

CITY OF BELLEVUE, WASHINGTON

ORDINANCE NO. 5341

AN ORDINANCE regarding development services under the Bellevue City Code; fees for applications requiring construction, land use, fire, survey, sign, transportation, utility, and clearing & grading review and inspection services; amending Ordinance Nos. 5185 and 5262.

THE CITY COUNCIL OF THE CITY OF BELLEVUE, WASHINGTON, DOES ORDAIN AS FOLLOWS:

Section 1. Section 2 of Ordinance No. 5185 is amended to read as follows.

Section 4. Administration and Enforcement

The Director is authorized to interpret the provisions of this ordinance and may issue rules for its administration. This includes, but is not limited to, correcting errors and omissions and adjusting fees to match the scope of the project. The Department of Planning and Community Development fees established here will be reviewed annually, and, effective January 1 of each year, may be administratively increased or decreased, by an adjustment to reflect the current published annual change in the Seattle Consumer Price Index for Wage Earners and Clerical Workers as needed in order to maintain the cost recovery objectives established by the City Council. The fees collected by the Department of Planning and Community Development for other review authorities will be reviewed annually by the appropriate Department, and, effective January 1, of each year, may be administratively increased or decreased, by an adjustment to reflect the current published annual change in the Seattle Consumer Price Index for Wage Earners and Clerical Workers, as needed in order to maintain the cost recovery objectives established by the City Council.

Section 2. Section 4 of Ordinance No. 5185 is amended to read as follows:

Section 6. General Provisions for Construction Permit Fees

1. Scope: These general provisions apply to all permits issued by the Building Section of the Department of Planning and Community Development and the development permits issued by the Fire Department.

2. Add-on Fees: Fees due after issuance as a result of a field inspection that identified a scope of work different from the work permitted are due and payable within five (5) working days of notification.

3. Valuation: The deposit required for plan review of a project based on building department valuation will have the owner's valuation rounded to the nearest increment.

4. Multi-building Projects: Separate building, mechanical, electrical, and plumbing permits are required for each building in a multi-building complex. If individual buildings do not have separate contract prices, the fees will be calculated on the total contract price and this total will be apportioned between the individual buildings. For multi-building projects with fees based on building department valuation, the appropriate fees will

be calculated on the total project valuation and this total apportioned between the buildings. These provisions apply to multi-building projects when applied and reviewed together as one project.

5. Miscellaneous Inspections and Other Fees: Table 2 is used to calculate fees for miscellaneous inspections and additional plan review.

Table 2 - Miscellaneous Inspections and Other Fees			
Type	Per Hour	Minimum Fee	Due
Inspection with no specific fee	\$75.00	.5 hour	Within 5 days of notification
Inspection outside normal hours	\$75.00	2 hours	Within 5 days of notification
Plan review resulting from changes to approved plans (when the building valuation is unchanged)	\$75.00	.5 hour	At revision issuance
Reinspection	\$75.00	.5 hour	Within 5 days of notification

6. Work Without a Permit: It is unlawful to proceed with any work or any portion of any construction, installation, alteration, or repair when the required fee has not been paid and the permit issued. When work for which a permit is required by the Bellevue Construction Codes is started or proceeded with prior to obtaining that permit, a penalty may be levied in an amount up to double the permit fee required for the work unlawfully conducted, as determined by the appropriate Director. This provision does not apply to emergency work when it is proved to the satisfaction of the appropriate Director that such work was urgently necessary and that it was not practical to obtain a permit before the commencement of the work. In all such cases, a permit must be obtained as soon as it is practical to do so; and if there is an unreasonable delay in obtaining the permit, a double fee (as provided in this ordinance) will be charged. The payment of this double fee does not relieve any persons from fully complying with the requirements of the Bellevue Construction Code in the execution of the work or from any other penalties prescribed by law.

Section 3. Section 5 of Ordinance No. 5185 is amended to read as follows:

Section 7. Building Permits

1. Determination of Value or Valuation: The determination of the value or valuation under any of the provisions of this ordinance, unless otherwise noted, will be made on the basis of the Building Valuation Data published quarterly in the International Conference of Building Official Building Standards and other valuation criteria approved by the Director. The valuation to be used in computing the plan review and permit fees will be the total value of all construction work, including labor and materials, for which the permit is issued, as well as all finish work, painting, roofing, electrical, plumbing, heating, air conditioning, elevators, fire-extinguishing systems, or any other permanent work or permanent equipment. The "gross area" used in conjunction with the ICBO building valuations, means the total areas of all floors - measured from the exterior face, outside dimensions, or exterior column line of a building - including basements, cellars, and

balconies but not including unexcavated areas. Where walls and columns are omitted in the construction of a building, such as an open shed or marquee, the exterior wall of the open side or sides will be considered the edge of the roof. When the value is unknown it will be determined by the Director.

2. Building Permit Fees: Table 3 is used to calculate the building permit fee once the determination of value has been made. The permit fee is due at issuance.

Table 3 – Permit Fees Based on Valuation

If the deposit is insufficient to cover the plan review fee, the applicant will pay the amount of the insufficiency at the time of issuance. The plan review fee of an expedited project, as approved by the Director, will be 100 percent of the building permit fee as shown by Table 3 and is in addition to the permit fee.

4. Transportation Surcharge: In addition to the other fees established herein, a surcharge will be levied and collected for the Transportation Department to defray costs of plan review, survey, and inspections.
