Planning and Community Development

Re: Major Comprehensive Plan Update (File No. 12-127970-AC)

The August 4, 2015 Community Council meeting will include a presentation and review of the city's major Comprehensive Plan update. Final action will be scheduled for the September 1, 2015 meeting. At that time, and as required by LUC 20.35.450, the Community Council will be asked to vote to approve the City Council's ordinance adopting the updated Comprehensive Plan and the ordinance adopting amendments implementing the Eastgate/I-90 project, which are an integrated part of the Comprehensive Plan update.

The Community Council held a courtesy hearing on the Comprehensive Plan update on March 3, 2015. The Bellevue Planning Commission held a public hearing on the Comprehensive Plan update on March 12, 2015, and recommended Council adoption of plan on March 25, 2015. The Planning Commission, along with other boards and commissions, presented the recommendation to the City Council on April 6, 2015. The City Council held a number of study sessions to review the recommendation and direct changes to the draft. The City Council is scheduled to take action on the ordinances on August 3, 2015. Draft ordinances are enclosed; final ordinances will be provided at the September 1 meeting.

If the City Council adopts, or adopts with modifications, the updated Comprehensive Plan the action is not effective within the jurisdiction of the Community Council until the Community Council votes to approve the ordinances, or the Community Council fails to disapprove the ordinances within 60 days of the enactment of the ordinances.

BACKGROUND

On March 25, 2015, the Planning Commission recommended that the City Council approve the adoption of update amendments to the Bellevue Comprehensive Plan in accordance with the requirements of the Growth Management Act. This updated Comprehensive Plan includes:

- **Volume 1** – The Community Vision and general elements of Volume 1 were reviewed and will be replaced by this update. The update also replaces the Land Use Map of the existing Comprehensive Plan. The Shoreline Element remains unchanged at this time, which will be replaced in concert with the Shoreline Master Program update project.
- **Volume 2** - Limited changes are made to Volume 2, including updates to the Downtown Bellevue subarea plan to adjust the southern boundary; removal of policy S-SW-27 from the Southwest Bellevue subarea; changes to the Eastgate, Richards Valley, and Factoria subarea plans to implement the Eastgate/I-90 project; and replacement of the

transportation facilities plans with a single consolidated Comprehensive Transportation Project List.

The Comprehensive Plan is the City's foundational policy document that captures the community's vision for the future of Bellevue, directs City actions and decisions, and helps guide capital investments. The recommended update to the plan does not "start over." Rather the update builds off of the current plan and continues to support many of its existing strategies, including investing in a strong Downtown neighborhood, revitalizing commercial areas, protecting neighborhoods, and enhancing the character of the city, as a "City in a Park." Significant changes to the plan address new and evolving conditions or to bring components up-to-date.

Vision – The plan fully captures the community vision for the future. This new Vision, which directly connects with the Council vision, looks out to what the City will be like in 2035 and serves as a framework for the entire Comprehensive Plan. The Vision furthers the community interest in a strong, growing Downtown and healthy mixed use and neighborhood centers, while preserving and enhancing natural areas and open spaces that make Bellevue a "City in a Park." The Vision recognizes the value of Bellevue's neighborhoods and the strength of its diverse population.

Growth Strategy – The plan extends the planning horizon and anticipates growth of 15,800 housing units and 51,800 jobs by 2035. With few areas left to annex or available for raw land development, the vast majority of growth will be accommodate through redevelopment in Downtown Bellevue or in other mixed use centers, including BelRed, Eastgate/Factoria and Wilburton.

Diversity – In the decade since the last major plan update, Bellevue has become one of the most diverse cities in the state. The population is increasingly more ethnic and is also growing older. The Comprehensive Plan considers this change to the community in terms of its economy, neighborhoods, housing, community services and human services, and it how the community engages with the City. The plan seeks to make public engagement open and accessible for all.

New Neighborhoods Element – The updated plan includes a new Neighborhoods Element that creates a "home" for neighborhood issues. It also frames the neighborhood/subarea area plan update process, planned to occur following conclusion of the Comprehensive Plan update.

New Neighborhood Areas – Related to the Neighborhood Element, the plan includes a comprehensive update of neighborhood area (subarea) boundaries. The older boundaries had not been updated in many years. These new boundaries better match with the areas that people self-identify with and will create a stronger base for neighborhood area planning. In addition to the citywide review of the boundaries, the plan includes a shift of the Downtown boundary in three specific areas that will help to regularize the current boundary without impacting the adjacent residential neighborhoods.

Housing – Housing received more comments than any other topic during review of the draft plan and at the public hearing. While the current Housing Element includes a robust set of

housing policies, this update increases emphasis on housing affordability, housing for seniors and addressing homelessness.

Utilities – This update adds new policies supporting widespread access to high-speed internet service to support the City’s ideal of being a connected community. The plan also includes a combination of new and established policies to address the need to mitigate the impacts of new electrical facilities, to supporting undergrounding of power lines, and to support identifying new funding opportunities to support undergrounding and mitigation.

Multimodal transportation – Strong support for non-motorized transportation came early in the process during the “Best Ideas” campaign in 2013 and recently from the online open house for the draft plan review. The update continues to support a comprehensive transportation system that addresses the mobility needs of all people. The update places an increased emphasis on addressing all modes of travel, whether by car, bus, train, bicycle or walking.

Economic development – The plan works to preserve and strengthen the City’s economic position through a combination of supporting business development, becoming increasingly connected globally, supporting economic opportunity for all citizens, and by creating a quality environment where people want to live, work and shop.

Environmental preservation – Over the last decade there has been increased community interest in environmental preservation even as the City continues to become more urban in some neighborhoods. To support the City’s image as a “City in a Park” and to respond to the threat to trees and open space from development and infrastructure projects, new Environment policy supports working towards a tree canopy target of 40% coverage and initiating an action plan for achieving it. The Environment Element also directs development of a community-level goal for greenhouse gas emissions and supports low impact development techniques that address stormwater impacts holistically.

Overall, the update of the plan maintains its relevance to the community even as the community and the City continues to evolve. The plan looks out to 2035 and serves to guide City decisions to enable coordinated effort toward a consistent community Vision. The update provides a strong policy foundation for City decisions and actions, especially related to infrastructure investments, neighborhoods, land use, environment and economic development. The update also addresses consistency with state law and regional plans.

Integration of Amendments

In addition to the review and update of the overall Comprehensive Plan, the update incorporates the plan amendments that resulted from the 2012 Eastgate/I-90 project and two proposed annual amendments. Under the state Growth Management Act cities are limited to amending plans no more than once per year, with few exceptions. Therefore these other amendments are integrated with the overall update to allow for a single annual amendment process.

Eastgate/I-90 Land Use and Transportation Project

This project amends the Eastgate, Factoria and Richards Valley subarea plans to promote the vision for the Eastgate/I-90 corridor as a thriving employment area and welcoming gateway into Bellevue that is walkable, bikable, and with a variety of retail uses to support and serve

the nearby office and residential uses; a corridor that reflects the natural character of the Mountains to Sound Greenway; and of a transit-oriented development area that provides a focal point for corridor activity.

Annual CPAs

St. Luke's Lutheran Church (15-103696 AC)

This amendment changes the designation of the property located at 3030 Bellevue Way NE from Single Family-Medium (SF-M) to Multifamily-Medium (MF-M) on the North Bellevue Subarea Plan map.

Public Storage (15-103770 AC)

This amendment changes the designation of the property located at 1111 118th Ave SE from Office (O) to Light Industrial (LI) on the Richards Valley Subarea Plan map.

Actions to Implement the Plan

The Comprehensive Plan sets the long-range policy direction for the City. While implementation of the plan may occur over many years, some of the key near-term actions that are anticipated to follow adoption of the plan include the following. These are new initiatives in addition to ongoing work, such as implementation of the Economic Development strategy.

- Continued planning for the City's primary employment centers, including new direction for the Wilburton commercial area.
- Update of the City's subarea/neighborhood area plans to respond to changing conditions in the city's neighborhoods.
- Launching work on a Housing Strategy Plan to address opportunities to increase access to affordable housing, and development of a homeless shelter.
- Development of the methodology to support a multi-modal transportation level of service.
- Pedestrian and bicycle implementation initiative (underway).
- Follow through on new environmental policies, including development of an action plan to enhance the City's tree canopy and work towards identifying Bellevue-specific goals for reducing greenhouse gas emissions.

Implementation of the plan will also occur through application of the policy framework it establishes for a wide range of City actions.

Draft Recommendation

In addition to a public meeting hosted by the EBCC in 2013 and the March 3, 2015, courtesy hearing, the city has held nearly 60 study sessions by six different boards and commissions over the last two years reviewing policies in detail. This included meetings held at Interlake High School, Bellevue College and the Samena Club. Community engagement included the Bellevue's Best Ideas campaign that solicited ideas for how to improve Bellevue, various public events, a series of visioning workshops, guest articles in the Bellevue Reporter, posts on Facebook and Twitter, a Neighborhood Leadership meeting, and both traditional and on-line open houses.

The Planning Commission held numerous study sessions to review background information, hearing from guest speakers, exhaustively reviewing the current plan, and detailed policy-by-policy reviews of the staff recommendation. The draft was substantially informed by the recommendations of the Arts Commission, Environmental Services Commission, Human Services Commission, Parks and Community Services Board, and Transportation Commission, which reviewed those sections and policies related to their individual area of expertise.

Council Review Process

Following the presentation of the Planning Commission's recommendation for updating the Comprehensive Plan on April 6, 2015, the City Council reviewed each element of the plan and considered changes to a number of individual policies. Council conducted a series of nine Study Sessions to review the Planning Commission's recommendation in detail, to raise specific policy questions, and to provide direction on individual policy topics. This review also allowed for responses to state and Puget Sound Regional Council comments to be incorporated into the draft.

CITY OF BELLEVUE, WASHINGTON

ORDINANCE NO. _____

AN ORDINANCE relating to the Comprehensive Plan of the City of Bellevue, as required and adopted pursuant to the Growth Management Act of 1990, as amended (Chapter 36.70A RCW); adopting update amendments to the Comprehensive Plan that consist of updating and replacing Volume 1 of the Comprehensive Plan, including the community vision, general elements, land use map, and glossary, and a new Neighborhoods Element, and select amendments to Volume 2, including changes to the Downtown and Southwest Bellevue subarea boundary, a change to the Southwest Bellevue policies, changes to the Factoria, Richards Valley, Eastgate subarea policies and land use maps, a change to the North Bellevue land use map, and replacing the transportation facility plans with a single consolidated transportation facility project list as set forth herein and in Ordinance Nos. _____, _____, and _____.

WHEREAS, the Bellevue Comprehensive Plan was adopted on December 6, 1993, and updated November 29, 2004, as amended annually; and

WHEREAS, on October 22, 2012, the City Council initiated the Comprehensive Plan update to respond to the requirement of the state Growth Management Act to periodically update such plans; and

WHEREAS, the City Council established a set of principles to guide the update and ensure that it reflects the long-term needs and vision of the community; and

WHEREAS, these principles include ensuring that the plan remains relevant to the community; that it advances the community vision; that it addresses the needs of a more diverse community; that outreach for the plan engages the entire community; that the current plan is used as a foundation for the update; that the plan addresses emerging issues; that the plan is accessible and usable for the public; that state and regional requirements are met; that the plan clearly connects to implementation strategies; and that the progress and successes of the plan can be measured; and

WHEREAS, Bellevue has undergone tremendous changes since the last update in 2004, including rapid growth in Downtown, annexation of over 900 acres, population growth of about 13,000 people, and demographic change; and

WHEREAS, the city engaged in a multi-year planning process to update the Comprehensive Plan that included public events and open houses; over 70 meetings of different boards and commissions; an online strategy that included a project website, social media, and online open house; meetings with neighborhoods and stakeholders; a series of press releases and op-eds; and a speaker series; and

WHEREAS, the community envisions that in 2035 Bellevue will be a vibrant international center for innovation and commerce with safe, attractive neighborhoods that feature some of America's finest schools; most of Bellevue's jobs and many of its new housing opportunities will be found Downtown with its thriving arts scene, and in new business/residential centers at BelRed, Wilburton, and Eastgate, which feature their own unique cultural amenities and urban landscapes; neighborhoods will epitomize Bellevue's reputation as a "City in a Park" with visually breathtaking vistas, viewpoints, and recreation areas; neighborhoods will remain connected to one another, offering diverse housing choices, gathering spaces, and local and regional commercial services; and Bellevue's people – its ultimate strength – will continue to define both the city and its neighborhoods; and

WHEREAS, the Comprehensive Plan anticipates growth of 15,800 additional housing units and 51,800 jobs between 2012 and 2035; and

WHEREAS, the Comprehensive Plan supports a strategy that focuses the city's growth in Downtown and other areas served by a full range of transportation options and planned for compact, mixed-use development such as BelRed, Eastgate/Factoria, Wilburton, and Crossroads while enhancing the vitality of existing neighborhoods and providing for commercial uses that serve the community needs; and

WHEREAS, the Comprehensive Plan identifies the infrastructure and capital investments to support growth and changing community needs, and is linked to facility plans for transportation, utilities, parks and other public facilities; and

WHEREAS, the Comprehensive Plan seeks to preserve and enhance quality of life, including economic opportunities, public safety, human and community services, housing, education, parks and natural areas, quality neighborhoods, art and culture; and

WHEREAS, the Comprehensive Plan seeks to encourage housing choices affordable to all income levels and a range of mobility options to serve the entire community; and

WHEREAS, the Comprehensive Plan seeks to protect and restore ecological systems of the natural environment, including reducing greenhouse gases, enhancing the city's overall tree canopy coverage, protecting critical areas, and preserving areas of open space; and

WHEREAS, this update includes a new Neighborhoods Element that provides specific information and policies related to Bellevue's neighborhoods and guides the neighborhood planning process; and

WHEREAS, the new Neighborhood Element identifies new neighborhood area boundaries that replace previous subarea boundaries, while established subarea boundaries will remain in effect for individual subarea plans until such plans are updated; and

WHEREAS, the new Neighborhoods Element uses updated neighborhood area names for BelRed, Cougar Mountain/Lakemont, Lake Hills, Factoria, Newport, Somerset, West Lake Sammamish, West Bellevue, Woodridge; and

WHEREAS, this updated includes the current Shoreline Management Element, which is being updated through a separate process consistent with state law;

WHEREAS, the Comprehensive Plan Vision will be realized by the entire city organization, in concert with the Bellevue community and regional partners;

WHEREAS, the Growth Management Act allows for amendments to comprehensive plans once annually; and

WHEREAS, the Planning Commission held a public hearing on March 4, 2015, with regards to the proposed update to the Comprehensive Plan; and

WHEREAS, on March 25, 2015, the Planning Commission recommended that the City Council approve such proposed update; and

WHEREAS, the Planning Commission's recommendation was presented to the City Council by representatives of the Planning Commission, Arts Commission, Environmental Services Commission, Human Services Commission, Parks and Community Services Board, and Transportation Commission on April 6, 2015; and

WHEREAS, the City Council considered the recommended Comprehensive Plan update concurrently with the other 2015 amendments; and

WHEREAS, the City Council reviewed each element and component of the recommended Comprehensive Plan and directed a limited set of additional amendments and changes; and

WHEREAS, the City Council finds that the Comprehensive Plan update satisfies the decision criteria established in Part 20.30(I) of the Land Use Code; and

WHEREAS, the City of Bellevue has complied with the requirements of the State Environmental Policy Act (Chapter 43.21C RCW) and the City Environmental Procedures Code (Chapter 22.02 BCC), including the issuance of a Determination of Non-Significance on February 12, 2015; now, therefore,

THE CITY COUNCIL OF THE CITY OF BELLEVUE, WASHINGTON, DOES HEREBY ORDAIN AS FOLLOWS:

Section 1. Amendments. The Bellevue Comprehensive Plan, Volume 1, is hereby amended as set forth in Attachment A and is hereby adopted.

Section 2. Amendments. The Land Use Map of the Bellevue Comprehensive Plan is hereby amended as set forth in Attachment B and is hereby adopted.

Section 3. Amendments. The Downtown and Southwest Bellevue subarea plan maps as contained in the Comprehensive Plan are hereby amended as set forth in Attachment C and is hereby adopted.

Section 4. Amendments. Policy S-SW-27 of the Southwest Bellevue Subarea Plan, of Volume 2 of the Comprehensive Plan, is hereby repealed.

Section 5. Amendments. The new Comprehensive Transportation Project List in Volume 2 of the Comprehensive Plan is hereby adopted to replace the Bel-Red Overlake Transportation Facility Plan; the Bridle Trails, Bel-Red, Crossroads Transportation Facility Plan; the East Bellevue Transportation Plan; the Eastside Transportation Program; the Newcastle Transportation Facility Plan; and the Pedestrian and Bicycle Transportation Facility Plan as set forth in Attachment D.

Section 6. Finding. The City Council finds that public notice was provided for all 2015 amendments to the Comprehensive Plan as required by LUC 20.35.400 for Process IV amendment to the text of the Comprehensive Plan.

Section 7. Finding. The City Council finds that the above-referenced amendments to the Comprehensive Plan satisfy the decision criteria established in Part 20.30(I) of the Land Use Code.

Section 8. Effective Date. This ordinance shall take effect and be in force five days after its passage and legal publication. This ordinance, Volume 1 and Volume 2 of the Comprehensive Plan, including their subcomponents, shall be available for public inspection in the office of the City Clerk.

Passed by the City Council this ____ day of _____, 2015, and signed in authentication of its passage this ____ day of _____, 2015.

