GOVERNMENT FINANCE OFFICERS ASSOCIATION

*Distinguished
Budget Presentation
Award*

PRESENTED TO

**City of Bellevue
Washington**

For the Biennium Beginning

January 1, 2005

President

Executive Director

The Government Finance Officers Association of the United States and Canada (GFOA) presented an Award for Distinguished Budget Presentation to the City of Bellevue, Washington for its biennial budget for the fiscal biennium beginning January 1, 2005.

In order to receive this award, a governmental unit must publish a budget document that meets program criteria as a policy document, as an operations guide, as a financial plan, and as a communication device.

The award is valid for a period of two years only. We believe our current budget continues to conform to program requirements, and we are submitting it to GFOA to determine its eligibility for another award.

City of
Bellevue

Post Office Box 90012 • Bellevue, Washington • 98009 9012

October 23, 2006

The Honorable Mayor
Members of the City Council
Residents and Stakeholders of the City of Bellevue

Dear Mayor Degginger, City Councilmembers, Residents and Stakeholders of Bellevue:

We are pleased to present the City's 2007-2008 Preliminary Operating Budget and the 2007-2013 Capital Investment Program (CIP) Plan. These combined budgets, totaling \$945 million for the 2007-2008 biennium, are recommended for your consideration.

The Operating Budget and CIP Plan include no tax increases. They recognize the fiscal constraints faced by the City while providing for emerging public safety needs. The budget and CIP plan maintain the City's high service levels, provide strategic investments in our streets, sidewalks, parks and other facilities and continue the City's commitment to work smarter and more efficiently through new technologies.

However, the preliminary Operating Budget and CIP plan do not address the fundamental challenge facing the City – how to fund and sustain the City's rapidly growing list of emerging operating and capital needs.

Bellevue residents continue to give us high marks:

- More than nine of ten residents described Bellevue as an excellent place to live. Nine in ten consider their neighborhood an excellent or good place to live.
- Eighty-eight percent of respondents feel they are getting their money's worth for their tax dollars.

Bellevue Today: Our Financial Position is Good

Today, our financial position is good as we undergo another major development cycle. Our downtown is dotted with construction cranes and office vacancy rates have plummeted. Regional economists are predicting a modest pace of growth into the foreseeable future.

This growth comes after several years of difficult times that included falling sales tax receipts and rising pension and health benefits costs. This means that our economic growth helps relieve some of the fiscal pressure by bringing our financial position back into balance. Our current and future budgets face fiscal pressures for several reasons:

- The recent recession eroded our resource base. For example, when the effects of inflation are removed, Bellevue's sales tax revenues did not return to 2000 levels until 2006;

- Decisions by the state legislature to remove \$2.4 million of Bellevue's annual taxing authority through B&O apportionment means that we will have less in the future;
- Pension and health benefit costs continue to rise at rates well above inflation;
- State and Federal legislation ranging from telecommunications policy to community development block grants can either reduce City revenues or increase City costs.

All of this means that the City has fewer dollars to meet service needs than it would have had.

Despite spending reductions in the past two budget cycles, such as reducing staffing and maintenance levels, we have emerged whole and strong from the regional recession without degradation of key programs. Standard and Poor's, one of the nation's preeminent bond rating agencies, recently affirmed Bellevue's strong management and financial capacity when it gave the City's general obligation bonds its highest rating (AAA). Of particular note was comment about the City's prudent financial management, the recognition of construction-related revenues as non-recurring, and the City's considerable restraint with regard to increasing tax levies.

One risk that has not been factored into our budget is Initiative 933. This initiative, which requires compensation for government regulation, will be on the ballot in November. Based on the timing, complexities, and uncertainties associated with this ballot measure, the Budget assumes no impact from this initiative. If this initiative passes, staff will return to Council with any necessary budget amendments in 2007.

Our Operating Budget Maintains Bellevue's Quality Services.

The Preliminary Budget maintains services and includes the addition of 17.19 new positions. Most positions added to the Preliminary Budget are revenue supported or necessary to convert limited term positions where service demands are expected to continue. Details of these budget adds can be found on the Budget Enhancement pages of each department's section in the budget document. Highlights of the proposed service additions include:

Public Safety. The budget allocates \$1.5 million for the addition of eight firefighters in response to an increasing service demand for medic calls; provides two positions for Advanced Life Support staffing including a Medical Services Officer and a ALS Data Analyst; funds contract administration for monitoring the recent ambulance transport contract and for quality control; and provides resources for an additional fire training academy to replace personnel who are expected to retire. \$1.2 million of the proposal cost is offset by additional revenues to the City from the Emergency Medical Services levy.

City Streets and Right of Way. The budget includes \$0.2 million for maintaining trees and streetscapes in the right of way; improves our pothole repair program so that repairs last longer; and provides maintenance and operating funding for signal lights that have been installed. A companion proposal, that improves landscaping in the City's right of way, is included in the Capital Investment Program.

Land Use and Development Regulation. This proposal includes \$0.3 million for the backlog in land use code amendments and to support several high priority projects.

Parks and Open Space. The budget includes the addition of two positions to enhance the quality of parks maintenance and contract oversight. These positions use existing dollars.

Human Services. The budget allocates an additional \$41,000 for human services grant requests to offset the loss of Federal money. With these additional resources, total City funding of human services is estimated at \$4.2 million for the 2007-2008 biennium.

Economic Development. The budget includes \$0.2 million for a number of economic development initiatives.

Support Services. This budget includes \$0.5 million for a fleet mechanic to maintain heavy equipment such as fire apparatus and for the staffing (1.44 positions) and support of the electronic content management system to provide more efficient access and distribution of the City's records and related business process improvements.

The budget includes an additional \$0.5 million to ensure tax compliance with existing code. The successful business and occupation tax audit program will be expanded and costs will be fully offset by additional tax collections.

The budget also includes the conversion of 1.75 limited-term employees into 1.75 full-time equivalent employees. One of these positions is an attorney to manage the ongoing body of work the department has experienced. The second position (.75) is a records clerk to support development services operations. These positions use existing resources.

Regional Services. The budget proposes the addition of one position to support the award winning e-Gov Alliance which is fully funded through other member city contributions.

The following table provides a summary of these proposed position additions:

Public Safety	
Firefighters - Aid Car Staffing	8.00
Administrative Lieutenant - *ALS Operations	1.00
Data Analyst - *ALS Data Analyst	1.00
Parks and Open Space	
Parks Maintenance - Contract Administrator	1.00
Parks Maintenance - Senior Streetscape Technician	1.00
Support Services	
Fleet Mechanical Services Technician	1.00
Electronic Content Management Administrator & Bus Process Analyst	1.44
Attorney I - LTE Conversion	1.00
Records Clerk - LTE Conversion	0.75
Regional Services	
e-Gov Alliance Project Manager	1.00
TOTAL NEW PROPOSED FTEs	17.19

This Budget Invests in the City's Infrastructure and Future

As with most budgets, this budget does not meet all of Bellevue's capital needs, nor does it fund all investment requests put forward by departments. We estimate total new CIP needs to be nearly half a billion dollars over the next decade; this capital budget funds only a fraction of that.

In total, there are 39 new or enhanced projects with additional recommended funding in the 2007-2013 CIP Plan. We believe that these projects are consistent with Council direction and were recommended by the Transportation Commission and the Parks & Community Services Board. The CIP continues to make strides toward addressing transportation demands, making investments in the downtown and investing in our parks system. Overall, this CIP is a balance between new investments and the need to maintain existing infrastructure.

The following list highlights some of the new projects included in the CIP. More detailed information on each project is available in the 2007-2013 CIP Plan accompanying the 2007-2008 Preliminary Budget.

Mobility & Transportation

PW-R-141, West Lake Sammamish Parkway/north city limit to I-90 (\$5.0 million) – funds design and implementation of a first phase of improvements as selected by the community.

PW-R-151, 145th Place SE/SE 8th to SE 24th and SE 22nd/145th PI to 156th PI SE (\$5.3 million) – funds final design and construction of the final phase of this project to include bike lanes, curb, gutter, sidewalks as well as other improvements.

PW-R-152, NE 8th Street/106th Avenue NE to 108th Avenue NE (\$4.0 million) – adds a westbound lane/turning lane on NE 8th Street;

CD-22 , Urban Boulevards/Great Streets (\$2.1 million) – funds gateway improvements at key locations and implements "urban boulevard" landscaping and corridor treatments along key neighborhood arterials.

PW-R-153, Bel-Red Corridor Plan Implementation (\$3.5 million) – early implementation project to partially fund remaining planning work, conceptual design studies, property acquisition and other implementation activities to advance the plan's key recommendations.

Parks and Open Space/Community Livability

P-AD-15, Parks Property Acquisition (\$4.9 million) – provides additional funding for future property acquisitions as opportunities arise.

P-AD-69, Bellevue Challenge Grant (\$3.5 million) – provides seed or incentive money to leverage City capital funding for a variety of partnership capital projects.

P-AD-36, Robinswood Synthetic Fields (\$2.0 million) – replaces grass soccer fields at Robinswood Park with synthetic turf for year-round use.

P-AD-75, Mercer Slough Environmental Education Center (\$5.7 million) – renovates the existing Sullivan House and develops two classroom buildings, two wetlab buildings, a multipurpose building, restroom, treehouse learning structure, slough overlook, visitor center, site improvements and parking.

P-AD-78, Citywide Streetscapes Neighborhood Program (\$2.0 million) – provides funding to improve, manage, and maintain landscape treatments and street trees on City arterials and rights-of-way. The project will focus on identifying and correcting the highest priority problem areas within the City.

Downtown Implementation Plan

CD-19, Downtown Investments/DIP Implementation (\$3.0 million) – includes planning, design, and construction for several urban livability projects focusing on mid-block crossings, great streets/themed streets, and pedestrian environment improvements.

CIP Line of Credit.

Overall, this budget continues the practice of moving more projects forward in the early years of our seven year-plan. We have often referred to this as “frontloading” the CIP Plan. Transportation, parks, and downtown projects are a priority and, to the greatest extent possible, they have been programmed in the early years of the CIP. This budget assumes that borrowing will be needed in the early years of the CIP to support cash flow needs related to frontloading. As such, the 2007-2008 budget sets aside \$2.0 million to pay the interest on borrowing costs. Should actual cash flow needs be less than anticipated, the monies set aside to pay interest costs will be reallocated to capital projects.

This Budget Includes the Practice of Funding for Contingencies

The budget includes a General Fund contingency of \$1.6 million for the biennium.

This budget does not include a contribution to the Rainy Day Reserve Fund and instead uses those resources for needed operating investments. At the May 2006 budget retreat, Council directed staff to move forward with a change to modified accrual budgeting starting in 2008. This change will positively impact Bellevue’s General Fund reserve balance and staff will return to Council for a discussion on fund balance policy at the 2007-2008 mid-biennium.

This budget places \$12 million in a Council contingency to be used at Council’s discretion. This \$12 million comes mainly from one-time monies (real estate excise tax and new construction sales tax) associated with the extraordinary economic growth that we are experiencing. I am recommending that Council not earmark these dollars for any specific capital project or other expense at this time. Instead, staff will return to Council with several alternatives for consideration.

In recent weeks, Council has heard from residents, businesses and other stakeholders seeking financial support for a multitude of new services and facilities. However, there is no ongoing revenue stream to fund or sustain these emerging needs. Additionally, the City has identified hundreds of millions of dollars in unfunded capital needs. This is the fundamental challenge facing the Council as it determines how to move forward.

Utility Funds

This Budget includes the following proposed utility rate increases for 2007 and 2008:

	<u>2007</u>	<u>2008</u>
Water	5.2%	6.6%
Wastewater	9.5%	2.5%
Storm and Surface Water	5.5%	5.0%

Rate increases are needed to fund 1) pass-through increases in wholesale Metro/King County Sewer and Cascade Water Alliance water costs to customers; 2) increasing State pension, technology, insurance and fuel costs; 3) inflationary increases in salaries, maintenance and operations costs; and 4) additional capital needs.

Average monthly Utility bills (including water, wastewater, and storm and surface water) for single family residential customers are projected as follows:

	<u>Monthly Bill</u>	<u>\$ Increase</u>	<u>% Increase</u>
2006 Utility Bill	\$89.37		
2007 Cascade		1.76	
2007 METRO		2.96	
2007 Local		1.20	
2007 Capacity Projects*		.58	
2007 Utility Bill	\$95.87	\$6.50	7.3%
2008 Cascade		1.87	
2008 Local		1.91	
2008 Capacity Projects		0.41	
2008 Utility Bill	\$100.06	\$4.19	4.4%

* Wastewater system improvements to increase trunk sewer and pumping station capacity to meet forecast growth in the downtown.

Bellevue Tomorrow: An Urban Center and World Class City

People and businesses are moving to our city in unprecedented numbers. Our downtown residential population is estimated to double in the next six years from five thousand to ten thousand residents. An increasing daytime workforce and our growing residential population will require new amenities such as restaurants, retail shops, entertainment, parks, open space, new transportation modes as well as core municipal services such as police, emergency medical services, and fire suppression.

Although this Preliminary Budget is sufficient to support our community over the next two years, we will have to reexamine our future service delivery needs and take a broader look at our capital program. While we've done an excellent job of outlining a future vision

for Bellevue as a world class city, much work remains to determine how the City will pay for capital needs to make this vision a reality. Based on recent estimates there are more than \$490 million in capital needs in several areas including:

Mobility and Transportation. More than \$263 million in projects, ranging from street widening and interchange expansions to bus and non-motorized improvement projects.

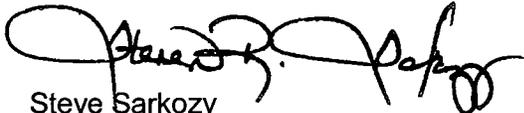

Parks and Open Space/Community Livability. More than \$126 in projects ranging from open space and trail improvements to community parks and recreation centers have been identified.

Downtown Implementation Plan. More than \$103 million in projects to improve livability and access to and through the downtown have been identified.

To meet these needs and remain competitive, the City must focus our energies on the development of a comprehensive strategy for addressing the City's long-term capital and operating needs of the community.

In closing, I want to thank all of the City's fiscal staff and program managers for their dedicated work on developing and producing this budget.

Sincerely,

A handwritten signature in black ink, appearing to read "Steve Sarkozy". The signature is fluid and cursive, with a large initial "S" and a distinct "y" at the end.

Steve Sarkozy
City Manager

Reader's Guide

Understanding a municipal budget and its specialized terminology can be a challenging exercise. This Reader's Guide has been developed to make review of the City of Bellevue's budget easier. It highlights the type of information contained in each chapter, describes some parts in detail, presents a glossary of commonly used budget terms, and gives directions for locating additional budget information.

The Reader's Guide is organized into the following sections:

A. 2007-2008 Budget Documents

This section identifies the information presented in each volume of the budget.

B. Basis of Accounting

This section discusses the basis of accounting used to present budget information.

C. Glossary

This section provides definitions for many of the terms used in the budget document.

D. Locating Additional Budget and Financial Information

This section provides a list of other documents containing information about the City's finances.

A. 2007-2008 BUDGET DOCUMENTS

The City of Bellevue has consolidated its operating and capital investment spending plans into three volumes:

2007-2008 Budget - is designed to provide the reader with a "one stop" comprehensive look at Bellevue's Budget. See the following section for details on each chapter in the 2007-2008 Budget document.

2007-2013 Capital Investment Program Plan - is designed for readers who are most interested in the City's long range plan for improving and maintaining its capital and technological infrastructure. It contains information relating to criteria for setting project priorities, maps, lists of funded projects, and project detail for all capital projects the City plans to implement between 2005 and 2011.

2007-2008 Budget Detail - is designed for those who want to get "behind the broader numbers" and explore some of the source data. It includes detail information on the resources supporting the budget as well as expenditures by type with comparisons to previous years. Also included are personnel reports and descriptions of each of the City's funds.

2007-2008 Budget Document Organization

Chapter 1 - Transmittal Letter

The Budget Transmittal Letter presents the City Manager's message on the 2007-2008 Budget and the 2007-2013 CIP Plan to the Mayor, Councilmembers, residents, and other stakeholders. The City Manager's transmittal letter highlights the priorities and issues for both operating and CIP budgets.

Chapter 2 - Reader's Guide

Chapter 3 - Executive Summary

The Executive Summary presents a high level summary of the key components of the 2007-2008 Budget. It begins with narrative sections highlighting the General Fund, Utility Funds, Parks Enterprise, and Development Services Fund Financial Forecasts. It includes information on "where the money comes from" such as taxes, grants, and beginning fund balances; "where the money goes" such as Transportation, Police, and Parks; and "what the money buys" such as personnel, maintenance and operations, and capital. The chapter includes a series of charts, graphs, and tables summarizing 2007-2008 resource and expenditure information.

Chapter 4 - Resource Summary

The Resource Summary presents 2007-2008 Budget resource information primarily through the use of graphic presentations. This chapter contains more detailed information on resources than what is included in the Executive Summary chapter.

Chapter 5 - Financial Forecasts

This chapter presents the six-year financial forecasts for the General Fund, Utility Funds, Parks Enterprise, and Development Services Fund. A forecast is a mid-range look into the future that tries to anticipate what spending and resources will be and what actions the City may need to take now based on those results. It also discusses significant factors that might influence the future including the economy, health benefit costs, collective bargaining agreements with the City's workforce, charges for water, and other factors that might increase or reduce resources or expenditures.

Chapter 6 – About Bellevue

This chapter provides background information about the City of Bellevue, such as its form of government and organization, location, population, and business climate.

