

Medicinal Marijuana Collective Gardens
Interim Zoning Regulations

5/13/2012

On May 7, 2012, the City of Bellevue adopted interim zoning controls regarding medical marijuana collective gardens for a period of six months while the City drafts, considers, holds hearings, and adopts permanent collective garden zoning regulations.

Any application for the establishment of a collective garden is required to meet the following criteria:

- There shall be no more than one collective garden permitted on a property tax parcel.
- Collective gardens may only be located in the Light Industrial, General Commercial, Bel-Red General Commercial, and Medical Institution land use districts.
- A collective garden, or facility for delivery of cannabis produced by the garden, may not be located within 1,000 feet of schools, religious institutions, youth-oriented facilities, libraries, residential treatment facilities, or any other collective garden or delivery site.
- No collective garden shall be permitted outdoors.
- No collective garden shall be located in any manner or place where the cannabis plants can be viewed or smelled from a public place.
- Any transportation or delivery of cannabis from a collective garden shall be conducted by the collective members or designated provider so that quantities of medical cannabis allowed by RCW 69.51A.085, now or as hereafter amended, are not exceeded.
- A qualifying patient cannot be a member of more than one collective garden and must be a member of one collective garden for at least thirty days before transferring their membership to another collective garden. Each collective garden must maintain records of its membership for no less than three years.