(SEAL)

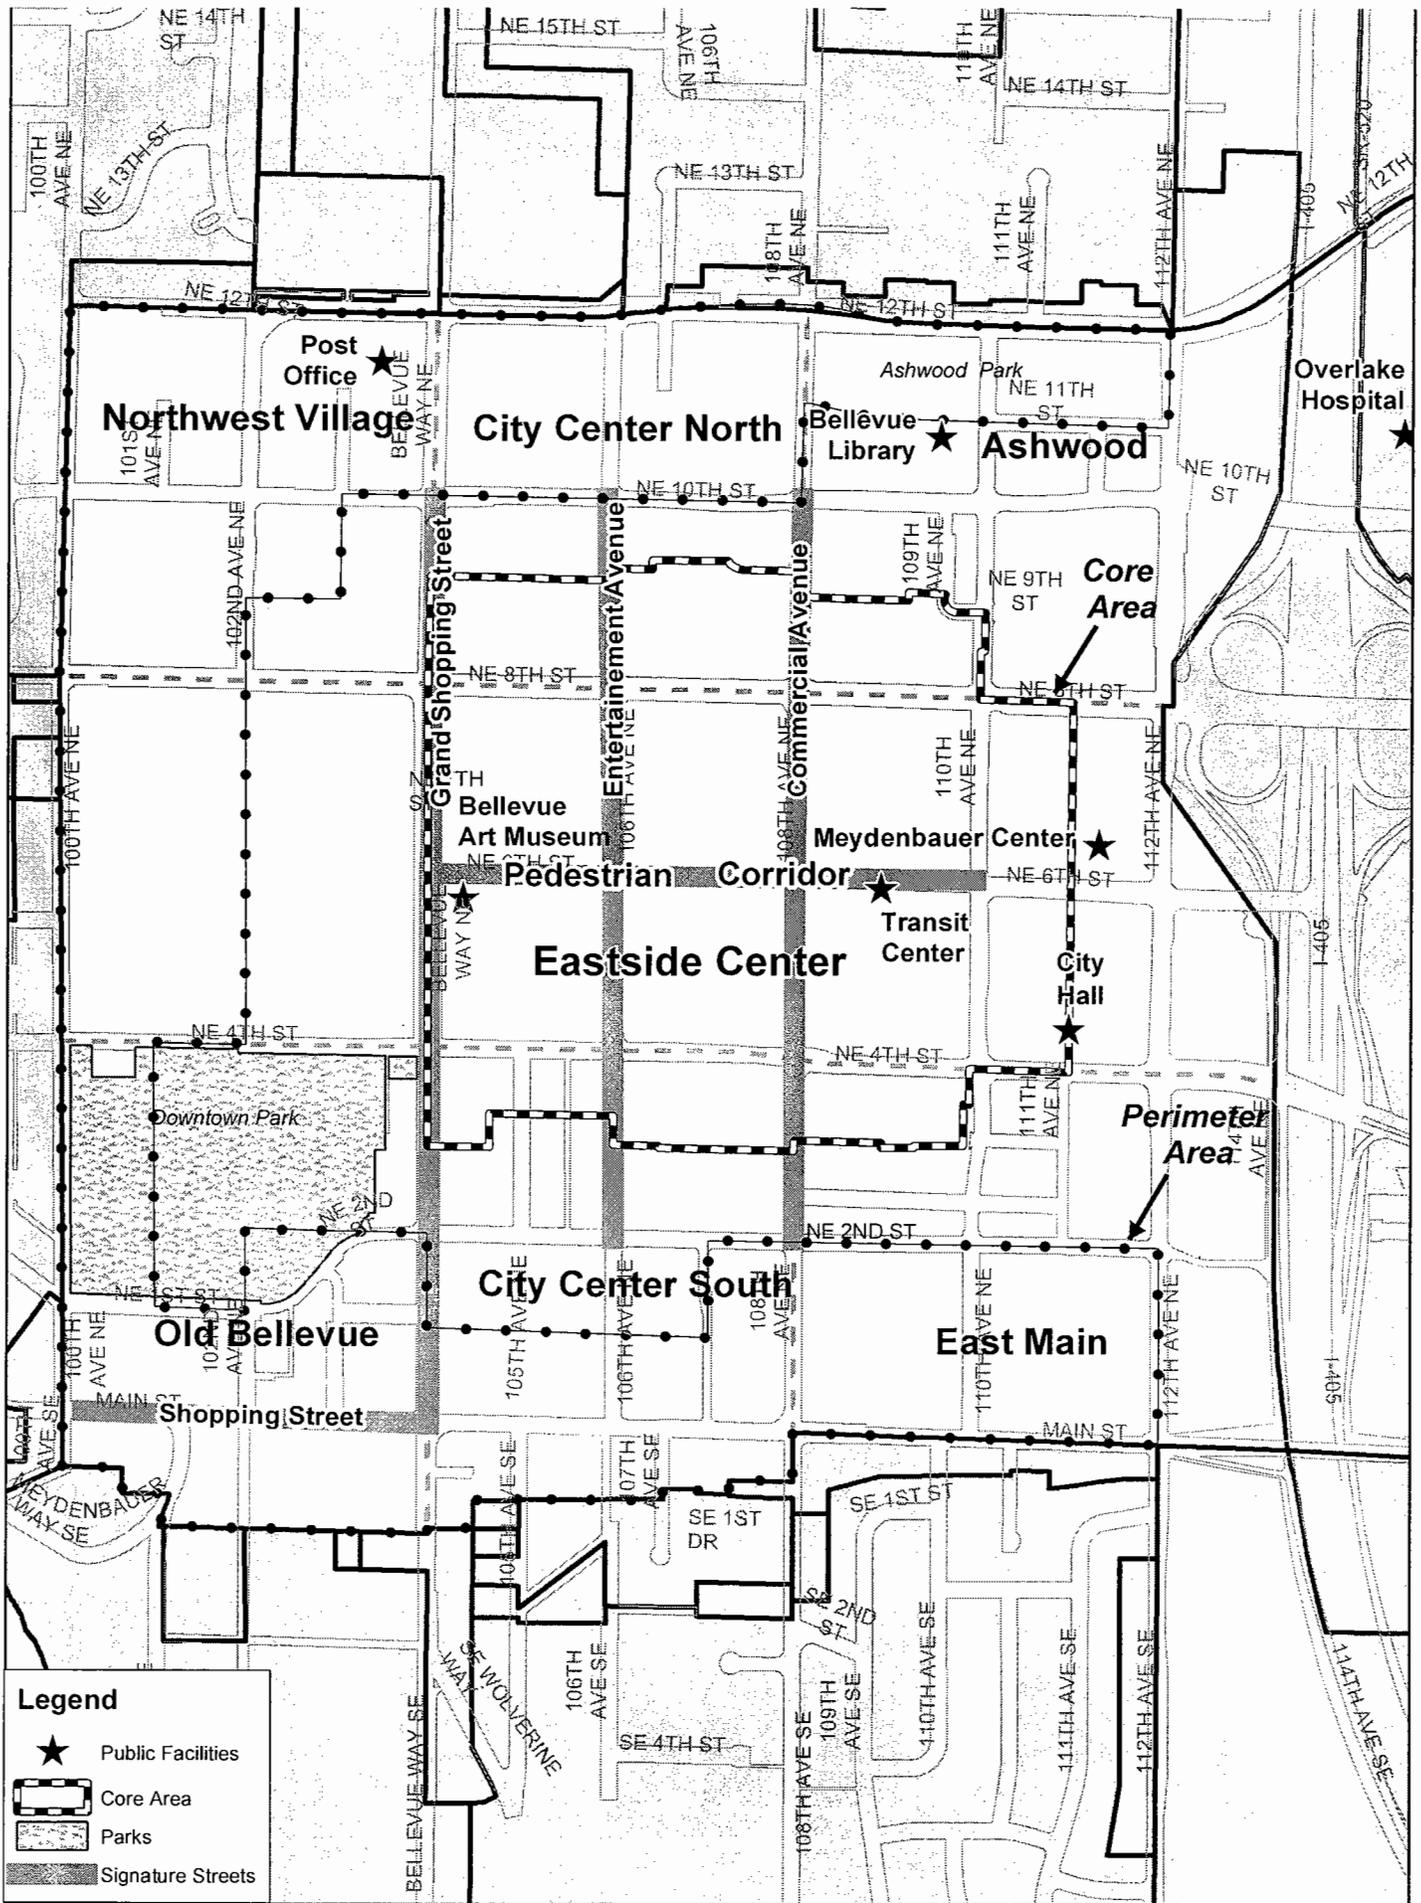

Claudia Balducci, Mayor

Approved as to form:
Lori M. Riordan, City Attorney

COMPREHENSIVE TRANSPORTATION PROJECT LIST

Adopted August 3, 2015.

Projects on this list guide the design of public investments and private-sector projects. These transportation projects span the entire city, as shown on the Map CTPL 1. Where there are several projects in close geographic proximity, separate maps provide more details, see Maps CTPL 2 and 3. For details on Downtown Bellevue projects, refer to the **Downtown Transportation Plan**. Projects related to “functional plans”, such as the **Pedestrian and Bicycle Transportation Plan** and the **Transit Master Plan** are located in those documents.

COMPREHENSIVE TRANSPORTATION PROJECT LIST →

Figure CTPL-2. Downtown and BelRed Projects

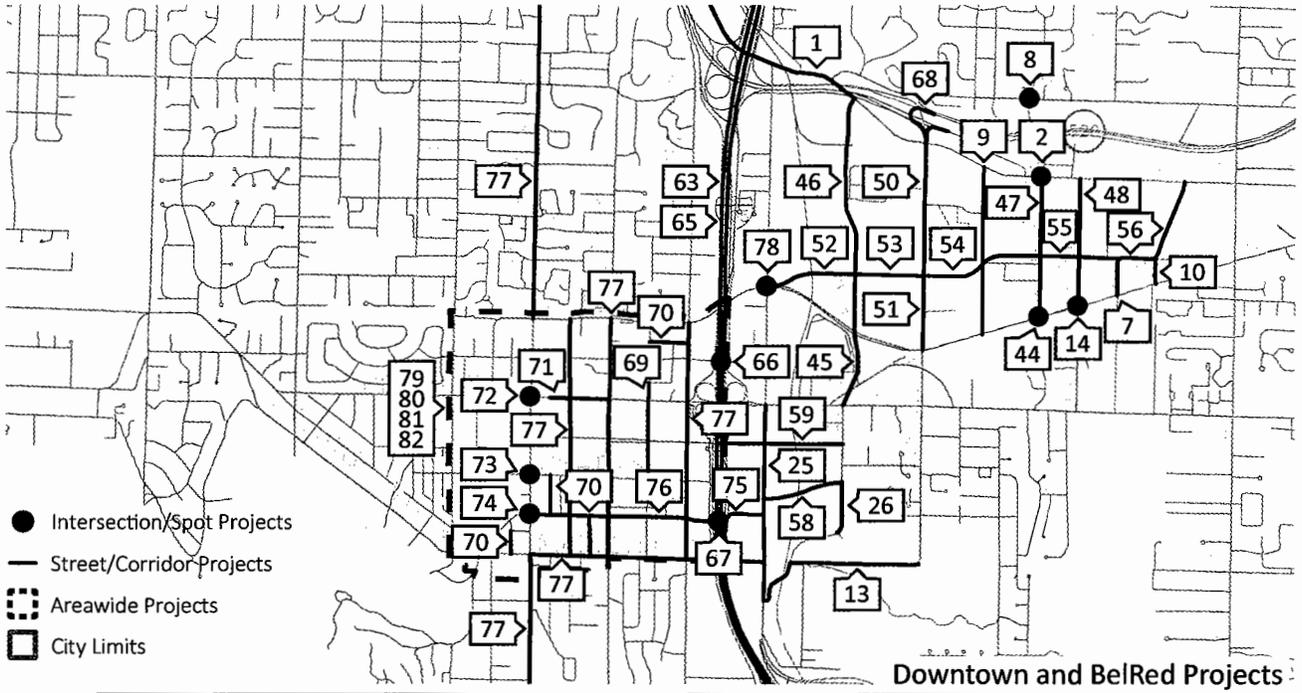

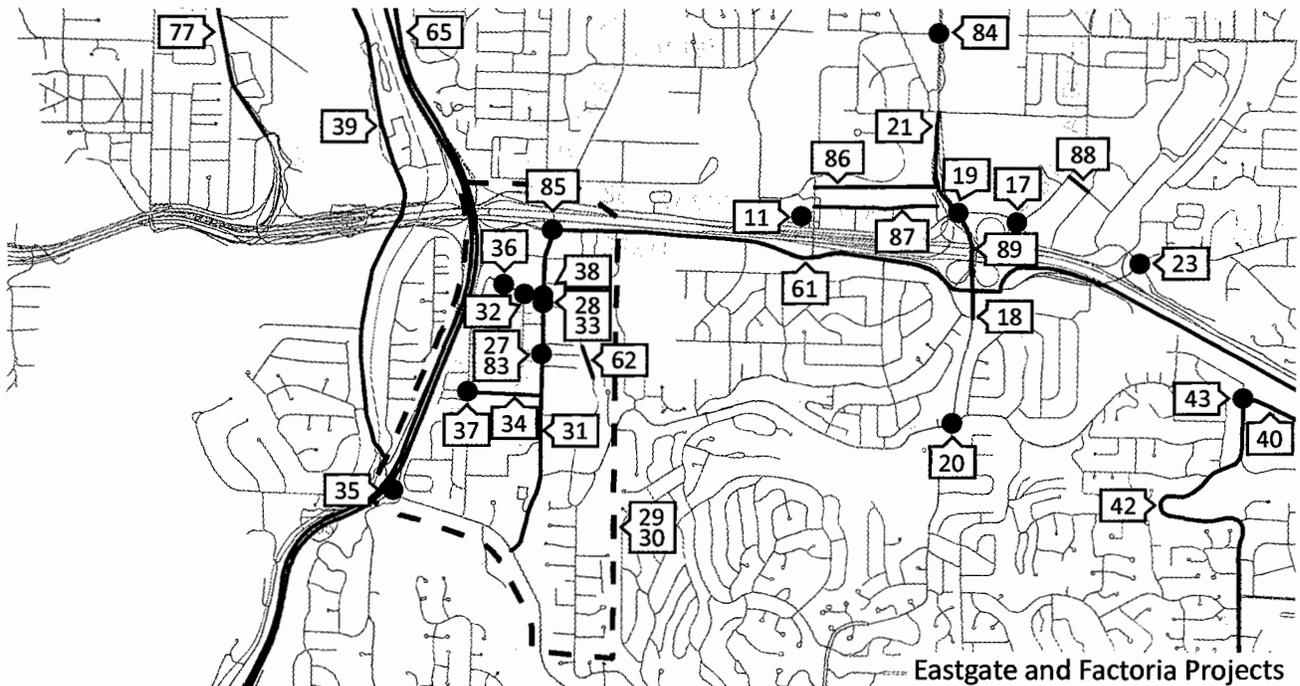

Figure CTPL-3. Eastgate and Factoria Projects

Comprehensive Transportation Project List
 Adopted August 3, 2015

Project No.	Description	Location	Limits	Associated CIP / TFP Projects
CTPL-81	Comprehensive network of on-street bicycle facilities and wayfinding plus short-term on-street bicycle parking. For both commuting and recreation, projects will support connectivity within Downtown and connections to neighborhoods and regional facilities such as the I-90 Trail, the SR 520 Trail and the future Eastside Rail Corridor Trail.	Downtown		PW-R-182, PW-R-182
CTPL-82	Implement transit passenger comfort amenities, information, and access to transit improvements at and around bus stops and light rail station areas throughout Downtown.	Downtown		PW-R-182, PW-R-182
CTPL-83	Lengthen the southbound to eastbound left turn lane and lengthen the westbound left turn lane at SE 40th and Factoria Blvd.	SE 40th Ln / Factoria Blvd SE		
CTPL-84	Replace aging wiring and poles at three signalized intersections along the 148th Avenue corridor, including SE 8th Street, Main Street, and NE 8th Street.	148th Ave NE/SE	SE 8th St, Main St, and NE 8th St	
CTPL-85	Redesign the Factoria Blvd and SE 36th St intersection to enhance pedestrian and bicycle crossings.	Factoria Blvd SE / SE 36th St		
CTPL-86	Establish a new east-west roadway on the south edge of the Bellevue College campus between 142nd Place SE/Snoqualmie River Road and 148th Avenue SE along the south campus boundary.	Coal Creek Rd	142nd Pl SE to 148th Ave SE	
CTPL-87	A new east-west pedestrian connection is formalized through the Lincoln Executive Center to the Eastgate Park-and-Ride.	SE 32nd St	Eastgate P&R Rd to 148th Ave SE	
CTPL-88	Improve east-west pedestrian and bicycle connectivity to retail services by creating a 6 to 10' wide trail connection that links SE 33rd Street to 156th Avenue SE.	SE 33rd St	156th Ave SE to 158th Ave SE	
CTPL-89	As a major north-south corridor and a gateway point for regional traffic on I-90, 148th Avenue SE/150th Avenue SE between SE 28th St and SE 38th St receives "boulevard" treatments including street trees, median plantings, special lighting, crosswalks, seating, special signs, landscaping, and public art.	148th Ave SE / 150th Ave SE	SE 28th St to SE 38th St	