Chapter 7 - Council Vision/Mission/Priorities

- The Council's vision, mission, and priorities are always "building blocks" of the budget process. In preparation for the 2007-2008 Budget, The Council met in several Budget retreats and workshops during 2006 and provided a framework for departments to use in developing their proposed budgets.

Chapter 8 - Comprehensive Financial Management Policy

This chapter presents significant City budget and accounting policies including policies relating to financial monitoring, budget preparation, revenues, and the Capital Investment Program Plan.

Chapter 9 - Stakeholder Outreach Summary

The City of Bellevue strives to involve the community in the budget process. This chapter describes Bellevue's survey efforts and public hearing process that assures stakeholder input on budget priorities.

Chapter 10 through Chapter 26 - Department Budgets

The 2007-2008 Budget marks the first time that the City of Bellevue is publishing a budget using an automated Budget planning and development system. The system, called GovMax, allows the city to facilitate its budget development and business processes. The new system serves as a planning tool and stores background financial data in detail for every City fund including salary schedules, filled and vacant position information, benefit costs, and information on CIP projects. The system will support an iterative planning process, keeping track of changes in the budget from initial request through various stages of departmental, budget office, City Manager and Council review and approval of a final budget.

The benefits of a strong budget system include automating manual processes, improving data collection and workflow, strengthening analysis capabilities, reducing data entry and re-keying, and reducing time spent compiling numbers, thus allowing additional time for analysis.

Each department presentation has a standard format and presents the budget at the department level and by major program areas. Information at the department level is shown on the pages that have only the department title such as "City Attorney", "Fire", or "Utilities". Information at the program level includes the program area title as well as the department name such as Fire, followed by Fire Suppression & Rescue or Utilities, followed by

Department level information: The first section of each department presentation is at the departmental level and includes a *Program Outcome Statement*, a discussion of *Services and Accomplishments*, an *Organizational Chart*, and *Major Challenges for the Biennium*.

- **Program Outcome Statement** - This section addresses the mission of the department and can be expressed as conditions or other values resulting from the conduct of the department's activities. For example, a Police Department outcome could be expressed as a safe city. In the 2007-2008 Budget the department can use outcome statements or a more traditional mission statement that includes the department's major goals and reflects the department's activities and programs.
- **Services and Accomplishments** - This section discusses the services provided by the department and its major accomplishments of the previous biennium.
- The next department level presentation provides four different financial summaries:
 - **Budgeted Cost Summary** – provides the budgets for each department program area;

- **Expenditure Category Summary** shows what the money is spent on including (1) *personnel* (wages and benefits), (2) *interfunds* (services provided by one department on behalf on another), (3) *M & O* (maintenance and operational expenditures), and (3) *Capital* (large equipment purchases or on the city's infrastructure including roads, parks, land acquisition and other commodities that are depreciable).
- **Funding Summary** - a summary of the funding sources that support the expenditure activity;
- **FTE Summary** – the Full Time Equivalent (FTE) positions assigned to each program area.
- **2007-2008 Work Initiatives** – are a list or discussion of the major work activities that the department plans to conduct during the biennium.
- **Major Challenges for the Biennium** – discusses the issues and challenges faced by the department during the two years of the budget. The discussion could include discussions of increased workload, new programs, improvements in service delivery and other factors that the department needs to consider to assure quality program delivery.

Program level information: Information at the program level follows a presentation pattern similar to the department level presentation. In addition, the program level presentation includes a *Summary of Services Provided*, key performance measures, including actual performance results for 2005 and targets through 2008. Additionally, the program level presentation includes a discussion of departmental performance, and a section titled *Program Notes* to highlight program areas for the reader's benefit.

B. BASIS OF ACCOUNTING

The City budgets and accounts for all funds on a cash basis. This means that transactions (i.e., resources or expenditures) are recognized only when cash is increased or decreased. For example, an expenditure for consulting services is budgeted when the payment for the service is expected to be made rather than when the service itself is expected to be performed. The City of Bellevue chose to use the cash basis of accounting because it is generally accepted as the easiest basis of accounting to understand and explain.

At year-end, the City prepares financial statements on the modified or full accrual basis, as required by the State-prescribed Budgeting, Accounting, and Reporting System (BARS), and by generally accepted accounting principles (GAAP). These financial statements are presented in the City's Comprehensive Annual Financial Report (CAFR).

C. GLOSSARY

The following are definitions of some of the more common terms one may encounter in reviewing this budget document.

ACCRUAL BASIS

A basis of accounting in which transactions are recognized at the time they are incurred, as opposed to when cash is received or spent.

AMENDED BUDGET

The amended budget is defined as the authorized mix and level of services, in place as of the last budget amendment ordinance, adjusted for reorganizations so that costs are comparable to the new biennial budget.

Unless otherwise noted, the 2001, 2002, 2003, and 2004 budget values shown in this document have been amended. They represent the adopted budgets plus additional expenditure appropriations resulting from City Council decisions made throughout the year and any reorganizations.

APPROPRIATION

A legal authorization granted by the legislative body (City Council) to make expenditures and to incur obligations for specific purposes. For operating fund budgets, these appropriations lapse at the end of each fiscal biennium. For nonoperating/special purpose funds such as the Capital Investment Program Funds, appropriations do not lapse but continue in force until fully expended or until the purpose for which they were granted has been accomplished, abandoned or revised by the City Council.

ASSESSED VALUATION (AV)

The fair market value of both real (land and buildings) and personal property as determined by the King County Assessor's Office for the purpose of calculating property taxes.

ASSET

Resources owned or held by a government that have monetary value.

BARS

The acronym "BARS" stands for Budgeting, Accounting, and Reporting Systems as prescribed by the State of Washington.

BASE BUDGET

Cost of continuing the existing levels of service in the current budget biennium.

BEGINNING FUND BALANCE

A revenue account used to record resources available for expenditure in one fiscal biennium because of revenues collected in excess of the budget and/or expenditures were less than the budget in the prior fiscal biennium.

BIENNIAL BUDGET

The financial and operating plan for the City that establishes a two-year appropriation in accordance with Washington State law.

BOND

A long-term "IOU" or promise to pay. It is a promise to repay a specified amount of money (the face amount of the bond) on a particular date (the maturity date). Bonds are typically used to finance capital projects.

BUDGET

A financial operating plan for a given period which displays the estimated expenditures to provide services or to accomplish a purpose during that period together with the estimated sources of revenue (income) to pay for those expenditures. Once the fund totals shown in the budget are appropriated by the City Council, they become maximum spending limits.

BUDGET CALENDAR

The schedule of key dates that a government follows in the preparation and adoption of the budget.

BUDGETARY BASIS

This refers to the basis of accounting used to estimate financing sources and uses in the budget. This generally takes one of three forms: Generally Accepted Accounting Principles (GAAP), cash, or modified accrual.

BUDGETARY CONTROL

The control or management of a government in accordance with the approved budget for the purpose of keeping expenditures within the limitations of available appropriations and resources.

CAPITAL ASSET

Property that has an initial useful life longer than one year and that is of significant value. The useful life of most capital assets extends well beyond one year. Includes land, infrastructure, buildings, renovations to buildings that increase their value, equipment, vehicles, and other tangible and intangible assets.

CAPITAL EXPENDITURE

An outlay that results in or contributes to the acquisition or construction of a capital asset.

CAPITAL INVESTMENT PROGRAM (CIP)

The CIP is a major planning tool of the City of Bellevue in which needed improvements to the City's facilities and infrastructure are identified, prioritized, priced, and discussed with the City Council and public. Funding from a variety of sources, including local taxes, is matched with the costs of these projects. After the City Council has reviewed and approved the program, these projects are implemented. The CIP covers a seven-year period and is updated every two years.

CAPITAL PROJECT

Major construction, acquisition, or renovation activities that add value to a government's physical assets or significantly increase the useful life.

CASH BASIS

A basis of accounting in which transactions are recognized only when cash is increased or decreased.

CIP

The acronym "CIP" stands for Capital Investment Program. It is a seven-year plan of capital improvements approved by the Council on a biennial basis. This plan is a blueprint which City staff can follow in implementation of the listed projects.

CONSTANT OR REAL DOLLARS

The presentation of dollar amounts adjusted for inflation to reflect the real purchasing power of money as compared to a certain point in time in the past.

CONSUMER PRICE INDEX (CPI)

A statistical description of price levels provided by the U.S. Department of Labor. The index is used as a measure of the increase in the cost of living (i.e., economic inflation).

CONTINGENCY

A budgetary reserve set aside for emergencies or unforeseen expenditures not otherwise budgeted.

CONTRACTUAL SERVICES

Services rendered to a government by private firms, individuals, or other governmental agencies. Examples include utilities, rent, maintenance agreements, and professional consulting services.

DEBT SERVICE

The cost of paying principal and interest on borrowed money according to a predetermined payment schedule.

DEFICIT

The excess of an entity's liabilities over its assets or the excess of expenditures or expenses over revenues during a single accounting period.

DEPRECIATION

Expiration in the service life of capital assets attributable to wear and tear, deterioration, action of the physical elements, inadequacy, or obsolescence.

DESIRED PROGRAM OUTCOMES

The consequence of what a program or activity does. An end result of a process.

DEVELOPMENT-RELATED FEES

Those fees and charges generated by building, development, and growth in a community. Included are building and street permits, development review fees, zoning, platting, and subdivision fees.

DIRECT SERVICES OVERHEAD

Costs for centrally-provided internal services which can be identified to specific departments and which departments can control how much of the service they use (e.g., postage, word processing, long-distance phone charges).

DISBURSEMENT

The expenditure of monies from an account.

DISTINGUISHED BUDGET PRESENTATION AWARDS PROGRAM

A voluntary awards program administered by the Government Finance Officers Association to encourage governments to prepare effective budget documents.

DOUBLE BUDGETING

The result of having governmental funds or departments purchase services from one another rather than from outside vendors. When internal purchasing occurs, both the "buyer" and the "seller" of services must have a budget. The "buyer" has to budget the expenditure and the "seller" has to have resources in its budget to provide the service. This type of transaction results in inflated budget values because the same expenditure or revenue dollar is budgeted twice, once in each fund's budget. The budget has not been adjusted to reflect double budgeting.

EFFECTIVENESS MEASURE

A measure used to determine if a program or department is achieving its desired outcome. The degree to which a performance objective is being achieved.

EFFICIENCY MEASURE

This measure reflects the relationship between work performed and the resources required to perform it. It demonstrates how well the available resources are being used.

ENCUMBRANCE

The commitment of appropriated funds to purchase an item or service. To encumber funds means to set aside or commit funds for a specified future expenditure.

EXPENDITURE

An expenditure is, in simple terms, the payment for goods and services. In a cash budget such as the City of Bellevue's, expenditures are recognized only when the cash payments for the cost of goods received or services rendered are made.

EXPENSE

Charges incurred (whether paid immediately or unpaid) for operations, maintenance, interest or other charges.

FINANCIAL POLICY

A government's conscious decision on the financial direction it wants to take regarding revenue, spending, and debt management in relation to government services, programs, and capital investment. Financial policy provides an agreed-upon set of principles for the planning and programming of government budgets and their funding.

FISCAL BIENNIUM

In accordance with Washington State Law (RCW 35A.34), a fiscal biennium is the period from January 1 of each odd-numbered year through December 31 of the next succeeding even-numbered year (i.e., January 1, 2003 - December 31, 2004).

FISCAL YEAR

A twelve-month period designated as the operating year for accounting and budgeting purposes in an organization. The City of Bellevue's fiscal year is the same as the calendar year.

FIXED ASSETS

Assets of long-term character that are intended to continue to be held or used, such as land, buildings, machinery, furniture and other equipment.

FULL-TIME EQUIVALENT (FTE)

The acronym "FTE" stands for Full-Time Equivalent and represents the measure by which the City accounts for its staffing. A regular City employee working a standard 40-hour week is counted as 1.0 FTE; a regular City employee working fewer than 40 hours per week is counted as a portion of an FTE (e.g., 30 hours a week is counted as 0.75 FTE).

FUND

Governmental accounting systems are organized and operated on a fund basis. A fund is an independent financial and accounting entity with a self-balancing set of accounts in which financial transactions relating to resources, expenditures, assets, and liabilities are recorded. Funds are established to account for the use of restricted revenue sources and, normally, to carry on specific activities or pursue specific objectives. Funds may be established by the State Constitution, State statute, City Charter, City ordinance, or Finance Director.

FUND BALANCE

The difference between resources and expenditures.

GAAP

Generally Accepted Accounting Principles. Uniform minimum standards for financial accounting and recording, encompassing the conventions, rules and procedures that define accepted accounting principles.

GENERAL CIP REVENUE

General CIP Revenue is defined as the revenue dedicated to CIP use derived from the 0.5% local optional sales tax, 0.03% business and occupation tax, interest earnings on unexpended balances, and any miscellaneous unrestricted revenues. General CIP Revenue is allocated to each non-utility program area based on overall priorities.

GENERAL OBLIGATION (G.O.) BOND

This type of bond is backed by the full faith, credit, and taxing power of the government.

GRANTS

A contribution by a government or other organization to support a particular function. Grants may be classified as either operational or capital, depending upon the grantor.

INDIRECT SERVICES OVERHEAD

Cost of centrally-provided internal services for which there is a citywide benefit that cannot be readily identified to specific departments (e.g., financial services).

INFRASTRUCTURE

The physical assets of a government (e.g., streets, water, sewer, public buildings, and parks).

INTERFUND SERVICES REVENUE

The term "interfund" refers to transactions between individual funds of the City of Bellevue (rather than transactions between the City and private companies, other governments, or vendors). From a budgeting and accounting perspective, the service receiver must budget and pay for the service received. The service provider will budget for the cost of providing the service and receive revenue in the form of a payment from the service receiver. Interfund revenues can be either payment for intracity services or contributions of revenue from one City organization to another. Examples of interfund revenues include equipment rental charges, self-insurance premiums, and contributions for debt service obligations. As can be seen from this description, interfund activities inflate both expenditures and revenues; this causes what we refer to as "double budgeting".

INTERGOVERNMENTAL REVENUE

Funds received from federal, state, and other local government sources in the form of grants, shared revenues, and payments in lieu of taxes.

INTERNAL SERVICE CHARGES

The charges to user departments for internal services provided by another government agency, such as data processing or insurance funded from a central pool.

LAPSING APPROPRIATION

An appropriation made for a certain period of time, generally for the budget biennium. At the end of the specified period, any unexpected or unencumbered balance lapses or ends, unless otherwise provided by law.

LEADERSHIP TEAM

The City's administrative decision-making body consisting of all department heads, the deputy and assistant city managers, and the City Manager.

LEOFF I

The acronym "LEOFF I" stands for Law Enforcement Officers and Firefighters I retirement program.

LEVY

To impose taxes for the support of government activities.

LIMITED-TERM-EMPLOYEE (LTE)

The acronym "LTE" stands for Limited Term Employee and represents an individual hired full or part-time for a specific project or purpose with an employment period not to exceed three years.

LINE-ITEM BUDGET

A budget prepared along departmental lines that focuses on what is to be bought.

LONG-TERM DEBT

Debt with a maturity of more than one year after the date of issuance.

M&O (MAINTENANCE AND OPERATING) COSTS

Expenditure category that represents amounts paid for supplies (e.g., office supplies, repair and maintenance supplies, minor equipment, and software), and other services and charges (e.g., ongoing contracts, professional services, communications, rent, utilities, and intergovernmental services).

MAINTENANCE OF CURRENT SERVICE LEVELS

A budget concept aimed at identifying the additional level of resources needed in a particular budgetary period to provide the same quality level of service as was provided in the prior budgetary period. Factors which might affect the cost of maintaining a current service level from year to year include inflation and mandatory cost changes, and changes in service volumes.

NET BUDGET

The legally adopted budget less double-budgeted items such as interfund transfers and interdepartmental charges.

NONOPERATING/SPECIAL PURPOSE FUND

A budgeting, accounting, and reporting entity established to receive revenues typically of a noncontinuing nature and to make expenditures for noncontinuing projects or programs. It usually has a short-term life, after which the fund will be disbanded. Although budgets may be established on an annual or biennial basis, appropriations are nonlapsing and continue from biennium to biennium.

OBJECT OF EXPENDITURE

An expenditure classification, referring to the lowest and most detailed level of classification, such as electricity, office supplies, land, or furniture.

OBJECTIVE

Something to be accomplished in specific, well-defined, and measurable terms and that is achievable within a specific time frame.

OBLIGATIONS

Amounts which a government may be legally required to pay out of its resources. They include not only actual liabilities, but also encumbrances not yet paid.

OPERATING COSTS

Operating costs (also called maintenance and operating costs or m&o costs) are planned expenditures, covered in the City's Operating Budget, for conducting continuing service programs based at the physical facilities constructed, reconstructed, or acquired by the Capital Investment Program. For example, the costs of personnel and supplies for maintaining a park property once it is constructed are "operating costs," while the costs of constructing the park itself are capital costs. Another example of an operating cost would be the necessity of paying for electricity to run a traffic signal once a CIP-financed intersection has been constructed.

OPERATING FUND

Operating funds have biennially-established balanced budgets which lapse automatically at the end of the fiscal biennium. These funds carry on the traditional service operations of a municipality.

OPERATING EXPENDITURES

The cost of personnel, materials, and equipment required for a department to function.

OPERATING REVENUE

Funds that the government receives as income to pay for ongoing operations. It includes such items as taxes, fees from specific services, interest earnings, and grant revenues. Operating revenues are used to pay for day-to-day services.

