Section 4. Section 6 of Ordinance No. 4950 is amended as follows:

General Provisions for Department of Planning and Community Development
Construction Permit Fees.

1. Scope: These general provisions apply to all permits issued by the Building Section of the Department of Planning and Community Development.
2. Add-on Fees: Fees due after issuance as a result of a field inspection that identified a scope of work different from the work permitted are due and payable within five (5) working days of notification.
3. Valuation: The deposit required for plan review of a project based on building department valuation will have the owner's valuation rounded to the nearest increment.
4. Multi-building Projects: Separate building, mechanical, electrical, and plumbing permits are required for each building in a multi-building complex. If individual buildings do not have separate contract prices, the fees will be calculated on the total contract price and this total will be apportioned between the individual buildings. For multi-building projects with fees based on building department valuation, the appropriate fees will be calculated on the total project valuation and this total apportioned between the buildings. These provisions apply to multi-building projects when applied and reviewed together as one project.
5. Miscellaneous Inspections and Other Fees: Table 2 is used to calculate fees for miscellaneous inspections and additional plan review.

Table 2 - Miscellaneous Inspections and Other Fees

Table 2 - Miscellaneous Inspections and Other Fees			
Type	Per Hour	Minimum Fee	Due
Reinspection	\$70.00	.5 hour	Within 5 days of Notification

6. Work Without a Permit: It is unlawful to proceed with any work or any portion of any construction, installation, alteration, or repair when the required fee has not been paid and the permit issued. When work for which a permit is required by the Bellevue Construction Codes is started or proceeded with prior to obtaining that permit, a penalty may be levied in an amount up to double the permit fee required for the work unlawfully conducted, as determined by the Director. This provision does not apply to emergency work when it is proved to the satisfaction of the Director that such work was urgently necessary and that it was not practical to obtain a permit before the commencement of the work. In all such cases, a permit must be obtained as soon as it is practical to do so; and if there is an unreasonable delay in obtaining the permit, a double fee (as provided in this ordinance) will be charged. The payment of this double fee does not relieve any persons from fully complying with the requirements of the Bellevue Construction Code in the execution of the work or from any other penalties prescribed by law.

Section 5. Section 7 of Ordinance No. 4950 is amended as follows:

Building Permits

1. Determination of Value or Valuation: The determination of the value or valuation under any of the provisions of this ordinance will be made on the basis of the Building Valuation Data published quarterly in the International Conference of Building Official Building Standards. The valuation to be used in computing the plan review and permit fees will be the total value of all construction work, including labor and materials, for which the permit is issued, as well as all finish work, painting, roofing, electrical, plumbing, heating, air conditioning, elevators, fire-extinguishing systems, or any other permanent work or permanent equipment. The "gross area" used in conjunction with the ICBO building valuations, means the total areas of all floors - measured from the exterior face, outside dimensions, or exterior column line of a building - including basements, cellars, and balconies but not including unexcavated areas. Where walls and columns are omitted in the construction of a building, such as an open shed or marquee, the exterior wall of the open side or sides will be considered the edge of the roof. When the value is unknown it will be determined by the Director.

2. Building Permit Fees: Table 3-A is used to calculate the building permit fee once the determination of value has been made. The permit fee is due at issuance.

Table 3-A - Permit Fees Based on Valuation	
Total Valuation	Fee
\$1 to \$500	\$22.70
\$501 to \$2,000	\$22.70 for the first \$500 plus \$3.50 prorated for each additional \$100 to and including \$2,000

\$50,001 to \$100,000	\$652.40 for the first \$50,000 plus \$6.70 prorated for each additional \$1,000 to and including \$100,000
\$100,001 to \$1,000,000	\$987.40 for the first \$100,000 plus \$5.80 prorated for each additional \$1,000 to and including \$1,000,000
\$1,000,001 and above	\$6,207.40 for the first \$1,000,000 plus 3.65 prorated for each additional \$1,000 thereafter

3. **Plan Review Fees:** When the plans and/or specifications describing the proposed construction are reviewed by the Building Official, the fee will be 65 percent of the building permit fee as shown on Table 3-A. A plan review deposit is due at submittal, and any excess of the deposit over the plan review fee owed will be refunded at issuance. If the deposit is insufficient to cover the plan review fee, the applicant will pay the amount of the insufficiency at the time of issuance. The plan review fee of an expedited project, as approved by the Director, will be 100 percent of the building permit fee as shown by Table 3-A and is in addition to the permit fee.

4. **Transportation Surcharge:** In addition to the other fees established herein, a surcharge will be levied and collected for the Transportation Department to defray costs of plan review, survey, and inspections. This fee is payable whenever a plan review fee is required by the Bellevue Construction Code for proposed construction of buildings other than those of Groups R3, U-1, and U-2 Occupancies. This surcharge, 60 percent of the sum of the building permit fee and plan review fee, is due at issuance. This section shall not apply to any building permit issued in connection with a building permit application which is filed on or after January 1, 1997.

5. **State Building Code Fee:** The state building code fee is collected at issuance for the state on all building, spa, satellite dish, antenna, and demolition permits at

the rate of \$4.50 each. The fee for multi-family building permits is \$4.50 for the first unit and \$2.00 for each additional unit. The fee is due at issuance.

6. Rounding: The total of the permit fee or plan review fee will be rounded to the nearest whole dollar.

7. Expedite Issuance: The fee to expedite making a building or clearing & grading permit ready-to-issue by a Permit Processing Technician, as approved by the Director, is \$35.00 per hour in one-half (.5) hour increments with a one (1) hour minimum. The fee is due at issuance.

8. Single Family Combination New Construction Permits: The fee for the mechanical and plumbing inspections of a single family combination new construction permit is 23% of the building permit fee. The fee for the electrical inspections, when combined in the permit, is 9% of the building permit fee. These fees are due at issuance and are in addition to the building permit.