Comprehensive Transportation Project List
 Adopted August 3, 2015

Project No.	Description	Location	Limits	Associated CIP / TFP Projects
CTPL-73	Provide dedicated southbound to westbound and westbound to northbound right turn lanes. Add new dual northbound to westbound left turn lanes on Bellevue Way. Require project proponent to prepare a multimodal analysis prior to implementation to evaluate the aggregate mobility benefits.	NE 4th St / Bellevue Way NE		TFP-222
CTPL-74	a) Add new westbound to southbound left-turn lane on NE 2nd St. b) Add new northbound to eastbound right turn lane on Bellevue Way. c) Add new southbound to eastbound dual left turn lanes on Bellevue Way. For each of these, require project proponent to prepare a multimodal analysis prior to implementation to evaluate the aggregate mobility benefits.	NE 2nd St / Bellevue Way NE		TFP-225
CTPL-75	Extend NE 2nd St from 112th Ave NE across I-405 to 116th Ave NE, including intersection improvements at 112th Ave NE and 116th Ave NE. Add new dual southbound to eastbound left turn lanes on 112th Ave at NE 2nd Street. The overpass is a component of the I-405 Master Plan (Project #108), the arterial projects are identified as "Beyond 2030" projects.	NE 2nd St	112th Ave NE to 116th Ave NE	TFP-197
CTPL-76	Widen this section from 3 or 4 to 5 lanes. This is a 2030 Baseline scenario project.	NE 2nd St	Bellevue Way NE to 112th Ave NE	TFP-190
CTPL-77	Conduct corridor studies and implement recommended multimodal improvements on the following streets: a) 108th Avenue NE between Main Street and NE 12th Street b) Main Street between Bellevue Way and 116th Avenue NE c) Bellevue Way between I-90 and Main Street d) Bellevue Way between NE 12th Street and SR 520 e) 112th Avenue between Main Street and NE 12th Street f) 106th Avenue NE between Main Street and NE 12th Street	106th Ave NE, 108th Ave NE, 112th Ave NE, Bellevue Way NE, Main St		TFP-230, TFP-234
CTPL-78	Conduct a needs assessment to determine whether a northbound to eastbound right-turn lane and eastbound to northbound dual left-turn lanes should be added at NE 12th St and 116th Ave NE.	NE 12th St / 116th Ave NE		
CTPL-79	Downtown crosswalks that incorporate "Standard", "Enhanced" or "Exceptional" components according to the Crosswalk Types map that are designed in context to accommodate pedestrians in a safe and comfortable manner	Downtown		PW-R-182
CTPL-80	Downtown mid-block crossings that are at-grade (grade-separated mid-block crossings would be built by others) to facilitate pedestrian crossings of wide arterials between signalized intersections.	Downtown		PW-R-182, PW-R-182

Comprehensive Transportation Project List
 Adopted August 3, 2015

Project No.	Description	Location	Limits	Associated CIP / TFP Projects
CTPL-64	Construct an HOV lane and one or more additional lanes (general purpose, HOV and/or HCT) in each direction to improve the person carrying capacity of the corridor with final designation of usage and number of lanes dependent on the results of the Growth Management Act, implementation of Transportation Demand Management legislation and analysis performed in the High Capacity Transit study. Refer to the I-405 Master Plan.	I-405	SE 8th St to I-90	
CTPL-65	Add two general purpose lanes on I-405 in each direction north of NE 10th St and south of NE 2nd St, with one additional lane in each direction between these streets. Refer to the I-405 Master Plan.	I-405		
CTPL-66	Add new I-405/SR-520 access at NE 10th St via collector-distributor lanes from and to the north. This project would likely be a regional or outside agency-led effort in which the City may choose to participate financially. Refer to the WSDOT I-405 Master Plan.	I-405 / NE 10th St		TFP-193
CTPL-67	Add new I-405 access at NE 2nd St via collector-distributor lanes from and to the south. This project would likely be a regional or outside agency-led effort in which the City may choose to participate financially. Refer to the WSDOT I-405 Master Plan.	I-405 / NE 2nd St		TFP-197
CTPL-68	Create a new full interchange at SR-520 near 124th Avenue NE.	SR-520 / 124th Ave NE		TFP-217
CTPL-69	Widen this section from three lanes to four or five lanes where not complete. Project is a component of the 2030 baseline scenario – final design subject to multimodal corridor analysis.	110th Ave NE	NE 4th St to NE 9th St	TFP-110
CTPL-70	Reconstruct the following sections to meet city design standards (sidewalks, lane width, etc.): a) 103rd Avenue NE between Main Street and NE 1st Street b) 105th Avenue NE between NE 2nd Street and NE 4th Street. c) 107th Avenue NE between Main Street and NE 2nd Street. d) NE 11th St between 110th Avenue NE and 112th Avenue NE.	103rd Ave NE, 105th Ave NE, 107th Ave NE, and NE 11th St		
CTPL-71	Add one westbound lane on NE 8th St between 105th Ave NE and 106th Ave NE (while preserving the large sequoia). 2030 Baseline scenario project.	NE 8th St	105th Ave NE and 108th Ave NE	TFP-219
CTPL-72	Add a new southbound to westbound right turn lane. Require project proponent to prepare a multimodal analysis prior to implementation to evaluate the aggregate mobility benefits.	NE 8th St / Bellevue Way NE		TFP-223

Comprehensive Transportation Project List
 Adopted August 3, 2015

Project No.	Description	Location	Limits	Associated CIP / TFP Projects
CTPL-59	<p>The project will extend the existing NE 6th St transit and carpool ramp, which is accessible to and from Interstate 405 in both directions, eastward from the middle of the freeway. The new road would extend above the northbound lanes of Interstate 405 and 116th Ave NE to a new intersection at 120th Ave NE.</p> <p>The facility will be designed to accommodate multiple uses, including HOV, frequent transit, general purpose, and a 14-ft wide non-motorized pathway along the south side of NE 6th St between 112th Ave NE and 120th Ave NE. The project will also include street lighting, landscaping, irrigation, storm drainage/detention.</p> <p>Conduct a needs assessment to determine whether westbound right turn lanes and double left-turn lanes should be added at 148th Ave NE and NE 8th St. The latter improvement would also include widening to the north, with new curb, gutter, and sidewalk.</p>	NE 6th St Multi-Modal Corridor	112th Ave NE to 120th Ave NE	PW-R-162, TFP-211
CTPL-60	<p>Part 1: The project will construct the Mountains to Sound Greenway Trail as a 10-foot-wide or greater width paved multi-use trail beginning at the current end of the I-90 Trail at Factoria Boulevard. The route extends eastward along the north side of SE 36th Street, follows a new independent alignment along the I-90 off-ramp to the 150th Avenue SE at SE 37th Street intersection, crosses 150th Avenue SE, and continues along the south side of SE 37th Street, just east of the entrance to the I-90 on-ramp (crosses SE 37th Street opposite Eastgate Plaza). The trail route then turns north and continues eastward adjacent to I-90 in the WSDOT right-of-way to Lakemont Boulevard. The design of the Mountains to Sound Greenway I-90 Trail links should, to the extent feasible, preserve existing and/or enhance adjacent on-street bicycle facilities, especially in locations where these are most useful to bicyclists. Revisions will be considered to the Factoria Boulevard/SE 36th Street intersection to enhance pedestrian and bicycle crossings, which is identified as priority bicycle corridor EW-4.</p> <p>Part 2: The project will install boulevard treatment on roadway segments adjacent to the Mountains to Sound Greenway Trail, with elements likely to include street trees, median plantings, special lighting, crosswalks, seating, special signs, landscaping, and public art. The project will coordinate with the City's Urban Boulevards program.</p>	NE 8th St / 148th Ave NE		
CTPL-61	<p>This project will connect the stub ends of 129th Place SE to provide a through north-south non-motorized connection between SE 38th Street and Newport Way. Project implementation will be coordinated with future private development in the immediate vicinity.</p>	Mountains to Sound Greenway Trail	Factoria Blvd to Lakemont Blvd	PW-W/B-78, TFP-243
CTPL-62	<p>Construct an HOV lane and one or more additional lanes (general purpose, HOV, and/or HCT) in each direction to improve the person carrying capacity of the corridor with final designation of usage and number of lanes dependent on the results of the Growth Management Act, implementation of Transportation Demand Management legislation and analysis performed in the High Capacity Transit study. Refer to the I-405 Master Plan.</p>	129th Ave SE	Newport Way to SE 38th St	TFP-103
CTPL-63		I-405	NE 8th St to NE 70th St

 Adopted August 3, 2015

Project No.	Description	Location	Limits	Associated CIP / TFP Projects
CTPL-56	<p>This project will construct roadway improvements, allowing for coordination and forward compatibility with Sound Transit who will be implementing the East Link project between the eastbound/northbound and westbound/southbound lanes NE Spring Boulevard and 136th Place NE. The project will interface with designs at 132nd and 134th Avenues NE, which will integrate traffic, pedestrian, and bicycle movements with the East Link crossings. The roadway cross-section outside of the LRT alignment includes one travel lane in each direction, on-street parking between 132nd Ave NE and 134th Ave NE, buffered bike lanes, curb, gutter, and sidewalk on each side, illumination, landscaping, irrigation, storm drainage, water quality treatment, and other underground utilities. The project will be designed to reflect Bel-Red urban design criteria, the 130th Avenue NE Light Rail Station Area Plan Report, and will also be coordinated with private development in the vicinity and the design of the 130th Avenue NE – Bel-Red Road to NE 20th Street, 134th Avenue NE – NE Spring Boulevard to NE 20th Street, and NE Spring Boulevard – 130th to 132nd Avenues NE projects. Future project implementation may occur in phases or include interim facilities dependent upon funding availability and coordination with other Sound Transit facilities, Bel-Red area capital investments or private developments.</p>	Spring Blvd and 136th Pl NE	132nd Ave NE to NE 20th St	PW-R-175, TFP-215
CTPL-57	<p>The project will ultimately provide a consistent 4-foot-wide shoulder on the east side, a 10.5-foot-wide northbound vehicle travel lane, a 10-foot-wide southbound vehicle travel lane, a 10-foot-wide multi-purpose trail (8 feet wide in approximately 2% of the corridor due to constricted space) on the west side separated by a 1.5-foot shy distance space and a 2-foot- or 5-foot-wide landscaped buffer where space is available; a signal at SE 34th Street, if warranted; and pedestrian crossings at SE 26th Street, Northup Way, NE 24th Street, and at five other locations along the parkway. The project will also make storm drainage, water quality, and fish passage improvements throughout the corridor.</p>	West Lake Sammamish Pkwy	North City Limits to SE 34th St	PW-R-183, TFP-078
CTPL-58	<p>This project will implement a new five lane arterial, with two travel lanes in each direction and a center turn lane where necessary, between 116th Avenue NE and 120th Avenue NE. The project will include bike lanes, curb, gutter and sidewalk on both sides, illumination, landscaping and irrigation, storm drainage and detention. The project will accommodate other utility infrastructure as needed. The final roadway alignment was determined in coordination with existing and potential future development and with the ownership interests of the Eastside Rail Corridor (ERC). The project has been designed not to preclude potential future uses of the ERC corridor. The project will include a new signalized intersection at NE 4th Street/120th Avenue NE and modifies the existing signalized intersection at NE 4th Street/116th Avenue NE. Implementation of the project will be closely coordinated with the complementary 120th Avenue NE improvements project. A neighborhood protection plan, to address potential traffic impacts along NE 5th Street to the east of 120th Avenue NE, may be developed in coordination with the neighborhood. The current project budget is intended to fully fund all phases of the project. The construction phase of the project will be completed in stages.</p>	NE 4th St	116th Ave NE to 120th Ave NE	PW-R-160, TFP-207

Comprehensive Transportation Project List
 Adopted August 3, 2015

Project No.	Description	Location	Limits	Associated CIP / TFP Projects
CTPL-53	This project will complete design and construct a new arterial street connection between 120th and 124th Avenues NE, including signalized intersections at 120th, 121st, 123rd, and 124th Avenues NE. The planned roadway cross-section will include two travel lanes in each direction with widened outside lanes for shared bicycle use, turn pockets or center medians, curb, gutter, and wide sidewalks on both sides, landscaping, irrigation, illumination, storm drainage, water quality treatment, and other underground utilities. An on-street parking and transit vehicle layover space will be provided along the north side of the roadway alignment. The project will be designed in coordination with the Sound Transit East Link light rail station in the vicinity of 120th Avenue NE.	Spring Blvd	120th Ave NE to 124th Ave NE	PW-R-173
CTPL-54	Multi-modal corridor incorporating east-west arterial capacity (2 through-lanes in each direction, potentially with an interim improvement limited to a single through-lane in each direction); light rail guideways and stations; urban sidewalks; a bicycle trail/pathway with regional trail connections; and "green" elements, including urban open spaces, tree canopy and landscaping features, and natural drainage features where practical.	Spring Blvd	124th Ave NE to 130th Ave NE	
CTPL-55	This project will complete the design and construct the westbound lane and other improvements on the north half of a new arterial roadway connection between 130th Avenue NE and 132nd Avenue NE. The project includes traffic signals at the 130th Avenue NE and 132nd Avenue NE that will integrate traffic, pedestrian, and bicycle movements with the Sound Transit East Link Light Rail Transit (LRT) project. The roadway cross-section will include a single travel lane outside the LRT alignment, sidewalk and bike lane, illumination, landscaping and irrigation, storm drainage and water quality treatment, and other underground utilities. The project will be designed and constructed in coordination with Sound Transit who will construct the 130th Avenue NE LRT station between the westbound and eastbound lanes and a park and ride facility to the north. The project will be designed to reflect Bel-Red urban design criteria and will also be coordinated with potential future private development in the vicinity, and designs for 130th Avenue NE – Bel-Red Road to NE 20th Street and NE Spring Boulevard – 132nd Avenue NE to NE 20th Street project. An eastbound lane and other roadway improvements to the south of the planned 130th Avenue NE LRT station will also be completed in the future. This may occur in phases in coordination with other Sound Transit facilities, Bel-Red area capital investments, and private developments.	Spring Blvd	130th Ave NE to 132nd Ave NE	PW-R-174, TFP-215

Comprehensive Transportation Project List
 Adopted August 3, 2015

Project No.	Description	Location	Limits	Associated CIP / TFP Projects
CTPL-50	This project will widen 124th Avenue NE from NE Spring Boulevard to Northup Way. The roadway cross-section will consist of five lanes, including two travel lanes in each direction with turn pockets or a center turn lane, install curb, gutter and sidewalk or multipurpose trail on both sides, planter strips, a bridge structure, retaining walls, illumination, landscaping, irrigation, storm drainage, water quality treatment, and install a new signal at NE 16th Street. The project will be designed and constructed in coordination with Sound Transit and the undercrossing of the East Link light rail line project in this vicinity and will reflect Bel-Red urban design criteria and to accommodate any necessary new and/or relocation of utility infrastructure. Implementation will be coordinated with private development in the vicinity and the development of 124th Ave NE Improvements – Main St to NE Spring Blvd and the NE Spring Blvd improvements to the west of the 124th Ave NE corridor.	124th Ave NE	Spring Blvd to Northup Way	PW-R-166, TFP-210
CTPL-51	This project will widen 124th Ave NE from NE 12th St (Bel-Red Rd) to NE Spring Blvd. The roadway cross-section of this segment consists of five lanes, including two travel lanes in each direction with turn pockets or a center turn lane; curb, gutter, and separated multi-use paths on both sides; and illumination, landscaping, irrigation, storm drainage and water quality treatment, intersection, and signal system improvements. The project will be designed and constructed to reflect Bel-Red urban design criteria and to accommodate any new and/or relocation of existing utility infrastructure and will be coordinated with the design and implementation of 124th Ave NE Improvements – NE Spring Blvd to NE 18th St. This project will also construct non-motorized improvements between NE 8th and NE 12th Streets. South of NE 8th St, the project has evaluated, designed, and will complete implementation of mitigation measures to protect residential communities south of NE 8th St from potential traffic impacts of Bel-Red growth and the associated major roadway projects in the vicinity. Future project implementation may occur in phases or include interim facilities dependent upon funding availability and coordination with other Bel-Red area capital investments or private developments.	124th Ave NE	NE 8th St to Spring Blvd	PW-R-169, TFP-213
CTPL-52	This project will complete the design and construct a new multi-modal arterial street connection between NE 12th Street/116th Avenue NE and 120th Avenue NE. NE 12th Street will be widened between 116th Avenue NE and the new street connection west of the Eastside Rail Corridor. The planned roadway cross-section for the new arterial street between NE 12th Street and 120th Avenue NE will include two travel lanes in each direction with turn pockets, along with new traffic signals at the NE 12th Street and at 120th Avenue NE intersections. This project will also incorporate other work elements including modifications to the existing NE 12th Street/116th Avenue NE intersection, a separated multi-purpose path along the north side and a sidewalk on the south side, landscaping and irrigation, illumination, storm drainage improvements and water quality treatment, and other underground utilities. The project will be designed and constructed in coordination with Sound Transit so that it may cross over the East Link light rail alignment and Eastside Rail Corridor. The project will be designed to reflect Bel-Red urban design criteria and will also be coordinated with private development in the vicinity and the development of NE Spring Boulevard - 120th to 124th Avenues NE and 120th Avenue NE Improvements – NE 12th Street to NE 16th Street.	Spring Blvd	116th Ave NE to 120th Ave NE	PW-R-172, TFP-209

