

MEMORANDUM

DATE: November 5, 2013

TO: Chair Kasner, Members of the East Bellevue Community Council

FROM: Mark Poch, Traffic Engineering Manager

SUBJECT: 148th Avenue and Main Street Intersection Traffic Conditions

Thank you for the opportunity to discuss traffic conditions at and in the vicinity of the 148th Avenue and Main Street intersection at the November 5th East Bellevue Community Council meeting.

I am planning to briefly present information on the following:

- Scope and status of the 148th Avenue and Main Street traffic signal maintenance project (PW-M-19).
- Scope and status of the 152nd Place SE/154th Avenue SE traffic improvement project (PW-M-7).
- Status of the SCATS Phase 4 traffic adaptive signal project (PW-R-155) which includes 140th Avenue/145th Place.
- Change in traffic volumes on 148th Avenue since the reopening of southbound traffic on West Lake Sammamish Parkway.

I would also like to learn more about your specific concerns regarding traffic associated with the new Kelsey Creek Center to help scope possible future traffic studies concerning the same.