OPERATING TRANSFERS

Amounts transferred from one fund to another to assist in funding the services for the recipient fund.

PAY-AS-YOU-GO BASIS

A term used to describe a financial policy by which capital outlays are financed from current revenues rather than through borrowing.

PERFORMANCE BUDGET

A budget wherein expenditures are based primarily upon measurable performance of activities and work programs.

PERFORMANCE MEASURE

An indicator which measures the degree of accomplishment of an activity. The three types used in the City of Bellevue are:

- Effectiveness - the degree to which performance objectives are being achieved.
- Efficiency - the relationship between work performed and the resources required to perform it. Typically presented as unit costs.
- Workload - a quantity of work performed.

PERFORMANCE INDICATORS

Specific quantitative and qualitative measures of work performed as an indicator of specific department or program activity or accomplishment.

PERSONNEL

Expenditure category that represents amounts paid for personal services rendered by employees (e.g., salaries and overtime pay) and benefits paid by the City.

POLICY

A policy is a guiding principle which defines the underlying rules which will direct subsequent decision-making processes.

PROGRAM

A group of related activities and projects which seek to accomplish a common objective.

PROGRAM AREA

The CIP can be described as having eleven program areas. They are: Transportation, Parks, General Government, Public Safety, New City Hall, Community and Economic Development, Neighborhood Enhancement Program, Neighborhood Investment Strategy, Water, Sewer, and Storm Drainage. Three program areas are further segmented into established project categories as follows: Transportation (Roadways, Intersections, Walkways/ Bikeways, and Maintenance/Minor Capital); Parks (Park Acquisition and Development and Park Redevelopment); and Community and Economic Development (Community Development and Economic Development).

PROGRAM BUDGET

A method of budgeting whereby the services provided to the stakeholders are broken down in identifiable service programs or performance units. A unit can be a department, a division, or a workgroup. Each program has an identifiable service or output and objectives to effectively provide the service. The effectiveness and efficiency of providing the service by the program is measured by performance indicators.

PROGRAM REVENUE

Revenues earned by a program, including fees for services, licenses and permits, and fines.

PROJECT COST

The project cost is an estimate of the resources required to complete the capital project as described on the project description page. Many of the project costs shown in the CIP Plan are preliminary in nature since no significant engineering has been done which would allow for more specific estimates to be produced. Most cost estimates are produced using rule-of-thumb approximations as opposed to specific lists of materials.

PROJECT PRIORITIZATION CRITERIA

Individual capital projects are ranked by priority which has an impact on funding and scheduling in the CIP Plan. In the review process, department staff, with input from Councilmembers, boards and commissions, and other interested groups, identify factors which would make one project of higher priority than another. These factors are termed project prioritization criteria.

PUBLIC HEARING

A public hearing is a specifically designated time, place, and opportunity for citizens, community groups, businesses, and other stakeholders to address the City Council on a particular issue. It allows interested parties to express their opinions and the City Council and/or staff to hear their concerns and advice.

RCW

The acronym "RCW" stands for Revised Code of Washington which is Washington State Law.

RESERVE

An account used either to set aside budgeted resources that are not required for expenditure in the current budget biennium or to earmark resources for a specific future purpose.

RESOLUTION

A special or temporary order of a legislative body; an order of a legislative body requiring less legal formality than an ordinance or statute.

RESOURCES

Total dollars available for appropriation, including estimated revenues, interfund transfers, other financing sources such as the sale of fixed assets, and beginning fund balances.

RESTRICTED/UNRESTRICTED REVENUE

A revenue is considered restricted when its receipt is either based upon the reasonable expectation that fees or charges paid to the City will be utilized to provide a specific product, service, or capital asset to the payor, or their receipt is directly tied to an expenditure. Revenue is also considered restricted when voters or the City Council has designated it for a specific purpose by ordinance or resolution. Revenues not designated restricted are considered unrestricted.

REVENUE

Sources of income received during a fiscal year, operating transfers from other funds, and other financing sources such as the proceeds derived from the sale of fixed assets.

REVENUE BOND

A type of bond backed only by the revenues from a specific enterprise or project, such as a utility.

SERVICE LEVEL

Services or products which comprise actual or expected output of a given program. Focus is on results, not measures of workload.

SOURCE OF REVENUE

Revenues are classified according to their source or point of origin.

TAXES

Compulsory charges levied by a government for the purpose of financing services performed for the common benefit of the people. This term does not include specific charges made against particular persons or property for current or permanent benefit, such as special assessments.

TRAINING POOL EMPLOYEE

An employee who is hired into a position created for the purpose of training for a regular position of the City. This classification is typically used for positions that required extensive training such as police officers or dispatchers.

TRANSITIONAL EMPLOYEE POSITION

An employee who is hired into a position created for the purpose of training for a regular position when the incumbent has submitted a resignation or the manager knows the position will be vacant within a year.

UNCOMMITTED RESOURCES

The net resources available after meeting the estimated cost of providing existing levels of service which may be used to support new or qualitatively expanded service programs or resource reductions.

UNDESIGNATED FUND BALANCE

The portion of a fund's balance that is not restricted for a specific purpose and is available for general appropriation.

USER CHARGES

The payment of a fee for direct receipt of a public service by the party who benefits from the service.

UTILITY SERVICES

A term used to describe services provided by Bellevue's three self-supporting utility funds: Sewer, Storm & Surface Water, and Water.

VARIABLE COST

A cost that increases/decreases with increases/decreases in the amount of service provided such as the payment of a salary.

WORKLOAD MEASURE

A unit of work accomplished (e.g., number of permit applications reviewed, the number of households receiving refuse collection service, or the number of burglaries investigated).

D. LOCATING ADDITIONAL BUDGET AND FINANCIAL INFORMATION

The City of Bellevue publishes a number of documents that provide information about the City's finances. Some of the more important documents that might be of interest include:

- The Comprehensive Annual Financial Report (CAFR) presents the year-end financial status and results of operations for each of the City's funds, as well as various statistical and demographic information about the City of Bellevue.
- Quarterly Monitoring Reports discuss the status of operating and CIP resources and expenditures each quarter including a year-end projection of probable outcomes.
- Annual Performance Report shows selected performance measures for all departments. This document shows target and actual performance for the year, where actual performance has met or exceeded the target, and describes steps being taken to improve performance.
- ICMA Comparative Cities Report compares Bellevue's performance to other cities nationwide.
- Our financial reports can be found at <http://www.cityofbellevue.org/582.htm> .

Requests for any of these documents or inquiries about other financial programs of the City of Bellevue should be directed to:

Ms. Jan Hawn
 Finance Director

Executive Summary

This chapter presents a high level summary of the key components of the 2007-2008 Budget. More detailed revenue and expenditure information can be found in subsequent chapters of this document.

The Executive Summary is organized into the following sections:

A. General Fund Financial Forecast Summary

This section provides a brief overview of the 2007-2008 General Fund Financial Forecast.

B. Utility Funds Financial Forecast Summary

This section provides a brief overview of the 2007-2008 Utility Funds Financial Forecast.

C. Parks Enterprise Fund Financial Forecast Summary

This section provides a brief overview of the 2007-2008 Parks Enterprise Fund Financial Forecast.

D. Development Services Fund Financial Forecast Summary

This section provides a brief overview of the 2007-2008 Development Services Fund Financial Forecast.

E. Budget Summary

This section presents summary resource and expenditure budget and trend information through the use of graphs and tables for the total City budget and its subcomponents (i.e., operating, special purpose, and capital investment program funds).

F. Debt Information

This section presents information about Bellevue's total general obligation debt capacity, current general obligation and revenue bond debt, and annual debt service requirements.

A. GENERAL FUND FINANCIAL FORECAST SUMMARY

The General Fund Financial Forecast (the Forecast) illustrates that our revised revenue base will be able to maintain the City's existing quality and mix of services through 2008. The Forecast builds on the proposed 2007-2008 budget's mix and level of resources and anticipated service levels. It calculates future resource and expenditure estimates based on current budget performance, historical trend analysis, current economic information, input from other governments and industries, and feedback from local economists.

The following summarizes the results of the forecast analysis:

Summary

While the short-term financial outlook is positive, the long-term financial outlook includes projected shortfalls in 2009 through 2012. These shortfalls are largely due to high rates of expenditure growth, such as escalating State pension contributions and a loss of B&O taxing authority in 2008.

Economic Outlook

The Forecast reflects the current strength in the local economy and assumes continued growth. Bellevue is in the midst of a major development cycle, expecting to add 2.8 million square feet of office and retail space over the next several years. Employment growth in the region continues to outpace the national average, which in turn contributes to personal income growth and regional population increases. Bellevue expects the residential downtown population to add more than 5,000 people over the forecast period. The increased urbanization of Bellevue is expected to provide additional revenues to the City, as well as additional service demands.

While the biennial outlook is strong, the Forecast shows growth in the later years at a decelerated rate. Regional economists are predicting a slowing of employment growth and retail sales. Development is expected to peak during the biennium and then moderate. Our downtown residential population is estimated to double in the next six years. An increasing daytime workforce and growing residential population will require new amenities as well as additional core municipal services. Key factors such as employment, inflation, and personal income impact the growth rate of the City's revenues, and in-turn the ability to support service demands.

Budget Growth

Proposed budget modifications incorporates increased service needs, including the addition of 17.19 FTEs, and estimates of revenue growth. Projected increases in revenues are sufficient to support service additions and brings the budget into balance for 2007 and 2008. However, as the Forecast illustrates, revenues are projected to fall short of expenditures by \$1.2 million in 2009, due in-part to the estimated impact of B&O apportionment. This deficit diminishes to \$300,000 by 2012. On average, resource growth falls just short of expenditure growth throughout the forecast period. The average annual expenditure growth rate is 4.0% over the forecast period.

See Chapter 5 - Financial Forecasts for more information on the 2007-2012 General Fund Financial Forecast.

B. UTILITY FUNDS FINANCIAL FORECAST SUMMARY

Introduction

The following key financial policies approved by Council in 1995, and updated in subsequent budgets, are incorporated in these financial forecast results:

- Consolidated reserve funding policies which define target and minimum reserve levels for each Utility fund;
- Operating reserve management policies which stipulate the transfer of greater-than-anticipated year-end reserves (ending fund balances) to the CIP Renewal & Replacement (R&R) Account;
- Capital reinvestment policies for future replacement of Utility infrastructure systems which base transfers to the CIP R&R Account on long-term capital investment;
- System expansion and connection policies which stipulate all capital related Capital Recovery Charges (CRC) and Direct Facility Charges will be deposited directly to the CIP Renewal & Replacement (R&R) Account; and
- Rate-planning policies which set rates at a level sufficient to cover current and future expenses and maintain reserves consistent with Utility financial policies and the long-term financial plans, and to pass through wholesale cost increases directly to customers. Inflationary indices are used as a basis for evaluating rate increases but no longer limit the growth in local programs.

These forecasts assume no increases in Utility staffing levels or significant changes in current service programs for maintenance and operations, which is consistent with ongoing department cost containment efforts.

Significant Issues

Significant issues expected to impact the Utilities current and future financial performance are briefly discussed below.

King County/METRO Wastewater Treatment Costs

Sewage treatment charges from King County/METRO will increase by 9.2 % (from \$25.60 to \$27.95) per residential equivalent unit in 2007. This increase is primarily driven by higher debt service resulting from increased capital costs (including the Brightwater treatment plant). Since this rate increase is expected to cover cost increases for both 2007-2008, there will be no rate increase for 2008. Per Council-adopted financial policies, wholesale cost increases are passed through to the customer. The increase in wastewater treatment costs will result in an increase to Bellevue ratepayers of approximately 7.0% in 2007.

Cascade Water Alliance

The Cascade Water Alliance (Cascade) has developed its proposed 2007 operating and capital budgets. Cascade's proposed 2007 operating budget is \$20 million, or 6.4% higher than 2006. Cascade's 2007 wholesale charges to Bellevue are currently projected to increase by \$1.1 million or 10.8%. This increase will be reduced by a one-time credit of \$0.5 million in 2007, resulting in a net increase to Bellevue of 5.8% or approximately \$0.6 million. Additionally, a one-time contingency of \$0.2 million for anticipated meter replacement has been budgeted in 2007, resulting in a total increase to the City of \$0.8 million, or 7.3%. Consistent with Council adopted policies of gradual and uniform rate increases, the impact of these one-time adjustments will be levelized over the 2007-2008 biennium. This will result in rate increases of 5.2% per year in 2007 and 2008 for wholesale water purchases.

New Capital Projects

There are several capital projects highlighted as being high priority during, and just beyond, this forecast period. These include projects to meet sewer capacity needs in the central business district and water infrastructure renewal projects.

Sensitivity and Risks

Each item discussed above could potentially affect annual Utility costs and rate requirements over the forecast period. Changes in inflation rates for various services can also affect annual cost levels. Each projection made in this forecast is based on the best information currently available, but actual costs and revenues in future years may be higher or lower than forecasted amounts, as changes in prevailing economic conditions or other circumstances influence actual Utility financial outcomes.

See Chapter 5 – Financial Forecasts for more information on the 2007-2012 Utility Financial Forecast.

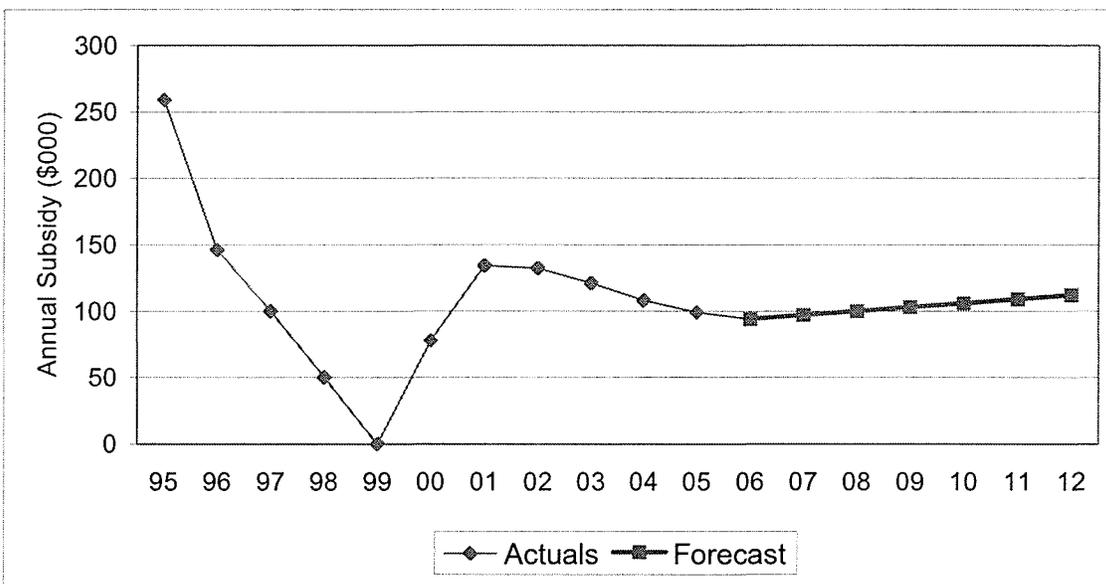

C. PARKS ENTERPRISE FUND FINANCIAL FORECAST SUMMARY

Introduction

The Parks Enterprise Fund accounts for the services provided by the Enterprise Program within the Parks & Community Services Department. These services include golf, tennis, aquatics, adult sports, and facility rentals. Enterprise Programs are primarily supported through user fees but attempt to serve all residents regardless of ability to pay through the use of scholarships, sponsorships and fee waivers. The Parks Enterprise Fund receives a subsidy payment from the General Fund to ensure that programs are accessible to all Bellevue residents.

General Fund Subsidy

- The forecast shows that the Parks Enterprise Fund can continue to make progress in reducing the General Fund Subsidy to about \$100,000 per year.
- The graph below shows the actual and forecasted subsidy payment from the General Fund:

Note: Between 1997 and 1999, the Parks Enterprise Fund received an annual payment of \$140,000 from King County to offset a portion of the operating costs associated with the Bellevue Aquatic Center. Starting in 2001, the subsidy includes an adjustment for the impact of the benefited employee rule changes.

- The Aquatic Center continues to be the driver behind the need for a General Fund Subsidy throughout the forecast period. Due to the nature of Aquatic Center programs, the majority of services provided at this facility are not “Full Cost Recovery” services. Most of these services recover only the direct program costs in an effort to provide affordable and accessible programs to youth and physically challenged participants. In addition to the General Fund subsidy, approximately \$300,000 of other Parks Enterprise Fund revenues are needed to support the Aquatic Center operation each year. Overall, this level of subsidy is consistent with the financial performance that was anticipated in 1995 when the City took over the pool.

Parks Enterprise Fund Reserves

Parks Enterprise Fund reserves will be managed within the targeted reserve level of 2-months operating expenses, or approximately \$500,000 to \$780,000 over the forecast period.

Enterprise Capital Improvements

The Parks Enterprise program funds the Enterprise Facility Improvements Project (CIP project P-R-2), including capital projects at the Bellevue Golf Course. In 1999, the City acquired the 2.79-acre Miller Property primarily to protect the golf course maintenance facility hours of operations from residential development directly adjacent to the maintenance facility. The 2005-2011 Capital Investment Program Plan included sufficient capital funding from both Enterprise user fees and General CIP funding to make the final balloon payment for the Miller property without the need for a long-term interfund loan. This approach will continue to protect the viability of the golf course operations, while allowing for the ongoing renovation of the Bellevue Golf Course and the ongoing subsidy of the Bellevue Aquatics Center.