Comprehensive Transportation Project List
 Adopted August 3, 2015

Project No.	Description	Location	Limits	Associated CIP / TFP Projects
CTPL-46	This project will extend the 120th Avenue NE widening from NE 12th Street to NE 16th Street. This corridor segment includes all intersection improvements at NE 12th Street and will be designed to accommodate future intersections at Spring Boulevard, NE 16th Street, and potential property access near the NE 14th Street alignment. The roadway cross-section will consist of five lanes, including two travel lanes in each direction with turn pockets or a center turn lane. The project will improve, or install where missing, bike lanes, curb, gutter and sidewalk on both sides, illumination, landscaping, irrigation, storm drainage, and water quality treatment. Between NE 14th and NE 16th Streets, the project will include a bridge structure and be designed and constructed in coordination with Sound Transit and the undercrossing of the East Link light rail line project in this vicinity. The project will be designed and constructed to reflect Bel-Red urban design criteria and to accommodate any necessary new and/or relocation of utility infrastructure. The project implementation will also be coordinated with private development in the vicinity and the development of 120th Ave NE Improvements – NE 8th to NE 12th Streets and the NE Spring Blvd improvements to the west and east of the 120th Ave NE corridor. Pre-design work on Stage 4 of the 120th Avenue NE corridor between NE 16th Street and Northrup Way conducted through 2014 has assumed the current roadway alignment and would widen the roadway and transition from a 5-lane section to a 4-lane section in proximity of NE 18th Street.	120th Ave NE	NE 12th St to Northrup Way	PW-R-168, TFP-241
CTPL-47	This project will redevelop 130th Avenue NE between Bel-Red Road and NE 20th Street. The segment north of the planned intersection with Spring Blvd will include a retail focused/pedestrian-oriented design with a two-lane cross-section, bike lanes, and on-street parking. The segment south of the Spring Blvd intersection will transition from the retail street design to the north to a three lane section. Along both segments, the project will design new or redeveloped curb, gutter and sidewalk on both sides of the street, future intersection improvements including turn lanes, potential mid-block crossings, illumination, landscaping, irrigation, storm drainage, water quality treatment, and other underground utilities. The project will be designed in coordination with the Sound Transit East Link light rail line project crossing 130th Avenue NE at the Spring Blvd alignment and the planned light rail station and park & ride facility between 130th and 132nd Avenues NE. The project will be designed to reflect Bel-Red urban design criteria and will also be coordinated with private development in the vicinity and the development of Spring Blvd - 130th to 132nd Avenues NE.	130th Ave NE	Bel-Red Rd to NE 20th St	TFP-218
CTPL-48	Widen 132nd Avenue NE to three lanes between Bel-Red Road and NE 20th Street. Modify traffic signals.	132nd Ave NE	Bel-Red Rd to NE 20th St	
CTPL-49	The project will widen the roadway to five lanes, including two travel lanes in each direction, with a center turn lane, and bicycle lanes. The funding allocation is a placeholder that may be used to support project pre-design or early implementation.	Bel-Red Rd	NE 20th St to NE 24th St	TFP-254

Comprehensive Transportation Project List
 Adopted August 3, 2015

Project No.	Description	Location	Limits	Associated CIP / TFP Projects
CTPL-40	Conduct a needs assessment to determine whether left-turn pockets should be constructed at key intersections along Newport Way SE between 164th Ave SE and Lakemont Blvd.	Newport Way SE	164th Ave SE to Lakemont Blvd extension	
CTPL-41	Provide a new traffic signal and turn lane on Forest Drive.	Lakemont Blvd / Forest Dr		
CTPL-42	Upgrade the existing two-lane road to higher standards; provide safety features; and provide left-turn pockets at key intersections including Newport Way.	164th Ave SE	Newport Way to Lakemont Blvd	
CTPL-43	Conduct a needs assessment to determine whether the south and east approach legs of 164th Ave SE and Newport Way should be channelized.	164th Ave / Newport Way		
CTPL-44	Conduct a needs assessment to determine whether a westbound-to-northbound right-turn lane and a second southbound-to-westbound right-turn lane should be added and signalization modified at Bel-Red Rd and 130th Ave NE.	130th Ave NE / Bel-Red Rd		TFP-218
CTPL-45	This project will extend, realign and widen 120th Ave NE from south of NE 8th St to south of NE 12th Street. The project includes all intersection and signal improvements at NE 8th St and a new signalized intersection at Lake Bellevue Drive/Old Bel-Red Road. The roadway cross-section will consist of five lanes, including two travel lanes in each direction with turn pockets or a center turn lane. The project will improve, or install where missing, bike lanes, curb, gutter and sidewalk on both sides, illumination, landscaping, irrigation, storm drainage, and water quality treatment. The project will be designed and constructed to reflect Wilburton/Bel-Red urban design criteria. The project includes new and/or relocation of utility infrastructure including a joint utility trench (JUT) to accommodate future underground utilities. The project will also be coordinated with private development in the vicinity and with development of the 120th Ave NE Improvements projects south of NE 8th St and from NE 12th Street to the north.	120th Ave NE	NE 8th St to NE 12th St	PW-R-164, TFP-208

Comprehensive Transportation Project List
 Adopted August 3, 2015

Project No.	Description	Location	Limits	Associated CIP / TTP Projects
CTPL-32	Consider relocating the existing mid-block crosswalk on SE 38th St west of Factoria Boulevard when Factoria Mall redevelopment changes the pedestrian and vehicular circulation pattern. This project's timing would be coincident with that of Mall redevelopment.	SE 38th St west of Factoria Blvd		
CTPL-33	Consider the feasibility and design of a grade-separated pedestrian crossing of Factoria Boulevard at SE 38th St. from the northeast corner to southwest corner of the intersection. This project could be developed in association with an enhanced transit facility at this location, and with private redevelopment on each side of the intersection where the skybridge would "land" on private property.	Factoria Blvd / SE 38th St		
CTPL-34	Provide a landscaped median where feasible to enhance the streetscape on SE 41st PI between Factoria Boulevard and 124th Ave SE. This project could be coordinated with future Mall expansion.	SE 41st PI	Factoria Blvd to 124th Ave SE	
CTPL-35	Conduct a study to determine whether adopted, projected 2030 vehicle level of service standards are anticipated to be met at the I-405 / Coal Creek Pkwy intersection. If these standards are not projected to be met, further study what types of improvements could be pursued to achieve this end.	Coal Creek Pkwy / I-405		
CTPL-36	Coordinate with private property owners to develop a primary access driveway from SE 38th St to Factoria Mall at time of redevelopment. Align this driveway with the major driveway (private road SE 37th St) on the north side of SE 38th St to create a 4-way intersection. Install traffic controls at this intersection if warrants are met. Provide pedestrian crosswalks at this intersection. The timing of this project is dependent on Factoria Mall redevelopment.	SE 38th St	At entrance to Factoria Mall	
CTPL-37	Install a new traffic signal at SE 124th Ave and 41st PI SE, if signal warrants are met.	124th Ave SE / 41st PI SE		
CTPL-38	Coordinate with King County Metro Transit and adjacent property owners to develop a "Factoria Station" transit center on Factoria Boulevard, near SE 38th St. In the short-term, the transit center could consist of enhanced service, rider information, and facilities. In the longer-term, a more substantial transit center may need to be designed and coordinated together with private redevelopment projects. To facilitate pedestrian crossings of Factoria Boulevard and SE 38th St, a grade-separated crossing (skybridge) may be considered in the long-term. A grade-separated pedestrian crossing would be integrated with adjacent private development.	Factoria Blvd / SE 38th St		
CTPL-39	Provide pedestrian/bicycle facilities while maintaining existing general purpose travel lanes. Conduct traffic analysis to assess the need for added turning lanes at selected intersections.	118th Ave SE	SE 8th St to Coal Creek Pkwy	

Comprehensive Transportation Project List
Adopted August 3, 2015

Project No.	Description	Location	Limits	Associated CIP / TFP Projects
CTPL-22	The Lakemont Blvd SE/West Lake Sammamish Pkwy SE Interchange Improvements identified in the WSDOT I-90 Bellevue to North Bend Corridor Study include the following project elements: (1) widen existing WLSP roundabout; (2) addition of a new roundabout at the westbound ramp terminal; and, (3) addition of a new EB slip ramp on the existing EB to NB WLSP off-ramp.	I-90 / Lakemont Blvd SE / West Lake Sammamish Pkwy SE		
CTPL-23	Conduct a warrant study to determine the need and potential benefit of a traffic signal in improving traffic flow at the intersection of Eastgate Way and SE 35th Pl.	Eastgate Way / SE 35th Pl.		
CTPL-24	Improve 160th Avenue NE with landscaping, street trees and street edge enhancements that extend the character of the Crossroads Park. The connection at 156th Avenue NE should include landscaping and design features that act as a park "gateway." 160th Avenue NE is an easement on private property used by Crossroads Park. To facilitate improvements to 160th Avenue, it may be appropriate for the city to acquire the right of way for 160th Avenue NE from NE 8th Street to Crossroads Park.	160th Ave NE	North of NE 8th St to Crossroads Park	
CTPL-25	Improve the 116th Avenue NE streetscape, including select median landscaping areas.	116th Ave NE	NE 8th St to SE 1st St	
CTPL-26	Improve the 120th Ave NE streetscape, including select median landscaping areas, between NE 4th St to NE 1st St.	120th Ave	NE 1st St to NE 4th St	
CTPL-27	Improve the pedestrian crossing of Factoria Boulevard at SE 40th Lane, considering options such as: installing special paving types or markings, and providing longer pedestrian signal phases or priority or an eastbound left-turn only signal phase.	Factoria Blvd / SE 40th Ln		
CTPL-28	Improve the at-grade pedestrian crossing of the Factoria Boulevard at SE 38th St intersection considering options such as: installing special paving types or markings, or providing longer pedestrian phases.	Factoria Blvd / SE 38th St		
CTPL-29	Improve wayfinding signage for pedestrians throughout the Factoria area. This project may be implemented by the city on public right-of-way, or by private property owners.	Factoria		
CTPL-30	Consider installing vehicle stop lines in advance of crosswalks and driveway access points where vehicle encroachment is documented and consistent.	Factoria		
CTPL-31	Provide pedestrian-scale lighting fixtures above Factoria Boulevard sidewalks.	Factoria Blvd		

Comprehensive Transportation Project List
 Adopted August 3, 2015

Project No.	Description	Location	Limits	Associated CIP / TFP Projects
CTPL-15	The project will add 5-foot-wide bicycle lanes outside of 11-foot-wide vehicle lanes on both sides of SE 16th Street. The project will construct new curb, gutter, and 6-foot-wide sidewalk and 4-foot-wide planter on the north side between 148th Avenue NE and 154th Avenue NE. This is a component of priority bicycle corridor EW-3: Lake to Lake Trail.	SE 16th St	148th Ave SE to 156th Ave SE	TFP-158
CTPL-16	Conduct a needs assessment to determine whether a westbound right turn lane should be added at 148th Ave / Main St.	Main St / 148th Ave		
CTPL-17	Redesign 156th Ave SE and SE Eastgate Way intersection to enhance traffic flow, upgrade pedestrian and bicycle crossings, and establish a gateway treatment, potentially to include developing a modern roundabout.	156th Ave SE / SE Eastgate Way		
CTPL-18	This project will evaluate and determine a preferred intersection improvement option. Options may include: Option A: Add second EB right turn lane, add second WB left turn lane, add EB through lane past I-90 eastbound on-ramp, extend SB left-turn pocket, and extend 3rd SB lane from I-90 on-ramp to SE 38th St. Option B: Construct multi-lane roundabout. Option C: Construct roundabout per Option B plus construct multilane roundabout at 150th Ave SE/SE 38th St and landscaped median between SE 38th St and SE 37th St. The project will also evaluate upgraded ped and bike crossings and gateway treatments.	150th Ave SE	SE 37th St to I-90 off-ramp	TFP-195
CTPL-19	This project will evaluate and determine a preferred intersection improvement option. Options may include: Option A: Add second NB left turn lane, add second EB right-turn lane, add second WB through lane past 148th Ave SE. Add E-W bike lanes through intersection. Option B: Construct multilane roundabout. The project will also evaluate/accommodate upgraded ped and bike crossings, planned Eastgate Way bike lanes, and gateway treatments.	Eastgate Way / 148th Ave SE		TFP-253
CTPL-20	This project will conduct a design alternatives analysis in coordination with the community, complete design, and includes a placeholder for construction of the identified roadway and non-motorized improvements to SE Newport Way between Somerset Boulevard and 150th Avenue SE. Specific improvements may include sidewalks on at least one side, pedestrian crossing facilities, bike lanes on both sides, turn lanes where necessary, and other potential roadway amenities including illumination, landscaping, irrigation, storm drainage and water quality treatments.	Newport Way	Somerset Ave SE to 150th Ave SE	TFP-255
CTPL-21	Provide a third southbound lane along 148th Avenue SE from the ramp to westbound I-90 north of Eastgate Way south over the 150th Avenue SE overpass to SE 38th St. The ramp from eastbound I-90 immediately south of Eastgate Way would merge with the third southbound lane as the overpass of I-90 already has three lanes. TFP Project 253 (CTPL-26) has identified alternatives for intersection improvements at 148th Ave SE and Eastgate Way, and TFP Project 195 (CTPL-25) has identified alternatives for intersection improvements at 150th Ave SE at SE 36th St and SE 38th St. This project should be studied in the context of those intersection improvements.	148th Ave SE	I-90 WB on-ramp to SE 38th St	

Comprehensive Transportation Project List
 Adopted August 3, 2015

Project No.	Description	Location	Limits	Associated CIP / TFP Projects
CTPL-6	Conduct a needs assessment to determine whether a median left-turn lane should be added on Northrup Way between 156th Ave NE and 164th Ave NE where not complete.	Northrup Way	156th Ave NE to 164th Ave NE	
CTPL-7	Reconstruct as three lanes; modify signalization.	134th Ave NE	Bel-Red Rd to Spring Blvd	
CTPL-8	Conduct a needs assessment to determine whether left-turn pockets should be added on all legs of 130th Ave NE / NE 24th St except the north leg. Also monitor for potential future signalization.	130th Ave NE / NE 24th St		
CTPL-9	Coordinate with private development to construct a new street that meets urban standards with two general purpose lanes, two parking lanes, gutters, and sidewalks, consistent with design guidelines established in the Bel-Red Corridor Plan.	127th Ave NE	Bel-Red Rd to Northrup Way	
CTPL-10	Coordinate with private development to construct new three-lane road; signalize.	136th Ave NE	Bel-Red Rd to Spring Blvd	
CTPL-11	Create a high capacity transit (HCT) station facility at the Eastgate Park & Ride.	Eastgate Park-and-Ride		
CTPL-12	Upgrade to urban standards (2/3 lanes) with curbs, gutters, and sidewalks where not complete. Provide intersection left turn lanes or two-way left turn lanes at selected locations	NE 24th St	164th Ave NE to 172nd Ave NE	
CTPL-13	Upgrade to urban standards (2/3 lanes) with curbs, gutters, bicycle facilities, and sidewalks. Provide intersection left turn lanes or two-way left turn lanes as required at selected locations.	Main St and SE 1st St	116th Ave NE to 124th Ave NE	
CTPL-14	Conduct a needs assessment to determine whether northbound and southbound right turn lanes should be added at 132nd Ave NE / Bel-Red Rd.	132nd Ave NE / Bel-Red Rd		

Comprehensive Transportation Project List
 Adopted August 3, 2015

Project No.	Description	Location	Limits	Associated CIP / TFP Projects
CTPL-1	This project will design and construct bike lane and sidewalk improvements on both sides of Northup Way between NE 24th Street and NE 33rd Place. This project will also incorporate other work elements including a pedestrian bridge at the Eastside Rail Corridor crossing, retaining walls, storm drainage improvements and water quality treatment, landscaping and irrigation, traffic signal and street light modifications, and two mid-block pedestrian crossings.	Northup Way	NE 24th St to NE 33rd Pl	PW-R-146, TFP-079
CTPL-2	Conduct a needs assessment to determine whether southbound right turn and westbound right turn lanes should be added at 130th Ave NE / NE 20th St.	130th Ave NE / NE 20th St		
CTPL-3	Conduct a needs assessment to determine whether eastbound and westbound through lanes and a second northbound left turn lane should be added at 156th Ave NE / NE 20th St and signalization modified. Also assess whether the eastbound through lane should be extended 800 feet (plus transition) east of 156th Avenue NE.	156th Ave NE / NE 20th St	From intersection to east of 156th Ave NE	
CTPL-4	The project will evaluate and refine improvements to the 148th Avenue NE Master Plan. Potential improvements include the following: 1) a third northbound through lane on 148th Avenue NE from 350 feet south of Bel-Red Road to the SR 520 eastbound on-ramp, 2) a northbound right-turn lane, and eastbound and westbound dual left-turn lanes at 148th Avenue NE and Bel-Red Road, 3) eastbound and westbound dual left-turn lanes at NE 20th Street and 148th Avenue NE, 4) extend the northbound and westbound right-turn lanes at NE 24th Street and 148th Avenue, 5) eastbound and westbound dual left-turn lanes at NE 24th Street and 148th Avenue NE, 6) configure the northbound 3-lane approach on 148th Avenue NE at the SR 520 eastbound on-ramp to right turn only, through/optional HOV right turn, and through only, and 7) convert and extend southbound right-turn lane on 148th Ave NE between NE 24th and NE 20th into a BAT lane. Improvements at NE 24th Street will accommodate or implement a wide-lane east-west bicycle facility. The project may be phased with the initial phase focusing on the north end of the 148th Avenue NE corridor. Scope and cost may be modified based future analysis and coordination with the City of Redmond associated with the 148th Avenue NE Master Plan. Funding allocation will support work in coordination with Redmond to identify project phasing and conduct predesign work.	148th Ave NE	At Bel-Red Rd, NE 20th St, and NE 24th St	TFP-250
CTPL-5	Coordinate with private development to construct a southbound right turn lane at 156th Ave NE and Bel-Red Rd.	156th Ave NE / Bel-Red Rd		

CITY OF BELLEVUE, WASHINGTON

ORDINANCE NO. _____

AN ORDINANCE adopting amendments to the Comprehensive Plan of the City of Bellevue and part of the Eastgate/I-90 Land Use and Transportation Project, pursuant to Chapter 36.70A RCW (Growth Management Act, as amended) and Chapter 35A.63 RCW; amending the text, policies, and maps of Eastgate, Factoria, and Richards Valley subarea plans; and establishing an effective date.

