, if any: ✓

None at this time.

6. Energy and Natural Resources

a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy need? Describe whether it will be used for heating, manufacturing, etc. ✓

Electricity and natural gas

b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.

Not that is known.

no-loss of tree cover would actually help

c. What kinds of energy conservation features are included in the plans of the proposal? List other proposed measures to reduce or control energy impacts, if any: ✓

Standard energy conservation measures that are required by the Uniform Building Code for the construction of the houses.

7. Environmental Health

a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur as a result of this proposal? If so, describe. ✓

No environmental hazards are expected.

(1) Describe special emergency services that might be required ✓

None beyond standard life safety services.

(2) Proposed measures to reduce or control environmental health hazards, if any.

None at this time.

SN

b. Noise

(1) What types of noise exist in the area which may affect your project (for example, traffic, equipment, operation, other)?

No significant noise impacts.

(2) What types and levels of noise would be created by or associated with the project on a short-term or long-term basis (for example, traffic, construction, operation, other)? Indicate what hours noise would come from the site.

Construction per City of Bellevue noise ordinance.

City ordinance BCC 9.18

(3) Proposed measures to reduce or control noise impacts, if any:

Observe City of Bellevue noise ordinance hours.

8. Land and Shoreline Use

a. What is the current use of the site and adjacent properties?

Single family residential. The project site is bound by single family residences to the north, east and west. NE 8th St is located to the south of the property.

one home on lot

b. Has the site been used for agriculture? If so, describe.

No

c. Describe any structures on the site.

One single family residence and garage. and carport/pump house.

d. Will any structures be demolished? If so, what?

Yes, the single family home and garage will be demolished.

e. What is the current zoning classification of the site?

R.3.5

f. What is the current comprehensive plan designation of the site?

Single-Family Medium (SF-M), Wilburton/NE 8th St Bellevue Subarea

g. If applicable, what is the current shoreline master program designation of the site?

N/A

no shoreline

h. Has any part of the site been classified as an "environmentally sensitive" area? If so, specify.

Not that is known.

I. Approximately how many people would reside or work in the completed project?

5+ residences/families

j. Approximately how many people would the completed project displace?

None

k. Proposed measures to avoid or reduce displacement impacts, if any:

NA

i. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:

Meets land use code and comprehensive plan designation.

9. Housing

a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.

5 middle income homes

b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.

1 middle income home

c. Proposed measures to reduce or control housing impacts, if any:

None

10. Aesthetics

a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?

Buildings will not exceed the allowable maximum building height as defined by the land use code.

b. What views in the immediate vicinity would be altered or obstructed?

None known.

Land relatively flat. Impact territorial view into trees

30' LUC 20.20.010 materials not determined.

c. Proposed measures to reduce or control aesthetic impacts, if any:

Houses will be constructed to meet City of Bellevue codes, Zoning and Comprehensive Plan.

shared access easement to elim. excessive pavement

11. Light and Glare

a. What type of light or glare will the proposal produce? What time of day would it mainly occur?

Porch lights at night

b. Could light or glare from the finished project be a safety hazard or interfere with views?

No significant impact expected.

light and glare code LUC 20.20.522

SN

c. What existing off-site sources of light or glare may affect your proposal?

None known.

d. Proposed measures to reduce or control light or glare impacts, if any:

None at this time.

12. Recreation

a. What designated and informal recreational opportunities are in the immediate vicinity?

Wilburton Hill Park, Highland Park

b. Would the proposed project displace any existing recreational uses? If so, describe.

No

c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:

None at this time.

13. Historic and Cultural Preservation

a. Are there any places or objects listed on, or proposed for, national, state, or local preservation registers known to be on or next to the site? If so, generally describe.

Not that is known.

b. Generally describe any landmarks or evidence of historic, archeological, scientific, or cultural importance known to be on or next to the site.

N/A

c. Proposed measures to reduce or control impacts, if any:

None

14. Transportation

a. Identify public streets and highways serving the site, and describe proposed access to the existing street system. Show on site plans, if any.

The site is currently accessed via NE 8th St. Proposed sites will be accessed via a private road off of NE 8th St.

b. Is site currently served by public transit? If not, what is the approximate distance to the nearest transit stop?

Public transit is currently located along NE 8th St at 126th Ave NE, 130th Ave NE, 131st Ave NE and 134th Ave NE approximately .1 miles from the project site.

c. How many parking spaces would the completed project have? How many would the project eliminate?

Completed project will provide 10-12 parking spaces. Approximately 2 parking spaces will be eliminated.

Only one house on lot but it has a lot of parking area (thus 12-14 spots)

SN

d. Will the proposal require any new roads or streets, or improvements to existing roads or streets, not Including driveways? If so, generally describe (indicate whether public or private).

Yes, a new private road will be constructed off of NE 8th St.

e. Will the project use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

Not that is known.

f. How many vehicular trips per day would be generated by the completed project? If known, indicate when peak volumes would occur.

6-8 during peak morning and afternoon/evening hours

g. Proposed measures to reduce or control transportation impacts, if any:

None

R.O.W. Use permit for construction hauling BCC 14.30

15. Public Services

a. Would the project result in an increased need for the public services (for example: fire protection, police protection, health care, schools, other)? If so, generally describe.

General public services to accommodate (5) single family residences.

b. Proposed measures to reduce or control direct impacts on public services, if any.

Payment of property taxes and other support fees.

why no natural gas? for kitchens, heat etc.

16. Utilities

a. Circle utilities currently available at the site: electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other.

storm detention per BCC 24.06 Utility Code

b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

Storm water (connect to City of Bellevue drainage system) in addition to those listed above

Signature

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.