In December 2006, the City's contract with MRA, Inc. to operate the Bellevue Municipal Golf Course will expire. Consistent with contract policies, the City issued a request for proposal (RFP) in April 2006 to determine if there were other qualified parties interested in submitting bids to compete for this significant body of work. In May 2006, seven bids were received and the City is evaluating the revenue sharing, level of service, and capital contributions that may be available. Given the magnitude of this service, City Council action to approve a vendor will be requested this fall, and the final Enterprise Financial Forecast will be amended to reflect the final terms of the approved contract.

Budget Assumptions and Issues

Below are some of the major assumptions used in developing the early outlook 2007-2012 forecast:

- Parks Enterprise Fund revenues are assumed to increase at the same rate as expenditures from 2007-2012, or roughly 3.5% per year.
- City Council will be discussing pricing and resident/non-resident access policies as part of the Recreation Program Plan Update. While these policy decisions could impact the pricing strategy and customer base for Enterprise Programs, no fundamental policy changes have been incorporated into this forecast update.
- Golf course revenues and expenses were based on the terms contained in current golf course operator contract. The Parks Enterprise Financial Forecast will be updated to incorporate final terms negotiated between the selected vendor and the City.
- No new programs or capital investments were included in this forecast or the Parks Enterprise Fund budget.

See Chapter 5 - Financial Forecasts for more information on the 2007-2012 Parks Enterprise Fund Financial Forecast.

D. DEVELOPMENT SERVICES FUND FINANCIAL FORECAST

Executive Summary

The Development Services Fund is responsible for administering the development review and inspection process, land use and comprehensive planning, and code enforcement.

The Development Services Fund forecast reflects continued growth in development activity through 2007 as a result of the addition of several major projects in 2005-2006. Additional staffing and contracted services were added in response to this rapid increase in activity.

Beginning in 2010, development activity levels stabilize and reflect moderate growth throughout the forecast period.

Background

Bellevue continues to experience unprecedented growth with the completion of several major projects (e.g. Lincoln Square residential tower, City Hall, Ashwood Commons Phase I) and the initiation of new projects (e.g. Washington Square, Bravern/Schnitzer NW, Ashwood Commons Phase II) in 2005 and 2006. In response to this rapid increase in activity, 32 Full-Time Employees (FTEs) have been added in 2005 and 2006 to respond to the high demand for project review and inspection. The construction valuation for issued permits, considered a key barometer of development activity, exceeded estimates in 2005 and 2006. This trend is expected to continue through 2007.

2007-2012 Outlook

Office vacancy rates in the central business district are a key indicator of the interest in development activity. Rates have fallen to 8.3% in the last year, which indicates that development activity will remain strong through the early years of the forecast (2007-2008). However, the number of design review applications (an early indicator of development activity) received through the first quarter of 2006 indicates that the demand for major projects in the central business districts will decline towards the latter part of 2008. In addition, as interest rates continue to rise, the demand for single family additions and remodel projects is expected to decline as well. As a result, the forecast reflects a decline in revenue (overall resources less the General Fund subsidy) from 2007 to 2009 by 32% or \$4.6 million, followed by moderate growth in revenue of 2.6% beginning in 2010. The forecast does not assume the continuation of the level of development activity experienced in 2006 and projected in 2007.

**Development Services Fund
2007-2012 Financial Forecast
(in \$000)**

	2007	2008	2009	2010	2011	2012

Ending Reserves	\$10,165	\$8,188	\$6,261	\$5,309	\$4,331	\$3,328

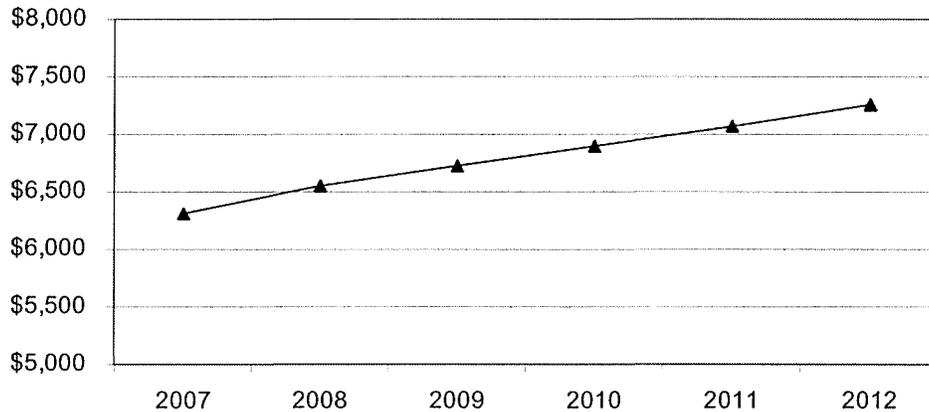

Forecast Drivers and Assumptions

- 1) The following major projects are assumed to be substantially completed in the early years of the forecast:
 - Lincoln Square Office Tower
 - Ashwood Commons Phase II
 - Belletini
 - Washington Square
 - Overlake Hospital
 - Avalon Meydenbauer
 - 1020 Tower
 - Bellevue Towers
 - 1200 Bellevue Way
 - City Center II
- 2) A significant spike in new major projects is not assumed beyond 2007. This results in a reduction of fee revenue of approximately \$4.6 million through 2009. Expenditures are expected to increase by inflation in 2008 and then decrease by approximately \$980,000 or 5%, in 2009 reflecting the completion of major projects.
- 3) The forecast reflects the addition of 32 FTEs to address the increase in workload associated with the major projects. Adjustments to resource levels are anticipated to begin towards the latter part of 2008.
- 4) This forecast assumes development fees grow at the rate of inflation (4.6% in 2007 and 2.6% from 2008 through 2012). A comprehensive Cost of Service Study was conducted in 2006 for Land Use, Fire, Transportation, and Utilities rates. In addition, recommendations to shift to the ICBO Valuation Table for Building fees will be proposed. Development fees may be adjusted to assure they are set accordingly to meet cost recovery objectives endorsed by Council.

General Fund Subsidy

The General Fund contribution to the Development Services Fund accounts for approximately 5% of the General Fund budget. This contribution (subsidy) supports personnel, M&O and capital costs for programs that have been designated as general funded activities. These programs include Comprehensive Planning, Neighborhood Outreach, Code Compliance, and Housing. Land Use activities supported by the General Fund include public information, policy development, and 50% of discretionary review.

General Fund Subsidy Forecast 2007-2012
(\$ in Thousands)

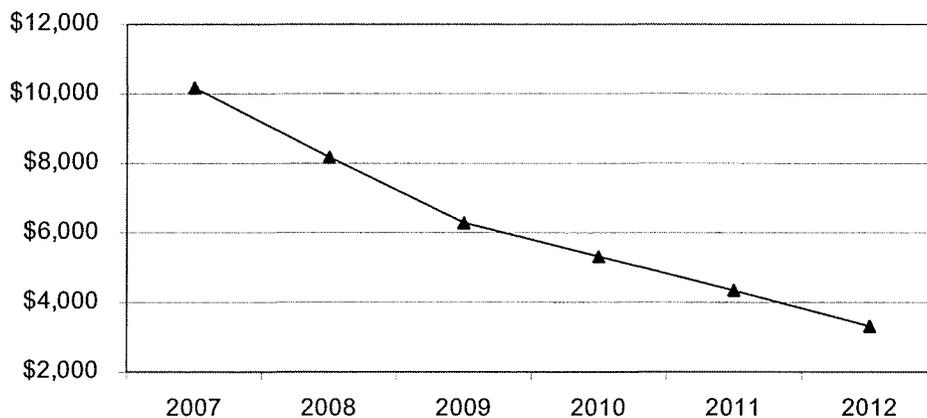

In 2006, the Economic Development program became its own department, and is no longer reflected in the General Fund subsidy. The General Fund contribution to the Development Services Fund is anticipated to grow at the rate of 3.8% from 2007 to 2008 and then by 2.6% over the forecast period.

Development Services Fund Reserves

The Development Services Fund maintains reserves to assure that core staffing levels are balanced with cyclical needs, thus mitigating the effects of downturns, and to account for prepaid building fees and development services deposits. The prepaid workload liability can extend for three years or more throughout the life of a project.

Development Services Reserves Forecast 2007-2012
(\$ in Thousands)

As displayed in the graph above, Development Services Fund reserves are anticipated to decline from \$10.2 million in 2007 to \$8.2 million in 2008. This reflects the completion of work on large projects that began in 2006 and 2007. Reserve levels are assumed to continue to decline by approximately \$4.9 million from 2008 through 2012, reflecting the completion of the major projects constructed during this development cycle. However, resourcing levels will continue to be evaluated over the forecast period to ensure alignment between resources, cost, and performance of the Development Services management model.

E. BUDGET SUMMARY

The remaining part of the Executive Summary presents 2007-2008 Budget information primarily through the use of tables and graphics.

Total City Budget

The gross total City budget figures are presented in this section.

Figure 3-1 on the following page summarizes the budget from both a total City budget perspective and from the operating budget, special purpose budget, and capital investment program budget perspectives. Further breakdown within each fund category is provided. Figures at the bottom of the table are presented “net of double budgeting” to give a more accurate representation of the size of the total City budget. Double budgeting is the result of transactions between funds that inflate the budget because expenditure and revenue dollars are budgeted twice, once in each fund’s budget.

Looking at the total City budget shows that the 2007-2008 Budget totals \$944.5 million. The decline between the 2007-2008 and the 2005-2006 Budgets is \$79.1 million, or 7.7%.

Figure 3-2 shows the 2007-2008 total City budget resources by source and expenditures by department with comparisons to the 2005-2006 Budget.

Figure 3-3 shows the City’s total expenditure budget by category and compares the 2005-2006 and the 2007-2008 biennial budgets, including dollar and percentage change.

Additional comments on the components of the total City budget are provided within the separate operating budget, special purpose funds budget, and capital project budget sections of this chapter.

2007-2008 Net City Budget

For analytical and comparison purposes, the budget is adjusted to remove internal transactions between City departments or City funds including transfers between funds and charges for services provided by one department to another department within the City. These adjustments are detailed below:

1. Adjusted for internal transfers (e.g., General CIP contribution from the General Fund) between City funds, the net City budget is:	<u><u>873,667,329</u></u>
2. Adjusted for charges for services provided by one department to another (e.g., information technology services), the net City budget is:	<u><u>786,055,019</u></u>

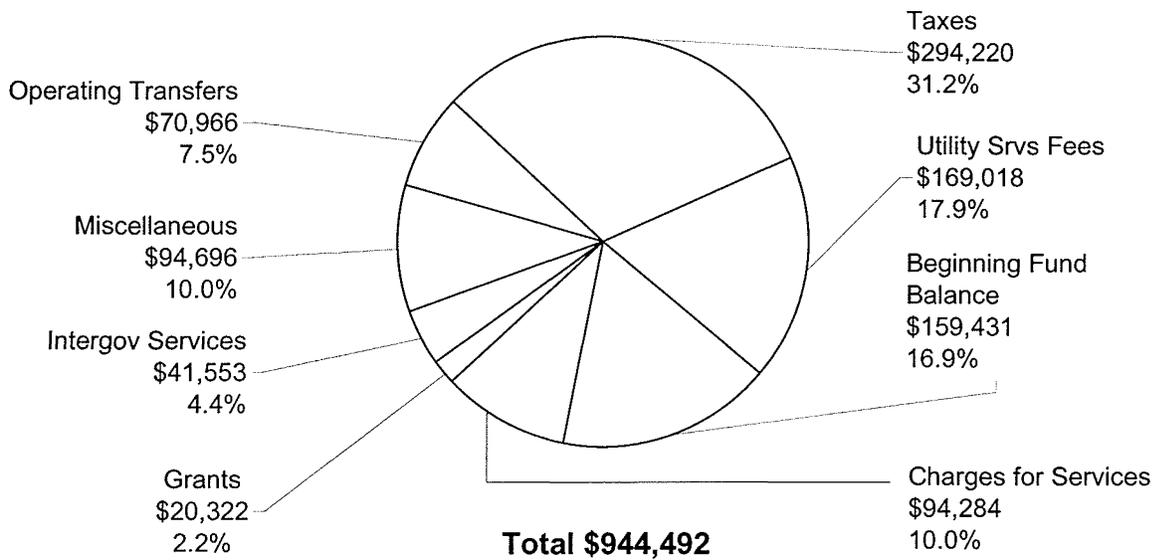

Figure 3-4

**2007-2008 Total City Budget
Resources by Source and Expenditures by Category
\$000**

Figure 3-4 presents the 2007-2008 total city budget resources by source and expenditures by category. As the resources chart indicates, at \$294.2 million or 31.2%, taxes make up the largest piece of the 'pie', followed by utility services fees at \$169.0 million, or 17.9%.

On the expenditure chart, at \$389.0 million, M&O accounts for 41.2% of the expenditure budget, followed by personnel at \$284.1 million or 30.1%.

Resources

Expenditures

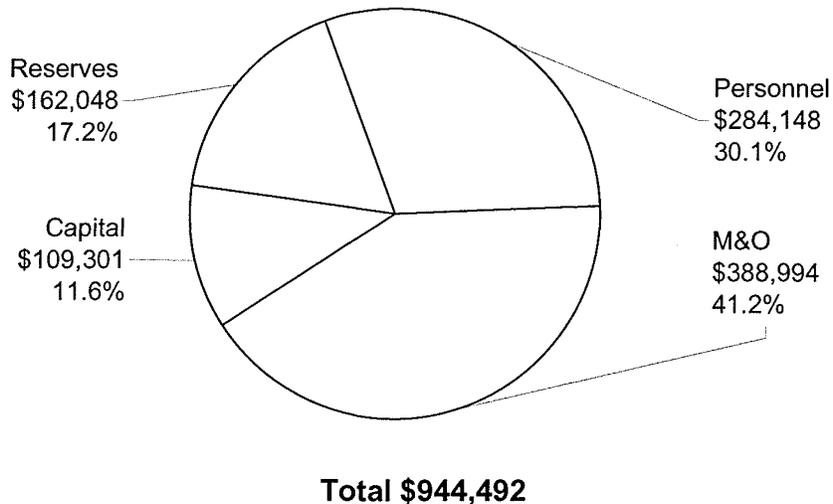

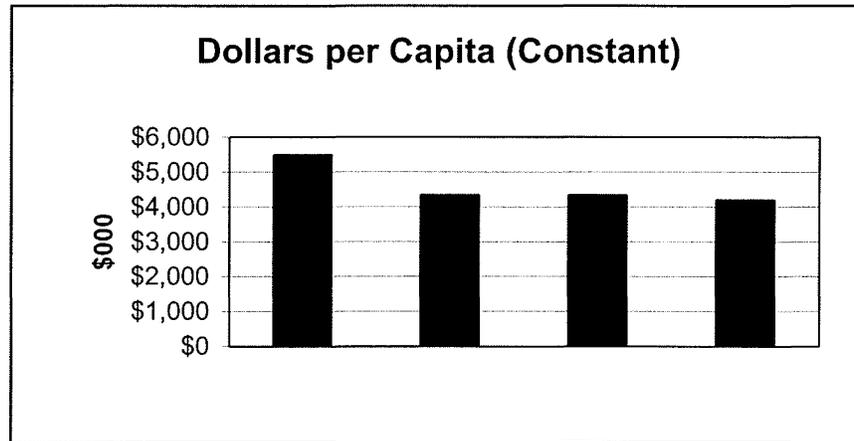

Figure 3-5

**Total Budget Comparison
Constant Dollar Total Budget Per Capita**

This figure displays a 2005 to 2008 comparison of the total city budget per capita on a constant dollar basis and shows the total city budget per capita fluctuating between \$5,489 in 2005 and \$4,194 in 2008.

The larger budget 2005 is due primarily to capital costs associated with the New City Hall.

	2005	2006	2007	2008
Total City Budget (\$000)	\$646,034	\$529,832	\$548,155	\$550,099
Budget in Constant (\$000)	\$633,989	\$508,262	\$512,016	\$500,811
Population	115,500	117,000	118,205	119,423
Total Budget per Capita	\$5,489	\$4,344	\$4,332	\$4,194

Figure 3-6

Total Budget Position Trends
Full-Time Equivalent Positions / 1,000 Population by Year

Figure 3-6 presents the ratio of total City positions per 1,000 population for the period of 2005 through 2008.

In 2006, position growth outpaced population growth; in 2007 FTEs and population are projected to grow at the same rate; and in 2008, there is no position growth while population increases by 1%. As a result, the annual positions/1,000 ratios remains at 10.9 in 2006 and 2007 and drops to 10.8 in 2008. For more specific personnel information, please refer to Chapter 3 of the 2007-2008 Budget Detail volume.

	2005	2006	2007	2008
Positions	1,242.1	1,271.8	1,284.4	1,284.4
Population	115,500	117,000	118,205	119,423
Positions/1,000	10.8	10.9	10.9	10.8

Operating Budget Highlights

Bellevue's fiscal position is positive due, in part, to a major development cycle spurred by a thriving economy. Our central business district is again alive with construction cranes. New homes are being built in our neighborhoods and permits to renovate existing structures continue to rise. In downtown alone, the residential population is estimated to double in the next six years from five thousand to ten thousand residents. Regional economists are predicting a modest pace of growth into the near future.