WHEREAS, the City has undertaken a review and revision of the Comprehensive Plan as per Chapter 36.70A.130 (4) RCW, known as the Comprehensive Plan Major Update; and

WHEREAS, the Growth Management Act authorizes the City to, among other things, amend the Comprehensive Plan on no more than an annual basis as per Chapter 36.70A.130 (2) (a) RCW; and

WHEREAS, on October 25, 2010, the City Council initiated the Eastgate/I-90 Land Use and Transportation Project, for the purposes of developing and evaluating land use concepts to enhance the vitality of the I-90 corridor and identifying and evaluating appropriate multi-modal transportation measures to support those concepts; and

WHEREAS, the City has engaged in a multi-year planning process for the Eastgate/I-90 area that has included the work of the Eastgate Citizen Advisory Committee and the Planning Commission. This work resulted in updates to the Eastgate, Factoria, and Richards Valley subarea plans in volume 2 of the Comprehensive Plan; and

WHEREAS, the vision for the Eastgate/I-90 corridor is a thriving multi-use employment area and welcoming gateway into Bellevue that is walkable, bikable, and with a variety of retail uses to support and serve the nearby office and residential uses; a corridor that reflects the natural character of the Mountains to Sound Greenway; and of a transit-oriented development area that provides a focal point for corridor activity; and

WHEREAS, the Planning Commission held public meetings and a public hearing pursuant to legally-required notice on the proposed amendment to the Comprehensive Plan and has recommended approval to the City Council; and

WHEREAS, the City Council has considered and discussed the proposed amendment to the Comprehensive Plan; and

WHEREAS, the City of Bellevue has complied with the requirements of the State Environmental Policy Act (Chapter 43.21C RCW) and the City Environmental Procedures Code (Chapter 22.02 BCC); and

WHEREAS, the City Council desires to amend the Comprehensive Plan consistent with the foregoing; now, therefore,

THE CITY COUNCIL OF THE CITY OF BELLEVUE, WASHINGTON, DOES HEREBY ORDAIN AS FOLLOWS:

Section 1. The Factoria Subarea Plan included as Attachment A to this ordinance and amending or adding text and policies to support multi-modal transportation, a mix of uses, the Mountains to Sound Greenway trail, and coherent corridor design consistent with the vision of the Eastgate Citizen Advisory Committee is hereby adopted.

Section 2. The Richards Valley Subarea Plan included as Attachment B to this ordinance and amending or adding text and policies to support transportation improvements and cohesive corridor design consistent with the vision of the Eastgate Citizen Advisory Committee is hereby adopted.

Section 3. The Eastgate Subarea Plan included as Attachment C to this ordinance and adding or amending text and policies to support multi-modal transportation, a mix of uses, a transit-oriented development area, environmental protection, cohesive corridor design, an integrated system of parks and open space, and coordination and partnership to implement the subarea plan consistent with the vision of the Eastgate Citizen Advisory Committee is hereby adopted.

Section 4. The Factoria Subarea map included as Attachment D to this ordinance and changing the designation of the property in the vicinity of the 3600 and 3700 blocks of Factoria Boulevard SE from General Commercial (GC) to Office Limited Business (OLB) is hereby adopted.

Section 5. The Richards Valley Subarea map included as Attachment E to this ordinance and changing the designation of the property at 13620 SE Eastgate Way from Light Industrial (LI) to Office Limited Business (OLB) is hereby adopted.

Section 6. The Eastgate Subarea map included as Attachment F to this ordinance and including the following amendments is hereby adopted:

- a) changing the designation of the property in the vicinity of 14634 through 14725 SE 36th Street from Single-Family Medium (SF-M) to Office (O);

- b) changing the designation of the unaddressed property in the vicinity east of 14725 SE 36th Street from Neighborhood Business (NB) to Neighborhood Mixed Use (NMU);
- c) changing the designation of the property in the vicinity of the 3700 block of 150th Avenue SE and the vicinity of the 15100 through 15300 blocks of SE 37th Street from Community Business (CB) to Neighborhood Mixed Use (NMU);
- d) changing the designation of the property in the vicinity of the 15300 through 15500 blocks of SE 37th Street from General Commercial (GC) to Neighborhood Mixed Use (NMU);
- e) changing the designation of the property at 3626 156th Avenue SE from General Commercial (GC) to Office Limited Business (OLB);
- f) changing the designation of the property at 3350 161st Avenue SE from Office (O) to Office Limited Business (OLB) is hereby adopted;
- g) changing the designation of the property in the vicinity of the 3200 and 3300 blocks of 148th Avenue SE and the 14600 and 14700 blocks of SE Eastgate Way from Office Limited Business (OLB) to Community Business (CB);
- h) changing the designation of the property in the vicinity of the 3300 block of 146th Place SE and the 14300 and 14400 blocks of SE Eastgate Way from Office Limited Business (OLB) to Eastgate Transit-Oriented Development (EG-TOD);
- i) changing the designation of the property at 3002 139th Avenue SE from Office Limited Business (OLB) to Eastgate Transit-Oriented Development (EG-TOD) or Office Limited Business (OLB);
- j) changing the designation of the property in the vicinity of the 3200 and 3300 blocks of 146th Place SE from Light Industrial (LI) to Eastgate Transit-Oriented Development (EG-TOD);
- k) changing the designation of the property at 2659 148th Avenue SE from Professional Office (PO) to Community Business (CB);
- l) changing the designation of the property at 2649 Landerholm Circle SE Neighborhood Business (NB) to Community Business (CB).

Section 7. The City Council finds that public notice was provided for all 2015 amendments to the Comprehensive Plan as required by LUC 20.35.400 for Process IV amendments to the text of the Land Use Code and Comprehensive Plan.

Section 8. The City Council finds that the Eastgate/I-90 amendments to the Comprehensive Plan satisfy the decision criteria contained in the Land Use Code (Part 20.30I).

Section 9. This ordinance shall take effect and be in force five days after its passage and legal publication. This ordinance and the Comprehensive Plan shall be available for public inspection in the office of the City Clerk.

Passed by the City Council this ____ day of _____, 2015, and signed in authentication of its passage this ____ day of _____, 2015.

Factoria Subarea Plan

Goals:

1. To preserve and maintain a natural setting for our residential areas and to manage change in the commercial district to improve its cohesiveness, compatibility, and accessibility to Subarea residents.
2. To create a well-integrated, transit-supportive, pedestrian-oriented, mixed-use urban neighborhood in Factoria's commercial core (District 2).

Overview

Factoria is known for its residential neighborhoods, easy access to the freeways, and shopping at Factoria businesses. Current issues center around the redevelopment of the commercial district while protecting residential neighborhoods, addressing mobility, and improving pedestrian links between commercial and residential areas.

Even before its 1993 annexation, the city worked with Factoria residents and businesses to strengthen the community's transportation vision. Since then, a series of transportation studies and updates have embraced the integration of transportation and urban design to enhance the quality of life in this vital activity center.

This Subarea Plan recognizes that the latest study—the 2005 Factoria Area Transportation Study (FATS) Update sought to update the Subarea policy framework and list of associated transportation facility projects so as to achieve long-term mobility and safety for transportation system users. This approach challenges the existing suburban land use pattern because, while Factoria has a mix of land uses – housing, offices, retail and services – they are disconnected.

In 2012, the Eastgate/I-90 Land Use & Transportation Project (Eastgate/I-90 project) was completed. The study area boundaries of that project, which establishes a long-range vision for the I-90 corridor, includes portions of three subareas: Eastgate, Richards Valley, and Factoria. The Eastgate/I-90 project, in part, identified strategies to build upon the Factoria vision and address transportation chokepoints. The Eastgate/I-90 project is more fully discussed in the Eastgate Subarea plan.

This Subarea Plan also provides a framework for the 2002 Land Use Code amendments that direct redevelopment of the Factoria Mall so that it can accommodate a new, mixed-use focus. The FATS Update provided the necessary determination of transportation system adequacy to accommodate the Mall's expansion. For all of District 2 redevelopment, the Update also addresses the needs of all modes of transportation within the Subarea and provides design guidance for private sector redevelopment. This Subarea Plan also provides a framework for Land Use Code amendments that will implement the vision of the Eastgate/I-90 project. That vision includes increasing the mix of uses in north Factoria, emphasizing transit focus and an enhanced pedestrian environment along Factoria Boulevard, and including public amenities with new development.

Redevelopment in Factoria will use the Eastgate/I-90 project and the FATS Update transportation and urban design strategies adapted into the Subarea Plan and in the East Bellevue Transportation Facilities Plan to create a well-integrated, transit-supportive, pedestrian-oriented, mixed-use urban neighborhood.

History

It is believed that Factoria was once part of the Duwamish Tribal Territory. Evidence of a village/habitation site exists at a location near Mercer Slough. The earliest English-speaking inhabitants of this area prior to 1900 occupied themselves with mining, logging, and farming. Edwin Richardson discovered coal in Newcastle in 1863 and prospectors formed the Lake Washington Coal Company which eventually became the Seattle Coal and Transportation Company.

During the 1890s, loggers cut large stands of timber on land now known as Woodridge Hill, Richards Valley, Greenwich Crest, Mockingbird Hill, Monthaven, Newport Shores, and the commercial area of Factoria. Somerset Hill forests remained intact for several decades. Logging continued to be important into the 1920s.

Apparently, around the turn of the 20th century, the area known as Mercer Landing was proposed as a port serving railroad and manufacturing plants.

This area, destined to become the town of Factoria, was promoted as an industrial center with coal smoke “belching from hundreds of smokestacks.” Promoters expected at least 20 plants, in addition to the existing Factoria Stove and Range Co., to locate there. But some 15 years after the promoter’s pitch, only the Factoria School had been built and the proposed industrial town of Factoria never got off the ground. The present day Factoria Mall is located on the original Factoria property.

Land use patterns evolved from early timberland, logging, and farming between the 1920s and 1950s to the current residential and commercial development.

Much of the area was planned and developed under the jurisdiction of King County.

Newport Shores and Somerset annexed into Bellevue during the 1960s and 1970s. The Factoria commercial area annexed in 1993.

Factoria is an area of about 2,100 acres bounded by I-90 on the north and Lake Washington on the west. The southern boundary forms an oblong crescent around Newport Hills. The Subarea contains just over 3,400 single-family dwelling units and about 1,300 multifamily units. There are 11 million square feet of commercial space, including offices employing over 7,500 people, making Factoria a busy urban area.

In District 1, (1,800 acres) there are about 71 acres of vacant land all of which is planned as single family use. Approximately 40 acres are classified as protected wetlands, as defined by the Bellevue Land Use Code (Section 20.50.044). In District 2 (282 acres), 6.7 acres remain vacant. Of those, 1.5 acres are planned for multifamily use, and 5.2 acres for office use.

The policies in the Factoria Subarea Plan guide the continued development and redevelopment of the Subarea. The Plan includes a section of design policies for the commercial area.

General Land Use

Policies

POLICY S-FA-1. Maintain land uses as depicted on the Land Use Plan.

POLICY S-FA-2. Protect single family neighborhoods from encroachment by more intense uses.

POLICY S-FA-3. Maintain land use densities that will not create vehicular congestion that exceeds adopted level of service standards.

POLICY S-FA-4. Encourage infill development and redevelopment in a manner that is compatible with surrounding uses and meets adopted design guidelines.

POLICY S-FA-5. Encourage any redevelopment to include parks, landscaping, and pedestrian access, and other pedestrian amenities.

POLICY S-FA-6. Retain the single-family land use designation on all school property.

POLICY S-FA-7. Restrict all future office expansion to districts shown on the Land Use Plan (Figure S-FA.1).

Critical Areas

In Factoria, as elsewhere, the city recognizes the importance of preserving the natural environment for wildlife habitat, stormwater management, as well as the aesthetic value to the community.

Controlling storm water runoff will help to prevent additional erosion of stream beds, downstream flooding and siltation. Specific areas of concern include the west side of Monthaven, Sunset Ravine, Mercer Slough, the Coal Creek watershed, and the siltation zone at its mouth.

Policies

POLICY S-FA-8. Protect and enhance the capability of Sunset Creek, Richards Creek, Coal Creek, and their tributaries to support fisheries and water related wildlife.

POLICY S-FA-9. Retain and enhance vegetation on steep slopes, within wetland areas, and along stream corridors in order to control erosion, reduce landslide hazard and to protect the natural drainage system.

POLICY S-FA-10. Encourage the use of a variety of site development options to conserve the natural land features in wetlands or steep slopes.

Residential

Goal:

To increase housing opportunities in Factoria commercial areas.

Policies

The Community Business zoning along the east side of Factoria Boulevard allows for housing to be developed over ground-floor commercial uses. This represents an opportunity to increase the supply of housing without encroaching on existing residential areas. Both the Eastgate/I-90 project and the The FATS Update recommends mixing housing and commercial uses. Mixing these uses in the same building is a method to help reduce vehicle use.

POLICY S-FA-11. Encourage mixed-use residential, hotel use, and other commercial development within community level retail districts.

Parks, Recreation, and Open Space

Goal:

To encourage development of parks and open space linkages by using acquisition and dedication of existing public rights-of-way as shown on the Pedestrian and Bicycle Transportation Plan maps and the Parks and Open Space System Plan.

Policies

POLICY S-FA-12. Continue to acquire and develop parks, community facilities, and trail systems.

Transportation

Goals:

- 1. To enhance multi-modal mobility for Factoria residents, employees, and shoppers and for those traveling within and through the Factoria commercial area.**
- 2. To maintain and improve the appearance of arterial streets in the Subarea.**

Policies

General Transportation

Transportation planning was conducted in 1992 for the unincorporated Factoria area as part of the East Bellevue Transportation Study. After the area annexed to Bellevue in 1993, the City initiated a detailed study of the transportation infrastructure. The 1996 Factoria Area Transportation Study (FATS) report addressed existing conditions and deficiencies and

Factoria Subarea Plan

recommended projects to accommodate travel demand. A FATS Update, completed in 2005, addressed the needs of all modes of transportation within the area, and provided design guidance for private sector redevelopment. The FATS Update analysis was augmented by transportation analysis done in support of the 2012 Eastgate/I-90 Land Use and Transportation Plan.

Traffic modeling conducted for both the FATS Update and the Eastgate/I-90 project used a horizon year of 2030. Both sets of analysis traffic modeling for 2030 shows that most Factoria intersections will continue to function within adopted level of service standards. A few transportation system projects would help maintain long-term mobility, including enhancing transit service and improving intersection operations at Coal Creek Parkway/I-405, Factoria Boulevard/I-90, SE 36th Street/Factoria Boulevard, and SE 38th Street/Factoria Boulevard.

For the Factoria Subarea, the adopted vehicle level of service (LOS) is E+ (LOS E+ is characterized in the Comprehensive Plan as: Near capacity. Notable delays. Low driver comfort. Difficulty of signal progression.) In the absence of transit service improvements, two intersections are projected to fall below the adopted LOS – Coal Creek Parkway at I-405, and Factoria Boulevard at I-90.

Aside from accommodating traffic, Factoria’s arterials should be maintained with litter pickup, plant pruning, and street repairs. In addition, street improvements such as street trees, sidewalks, and other pedestrian amenities should be used to improve the arterial’s appearance.

POLICY S-FA-13. Plan for the long-range transportation facility needs in the Factoria Subarea through an integrated, multi-modal transportation system.

POLICY S-FA-14. Implement the transportation and urban design recommendations of the Eastgate/I-90 project and the Factoria Area Transportation Study (FATS) Update. ~~transportation and urban design recommendations.~~

POLICY S-FA-15. Discourage traffic from office and retail commercial development from spilling over onto residential streets.

POLICY S-FA-16. Establish and implement a street tree plan and planting program for Factoria emphasizing arterial streets and buffering high intensity land use.

POLICY S-FA-17. Require new development and encourage existing development to plant and maintain street trees in accordance with a Factoria Subarea street tree plan.

POLICY S-FA-18. Provide and improve visual and pedestrian access to Sunset Creek, Richards Creek, Coal Creek, and Mercer Slough from pathways and access points.

POLICY S-FA-19. Encourage neighborhood groups to help with maintenance in coordination with City work crews.

Pedestrian and Bicycle

The Pedestrian and Bicycle Transportation Plan provides the guidance for improving the mobility and safety for everyone who uses the non-motorized transportation system, both the public system and the pathways that are on private property.

POLICY S-FA-20. Encourage the development of mid-block pedestrian connections.

POLICY S-FA-21. Provide a network of sidewalks, footpaths, and trails with interconnections to areas surrounding the Factoria Subarea to accommodate safe and convenient access to community facilities, retail areas, and public transit as well as to accommodate the exercise walker and hiker.

POLICY S-FA-22. Improve safety for bicyclists and other nonmotorized users by providing an integrated on-street and off-street system.

POLICY S-FA-23. Provide public access from Newport Shores to Newcastle Beach Park for bicycles and pedestrians only.

POLICY-S-FA-X1. Develop the Mountains to Sound Greenway trail through the subarea to provide pleasant, safe, non-motorized facilities that provide local and regional connections.

Utilities

Policies

POLICY S-FA-24. Encourage the undergrounding of utility distribution lines in areas of new development and redevelopment.

POLICY S-FA-25. Provide screened and maintained space for storage and collection of recyclables in commercial and multi-family developments.

Planning District Guidelines

Policies

District 1

General Land Use

POLICY S-FA-26. Permit multifamily development west of Monthaven at densities designated on the Land Use Plan (Figure S-FA.1) provided that the multifamily development does not have primary vehicular access through the Monthaven neighborhood.

Community Design

The stand of trees along the ridge of the slope provides an important visual buffer for the residents of Monthaven. Multifamily development should provide a vegetative buffer that includes protection of existing significant trees between the multifamily use and single-family residences. The buffer should be augmented as necessary to provide sufficient screening.