The recommended operating budget is a "current services" budget and will provide Bellevue residents and other stakeholders with service levels consistent with the 2005-2006 biennium. It will be adequate for the next two years and will essentially support what we are doing now factored by inflation and pipeline activities approved by the Council. It will include a minimal level of service adds to meet service deficiencies, to manage short-term growth, to reflect "best practices" or to provide needed administrative support related to prior Council budget decisions. The Full Time Equivalent positions (FTEs) added to the budget are revenue supported or necessary to convert Limited Term Employee (LTEs) positions where service levels continue to be needed.

The minimal growth in the operating budget comes after several years of difficult times that included falling sales tax receipts and rising pension and health benefits costs. While good economic times help to relieve some of the fiscal pressure by bringing our financial position back into balance, the current and future operating budgets face fiscal pressures for several reasons:

- The recent recession eroded our resource base. When the impact of inflation is removed from the budget, Bellevue's sales tax revenues do not return to 2000 levels until 2006.
- Decisions by the Washington state legislature to remove in 2008 \$2.4 million of Bellevue's annual Business & Occupancy taxing authority through apportionment means that we will have less future revenues from this important revenue source.
- Pension and health benefit costs continue to rise at rates well above inflation.
- State and Federal legislation ranging from telecommunications policy to community development block grants, may either reduce City revenues or increase City costs.

The Operating Budget includes the addition of 17.19 new positions. Details of these budget additions can be found in the individual department budget discussion under the "Budget Issues" sections. Highlights of the proposed service additions include:

- Public Safety. The budget proposal allocates \$1.5 million for the addition of eight firefighters in response to an increasing service demand for medic calls; provides two positions for Advanced Life Support staffing including a Medical Services Officer and a ALS Data Analyst; funds contract administration for monitoring the recent ambulance transport contract and for quality control; and provides resources for an additional fire training academy to replace personnel who are expected to retire. Of this proposal \$1.2 million is offset by additional revenues to the City.
- Land Use and Development Regulation. This proposal includes \$0.3 million for the back log in land use code amendments and consulting services funding to address high priority projects including the Meydenbauer Bay connection and Downtown Plan implementation.
- City Streets and Right of Way. The budget includes \$0.2 million for maintaining trees and streetscapes in the right of way; improves our pothole repair program so that repairs last longer; and provides maintenance and operating funding for signal lights that have been installed. A companion proposal, that improves landscaping in the City's right of way, is included in the Capital Improvement Program.

- Parks and Open Space. The budget includes the addition of two positions to enhance the quality of parks maintenance and contract oversight. These positions use existing dollars.
- Human Services. The budget allocates an additional \$41,000 for human services grant requests to fill the funding gap from loss of Federal money. With these additional resources, total City funding of human services is estimated at \$4.2 million for the 2007-2008 biennium.
- Economic Development. The budget includes \$200,000 for the development and implementation of an international trade and economic development marketing program.
- Support Services. This budget includes \$0.5 million for a fleet mechanic to maintain heavy equipment such as fire apparatus and for the staffing (1.44 positions) and support of the electronic content management system to provide more efficient access and distribution of the City's records.

The budget includes an additional \$0.5 million to ensure tax compliance with existing code. The successful Business and Occupation tax audit program will be expanded and costs will be fully offset by additional tax collections.

The budget also includes the conversion of two limited term employees into two full-time equivalent employees. One of these positions is an attorney to manage the ongoing body of work the department has experienced. The second position is a records clerk to support development services operations. Existing revenues fully support these positions.

- Regional Services. The budget proposes the addition of one position to support the award winning e-Gov Alliance.

Ongoing Operating and Maintenance Costs for New Capital Projects

The City places a high priority on maintaining its facilities. The 2007-2008 operating budget includes an additional \$917,000 for new operating and maintenance costs for capital projects expected to come on line during the 2007-2008 biennium primarily for Parks and Transportation projects.

Utility Operations

This Budget includes the following proposed utility rate increases for 2007 and 2008:

	<u>2007</u>	<u>2008</u>
Water	5.2%	6.6%
Wastewater	9.5%	2.5%
Storm and Surface Water	5.5%	5.0%

Rate increases are needed to fund 1) pass-through increases in wholesale Metro/King County sewer and Cascade Water Alliance water costs to customers; 2) increasing State pension, technology, insurance and fuel costs; 3) inflationary increases in salaries, maintenance and operations costs; and 4) additional capital needs.

Average monthly Utility bills (including water, wastewater, and storm and surface water) for single family residential customers are projected as follows:

	<u>Monthly Bill</u>	<u>\$ Increase</u>	<u>% Increase</u>
2006 Utility Bill	\$89.37		
2007 Cascade	\$1.76		
2007 METRO	\$2.96		
2007 Local	\$1.20		
2007 Capacity Projects	\$0.58		
2007 Utility Bill	\$95.87	\$6.50	7.3%
2008 Cascade	\$1.87		
2008 Local	\$1.91		
2008 Capacity Projects	\$0.41		
2008 Utility Bill	\$100.06	\$4.19	4.4%

As depicted in Figure 3-7, the 2007-2008 operating budget totals \$719.3 million. The operating budget in total grew \$79.1 million or 12.4%.

The City's General Fund is the largest fund, accounting for most of the City's day-to-day operations. The budget growth in the General Fund from the prior biennium is \$33.4 million or 13.3%.

The Utility Funds show a budget increase of \$22.9 million or 13.7% as compared to the 2005-2006 budget. This increase is primarily attributable to pass-through rate increases in METRO sewer costs and Cascade Water Alliance costs, and local program cost increases.

The Development Services Fund budget shows an increase from the prior biennium of \$10.1 million or 27.8%. This increase is attributable to the recent rapid increase in development activity.

The Parks Enterprise Fund 2007-2008 Budget has remained virtually the same as the last biennium.

The Internal Services Funds category grew by \$7.0 million or 9.6%, primarily due to additional costs associated with the New City Hall, the timing of capital replacements in the Equipment Rental Fund and the impact of inflation on City budgets.

The reserve/other fund category increased by \$5.6 million or 5.3%, primarily due to lower than anticipated expenditures in 2005-2006.

Figure 3-7

Operating Budget Expenditures by Fund

	2005-2006 Budget	2007-2008 Budget	Variance	% Change
General Fund	251,273,645	284,689,908	33,416,263	13.3 %

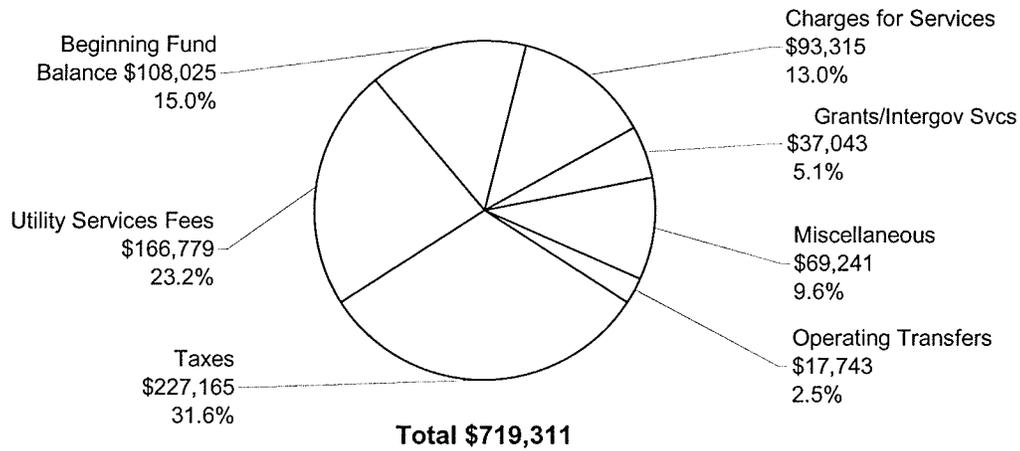

Figure 3-8

**2007-2008 Operating Budget
Resources by Source and Expenditures by Group
\$000**

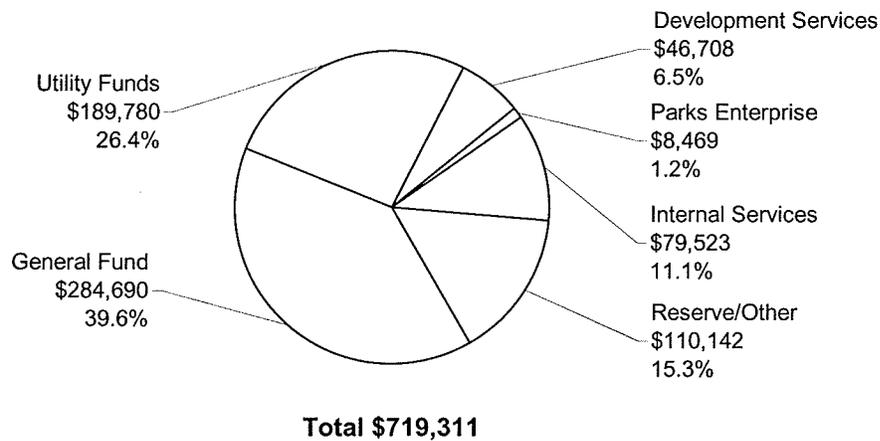

This figure presents the 2007-2008 total operating budget resources by source and expenditures by group. At 31.6% of the "pie", taxes represents the largest resource category followed by utility services fees and beginning fund balance. Together, these three sources represent 69.8% of operating budget resources.

The General Fund is the largest operating budget fund at \$284.7 million, representing 39.6% of expenditures.

Resources

Expenditures

Special Purpose Budget Highlights

Special purpose funds highlights for 2007-2008 include:

- **Lower transfer of Council Reserve from the Operating Grants and Donations Fund**

The 2007-2008 Operating Grants and Donations Fund budget has decreased by \$13.2 million compared to the 2005-2006 biennium. The decrease is mainly due to the use of \$10.6 million Council reserves to support New City Hall (NCH) debt service for the 2005-2006 biennium. In 2007, the remaining Council reserve balance budgeted in the Operating Grants and Donations Fund is only \$88,000.

For the 2007-2008 biennium, the majority of the debt service payments on the NCH bonds will be supported from excess reserves from a number of City funds.

- **Lower Debt Service Requirement**

The 2007-2008 Budget for the City's Debt Service Funds has decreased by \$2.0 million compared to the previous biennium. The primary reason for the decrease is due to the anticipated retirement of the 2003 Unlimited Tax General Obligation (UTGO) refunding bonds in 2008.

The decrease in debt payments as a result of the retirement of the 2003 Unlimited Tax General Obligation (UTGO) refunding bonds is partially offset by an increase in debt payments for the 1995 and 2002 Limited Tax General Obligation (LTGO) bonds. These bonds are associated with the Meydenbauer Center.

- **Increase of Housing Fund Reserves**

Reserves accumulate in the Housing Fund until projects are selected and funded by A Regional Coalition for Housing Fund (ARCH). Reserves increased in the 2007 due to lower than anticipated program expenditures in 2005 and an unanticipated loan repayment in 2006. In 2005, the Housing Program did not meet the target for low-income housing production. Several potential projects are in the works for funding in the upcoming biennium. Contribution to the Housing Fund from the General Fund remains constant at \$312,000 through 2008.

Figure 3-9

Special Purpose Budget Expenditures by Fund

	2005-2006 Budget	2007-2008 Budget	Variance	% Change

Figure 3-10

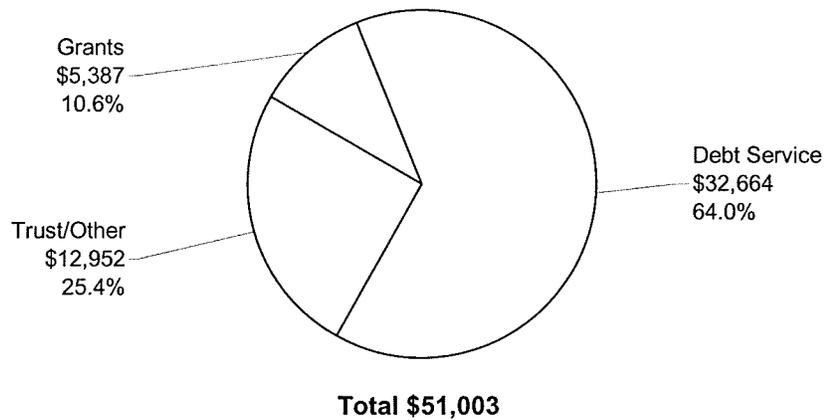

**2007-2008 Special Purpose Budget
Resources by Source and Expenditures by Group
\$000**

This figure depicts the resource and expenditure budget for the City's eight special purpose funds (not including the three capital funds). For the purposes of this display, resources have been categorized into five main components with the "pie slices" revealing the comparative size of each component of the budget. As the graph shows, excluding transfers between funds, the largest resource category is the beginning fund balance. This is primarily due to large reserves being held in some of these funds (e.g., Firemen's Pension Fund).

Expenditures

Capital Project Budget Highlights

Bellevue's Capital Investment Program (CIP) Plan presents a schedule of major public facility improvements for implementation within a seven-year period.

The CIP continues to make great strides toward addressing mobility and transportation demands, as well as making investments into the downtown and to our parks and open space system. As with most budgets, this budget does not meet all of Bellevue's capital needs. However, the projects included in the CIP are consistent with Council direction and feedback from the community to continue Bellevue's high quality services.

In addition, the Plan continues the practice of moving more projects forward in the early years of the seven-year period. We have often referred to this as "frontloading" the CIP Plan. Transportation and Parks projects are a priority, and to the greatest extent possible, they have been programmed in the early years of the CIP. The Plan assumes that borrowing, via a line of credit (LOC), will be needed in the early years of the CIP to support cash flow needs related to frontloading. As such, the 2007-2008 budget sets aside \$2.0 million to the interest on borrowing. The recommended CIP Plan will assure our ability to retire the LOC by the end of 2013.

In total, the 2007-2013 CIP Plan is recommended at \$340 million, of which \$261 million is allocated for the General Capital Investment Program and \$79 million for the Utility Capital Investment Program. The Plan includes forty new or enhanced projects, two project deferrals, and four project deletions. More detailed information is available in the 2007-2013 CIP Plan accompanying the 2007-2008 Preliminary Budget.

- **Key Projects for 2007-2008**

A number of projects are scheduled to be completed in the next biennium. While the following list is not inclusive of all the projects the City will be undertaking in 2007-2008, it includes some of the more high profile projects.

Detailed project descriptions for these and other CIP projects can be found within the 2007-2013 Capital Investment Program Plan.

Transportation

150th Avenue SE – Newport Way to SE 36th Street (PW-R-105)
 NE 10th Street Extension (PW-R-149)
 NE 8th Street/106th Avenue NE to 108th Avenue NE (PW-R-152)
 Implement elements of the Bel-Red Corridor Plan (PW-R-153)
 NE 10th Street/176th Avenue NE/NE 13th Street/183rd Avenue – Northrup Way (PW-M-14)
 148th Avenue SE/Lake Hills Boulevard (PW-I-90)
 NE 24th Street – Northrup Way to 130th Avenue (PW-W/B-69)

Parks

Robinswood Synthetic Fields (P-AD-36)
 Highland Skate Park (P-AD-57)
 Resource Management Division Facility (P-AD-59)
 Kelsey Creek Park Stream Restoration (P-AD-65)
 Challenge Grant (P-AD-69)
 Mercer Slough Environmental Education Center (P-AD-75)
 Ashwood Plaza Development (P-AD-76)
 Boeing Access Road Improvements (P-AD-77)

General Government

Fleet & Communications Maintenance Shops Relocation (G-41)
 Finance and Human Resources System Replacement – ERP (G-59)
 Enterprise Content Management System (G-60)
 Municipal Wireless Network (G-65)

Public Safety

Mobile Data Computers/Automated Vehicle Location/Integrated Mapping (PS-36)
 Deccan Live Move-Up Module (PS-60)

Community and Economic Development

Gateways and Neighborhood Identity (CD-17)
 Eastgate Subarea Plan (CD-21)
 Gateways/Urban Boulevards/Great Streets (CD-22)
 Shoreline Update Inventory Phase (CD-25)
 Critical Areas Handbook and Geo-Mapping (CD-26)
 Urban Corridor Design/High Capacity Transit (ED-5)

Utilities

Rosemont Asbestos Cement Water Main Replacement (W-87)
 Reservoir Water Quality Upgrades (W-92)
 Bel-Red Inlet Capacity Improvement (W-100)
 Coal Creek Stabilization (D-69)
 Lower Newport Stream Channel Modification (D-74)
 Meydenbauer Creek Erosion Control (D-80)
 Retrofit regional detention facilities for Improved Water Quality (D-92)

Figure 3-11

**2007-2008 Capital Project Budget
Expenditures by Program Area and Fund
\$000**

Figure 3-11 compares the 2007-2008 biennium to the 2005-2006 biennium for the City's two Capital Investment Program (CIP) funds and the 2004 City Hall Bond Fund. Overall, the 2007-2008 budget is substantially less than the 2005-2006 budget due to the completion of the construction of the new City Hall project in 2006.

Excluding the New City Hall project, budgeted capital expenditures in the General CIP Fund are relatively equal although the amounts by program area have changed since the last biennium to respond to the highest priority capital needs within the City. Budgeted expenditures in the Utility CIP Fund increased to reflect funding for several projects to meet sewer capacity in the central business district and water infrastructure and renewal capital needs.

Capital Project Budget	2005-2006 Budget	2007-2008 Budget	\$ Change	% Change
2004 City Hall Bond Fund				
New City Hall	\$74,812	\$0	(\$74,812)	(100.0%)
Subtotal 2004 City Hall Bond Fund	\$74,812	\$0	(\$74,812)	(100.0%)

Total Capital Project Budget	\$319,318	\$174,178	(\$145,140)	45.5%

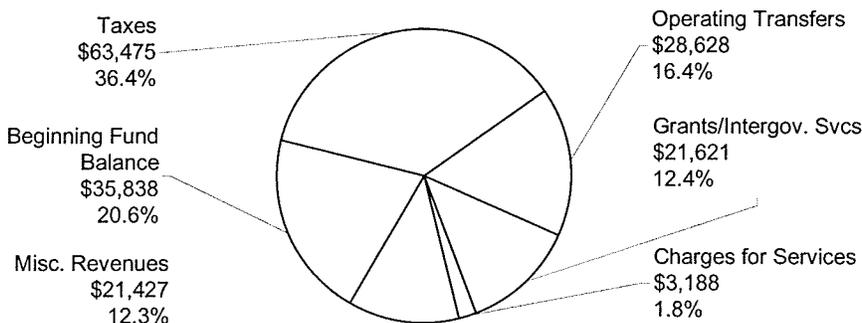

Figure 3-12

**2007-2008 Capital Investment Program Budget
Resources by Source and Expenditures by Program Area
\$000**

This figure depicts the resource and expenditure budget for the City's two CIP funds (General CIP & Utility CIP). For the purposes of this display, resources have been categorized into six main components with the "pie slices" revealing the comparative size of each component of the budget. The largest revenue categories are taxes, which is comprised of sales, real estate exices, and business and occupation taxes. Beginning fund balance represents the utilities reserve and replacement funds for future funding of capital improvements.

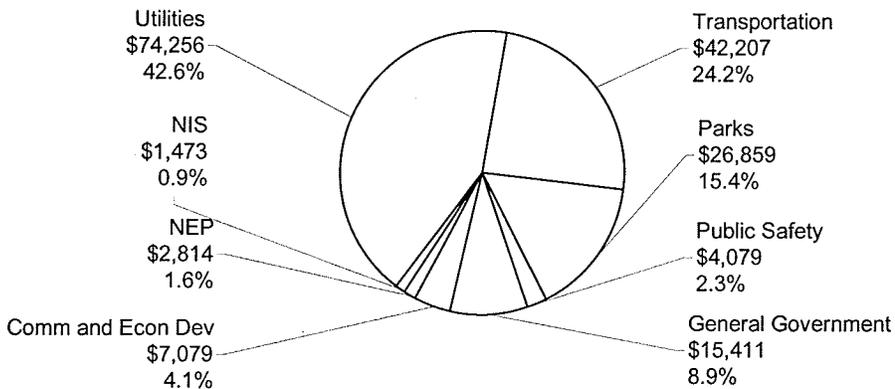

The expenditure pie has been divided into the CIP program areas and reveals the comparative size of each. Transportation, Parks, and Utilities combine to make up 82.3% of the expenditure budget reflecting the overall capital funding priorities in the City.

F. DEBT INFORMATION

State Law enables the City to issue debt for three general categories of use: General Government, Park and Open Space, and Utility System uses. The debt issued in each category is limited to 2.5% of the City's assessed valuation (for a total limit of 7.5%). In addition, the State Constitution also allows for non-voted, or councilmanic debt limited to 1.5% of the City's assessed valuation, to be included within the General Government 2.5% limit. Such councilmanic debt can be funded by property taxes, but does not result in an increase to regular levy property taxes. Publicly voted bonds (which excludes councilmanic debt) require a 60% majority approval for passage of a bond election and a total voter turnout of at least 40% of the total votes cast in the last general election. Publicly-voted bonds are funded by voted levy property taxes and the approval of these bonds will result in an increase to voted levy property taxes.

Figure 3-14 exhibits by category the City's total general obligation debt capacity, the amount of debt issued, and the allocation of remaining debt capacity between voted and councilmanic limits. As of January 1, 2007, the City's remaining general government debt capacity was approximately \$477 million, approximately \$263 million in voted capacity and \$214 million in councilmanic capacity. The approximate remaining debt capacity for park and open space use is \$656 million and for utility system use is \$657 million.

Figure 3-14
Total Debt Capacity and Debt Issued
as of January 1, 2007
(\$ Millions)

Maximum Legal Capacity = \$26,287 x 0.025 = \$657

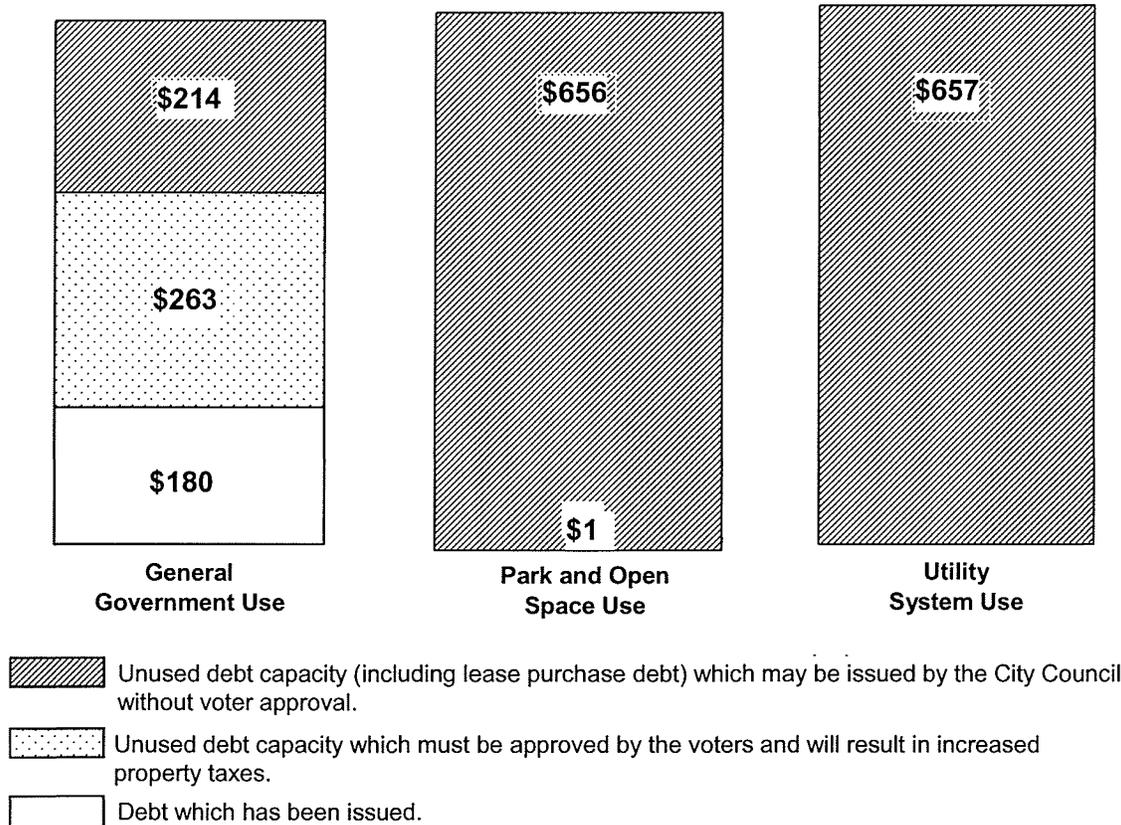

Figure 3-15 on the following page presents detailed information on the City's General Obligation and Revenue Bond debt. For each debt issue, this figure lists the amount issued, the issue and maturity dates, interest rate, source of debt payment funding, and the debt service requirements included in the 2007-2008 Budget.

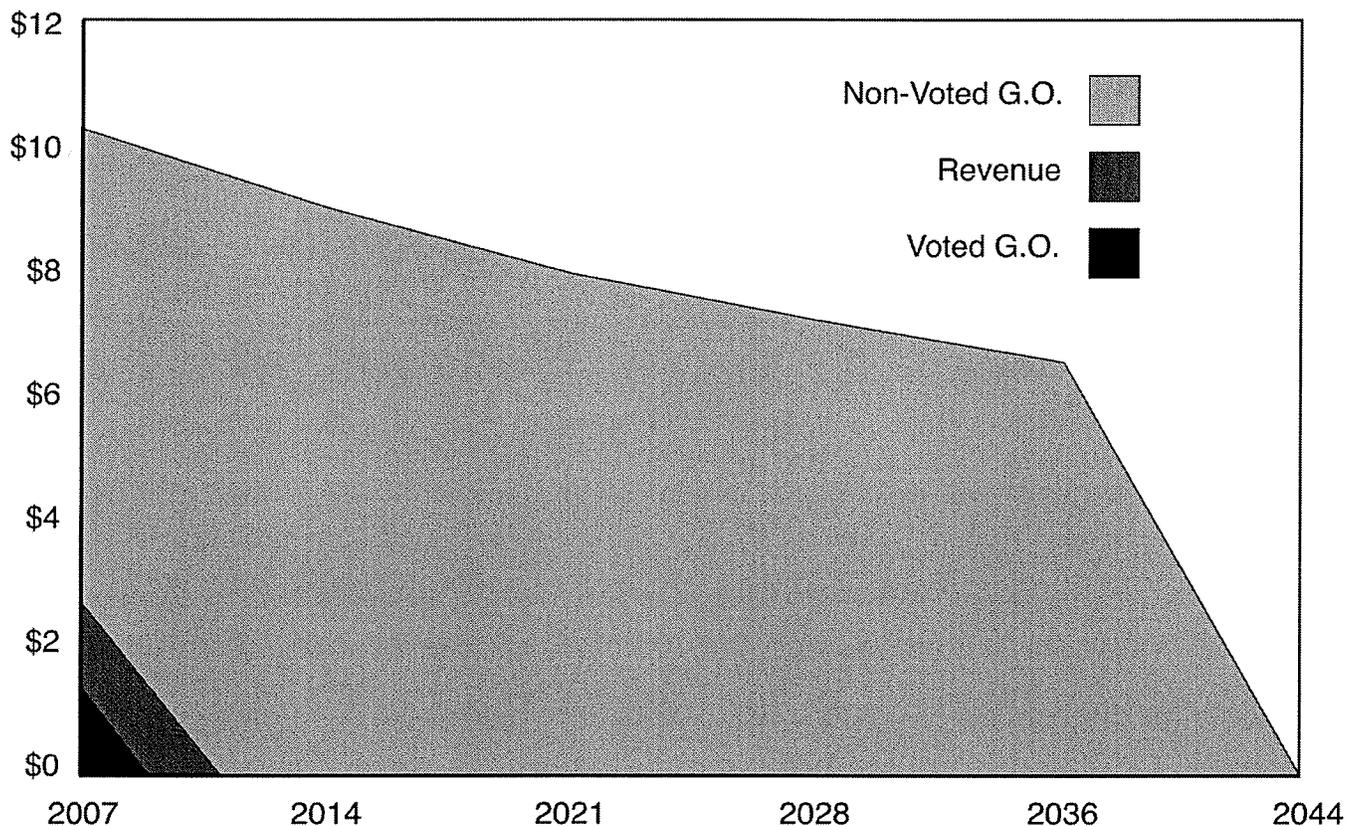

**Figure 3-15
GENERAL OBLIGATION AND REVENUE BOND DEBT INFORMATION**
\$000

	Original Amount Issued	Issue Date	Final Maturity Date	Interest Rate	Source of Debt Service Funding	2007-2008 Debt Service Requirement	
						Principal	Interest
Non-Voted General Obligation (G.O.) Bonds:							
1995 Limited G.O.	5,140	1995	2025	5.15 - 5.80%	Hotel/Motel Taxes	\$796	\$729
1998 Limited G.O.	4,310	1998	2018	4.00 - 4.78%	Grants/CIP/Moorage Fees	350	346
2002 Limited G.O.	10,450	2002	2032	3.50 - 5.50%	Hotel/Motel Taxes	425	1,012
2003 Limited G.O. Refunding, Series B	4,635	2003	2014	2.00 - 4.50%	CIP	785	244
2004 Limited GO (City Building)	102,710	2004	2043	5.00 - 5.50%	CIP/Reserves	---	10,614
Subtotal Non-Voted G.O. Bonds	\$127,245					\$2,356	\$12,945
Voted General Obligation Bonds:							
2003 Limited G.O. Refunding, Series A	\$8,550	2003	2008	3.00 - 5.00%	Voted Levy Property Tax	\$2,755	\$118
Subtotal Voted G.O. Bonds	\$8,550					\$2,755	\$118
Revenue Bonds:							
1991 Bellevue Convention Center Authority, Series B (1)	21,120	1991	2019	5.90 - 7.20%	BCCA	\$1,237	\$2,738
1994 Bellevue Convention Center Authority Refunding (1)	13,749	1994	2025	6.25 - 7.50%	BCCA	472	658
2004 Waterworks Refunding	6,825	2004	2010	2.00 - 3.625%	Utility Services Fees	2,110	248
Subtotal Revenue Bonds	\$41,694					\$3,819	\$3,644
TOTAL GENERAL OBLIGATION AND REVENUE BONDS	\$177,489					\$8,930	\$16,707

(1) The Bellevue Convention Center Authority (BCCA) is a component unit of the City for financial reporting purposes. The Authority's revenue bonds are secured by Lease Purchase Rental payments from the City paid for with Hotel/Motel Tax revenues and other revenues of the City available without a vote of the City's electors.

Figure 3-16 presents the annual debt service requirements for the City's voted, councilmanic (non-voted), and revenue debt through 2044. The 2007 debt service requirements are \$1.4 million for voted debt, \$1.3 million for revenue bond debt, and \$7.6 million on councilmanic debt. If no further debt is issued, the final debt payment for the voted debt will be made in the year 2008, for revenue debt in 2010, and for councilmanic debt in 2043. This graph shows the City's annual debt service requirements decreasing over time.

CITY BOND RATINGS

On October 16, 2006 the City held the following bond ratings:

<u>Bond Type</u>	<u>Standard and Poor's</u>	<u>Moody's</u>
Unlimited Tax General Obligation	AAA	Aaa
Limited Tax General Obligation	AAA	Aa1
Revenue	N/A	Aa2

Resource Summary

This chapter illustrates 2007-2008 Budget resource estimates primarily through the use of graphic presentations. Text describing the graphic presentations is included to highlight some of the key information presented.

This Resource Summary is organized into the following sections:

A. Total City Budget Resources

This section provides the reader with additional information on City taxes.

B. Operating Funds Budget Resources

This section provides information regarding operating budget resources by category and General Fund resource changes by source.

C. Special Purpose Funds Budget Resources

This section provides information regarding special purpose budget resources by category.

D. Capital Project Funds Budget Resources

This section provides information regarding capital project budget resources by category.

A. TOTAL CITY BUDGET RESOURCES

Figure 4-1 presents the 2007-2008 resource budget for all City funds and contains a comparison to 2005-2006 resources. Resources for 2007-2008 are anticipated to decrease \$79.1 million or 7.7% from 2005-2006. The decrease is primarily due to the completion of the new City Hall project and use of proceeds from the 2004 sale of bonds for the project.

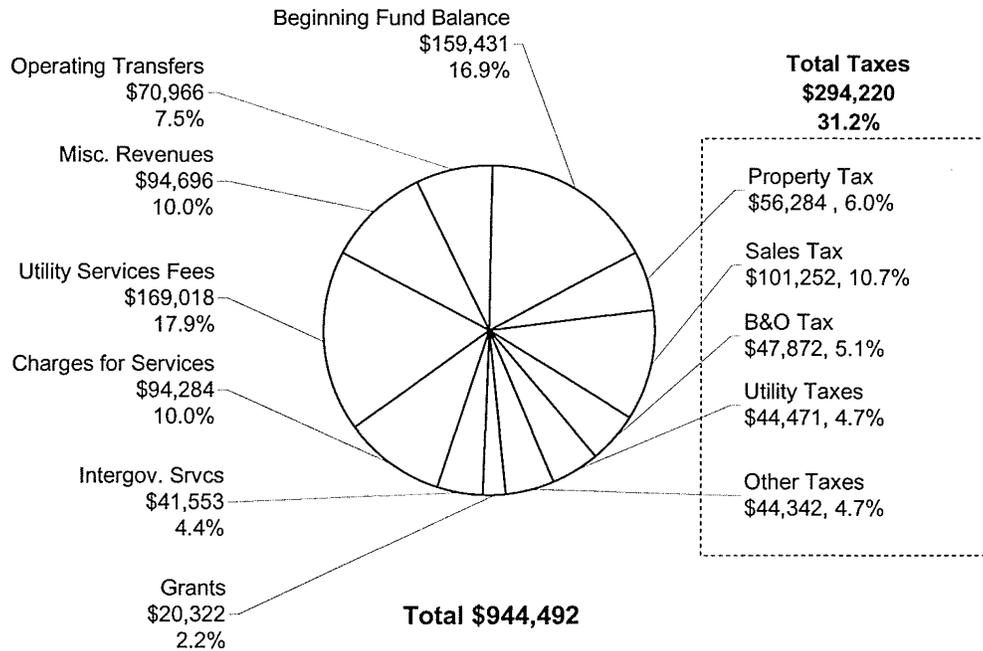

As illustrated in the pie chart, taxes are the largest resource category contributing more than 30% of the City's total resources. Tax collections are anticipated to increase by \$33.0 million as the region continues to experience strong economic growth. Within the taxes category, the largest components include sales tax, property tax and business and occupation tax.

Utility Service Fees are the next largest category of resources. This revenue category is made up of water, sewer and storm and surface water service fees. These revenues are projected to grow by nearly \$16.5 million over the 2005-2006 biennium due to increases associated with pass-through wholesale costs and local program costs.