POLICY S-FA-26.5. Retail auto sales are appropriate in OLB districts along SE 36th Street west of the ravine located at about 133rd Avenue SE and east of the Newport Corporate Campus located at 132nd Avenue SE.

POLICY S-FA-27. Provide landscape buffers between any multifamily development west of Monthaven and existing single-family residences.

District 2

POLICY S-FA-28. Establish design standards for the Factoria commercial area. District 2 is surrounded by other neighborhoods and serves as a commercial, employment and high-density residential activity center south of I-90.

~~Both the Eastgate/I-90 project and the FATS Update recommends transportation and urban design strategies to create a well-integrated, transit supportive, pedestrian oriented, mixed-use neighborhood in Factoria's commercial core.~~

- Well-integrated: Factoria has a wide variety of land uses – employment, retail, single family and multi-family housing, schools – but in many cases these are separated by long distances, busy roads, and steep topography. Geographic separation discourages walking and transit use, as does an uncomfortable pedestrian environment. ~~The Eastgate/I-90 project and the FATS Update recommends guidelines for private redevelopment and identifies public pedestrian projects that together will help to form a more cohesive Factoria neighborhood.~~
- Transit-supportive: Factoria has a high level of transit service and use. Transit use may increase if riders find it easy and comfortable to walk between transit stops and the buildings. As properties redevelop, ~~the FATS Update recommends locating these buildings should locate closer to the street and providing direct pedestrian connections between the sidewalk and the primary building entrance.~~
- Pedestrian-oriented: The ability to walk-around comfortably within Factoria is essential to help create a neighborhood feel. Private site redevelopment that incorporates Eastgate/I-90 project and the FATS-recommended design guidelines, combined with public sidewalk and street-crossing projects, will help make it easier to get around without a car.
- Mixed-use: Mixed-use structures are those that contain a number of different uses, stacked vertically. Adopted zoning allows for a mixing of uses across much of Factoria's commercial area. For instance, housing may be constructed atop retail uses. ~~Both t~~The Eastgate/I-90 project and the FATS Update encourage greater utilization of this mixed-use potential.

To help achieve the vibrant neighborhood envisioned for Factoria, ~~the FATS Update recommends implementing policies that acknowledge the critical link between land use and transportation should be implemented.~~ The community envisions a network of walkways and design elements connecting the retail uses to residential neighborhoods and other community activity centers.

General Land Use

Factoria Subarea Plan

In 2002, the City Council adopted a Land Use Code Amendment that allowed 51,000 square feet of new retail and 685 residential units on the Factoria Mall site, plus an additional 100,000 square feet of retail development, contingent upon a determination of adequate transportation system capacity through a FATS Update. The FATS Update provides the necessary determination of transportation system adequacy to accommodate the Mall expansion.

POLICY S-FA-29. Utilize vegetation, sensitive site planning and superior building design to integrate multifamily and commercial development with nearby single-family neighborhoods.

POLICY S-FA-30. Allow Factoria Mall redevelopment to include an additional 100,000 square feet of commercial space beyond that provided for in the 2002 Land Use Code Amendments, per the FATS Update.

POLICY S-FA-30.1. ~~Consider allowing~~ Encourage a pattern of office use office intensity up to 0.75 FAR in the area north of Factoria Mall that is visible from I-90 and contributes to a sense of placethrough application of design review, with particular emphasis on the area's contribution to Factoria's pedestrian environment and the area's "gateway" location to the Factoria commercial center.

POLICY S-FA-X-2. Encourage the development of a community retail node at the north end of Factoria Boulevard through mixed use zoning that supports pedestrian activity and transit service.

POLICY S-FA-X-3. Consider the use of a land use incentive system in office and mixed use areas that incentivizes provision of infrastructure and amenities that offer public benefits through the potential for additional floor area ratio (FAR) and height.

Park, Recreation, and Open Space

POLICY S-FA-31. Provide for open space and recreation needs of residents, workers, and shoppers.

POLICY S-FA-32. Create a series of open spaces and gathering places with visual and walking connections along Factoria Boulevard

POLICY S-FA-33. Orient open spaces to take advantage of sunshine and territorial views.

POLICY S-FA-34. Provide seating, weather protection, special paving, shade trees, and landscaping.

Utilities

POLICY S-FA-35. Minimize disruptive effects of utility construction on property owners, motorists, and pedestrians.

Critical Areas

POLICY S-FA-36. Minimize erosion damage on slopes to protect downslope properties and stream beds.

Transportation

Transportation recommendations in the Eastgate/I-90 project and the FATS Update emphasize multi-modal mobility to guide future public infrastructure investments.

POLICY S-FA-37. Encourage interjurisdictional cooperation among the City of Bellevue, the State, Metro, and Sound Transit on transportation concerns.

POLICY S-FA-38. Ensure that development is conditioned to satisfy future right-of-way, financing, and development standards as identified by the City of Bellevue.

Pedestrian and Bicycle

Pedestrian and bicycle system connectivity, as identified in the adopted Pedestrian and Bicycle Transportation Plan(1999), is interrupted by gaps in the planned system. Pedestrian access to transit, employment and retail/services is constrained by inadequate non-motorized facilities on public and private land. The Eastgate/I-90 project and the FATS Update identifies improvements to sidewalks, crosswalks, paths, and private walkways that will help fill gaps and increase accessibility.

POLICY S-FA-39. Enhance connectivity and accessibility for pedestrians and bicyclists throughout the Factoria area.

Transit

Improving transit facilities and services is important to help residents, shoppers, and employees get around Factoria without a car. Investments in transit, together with pedestrian amenities, will support Factoria livability and may reduce the long-term need to expand arterial capacity.

Amenities such as passenger shelters and trash receptacles create a more pleasant environment for transit riders. To serve increasing numbers of transit passengers over time, it may be necessary to enhance facilities. A recommended Factoria Station transit center on Factoria Boulevard near SE 38th Street would provide for convenient transit access and transfers for the many thousands of employees, residents, and shoppers within a mile of this site

Each day, regional buses pass by Factoria on I-90 and I-405 without providing service to Factoria. Transit freeway stations on I-90 and I-405 with pedestrian connections to the surface streets could capture this transit service for Factoria commuters.

POLICY S-FA-40. Coordinate with Metro to provide passenger shelters, where warranted, at bus stops on Factoria Boulevard.

POLICY S-FA-41. Work with Metro and adjacent property owners to develop a Factoria Station transit center at a location on Factoria Boulevard that is convenient to employees, residents and shoppers.

POLICY S-FA-42. Work with Metro and Sound Transit to develop freeway stations on I-90 and I-405 to serve Factoria employees, residents and shoppers.

Roadways

A number of new projects were identified in the Eastgate/I-90 project and the FATS Update to improve traffic safety and traffic flow on arterials and to enhance access to the adjacent private parcels and to freeways. These recommended projects are catalogued and mapped in the East Bellevue Transportation Plan.

POLICY S-FA-43. Maintain the adopted vehicular level of service on Factoria arterials, utilizing FATS Update recommended roadway projects recommended by the Eastgate/I-90 project and the FATS Update.

Circulation and site access

Multiple driveways and limited connections between sites exacerbate vehicular congestion and conflicts with pedestrians. Each driveway onto an arterial creates a site for potential vehicular/pedestrian conflicts. From both a traffic safety and pedestrian safety standpoint, the fewer driveways along an arterial, the better.

Many parcels along Factoria Boulevard have more than one driveway. This pattern was developed when automobile mobility was considered one of the most important objectives. The resulting proliferation of driveways has resulted in just the opposite effect, congestion on the arterial that links all the businesses. With increased land development and better transit service, there are more pedestrians using the sidewalks. At each driveway, a motorist must watch for both pedestrians and other automobiles, but sometimes one or the other is missed, resulting in an accident.

The FATS Update recommends a long-term strategy to reduce the number of driveways and to enhance circulation along the commercial corridor. This strategy involves two parts: consolidating driveway access points; and providing greater circulation between parcels.

As redevelopment occurs, or as city projects improve adjacent arterials, a parcel with multiple driveway would be required to consolidate access points. Further, when opportunities arise, the city could encourage adjacent property owners to combine and share driveways. An important part of this strategy involves creating off-street connections between parcels so that a customer, whether in a vehicle or on foot, could move along the corridor to patronize different businesses, without having to enter the arterial. Driveway design that incorporates traffic calming would keep arterial bypass traffic to a minimum and create a pleasant pedestrian environment.

POLICY S-FA-44. Consolidate curb cuts/driveways as redevelopment occurs or when public arterial improvements are planned.

POLICY S-FA-45. Encourage adjacent parcels to develop shared driveways to reduce the overall numbers of driveways along the arterial.

POLICY S-FA-46. Provide non-arterial pedestrian and vehicular circulation both between and within commercial parcels.

Boulevards

Factoria Boulevard is designated as a “Boulevard” in the Urban Design Element. Both within the right-of-way and on adjacent private development, a boulevard incorporates design features such as gateways, street trees, colorful plantings, landscaped medians, special lighting, separated and wider sidewalks, prominent crosswalk paving, seating, special signs, and public art.

POLICY S-FA-47. Establish Factoria Boulevard arterial streetscape standards for tree planting, pedestrian lighting, sidewalks, crosswalks, and other urban design elements to be applied when private property redevelops or public projects are implemented.

Gateways

Visitors arriving at Factoria use three major routes: south on Factoria Boulevard at I-90, north on Factoria Boulevard at Coal Creek Parkway, or north on 124th Ave SE. at Coal Creek Parkway. Gateway designs for these entry points into Factoria should be provided to mark the transition into this special neighborhood and reinforce the Factoria identity. Street tree plantings; pedestrian scale lights, public art, district identification signs and banner poles; landmark features and wayfinding devices; and building placement should be considered at each of these “gateways”. A gateway can be dramatic and obvious, sometimes including non-commercial signs, art, structures, and unique lighting. It can also be subtle, using signs, a change in plant material or paving surface.

POLICY S-FA-48. Establish gateway design standards and guidelines to create a welcoming experience for pedestrians and motorists at the Factoria entry points on Factoria Boulevard. Apply these standards when private property redevelops and when public projects are implemented.

POLICY S-FA-49. In partnership with adjacent property owners, take incremental steps to create mixed-use gateways and urban focal points at the following intersections along Factoria Boulevard:

- SE 37th Place / Loehmann's Plaza Factoria Village entrance;
- SE 38th Street;
- SE 40th Lane / Factoria Mall entrance; and
- SE 41st Place

Incorporate infrastructure improvements and implement design guidelines that will enhance pedestrian crossings (respecting the significant traffic volumes and multiple turning movements at these intersections), improve transit amenities, and develop an active building frontage along Factoria Boulevard with direct pedestrian routes to retail storefronts from the public sidewalk and weather protection for pedestrians.

Community Design- I-90 Corridor

POLICY S-FA-X-4. Apply design review for commercial, office, and mixed use development that promote pedestrian-friendly design, ensure quality and a sense of permanence, promote environmental sustainability, and create a distinct sense of place.

POLICY S-FA-X-5. Reinforce a sense of place that reflects the area’s location on the Mountains to Sound Greenway and emphasizes the emerging urban character of the Eastgate I-90 corridor by encouraging building and site design that includes visibly recognizable natural features such as green walls, façade treatments, green roofs, and abundant natural landscaping.

POLICY S-FA-X-6. Promote the feeling of a city in a park through development regulations that retain wooded greenbelts to provide a green backdrop for office and commercial uses and naturally buffer less intense development.

Community Design – Factoria Boulevard

In 2002, the City Council adopted zoning and design guidelines specifically applicable to redevelopment of the Factoria Mall site. This is the F-1 zoning district, where the Factoria TownSquare Design Guidelines are applicable. The Eastgate/I-90 project and the FATS Update recognizes that many components of these guidelines are also applicable to the commercial corridor along Factoria Boulevard.

The F-1 design guidelines are intended to achieve for the Factoria Mall site what the Eastgate/I-90 project and the FATS Update recommends for the Factoria Boulevard commercial corridor – that is, a mix of transportation and land use projects that create a more walkable urban environment.

Implementing F-1 urban design guidelines on the Factoria Mall site and the Eastgate/I-90 LUTP and the FATS Update specific guidelines elsewhere on the Factoria Boulevard commercial corridor, would transform the corridor from an auto-oriented strip to a commercial corridor that has a greater orientation toward pedestrians.

To supplement the Urban Design Element of the Comprehensive Plan, and the guidelines of the Community Retail Design District, specific urban design guidance for redevelopment of Community Business-zoned properties along Factoria Boulevard should include the following key elements:

- Building placement
- Parking location
- Pedestrian environment

POLICY S-FA-50. Develop and implement design guidelines, to supplement the Community Retail Design District guidelines applicable to new development and redevelopment on commercial sites along Factoria Boulevard.

Building Placement

To create a walkable environment in an urban, commercial setting, the relationships between the buildings and the public sidewalks deserve considerable attention. In such an environment, buildings are located close to or adjacent to the right-of-way, and they are designed to invite pedestrians to the front door.

Factoria Boulevard’s walkability is currently challenged by a land use pattern that generally favors automobiles over pedestrians. In Factoria, many buildings are situated at the rear of

the lot. Seldom can one walk directly from the sidewalk to the building entry without encountering moving vehicles, a maze of parked cars, high curbs, and overgrown vegetation. Since everyone is a pedestrian at some point in their journey to a store's front door, it is both good public policy and good business, to make the front door accessible to all.

In the Community Business zoning area, Land Use Code regulations require no minimum front-yard setback, and the F-1 zoning calls for a minimum 15-foot setback from the right-of-way along Factoria Boulevard. To facilitate pedestrian activity, the city could establish a maximum building setback along Factoria Boulevard for the Community Business zoning designation. Site design should include an accessible walkway to a weather-protected main entrance, and parking that is located on the side or rear of the building, or perhaps underneath it.

POLICY S-FA-51. Consider establishing a maximum building setback from the right-of-way for structures along the Factoria Boulevard commercial corridor.

POLICY S-FA-52. Allow buildings to abut the Factoria Boulevard public right-of-way, so long as there is adequate space for the arterial sidewalks.

POLICY S-FA-53. Provide building-mounted weather protection for pedestrians.

POLICY S-FA-54. Provide prominent, easily identifiable pedestrian entries to individual storefront businesses.

POLICY S-FA-55. Incorporate high quality and pedestrian-scaled materials on building facades along public sidewalks and interior walkways.

Parking Location

The FATS Update recommends site planning that locates parking either behind the building or on the side of the building. If parking is located behind the building, then a driveway with directional signage would be incorporated into the site plan. If parking is located on the side of building, and thus adjacent to the sidewalk, then a visual screen/physical barrier between the parking lot and the sidewalk is appropriate.

As walking and transit use grow, and an increasing number of customers arrive to businesses on foot, it may be possible to reduce the amount of parking required.

The FATS Update recommends studying reducing the minimum parking requirement if the site is adjacent to transit service and if the development includes amenities that foster transit use and pedestrian activity.

POLICY S-FA-56. Locate and design buildings and parking such that there is a direct pedestrian connection between the public sidewalk and the primary building entrance.

POLICY S-FA-57. Explore providing incentives to developers on the Factoria Boulevard commercial corridor to build underground parking that would enhance the pedestrian orientation of a site.

POLICY S-FA-58. Use shared parking and provide accessible pedestrian linkages across adjacent sites.

POLICY S-FA-59. Design surface parking lots so that they are not located between the building entrance and the public sidewalk along Factoria Boulevard, unless there is a direct accessible pedestrian connection through the parking lot.

Pedestrian Environment

Sidewalk design should include a “buffer zone” along the curb that consists of items such as street trees, planting strips, kiosks, street furniture, pedestrian scale lights or signage. This buffer zone separates moving cars from pedestrians. Along the sidewalks, pedestrian scale/style lighting should augment the high intensity lights that illuminate the street for traffic.

Curbside parking should be provided where possible. While this is not a solution for Factoria Boulevard, pedestrians on other adjacent streets would benefit from this parking configuration.

Sidewalk width should be proportionate to anticipated pedestrian flows, which means that sidewalk should be wider than the standard at transit service points.

A pedestrian-oriented business district can be created when open spaces are incorporated into the site design. Public plazas invite relaxation, informal gatherings, and provide visual contrast to the buildings. Wide sidewalks provide for outdoor seating areas adjacent to restaurants and cafes and increase opportunities for business activity when the weather is nice. Whether as an expansion of the sidewalk or a plaza that extends away from the street, partial enclosure by buildings, landscaping, and/or street furniture will create comfortable public places. These spaces may be large and elaborate, or small and discrete. The design of a plaza should include good pedestrian circulation and active ground floor uses in the adjacent buildings. Buildings should provide weather protection using storefront awnings.

POLICY S-FA-60. Establish design guidelines to create plazas and other quasipublic spaces when private properties along Factoria Boulevard redevelop to allow space for outside activities including café seating.

POLICY S-FA-61. Provide pedestrian – scale lighting along Factoria Boulevard sidewalks and along on-site walkways.

POLICY S-FA-62. Provide sidewalks along Factoria Boulevard that in places may be wider than the City’s standard 12-foot wide arterial sidewalk to comfortably accommodate pedestrians adjacent to this busy arterial, especially near transit stops.

POLICY S-FA-63. Enhance pedestrian amenities along 124th Avenue S.E., 128th Avenue S.E., S.E. 38th Street, and S.E. 41st Street.

POLICY S-FA-64. Encourage the coordination of amenities and development of bike racks and pedestrian shelters in key locations.

POLICY S-FA-65. Encourage the use of landscaping that will serve as physical and visual buffers between pedestrians and parking areas.