Beginning Fund Balance (BFB) is the third largest category of resources. This is the result of reserve policies which specify that we shall maintain reserves to adequately cover future liabilities (e.g., equipment replacement reserves). These reserve policies allow the City to handle large expenditure increases caused by the timing of certain expenditure items without having to raise revenues. The decline in BFB is largely due to the use of reserves for the new City Hall project.

Figure 4-1

2007-2008 Total City Budget Resources
\$000

Comparison to 2005-2006 Budget

	2005-2006 Budget	2007-2008 Budget	\$ Change	% Change
Taxes				
Sales Tax	\$87,763	\$101,252	\$13,489	15.4%
Property Tax	54,680	56,284	1,603	2.9%
Business & Occupation Tax	43,897	47,872	3,975	9.1%
Utility Taxes	40,909	44,471	3,562	8.7%
Other Taxes	33,978	44,342	10,364	30.5%
Subtotal Taxes	\$261,228	\$294,220	\$32,993	12.6%
Utility Services Fees	152,521	169,018	16,498	10.8%
Beginning Fund Balance	207,997	159,431	(48,566)	(23.3%)
Charges for Services	78,730	94,284	15,554	19.8%
Miscellaneous	120,674	94,696	(25,977)	(21.5%)
Operating Transfers	141,697	70,966	(70,731)	(49.9%)
Intergovernmental Services	43,175	41,553	(1,622)	(3.8%)
Grants	17,548	20,322	2,775	15.8%
Total Resources	\$1,023,570	\$944,492	(\$79,077)	(7.7%)

**FIGURE 4-2
SUMMARY OF LOCALLY LEVIED TAXES**

This figure includes information on each of the taxes levied to support city services. Included for each tax are the maximum allowable rate, the current City rate, the 2007 and 2008 budgets, and supplemental information.

1. Regular Property Tax Levy – Preliminary Estimate

Maximum Rate:	\$3.17/\$1,000 AV
2007 Estimated Rate:	\$1.04/\$1,000 AV
2007 Estimated Levy:	
General Fund	\$25,190,000
Human Services Fund	<u>2,045,000</u>
Total 2007 Estimated Regular Property Tax Levy	\$27,235,000
2008 Estimated Rate:	\$0.98/\$1,000 AV
2008 Estimated Levy:	
General Fund	\$26,094,000
Human Services Fund	<u>2,106,000</u>
Total 2008 Estimated Regular Property Tax Levy	\$28,200,000

Current law limits the property tax increase from the prior highest allowable regular levy to the lesser of 101% or 100% plus inflation, where inflation is measured by the percentage change in the Implicit Price Deflator (IPD). For 2007 the IPD is projected to change 3.4%.

Based on the 2007 preliminary regular levy of \$27,235,000 and the 2008 estimated levy of \$28,200,000, each \$0.01 per \$1,000 assessed value (AV) of the regular property tax levy rate generates \$263,000 in 2007 and \$287,000 in 2008 in property tax revenue.

Both the 2007 preliminary regular levy and the 2008 estimated levy include property tax lid lift revenues of \$991,000. This levy lid lift was approved by the voters on May 17, 1988 to pay maintenance and operating costs of City park facilities funded through a \$16.5 million park bond issue.

The 2007 preliminary regular levy AV is at \$26.3 billion, an increase of \$2.3 billion or 9.7% from the 2006 AV. The 2008 regular levy AV is estimated to be \$28.7 billion, an increase of \$2.4 billion or 9.1% from the 2007 AV.

FIGURE 4-2 (Continued)

2. Voted Property Tax Levy

Maximum Rate: The bonds serviced from this revenue source cannot exceed 7.5% of the City's voted property tax levy AV less any councilmanic or lease/purchase bond issues.

2007 Rate:	\$0.05/\$1,000 AV
2007 Levy:	\$1,394,000
2008 Estimated Rate:	\$0.00/\$1,000 AV
2008 Estimated Levy:	\$0

Each \$0.01 per \$1,000 AV of the 2007 voted property tax levy rate based upon the 2007 voted levy of \$1,394,000 generates \$263,000 of property tax revenue. The City will have accumulated reserves sufficient to cover the last voted levy's debt service payment on January 1, 2008 and therefore, no additional voted property tax monies will be levied in 2008.

3. Sales Tax

Maximum Rate:	1.0%*
Current Rate:	1.0%*
2007 Estimate:	
General Fund**	\$35,668,000
Operating Grants & Donations Fund	1,000,000
General CIP Fund	14,043,000
Housing Fund	<u>100,000</u>
Total 2007 Sales Tax	\$50,811,000
2008 Estimate:	
General Fund**	\$35,888,000
Operating Grants & Donations Fund	1,000,000
General CIP Fund	13,452,000
Housing Fund	<u>100,000</u>
Total 2008 Sales Tax	\$50,440,000

* 15% of the sales tax revenue produced by the City's 1% is allocated to the county.

** Includes a portion of CIP allocation for maintenance and operating costs associated with completed capital projects, CIP allocation for facilities costs and adjustments for "one-time" estimated collections i.e. construction.

Each 0.1% of the sales tax rate generates \$5,081,000 in 2007 and \$5,044,000 in 2008 of sales tax revenue.

FIGURE 4-2 (Continued)

4. Business & Occupation Tax

Maximum Rate:	0.2%
Current Rate:	0.1496%
2007 Estimate:	
General Fund (0.11%)	\$17,797,000
General CIP Fund - Unrestricted (0.03%)	4,894,000
General CIP Fund - Restricted Transportation Only (0.0096%)	<u>1,570,000</u>
Total 2007 Business & Occupation Tax	\$24,261,000
2008 Estimate:	
General Fund (0.11%)	\$17,322,000
General CIP Fund - Unrestricted (0.03%)	4,764,000
General CIP Fund - Restricted Transportation Only (0.0096%)	<u>1,525,000</u>
Total 2008 Business & Occupation Tax	\$23,611,000

A majority of voters may approve a rate in excess of 0.2%. Each 0.01% of the business and occupation tax rate generates \$1,622,000 in 2007 and \$1,578,000 in 2008 of B&O tax revenue.

5. Utility Taxes**a. Electric Utility Tax**

Maximum Rate:	6.0%
Current Rate:	5.0%
2007 Estimate:	\$6,216,000
2008 Estimate:	\$6,415,000

A majority of the voters may approve a rate in excess of 6%. Each 0.1% of the electric utility tax rate generates \$124,000 in 2007 and \$128,000 in 2008 of electric utility tax revenue.

b. Gas Utility Tax

Maximum Rate:	6.0%
Current Rate:	5.0%
2007 Estimate:	\$3,059,000
2008 Estimate:	\$3,160,000

A majority of the voters may approve a rate in excess of 6%. Each 0.1% of the gas utility tax rate generates \$61,000 in 2007 and \$63,000 in 2008 of gas utility tax revenue.

FIGURE 4-2 (Continued)

c. Water Utility Tax

Maximum Rate:	None
Current Rate:	5.0%
2007 Estimate:	\$1,275,000
2008 Estimate:	\$1,354,000

Tax levied on the City's Water Utility. Each 0.1% of the water utility tax rate generates \$26,000 in 2007 and \$27,000 in 2008 of water utility tax revenue.

d. Sewer Utility Tax

Maximum Rate:	None
Current Rate:	5.0%
2007 Estimate:	\$1,527,000
2008 Estimate:	\$1,580,000

Tax imposed on the City's Sewer Utility. Each 0.1% of the sewer utility tax rate generates \$31,000 in 2007 and \$32,000 in 2008 of sewer utility tax revenue.

e. Storm Drainage Utility Tax

Maximum Rate:	None
Current Rate:	5.0%
2007 Estimate:	\$671,000
2008 Estimate:	\$706,000

Tax levied on the City's Storm & Surface Water Utility. Each 0.1% of the storm drainage utility tax rate generates \$13,000 in 2007 and \$14,000 in 2008 of storm drainage utility tax revenue.

f. Garbage Tax

Maximum Rate:	None
Current Rate:	4.5%
2007 Estimate:	\$792,000
2008 Estimate:	\$812,000

Tax levied upon the private garbage collection company that services Bellevue. Each 0.1% of the garbage tax rate generates \$18,000 in 2007 and 2008 of garbage tax revenue.

FIGURE 4-2 (Continued)

g. Telephone Utility Tax

Maximum Rate:	6.0%
Current Rate:	6.0%
2007 Estimate:	
Telephone Utilities	\$2,983,000
Cellular Telephone Utilities	<u>4,002,000</u>
Total 2007 Telephone Utility Tax	\$6,985,000
2008 Estimate:	
Telephone Utilities	\$2,899,000
Cellular Telephone Utilities	<u>4,160,000</u>
Total 2008 Telephone Utility Tax	\$7,059,000

Tax levied on all telephone companies. Each 0.1% of the telephone utility tax rate generates \$116,000 in 2007 and \$118,000 in 2008 of telephone utility tax revenue.

6. Television Cable Franchise Fee

Maximum Rate:	5.0%
Current Rate:	5.0%
2007 Estimate:	\$1,410,000
2008 Estimate:	\$1,450,000

Fees levied on cable television companies operating in the City. This fee is collected in the Franchise Fund, where it will be used to support the development of cable television activities. Each 0.1% of the television cable fee generates \$28,000 in 2007 and \$29,000 in 2008 of television cable franchise revenue.

7. Accommodations (Hotel/Motel) Tax

100% of accommodations taxes are committed to the Bellevue Convention Center Authority (BCCA), a public development authority created by the City Council on December 4, 1989.

Maximum Rate:	5.0%
Current Rate:	5.0%
2007 Estimate:	\$6,329,000
2008 Estimate:	\$6,807,000

Proceeds are restricted to the Hotel/Motel Tax Fund, and are then transferred to the BCCA. There is a 2% credit against the State sales tax on accommodations in Bellevue. The accommodations tax may be used only for tourism facilities and tourism promotion purposes. Each 0.1% of the tax generates \$127,000 in 2007 and \$136,000 in 2008.

FIGURE 4-2 (Continued)

8. Admissions Tax

Maximum Rate:	5.0%
Current Rate:	3.0%
2007 Estimate:	\$314,000
2008 Estimate:	\$322,000

Tax levied on admission charges to theaters, amusement parks, swimming pools, etc. Each 0.1% of the admissions tax rate generates \$11,000 in 2007 and 2008 of admissions tax revenue.

9. Gambling Tax**a. General Fund**

Maximum Rate:	2% - 5%
Current Rate:	2% - 5%
2007 Estimate:	\$20,000
2008 Estimate:	\$20,000

Gambling tax on amusement games, bingo, and raffle activities. State law provides that the City must first use these proceeds to pay for enforcement activities. In Bellevue, the remaining funds are dedicated to providing youth facilities.

b. Human Services Fund

Maximum Rate:	5.0%
Current Rate:	5.0%
2007 Estimate:	\$250,000
2008 Estimate:	\$250,000

Gambling tax on punch board and pull tab activities. The proceeds from this revenue source are receipted into the Human Services Fund. They are reserved for the purpose of providing youth facilities to the extent that funds from this tax are not first required to enforce gambling laws as required by State law.

10. Real Estate Excise Tax

Maximum Rate:	0.5%
Current Rate:	0.5%
2007 Estimate:	\$11,520,000
2008 Estimate:	\$11,706,000

Revenue proceeds are receipted to the General Capital Investment Program Fund for use on capital projects. Each 0.25% of the real estate excise tax rate generates \$5,760,000 in 2007 and \$5,853,000 in 2008 of real estate excise tax revenue.

**FIGURE 4-3
PROPERTY VALUATION & TAX LEVY INFORMATION
1980 through 2007**

This figure displays historical property tax information for comparison purposes. Official property tax records are maintained by the King County Assessor's Office. Property owners are taxed on 100% of the fair market value of their property.

The 2007 preliminary regular levy assessed valuation (AV) and preliminary regular property tax levy amounts shown in this exhibit reflect the preliminary AV amounts estimated by King County.

<u>Year</u>	<u>Regular Levy Assessed Valuation (\$ in millions)</u>	<u>% Change from Prior Year</u>	<u>Regular Property Tax Levy (\$000)</u>	<u>% Change from Prior Year</u>	<u>Tax Rate per \$1000 Assessed Valuation</u>

Figure 4-4

Property Taxes
Typical Distribution of Property Tax Dollars

This figure illustrates the property tax distribution for a typical Bellevue taxpayer in 2006. As shown in the pie chart, Bellevue's property tax levies make up only 14% of a property owner's tax bill. The largest components are the State school levy and the Bellevue School District levy.

Official property tax records are maintained by the King County Assessor's Office.

The following table displays the 2006 property tax bills for hypothetical low-, medium-, and high-assessed value (AV) homes.

	2006 Rate/\$1,000 of AV	Low AV = \$100,000	Medium AV = \$400,000	High AV = \$800,000
Emergency Medical Services	\$0.22	\$22	\$88	\$176
Port of Seattle	0.23	23	92	184
King County Library	0.53	53	212	424
City of Bellevue	1.16	116	464	928
King County	1.33	133	532	1,064
Bellevue School District	2.09	209	836	1,672
State School Levy	2.50	250	1,000	2,000
Total	\$8.06	\$806	\$3,224	\$6,448

B. OPERATING BUDGET RESOURCES

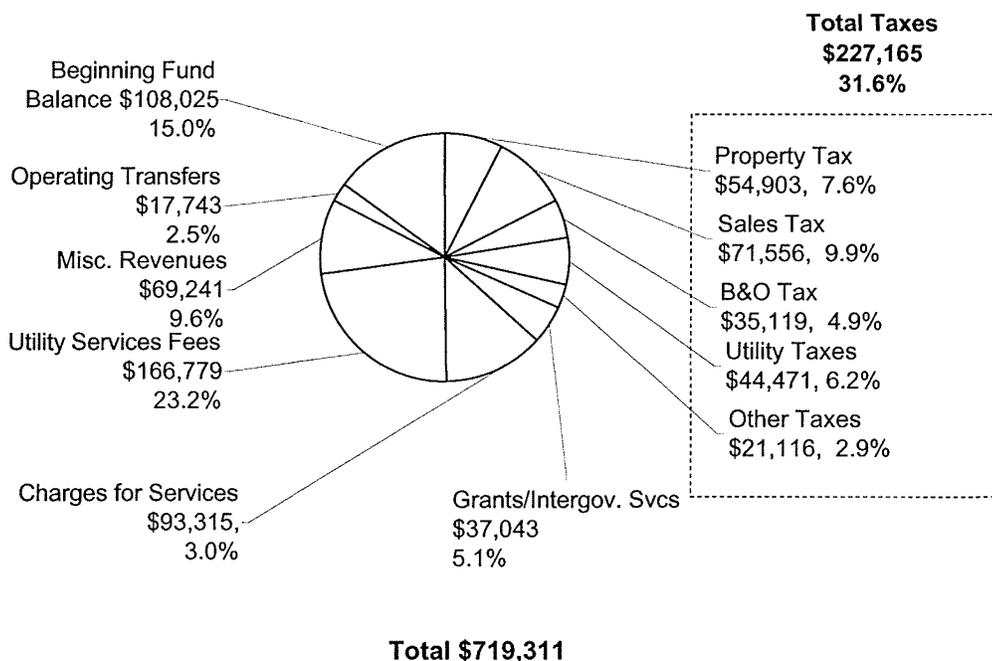

Figure 4-5 presents the 2007-2008 resource budget for the City's 22 operating budget funds. This graphic highlights that the largest operating budget resource categories are taxes at 31.6%, utility services fees at 23.2%, and beginning fund balance at 15.0%. Overall, operating budget resources are projected to increase by \$79.1 million or 12.4%.

- Sales tax revenues are projected to increase significantly in the biennium based on projected levels of development activity and employment growth.
- Increased pass-through wholesale sewer and water costs to customers, along with increased local program costs resulted in increased utility service fees.
- Beginning fund balance increased due to general growth in the economy.

Figure 4-5

2007-2008 Total Operating Budget Resources

\$000

Comparison to 2005-2006 Budget

	2005-2006 Budget	2007-2008 Budget	\$ Change	% Change
Taxes				
Sales Tax	\$62,304	\$71,556	\$9,252	14.8%
Property Tax	51,721	54,903	3,182	6.2%
Utility Taxes	40,909	44,471	3,562	8.7%
Business & Occupation Tax	32,578	35,119	2,541	7.8%
Other Taxes	16,900	21,116	4,216	24.9%
Subtotal Taxes	\$204,412	\$227,165	\$22,753	11.1%
Utility Services Fees	149,889	166,779	16,890	11.3%
Beginning Fund Balance	102,199	108,025	5,826	5.7%
Charges for Services	77,541	93,315	15,774	20.3%
Miscellaneous	61,280	69,241	7,961	13.0%
Grants/Intergovernmental Services	29,940	37,043	7,103	23.7%
Operating Transfers	14,974	17,743	2,769	18.5%
Total Resources	\$640,235	\$719,311	\$79,076	12.4%

Figure 4-6 is a summary of the General Fund resource changes from 2005-2006 to 2007-2008. General Fund resources are anticipated to increase \$33.4 million or 13.3% over 2005-2006.