The details of pedestrian infrastructure can often make or break a neighborhood's walkability. ~~The FATS Update provides general guidance for creating a pedestrian system that works for everyone.~~ To minimize street crossing distances for pedestrians, curb bulbs could be installed where pedestrian flows warrant and traffic patterns allow. Crosswalks at controlled intersections could be constructed with special pavement to highlight the area as a pedestrian zone.

At certain intersections where high volumes of pedestrians and vehicles converge, the installation of countdown signals can provide some measure of certainty for pedestrians wary of a signal that they think may change too fast.

In some locations, crosswalk enhancements and pedestrian activity may not be compatible with a roadway's primary mission to move vehicles. In this situation, a grade-separated pedestrian crossing may be warranted. A decision to build a pedestrian bridge or tunnel should consider factors such as topography; accidents; volumes of pedestrians and vehicles; safety for pedestrians; origins and destinations; opportunities to create an urban focal point or gateway; and/or opportunities for partnerships between the city, adjacent property owners, and transit agencies.

The design of a pedestrian bridge should be both distinctive and graceful, providing convenient pedestrian access while enhancing the streetscape. Design components of a pedestrian bridge should include visible and easily accessible connections with the sidewalks, and architectural characteristics that are perceived as part of the public right-of-way and are distinct from adjacent buildings. Weather protection is desirable but should not isolate pedestrians from the right-of-way below.

A comprehensive graphic system of information and wayfinding can help residents and visitors alike get around in Factoria without a car. Wayfinding signage can be implemented by the city on public land, and by private developers with large sites (Factoria Mall, ~~Loehmann's Plaza~~Factoria Village). A Factoria walking map could show the major access points to neighborhoods, regional trails, and transit service, as well as the shortest way on foot to a bus stop or to a favorite restaurant.

POLICY S-FA-66. Enhance pedestrian crossings of Factoria Boulevard and other Factoria area arterials, considering such methods as: installing special paving types or markings; providing longer pedestrian signal phases; extending curbs; installing countdown signals; or providing pedestrian refuge islands.

POLICY S-FA-67. A pedestrian bridge may be appropriate over Factoria Boulevard at SE 38th Street, provided there is a clear demonstration of public benefit and design criteria are fully met.

POLICY S-FA-68. Develop and implement a wayfinding system to guide pedestrians to attractions in the Factoria area.

POLICY S-FA-69. Provide pedestrian-oriented storefront signage.

POLICY S-FA-70. Consolidate commercial signs to a single structure and limit their size. Apply Bellevue's Sign Code and amortization program for nonconforming signs.

Richards Valley Subarea Plan

Goal:

To maintain the Subarea as a green and wooded place that provides a complementary mixture of living and working opportunities.

Discussion: The Richards Valley Subarea consists of three distinct districts. West of I-405 is heavily vegetated and is developed with a variety of uses – parkland, light industrial, and multifamily. Woodridge Hill is largely residential with a mixture of single-family and multifamily units. East of Woodridge Hill development includes a wide variety of uses – residential, park, warehousing, and extensive retail. Although the community recognizes the need for maintaining working opportunities in the Subarea, they want to ensure that the quality of the residential community and natural features (especially dense vegetation and wooded vistas) remain at a high level.

Overview

According to most sources, Richards Valley was once part of the Duwamish Tribal Territory. Evidence shows a village/habitation site located on or near Mercer Slough.

The earliest English speaking inhabitants of this area prior to 1900 occupied themselves with mining, logging, and farming.

During the 1890s loggers cut large stands of timber on land now known as Woodridge Hill and Richards Valley and into the Factoria area. Logging continued to be important into the 1920s. The railroad trestle built in 1904 serves as an important Richards Valley Subarea landmark.

Land use patterns evolved from early timberland, logging, and farming between the 1920s and 1950s to the current settlements of residential and commercial development.

Woodridge Hill and Richards

Valley were annexed into Bellevue during the 1960s and 1970s.

Richards Valley, an area of 1,153 acres, forms an oval beginning with I-405 and the Lake Hills Connector to the north, 132nd Avenue S.E. on the east, Mercer Slough on the west and Richards Road and I-405 converging at I-90 to the south. Of the 1,754 housing units in the Subarea 1,022 (58 percent) are single-family units and 732 (42 percent) are multifamily units. The residential population of Richards Valley is 4,200.

~~Of the 1.5 million square feet of non-residential uses in Richards Valley, half is industrial, about a quarter is office, and a fifth is institutional and governmental. Of Bellevue's subareas, only three have land planned for light industrial uses: Bel-Red, North Bellevue, and Richards Valley. Richards Valley has about 120 acres of light industrial land compared to North Bellevue with about 20 acres and Bel-Red with about 400 acres.~~

~~Richards Valley has about 140 acres of land planned for office use compared to Eastgate with 246 and Wilburton with 225.~~

~~Approximately 2,500 people work in Richards Valley. The residential population is 4,200.~~

Richards Valley is known for the views from Woodridge Hill and the wooded areas and wetlands in the valley. This plan focuses on protection of the treasured natural features in the face of continued development of residential, office, and light industrial uses.

For instance, the community wants to maintain and preserve single-family neighborhoods as the primary use especially on Woodridge Hill and Woodmoor. A mix of light industrial and additional residential uses is appropriate in the lower elevations of the valley.

In 1987 the City Council adopted the Sensitive Area Requirements to protect sensitive areas in Bellevue. As a result the open use land use designation became obsolete and during the Subarea plan review process the Citizens Advisory Committee redesignated some 115 acres of open use land for residential or commercial uses.

Of the 1.5 million square feet of non-residential uses in Richards Valley, half is industrial, about a quarter is office, and a fifth is institutional and governmental. Approximately 2,500 people work in Richards Valley. Historically, three of Bellevue's subareas have had land planned for light industrial uses: Bel-Red, North Bellevue, and Richards Valley. However, with the rezoning of the Bel-Red area in 2009, only two subareas now have industrial zoned lands: Richards Valley with about 110 acres, and North Bellevue with about 20 acres.

The Richards Valley industrial area has easy access to the freeway. It is home to a wide range of businesses and other significant uses or features including a solid waste transfer station and electrical substation. Lack of internal street connectivity and the number of drainage corridors, streams, and wetlands pose challenges to redevelopment. However, the abundance of natural features and critical areas also provide opportunities for environmental enhancement over time.

In 2012, the Eastgate/I-90 Land Use & Transportation Project (Eastgate/I-90 project) was completed. The study area boundary for that project, which establishes a long-range vision for the I-90 corridor, includes the industrial portion of the Richards Valley subarea. The Eastgate/I-90 project, in part, identified strategies that not only ensure the continued existence of the Richards Valley industrial area, but also encourage higher intensity flex-tech/research and development uses and stream and vegetation corridor enhancements. The Eastgate/I-90 project is more fully discussed in the Eastgate Subarea plan.

Land uses in the Subarea are indicated on the Land Use Plan Map (*Figure S-RV.1*).

General Land Use

Policies

POLICY S-RV-1. ~~Ensure that development and site planning comply with the Sensitive Area Regulations.~~

~~**POLICY S-RV-2.** Encourage land uses and site development that minimize the appearance of intense development.~~

~~**POLICY S-RV-3.** Encourage commercial areas to develop with sensitivity to their surroundings.~~

Enhance the natural environment within the industrial area by encouraging redevelopment to consider natural features in site design, including but not limited to reducing impervious surfaces, improving the functions of wetlands and stream corridors, incorporating natural drainage features, retaining trees, and restoring vegetated corridors.

Discussion: Richards Valley is recognized as an employment center and additional commercial development is encouraged in properly designated areas. Commercial development is appropriate if it doesn't degrade the environment and if traffic mitigation addresses traffic congestion and safety problems.

~~**POLICY S-RV-4.** Do not allow aAuto sales, auto rental, and auto leasing uses are not appropriate on the parcels in the Light Industrial District that are along the following streets: 118th Avenue S.E., Richards Road, and S.E. 26th.~~

POLICY S-RV-X-1. Consider the use of a land use incentive system in the Office Limited Business area that incentivizes provision of infrastructure and amenities that offer public benefits through the potential for additional floor area ratio (FAR) and height.

POLICY S-RV-5. Allow recreation and community uses in and on school sites which may be closed in the future.

Discussion: When determining the appropriate intensity of activity, consider the previous use of the school and the ability of nearby streets to accept additional traffic. When applicable, the community can participate in the conditional use process in deciding appropriate uses on closed school sites.

Natural Determinants

Policies

POLICY S-RV-6. Retain the remaining wetlands within the 100-year floodplain along Richards Creek, Kelsey Creek, and Mercer Slough for drainage retention and natural resource park use.

Discussion: It is important to preserve the natural environment and to retain the native habitat for the aesthetic value and character of the community.

POLICY S-RV-7. Protect and enhance the capability of Richards Creek, Kelsey Creek, and Mercer Slough and their tributaries to support fisheries along with other water-related wildlife.

POLICY S-RV-8. Retain and enhance existing vegetation on steep slopes, within wetland areas, and along stream corridors to control erosion and landslide hazard potential and to protect the natural drainage system.

Residential

Policies

POLICY S-RV-9. Encourage a variety of different densities and housing types in residential areas to accommodate social and economic lifestyles changes as well as the different stages of life.

Discussion: If moderate or low-income multifamily units are constructed in the Subarea, the sites should be dispersed rather than concentrated in one development.

Parks and Recreation

Policies

POLICY S-RV-10. Encourage the City to purchase land for parks and open space when it becomes available.

POLICY S-RV-11. Protect and preserve publicly owned land.

Discussion: This policy refers to land set aside for storm drainage and detention, the right-of-way along the Lake Hills Connector, and potential links in the trail and park system. An efficient way to accomplish this is for the City to purchase properties or parts of properties protected by the City's Sensitive Area Regulations.

Transportation

Policies

POLICY S-RV-12. Develop a safe integrated on and off-street nonmotorized system emphasizing connections to schools, parks, transit, and other parts of Bellevue.

Discussion: Richards Valley needs many nonmotorized improvements. These include better access to the schools, parks, and transit service. Because of its central location to other parts of Bellevue (such as Downtown, and the Kelsey Creek and Mercer Slough Parks), it is important for the off-street trail system to connect safely to the on-street facilities.

POLICY S-RV-13. Provide better pedestrian access and views of Richards Creek, Kelsey Creek, and Mercer Slough.

Discussion: While pedestrian and visual access is important, it should be balanced with the need to develop sites sensitively and in accordance with Sensitive Area Regulations.

POLICY S-RV-14. Promote development of a nature trail between the Lake Hills Connector and Kamber Road near Richards Creek.

Discussion: The nature trail should provide the public with views and walking opportunities in this unique and fragile area. The trail should be compatible with the environmentally sensitive areas along the creek.

POLICY S-RV-15. Consider interim solutions for nonmotorized improvements until major improvements can be made.

Discussion: Use the City's Overlay Program, Minor Capital Projects Fund, Neighborhood Enhancement monies, or other sources to provide interim solutions when practical. When appropriate, consider constructing sidewalks on only one side of the street.

POLICY S-RV-16. Encourage improved Metro transit service to and from key points in the Richards Valley Subarea.

Discussion: Metro should provide better transit service in the Richards Road corridor to Bellevue Community College, Eastgate, Factoria, the downtowns of Bellevue and Seattle, and the University of Washington.

POLICY S-RV-17. Plan for the long-range traffic related facility needs in the Richards Valley Subarea including designated arterial, feeder (collector), and residential streets.

Discussion: The East Bellevue Transportation Study will include an evaluation of Richards Valley's arterial facility needs on Richards Road including the impacts of new development on the transportation system.

POLICY S-RV-18. Minimize access to the Lake Hills Connector when considering new development near the Connector.

POLICY S-RV-X-2. Enhance the pedestrian and bicycle environment along Eastgate Way by constructing sidewalks, bike lanes, and other features to improve safety.

Utilities

Policies

POLICY S-RV-19. Encourage the combination of utility and transportation rights-of way in common corridors and coordinate utility construction with planned street and bike lane improvements which could result in a more efficient allocation of funds.

POLICY S-RV-20. Use common corridors for new utilities if needed.

Discussion: If new power lines are needed in the Subarea, they should be developed in areas that already contain power lines, rather than causing visual impacts in new areas.

POLICY S-RV-21. Improve the appearance of public streets and power line rights-of-way.

POLICY S-RV-22. Encourage the undergrounding of utility distribution lines.

Community Design

Policies

POLICY S-RV-X-3. Apply design review in the Office Limited Business area that promotes pedestrian-friendly design, ensure quality and a sense of permanence, promote environmental sustainability, and create a distinct sense of place.

POLICY S- RV-X-4. Reinforce a sense of place that reflects the area's location on the Mountains to Sound Greenway and emphasizes the emerging urban character of the Eastgate I-90 corridor by encouraging building and site design that includes visibly recognizable natural features such as green walls, façade treatments, green roofs, and abundant natural landscaping.

POLICY S- RV-X-5. Promote the feeling of a city in a park through development regulations that retain wooded greenbelts to provide a green backdrop for office and industrial uses and naturally buffer less intense development.

POLICY S-RV-23. Disturb as little of the natural character as possible when improving streets and arterials.

Discussion: The Lake Hills Connector is an example of using natural vegetation along the street frontage and in the median.

POLICY S-RV-24. Encourage the retention and enhancement of special features designated by the Urban Design Element such as unique open spaces, landmarks, and viewpoints.

Discussion: In Richards Valley the stream and wetlands qualify as unique open space, the railroad trestle as a landmark and the view from Woodridge School grounds as a designated viewpoint.

POLICY S-RV-25. Encourage the retention of vegetation during the clearing, grading, and construction processes to screen development from nearby residential neighborhoods.

POLICY S-RV-26. Require design review for areas along Richards Road in order to ensure that site and building design of commercial and multifamily uses in the valley are in character with the nearby single-family neighborhoods.

Discussion: Commercial and multifamily development should be screened to provide a visual separation from the road. If development cannot be screened, building height, bulk, color, and roofline design should be compatible with the development allowed in the nearby single-family community. Use design review to accomplish this.

In addition, use the Richards Creek Sensitive Area as an amenity when designing sites.

POLICY S-RV-27. Development along Richards Road should preserve and maintain the green and wooded character of the Richards Road corridor.

POLICY S-RV-28. New development, including single-family development, should install landscaping which provides a dense visual vegetative screen along Richards Road. The planting should be an amenity to those who travel, live, and work along Richards Road.

POLICY S-RV-29. Encourage the site and building design of commercial and multifamily use on Woodridge Hill to be in character with the nearby single-family neighborhood.

Discussion: Building height, bulk, color, and roofline design should be compatible with the development allowed in the nearby single-family community. Use design review to accomplish this.

POLICY S-RV-30. Develop areas designated for light industrial uses with sensitivity to the natural constraints of the sites.

POLICY S-RV-31. Encourage screening of rooftop machinery from view at ground level.

Eastgate Subarea Plan

Goal:

To preserve and promote the accessibility and appearance of residential neighborhoods, local amenities, and business establishments within the Subarea.

Discussion: The Subarea is mostly developed. It is important that subsequent development and redevelopment improves the function and appearance of the various land uses and that they are compatible with each other.

Overview

The Eastgate Subarea provides a gateway for south Bellevue and an axis for travel between the Eastside and metropolitan Seattle. Rolling tree- and house-covered hills on either side of the I-90 corridor surround a major commercial interchange located at the center of the Subarea.

Convenient access makes the Eastgate Subarea a desirable place to live and work. Jobs, stores, schools, churches, parks, and trails all are within easy walking distance of each other. As one of Bellevue's older areas, the Subarea contains established residential neighborhoods, many with attractive views. Combined, these amenities have greatly enhanced the quality of life for the Subarea's residents and business owners alike.

The Eastgate Subarea encompasses approximately 1,500 acres. Its boundaries are 137th Avenue S.E. to the west, S.E. 23rd Street to the north, 168th Avenue S.E. to the east, and S.E. 41st Street to the south. With the Eastgate annexation in 2012, all of the subarea is within City limits.

~~The southern third and portions of the eastern edge of the Subarea lie outside the City of Bellevue's boundaries. In the future, the Subarea's boundaries may expand southward, to include areas that fall currently within the Newcastle Subarea and eastward up to Lake Sammamish.~~

The I-90 business corridor covers 10 percent of the ~~subarea~~ Subarea, and is home to major corporations, high technology industries, and community shopping areas. When combined with the adjacent Factoria commercial core, the area is the third largest employment area in the city. The corridor, which has developed primarily since 1980 ~~within the last ten years~~, owes its success to the area's accessibility to I-90 and its proximity to major urban centers. ~~Sunset Village and the~~ The Eastgate Plaza Shopping Center, which serves the large residential neighborhoods in and near the Subarea, also ~~is are~~ located in this corridor. The area north of the I-90 corridor features large and small parks; a deep, wooded ravine; about 160 acres of publicly-owned land; and numerous public facilities such as churches, government agencies, and Bellevue College. ~~a community college. The area south of I-90 is largely within unincorporated King County, with the exception of the commercial areas that front the freeway.~~ Parks, schools, and churches also are found within the Subarea on both sides of I-90.

As of November, 1989, 95 acres of incorporated land remain vacant in the Subarea. Of these, about 22 acres are designated for commercial uses and about 73 acres are designated for residential uses. Eighty-two acres of the Subarea's vacant land is known as the Sunset Property, which will be developed with 750,000 square feet of office space and 312 multifamily homes. These multifamily homes will augment the Subarea's current supply of 522 multifamily and 725 single-family homes that lie within the incorporated portions of the Subarea. The potential residential population of the Subarea is approximately 3,250 people. This potential is not expected to increase or decrease dramatically. Employment growth, however, is projected to reach 9,000 workers by 2020, up from 7,270 workers in 1988.

Protecting residential neighborhoods from increased development and its resultant increased traffic, redeveloping existing retail properties, and creating a comprehensive trail system are expected to be the Subarea's major issues in the near future.

In 2012, the Eastgate/I-90 Land Use & Transportation Project (Eastgate/I-90 project) was completed. The study area boundaries of that project, which establishes a long-range vision for the I-90 business corridor, incorporate much, but not all, of the Eastgate subarea, as well as portions of the Factoria and Richards Valley subareas.

The Eastgate/I-90 project supports changes intended to capture market demand, improve transportation conditions, address concerns of the employment sector as well as the general public, and position the corridor to grow gracefully over time. It includes the following key elements:

- It builds on the success of the corridor as a major employment and office center, by adding capacity for additional office growth and allowing a greater mix of support retail and service uses.
- It establishes a mixed-use Transit-Oriented Development center around the transit center and south of Bellevue College. A substantial portion of the future office and residential growth in the corridor is expected to occur at this location.
- It increases opportunities for residential development in the corridor, to add vibrancy to the area, provide housing in proximity to Bellevue College and places of work, benefit from existing transit service, and support nearby retail uses.
- It seeks to enhance Bellevue College's visual presence and connections to the adjacent community.
- It promotes the Mountains-to-Sound Greenway by supporting the development of the Mountains-to-Sound Greenway trail through Bellevue and by incorporating sustainable design and abundant natural landscaping into the built environment.
- It identifies modest but effective motorized and non-motorized transportation improvements that may be accomplished through partnerships with other agencies.
- It supports increased floor area ratios and building heights throughout the corridor to meet demand for continued job and economic growth.

This Subarea Plan provides a framework for Land Use Code amendments that will implement the vision of the Eastgate/I-90 Land Use & Transportation Project as summarized above.

Land Use

Policies

POLICY S-EG-X1. Focus Eastgate growth into a mixed use center adjacent to the Eastgate Transit Center with greater height and intensity than the surrounding area.

POLICY S-EG-X2. Establish a pedestrian-oriented street that provides a community plaza and allows for connections between Bellevue College, the Eastgate Park and Ride, and the office, retail, and residential development in the transit-oriented development center.

POLICY S-EG-1. Encourage office and retail land uses that take advantage of the freeway access, transit service, and non-motorized transportation alternatives without adversely impacting adversely the residential neighborhoods.

Discussion: Intense office development can generate adverse traffic impacts and block residential views. Site design also can impact residential quality. To support this policy, office and retail development should be ~~limited~~ well designed so that it is compatible with surrounding neighborhoods and be oriented around a multi-modal transportation system that reduces vehicular congestion and traffic impacts.

POLICY S-EG-2. Encourage the integration of restaurants and other commercial uses that serve local workers into and adjacent to be compatible in design with surrounding office development to enhance the mix of uses within walking distance of employment areas, and accessible to pedestrians.

Discussion: The reason for encouraging restaurants and other commercial services within office developments is to reduce vehicular traffic between the office parks and retail areas. Retail areas are intended to serve primarily local needs.

Natural Determinants Environment

Policies

POLICY S-EG-3. Protect the Vasa Creek riparian corridor from development to improve water quality, fisheries, and provide open space.

Discussion: The Vasa Creek riparian corridor has major segments that remain in a natural state. This creek is one of the few natural areas left in the Subarea and should be protected. A trail along the creek may be possible if environmental impacts can be avoided.

POLICY S-EG-4. Ensure that increases in impervious surface area or stormwater runoff will not increase the quantity or worsen the Protect and improve the stormwater quality entering public drainage systems, streams, and Phantom Lake, Lake Washington, and Lake Sammamish.

Discussion: Construction activities should control erosion and sedimentation. This could include seasonal limitation on grading activities, natural vegetative filtration, and use of the best available

technology. Storm water quality from developments should be improved prior to discharge into the public drainage system.

POLICY-S-EG-X-3. Explore sub-regional stormwater detention as a future step to provide a more effective approach to stormwater control and mitigation and to achieve broader environmental benefits through coordinated treatment and detention across multiple properties.

Commercial

Policies

~~**POLICY S-EG-5.** Consolidate retail/commercial development within existing Community Business and General Commercial boundaries.~~

~~**POLICY S-EG-6.** Limit retail expansion to serve primarily neighborhood and community retail needs.~~

~~Discussion: Retail services should serve area residents but not become regional shopping centers.~~

Residential Development

Policies

POLICY S-EG-7. Maintain single-family housing as the predominant residential land use in the Subarea in land area and appearance.

POLICY S-EG-8. Limit multifamily housing zoning to locations accessible directly from arterials, as depicted on the Land Use Plan (*Figure S-EG.1*).

POLICY S-EG-10. Multifamily housing may be appropriate to separate office and retail land uses from single-family neighborhoods or as a part of mixed use developments where there is close proximity to transit or neighborhood-serving commercial uses, with a special emphasis on meeting the housing needs of Bellevue College.

POLICY S-EG-11. Encourage more opportunities for affordable housing in the Subarea by maintaining and rehabilitating existing housing stock.

Transportation and Circulation

Policies

POLICY S-EG-9. Discourage multifamily and commercial traffic from passing through local streets in single-family neighborhoods.

POLICY S-EG-12. Consider allowing a reduction in parking requirements where it is possible to do so because of proximity to transit. ~~Evaluate the impacts on parking,~~

nonmotorized circulation, and site access when uses that have high trip generation or unusual traffic patterns are proposed.

Discussion: Certain land uses, such as health clubs and movie theaters, have high trip generation, unusual traffic patterns, and high parking demands. Appropriate considerations should be given to these land uses to determine their traffic impacts and suitable mitigating measures. Mitigating existing traffic problems also should be considered.

POLICY S-EG-13. ~~Reduce parking spillover from commercial uses to maintain safety standards.~~

POLICY S-EG-14. Improve safety, convenience, and access by ensuring that internal circulation systems are integrated with the street system to improve multi-modal mobility within and between developments. for pedestrians and other nonmotorized users by providing and maintaining an integrated on-street and off-street system.

Discussion: The City should create a nonmotorized action list that proposes projects to eliminate missing links in the nonmotorized transportation system. It is important to use this list when reviewing tasks such as capital projects, the Street Overlay Program, and maintenance projects. The list could identify both interim and long term capital improvements.

POLICY S-EG-X-4. Collaborate with the Washington State Department of Transportation to relieve congestion created by vehicles entering and exiting Interstate 90.

POLICY-S-EG-X-5. Develop the Mountains to Sound Greenway trail through the subarea to provide pleasant, safe, non-motorized facilities that provide local and regional connections.

Discussion: the Mountains to Sound Greenway trail connects the Puget Sound with central Washington along 100 miles of I-90. Within Bellevue, there is a 3 mile gap through the Eastgate area from Factoria to Bellevue city limits. Closing this gap will provide a transportation and recreation resource that will benefit Eastgate residents, visitors, and businesses.

POLICY S-EG-15. ~~Consider interim solution for nonmotorized improvements until major improvements can be made.~~ Improve connectivity within the subarea for pedestrians and bicycles where opportunities exist by integrating land uses, improving roadway safety for all modes of travel, and linking commercial, office, parks, and public spaces with trails and pathways.

Discussion: Use the City of Bellevue's Overlay Program, Minor Capital Project Fund, Neighborhood Enhancement Program fund, or other sources to provide interim solutions when practical. These interim projects should not preclude major improvements.

POLICY S-EG-16. Encourage improvement of transit Metrolink facilities and service to and from key points in the Eastgate Subarea.

Discussion: 142nd Place SE should be established as a frequent transit network corridor that reinforces the Transit Oriented Development Area, enhances bus service connections to Bellevue College, and is designed to serve as a gateway feature for the area. In addition, it may be possible to serve more parts of the Subarea, and to serve the Subarea more efficiently, by working

with partner agencies and organizations. Eastgate needs Metro service during off-peak hours from shopping areas and along arterials.

POLICY S-EG-17. Plan for the long-range, traffic related needs in the Eastgate Subarea, including designated arterials, feeder (collector) streets, and residential streets.

Discussion: Such planning should include an evaluation of Eastgate's arterial facility needs for improvements to Eastgate Way and access to I-90.

Community Design

Policies

POLICY S-EG-18. Encourage a gateway within the I-90 interchange to accentuate Eastgate as an entry into Bellevue. Reinforce the area's location on the Mountains to Sound Greenway, accentuate Eastgate as a major entry into Bellevue, and emphasize the emerging urban character of the Eastgate I-90 corridor through the application of land use regulations, public amenity incentives, and design guidelines.

Discussion: The I-90 interchange at Eastgate is a major link between the northern and southern halves of the Subarea and is an access point for the freeway. A gateway should link both halves and include improved landscaping with seasonal color, pedestrian connections, lighting, district identification signs, and public artwork.

POLICY S-EG-19. Provide graceful edges and transitions between more intense development and existing residential land uses by maximizing Maximize the use of existing vegetation and topography to separate and buffer and maintain compatibility between different land uses through land use regulations.

Discussion: The Subarea has natural, vegetated topographic breaks between the commercial/office developments and the residential neighborhoods. These natural buffers should be retained to keep these uses separate but compatible.

POLICY S-EG-X-6. Consider design review for commercial, office, and mixed use development that promotes pedestrian-friendly design, ensures quality and a sense of permanence, promotes environmental sustainability and creates a distinct identity.

POLICY S-EG-20. Preserve the view amenities of adjacent single-family neighborhoods as development and redevelopment occurs.

POLICY S-EG-21. Discourage new development from blocking existing views from public spaces.

POLICY S-EG-22. Encourage the preservation of sufficient natural vegetation to assure amenable views. Support the overall sustainability and green identity of the I-90 corridor consistent with the Mountains to Sound Greenway by including visibly recognizable natural features in public and private development. Examples include, but are not limited to green walls, façade treatments, green roofs, retained native vegetation, and abundant natural landscaping.

~~**POLICY S-EG-23.** Diminish the affect of rooftop equipment on views from residential areas.~~

POLICY S-EG-24. Diminish the effect of rooftop equipment on views from residential areas by requiring Design-rooftop equipment to be low-profiled and screened to match the building's exterior color, building materials, and styles.

~~**POLICY S-EG-25.** Use landscaping to complement building and site design.~~

~~Discussion: Eastgate has a variety of land uses with large areas of office development. Site design should use street lighting and landscaping to accentuate walks and roads, soften paved areas, and screen development from adjacent residential uses. Large color spots of flowers should be used to accentuate areas visible from streets. When possible, plantings of trees and shrubs should be large enough to complement the scale of the building.~~

POLICY S-EG-26. Maintain the Subarea's predominantly treed skyline and encourage preservation of existing stands of trees and landscaping.

~~Discussion: Eastgate has a low profile skyline with many trees. Buildings, especially in the I-90 corridor, should respect and complement this skyline.~~

POLICY S-EG-27. Encourage the State Department of Transportation to provide landscaping that clarifies access patterns and improves the appearance of their properties.

~~**POLICY S-EG-28.** Encourage cohesive site and building design in the redevelopment of the Eastgate retail, office, and service property. Create community character in commercial, office, and mixed use development through the use of standards and incentives that support public art, street lighting, landscaping, distinctive building design, and pedestrian-oriented site design.~~

~~Discussion: Some of the Subarea's retail, office, and service uses have immediate redevelopment potential. Therefore, redevelopment should enhance the surrounding arterials with pedestrian amenities such as well defined pedestrian walkways that connect surrounding properties with street and building entrances. In addition, coordinate on site auto circulation to reduce curb cuts and improve pedestrian safety. Landscaping should be in scale with the development.~~

POLICY S-EG-X-7. Encourage the development of a dynamic public realm by integrating publicly accessible plazas, open spaces, and other gathering spaces within private development in commercial, office, and mixed use areas.

Parks and Open Space

Policies

POLICY S-EG-X-8. Integrate a system of parks, recreational facilities, and open spaces that will benefit surrounding neighborhoods and help create an environment that supports healthy lifestyles.

POLICY S-EG-X-9. Create and encourage an interconnected system of non-motorized trails as a part of public and private development within the subarea that will link community amenities, provide recreational opportunities, and offer transportation benefits.

POLICY S-EG-X-10. Develop local connections to the Mountains to Sound Greenway through the subarea in order to enhance the trail as a local and regional recreational asset.

Coordination and Partnership

Policies

POLICY S-EG-X-11. Coordinate with Bellevue College, the State of Washington, the Mountains to Sound Greenway Trust, county and regional agencies, the private sector, and others to implement the desired land use and transportation changes in this subarea plan.

POLICY S-EG-X-12. Support the evolution of Bellevue College according to its institutional mission and encourage campus growth that is physically and functionally integrated into surrounding land uses.

Planning District Guidelines

Policies

Planning District 1

~~POLICY S-EG-29.~~ Retain significant vegetation and supplement vegetation on the steep slope along the southeast edge of Kamber Road between 137th Avenue S.E. and S.E. 24th Street.

~~POLICY S-EG-31.~~ Encourage residential Planned Unit Developments (PUD) to protect steep slopes and preserve open space in the northern half of the Sunset property.

~~Discussion: Steep slope protection and open space preservation at the north end of the Sunset property should buffer views of the development from the single family residences across Kamber Road.~~

~~POLICY S-EG-32.~~ Develop multifamily housing in the northern and central portion of the Sunset property to take advantage of the site's view potential.

~~POLICY S-EG-33.~~ Encourage office uses in the southern half of the Sunset property to gain visibility and accessibility from I-90 and the frontage road.

~~Discussion: Policies S-EG-29 through S-EG-33 should guide the conditions of development as stated in these policies.~~

POLICY S-EG-34. Designate the 10.5 acre site northwest of the I-90 Business Park, known as the Old School District property, Single-family Urban Residential.

Discussion: At the reclassification stage particular attention should be given to the mitigation of traffic impacts to the adjacent residential neighborhoods that could result from the site's development. Multiple access points should be considered in order to disperse traffic. Alternatives to access from S.E. 26th Street/158th Avenue S.E. should be pursued.

POLICY S-EG-35. Designate the 4-acre Saint Andrews Church property and the northern 9.5 acres of the Latter Day Saints Temple property as Single-family High-density (SF-H).

Discussion: The development of congregate care senior housing, nursing home, or affordable housing may be appropriate for the site. A conditional use permit should be required to insure compatibility with adjacent development and insure that it is in keeping with the character of the Subarea. Multifamily Low density may be appropriate for a rezone only to accommodate congregate care senior housing, nursing homes, or affordable housing.

Planning District 2

POLICY S-EG-30. Retain sufficient vegetation on the eastern side of the Sunset property to visually buffer Bellevue Community College.

POLICY S-EG-36. Designate the 1.25-acre triangular parcel directly opposite the eastern entrance to Bellevue Community College (B.C.C.) at the south end of 145th Place S.E. Professional Office.

Discussion: In no case should there be access to both 145th Place S.E. and the B.C.C. access road. The site may be appropriate for a Multifamily Low density.

POLICY S-EG-37. Encourage light industrial development south of Kamber Road to buffer residences to the north. Screen industrial development from residences to the north of Kamber Road from light industrial development with a landscaped buffer.

Discussion: The buffer should be 30 feet wide along the south side of Kamber Road and include landscaping to accomplish maximum screening. In addition, outdoor lighting shall be shielded and loading docks shall be located away from residential land uses.

POLICY S-EG-38. Protect the surrounding neighborhoods from future development in the I-90 Business Park by observing transition area requirements from residential uses as well as maintaining landscape buffers.

Discussion: Encourage retention of significant open space in the I-90 Business Park in conjunction with utilization of the remaining Development potential. Apply the OLB-OS designation in support of this policy. [Amended Ord. 5392]

POLICY S-EG-39. Designate the 6-acre parcel south of the Squibb Building west of Vasa Creek as Office, Limited Business.

Discussion: Any proposed residential development should include a portion of the units as affordable housing. If the site is developed with residential uses, nonmotorized access should be provided to 156th Avenue S.E. Hotel, motel, and retail uses should be prohibited. Before any development occurs at this site, a traffic/ circulation study should be required to define a plan of action for dealing with increasing congestion in the area of the tunnel under I-90. Such a study would emphasize the importance of traffic considerations in development of the site to prevent further degradation and increasing safety problems.

POLICY S-EG-40. Auto sales, auto rental, and auto leasing uses are not appropriate in the Light Industrial District located east of 156th and north of I-90 nor along S.E. 24th.

Discussion: The Light Industrial District located east of 156th is currently known as the I-90 Business Park.

POLICY S-EG-X-13. Rezone master planned areas in District 2 to be consistent with the underlying Land Use designation and implement the Eastgate Land Use and Transportation project vision when existing concomitant agreements affecting the site are renegotiated or repealed and upon approval of a new Master Development Plan.

Discussion: Large master planned projects in Eastgate are subject to Master Plan/Design Review requirements and conditions associated with concomitant zoning agreements that may prevent implementation of zoning consistent with the Eastgate Land Use and Transportation Project vision. Portions of the Sunset Corporate campus, subject to concomitant agreement 14463 and the area generally associated with the I-90 Corporate Campus, subject to concomitant agreements 6015, 11390, and 33217 should only be rezoned when the existing concomitant agreements are renegotiated or repealed.

POLICY S-EG-X-14. Encourage a mixed use area between Bellevue College and I-90 into a walkable, transit-oriented center at the level of intensity needed to create a vibrant mix of offices, residences, and locally-serving shops and restaurants that are urban in character.

POLICY S-EG-X-15. Retain neighborhood-serving commercial uses through flexible zoning that allows a rich combination of neighborhood retail and services.

POLICY S-EG-X-16. Consider the use of a land use incentive system in office and mixed use areas that incentivizes provision of infrastructure and amenities that offer public benefits through the potential for additional floor area ratio (FAR) and height.