- Sales tax revenues are anticipated to increase \$9.3 million or 14.8% as development activities and employment growth spur spending.
- Property taxes are projected to grow by \$2.8 million or 5.9% as major development is completed. The Forecast assumes no property tax levy increase, other than from the authorized increases for new construction and adjustments for refunds, omitted assessments for prior years, etc.
- Business and occupation tax receipts are anticipated to be \$2.5 million or 7.8% higher than in 2005-2006. This growth is projected as a result of the employment growth expected for the region and is offset by the estimated impact of B&O apportionment, which removes \$1.8 million from the General Fund biennial forecast (\$2.4 million total city impact). Growth in the business and occupation tax is assumed to be a function of employment growth and inflation.
- Utility tax collections are anticipated to be \$3.2 million or 8.5% higher in 2007-2008 than in 2005-2006. Tax collections for electric, natural gas, water, sewer and storm drainage utilities are projected to increase based on recent or proposed utility service rate increases and population growth. Telephone and garbage utility tax revenues are projected to decline based on historical trends.
- Intergovernmental services revenues are anticipated to be \$4.9 million or 16.6% higher than in 2005-2006. This projected increase reflects additional Emergency Medical Services levy revenue used to support the City's increased medic service demands.
- Charges for services revenues are anticipated to be \$4.0 million or 18.0% higher than in 2005-2006 reflecting growth in General Fund staff support of activities outside of the General Fund such as development activities and the demand for permitting and inspection services.
- Beginning fund balance is anticipated to be \$3.8 million higher than in 2005-2006 reflecting general growth in the economy.

Figure 4-6

Summary of General Fund Resource Changes - By Source
\$000

Resources	2005-2006 Budget	2007-2008 Budget	\$ Change	% Change
Sales Tax	\$62,304	\$71,556	\$9,252	14.8%
Property Tax	47,928	50,752	2,824	5.9%

C. SPECIAL PURPOSE FUNDS BUDGET RESOURCES

Figure 4-7 is a summary of the City's Special Purpose Fund resource changes from 2005-2006 to 2007-2008. Overall, Special Purpose Fund resources are projected to be \$13.0 million or 20.3% less in 2007-2008 than in 2005-2006.

- Beginning fund balance is anticipated to drop by \$10.2 million in 2007-2008 compared to 2005-2006. This decrease is primarily due to the use of Council reserves for the New City Hall project.
- Tax revenues will decrease by \$1.2 million due to the retirement of the 2003 Unlimited Tax General Obligation (UTGO) refunding bonds in 2008.
- Grants/intergovernmental services revenues are lower mainly due to timing in budgeting for grant revenues.

Figure 4-7

**2007-2008 Total Special Purpose Budget Resources
\$000**

Comparison to 2005-2006 Budget

	<u>2005-2006 Budget</u>	<u>2007-2008 Budget</u>	<u>\$ Change</u>	<u>% Change</u>
Beginning Fund Balance	\$25,802	\$15,568	(\$10,234)	(39.7%)
Operating Transfers	24,237	24,596	359	1.5%
Taxes				
Sales Tax	1,810	2,200	390	21.5%
Property Tax	2,959	1,381	(1,578)	(53.3%)
Subtotal Taxes	4,769	3,581	(1,188)	(24.9%)
Miscellaneous	4,568	4,048	(520)	(11.4%)
Grants/Intergovernmental Services	4,640	3,210	(1,430)	(30.8%)
Total Resources	<u>\$64,016</u>	<u>\$51,003</u>	<u>(\$13,013)</u>	<u>(20.3%)</u>

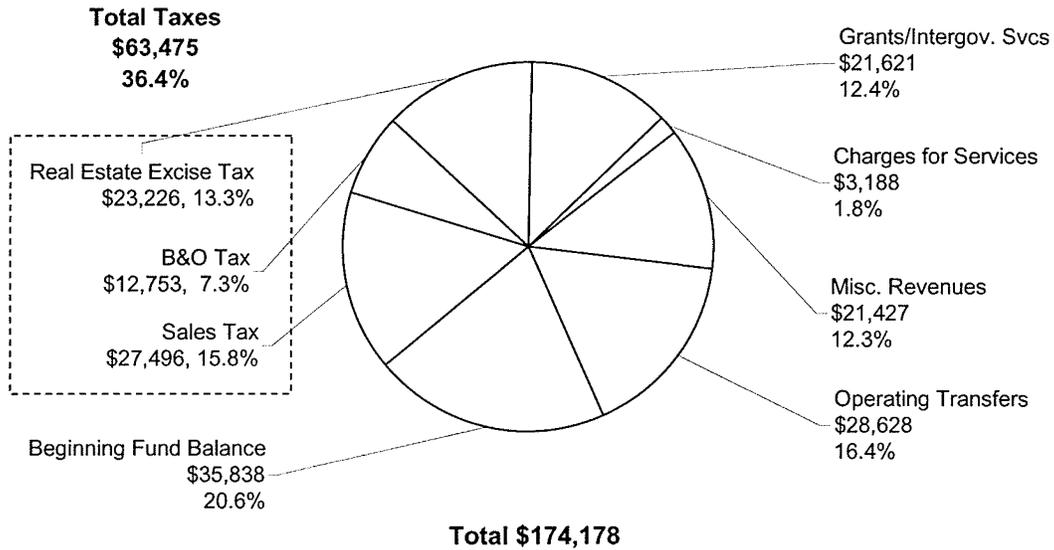

D. CAPITAL PROJECT FUNDS BUDGET RESOURCES

Figure 4-8 is a summary of the City's Capital Project Fund resource changes from 2005-2006 to 2007-2008. Overall, Capital Project Fund resources are substantially less than the 2005-2006 budget due to the completion of the new City Hall project.

- Sales and business & occupation tax revenues are projected to increase by \$5.3 million or 15.1% as development activities and employment growth spur spending.
- Real estate excise tax revenue is projected to increase by \$6.1 million or 36.0% which reflects the increase in development activity and the continued strength of the local real estate market.
- Operating transfers and beginning fund balance are projected to decrease by \$118.0 million due to the completion of the new City Hall project and use of proceeds from the 2004 sale of bonds for the project.
- Miscellaneous resources are projected to decrease by \$33.4 million primarily due to a reduction in anticipated interim cash flow borrowing for 2007-2008 compared to the 2005-2006 biennium.
- Grants/Intergovernmental services revenues are projected to decrease by \$4.5 million primarily due to the completion of several multi-agency partnership projects such as the Zone 1 Public Safety Wireless (PS-58), Zone 1 Paging and Station Alerting System (PS-59) and the NE 29th Place Connection (PW-R-60) projects.

Total Resources	<u>\$319,318</u>	<u>\$174,178</u>	<u>(\$145,140)</u>	<u>45.5%</u>

A. GENERAL FUND FINANCIAL FORECAST

Executive Summary

The General Fund Financial Forecast (the Forecast) projects that resources will be sufficient to sustain the City's quality and mix of municipal services through 2008. The Forecast builds upon the proposed 2007-2008 projected revenues and expenditures and calculates future resource and expenditure estimates based on recent and anticipated economic trends.

As illustrated in the graph below, the short-term financial outlook is positive, however the long-term financial outlook includes projected shortfalls in 2009 through 2012. These shortfalls are largely due to high rates of expenditure growth, such as escalating State pension contributions and a loss of B&O taxing authority in 2008.

Overview

The Forecast illustrates how we expect the City's finances as a whole to perform over the six-year period from 2007-2012. Some of the benefits of forecasting include:

- Provides insight into the long-term financial effects of current policies, programs, and priorities;
- Provides an early warning for potential problem areas to watch where alternative strategies may need to be developed;
- Assists in strategic decision-making and long-range planning efforts by allowing Council to see how programs fit within the overall context of City finances; and
- Illustrates the bottom line effect of current budget decisions on future resources.

The General Fund Forecast is divided into four sections:

- Section I: Economic Outlook discusses the major economic trends affecting the Forecast.
- Section II: Full Forecast Results summarizes the major revenue and expenditure trends in the current forecast.
- Section III: Resource Highlights provides a detailed discussion of the predicted growth or decline of the major economically-sensitive revenue sources. Includes a discussion of major issues and risks associated with select revenues and issues not included in the base Forecast.
- Section IV: Expenditure Highlights provides an overview of the major drivers of expenditure growth in the Forecast. Includes a detailed discussion of major drivers and other issues not included in the base Forecast.

Section I: Economic Outlook

The Forecast reflects the current strength in the local economy and assumes continued growth, at a modest pace, through 2012. Bellevue is in the midst of a major development cycle, expecting to add 2.8 million square feet of office space over the next several years (includes planned, permitted and under construction projects). Employment growth in the region continues to outpace the national average, which in turn contributes to personal income growth and regional population increases. Bellevue expects the residential downtown population to add more than 5,000 people over the forecast period. The increased urbanization of Bellevue is expected to provide additional revenues to the City, as well as additional service demands.

While the 2007-2008 biennial outlook is strong, the Forecast shows growth in the later years at a modest pace. Regional economists are predicting a slowing of employment growth and a cooling of the housing market. Development is expected to peak during 2008 and then moderate in later years. Key factors such as employment, inflation, and personal income impact the growth rate of the City's revenues. These key factors affect retail sales, vacancy rates, and new development.

Employment. Puget Sound has added approximately 55,000 jobs in the past year, primarily in the services, construction and aerospace industries. Job growth in the Puget Sound area is expected to slow but will continue to outpace the national rate. The Puget Sound Economic Forecaster is projecting employment growth to drop from a high of 3.8% in 2006 to 2.5% in 2007 and 2.3% in 2008, which is twice the anticipated national rate of growth. This trend is expected to contribute to growth in personal income and a steady sustainable rate of homebuilding. The long-term outlook remains positive for the region with an average growth rate of 1.4% anticipated through the remainder of the Forecast period.

Inflation. The Forecast assumes inflation at 3.0% in 2007, leveling off to 2.6% for the remainder of the forecast period. This rate is not expected to significantly slow consumption, which should bolster sales, business and occupation (B&O) and utility tax collections. Utility rates, which include electricity, gas, water, etc., are projected to rise at or above the rate of inflation through the forecast period which will increase utility tax collections. Telephone utility taxes are expected to continue to decline through the forecast due to the continued decline in use of traditional telephone technology.

Retail Sales. As the economy decelerates, taxable retail sales are expected to grow at a more moderate pace than in the current biennium (an average of 5.9% for 2007-2008 compared to an average of 9.2% for 2005-2006). The high rate in the current biennium reflects the impact from increased construction activity and strong job growth in the region. The General Fund sales tax forecast projects a 9.4% increase in sales tax for 2007. As job growth slows and development levels off, sales tax is projected to grow at an average of 4.2% for 2009-2012.

Vacancy Rates. Office vacancy rates in the central business district (CBD) continue to drop (8.3% reported for the 2nd quarter) with over 50,000 square feet of office space being absorbed in the last year (CB Richard Ellis). An additional 2.8 million square feet are currently proposed/in-review or under construction, including Lincoln Square's Office Tower, which has been fully pre-leased and is expected to be completed in mid-2007. Downtown office vacancy rates are expected to remain low due to the strong employment growth in the region. Declining office vacancy rates and new commercial development positively impact B&O tax and utility taxes.

Development Activity. Bellevue is experiencing an unprecedented amount of development activity that is expected to level off towards the end of 2008 as projects permitted or under construction are completed. New development growth positively impacts sales tax and property tax. The Forecast incorporates one-time estimates for sales tax generated through development activities, but does not include extraordinary construction sales tax associated with values over \$100 million. Per Council direction, these one-time resources are set aside for unforeseen needs or emerging opportunities and are not included in the General Fund forecast projection.

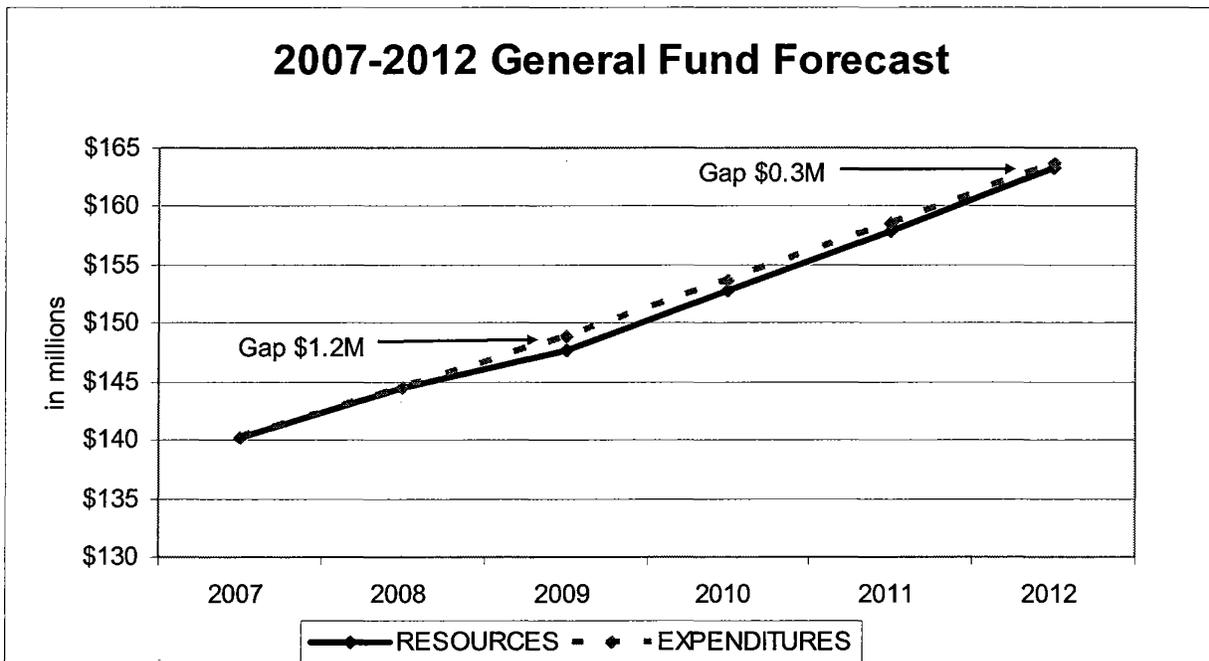

Legislative Changes. State legislative changes to the Business and Occupation (B&O) tax, called apportionment, will adversely affect Bellevue's General Fund and Capital Improvement Program Fund (CIP) beginning in 2008. Apportionment will narrow our current tax base by reallocating a portion of it to other jurisdictions. The legislative changes are very complex and impacts are difficult to estimate. The Forecast includes a projected impact of approximately \$1.8 million to the General Fund in 2008.

Additionally, Initiative 933, which requires the government to compensate private property owners when certain regulations are imposed, will be on the ballot in November. Based on the timing, complexity, and uncertainty associated with this ballot measure, the Budget assumes no impact from this initiative. If this initiative passes, staff will return to Council with any necessary budget amendments in 2007.

Section II: Forecast Results

The Forecast builds on the proposed 2007-2008 budget’s mix and level of resources and anticipated service levels. It calculates future resource and expenditure estimates based on current budget performance, historical trend analysis, current economic information, input from other governments and industries and feedback from local economists.

The proposed budget incorporates increased service needs, including the addition of 17.19 FTEs, as well as projected growth in tax revenues. The Forecast projects that revenues will fall short of expenditures by \$1.2 million. This deficit diminishes to \$300,000 by 2012 (see graph and data table below). On average, resource growth falls just short of expenditure growth throughout the remainder of the Forecast period.

(in millions)

	2007	2008	2009	2010	2011	2012
Resources	\$140.2	\$144.5	\$147.7	\$152.7	\$157.9	\$163.3
Expenditures	140.2	144.5	148.9	153.5	158.5	163.6
Uncommitted Resources	\$0.0	\$0.0	-\$1.2	-\$0.8	-\$0.6	-\$0.3

Section III: Resource Highlights

This section includes a) a general discussion of resources; b) a detailed discussion of taxes; and c) a detailed discussion of other revenues.

A. Summary

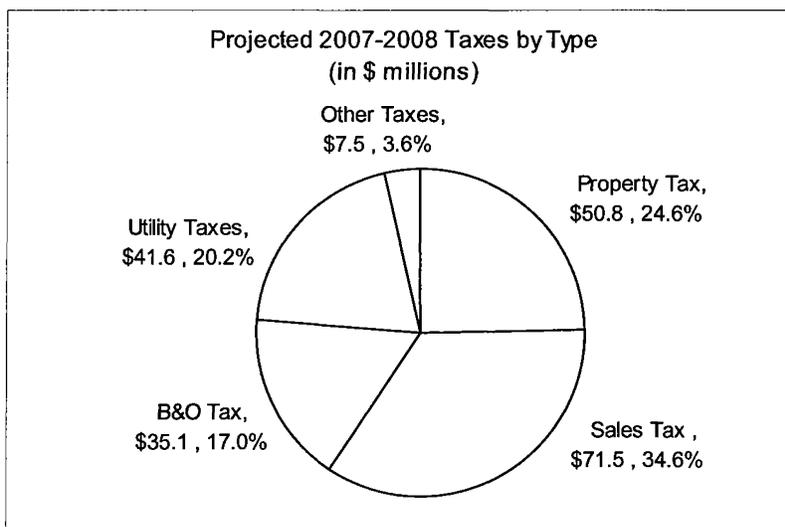

Projections for the most economically sensitive taxes (75% of all revenues) remain positive through the forecast period. Resource growth is expected to average 4.0% through 2012; with the exception of the telephone utility tax, which continues to decline. Much of this decline in telephone utility tax is due to the substitution of traditional telephone services with wireless, internet, and cable television technologies. With continued substitution, customers are disconnecting their traditional telephone and using an alternative technology.

State legislative changes to the Business and Occupation (B&O) tax, called apportionment, will adversely affect Bellevue's General Fund and Capital Improvement Program Fund (CIP) beginning in 2008. B&O apportionment will narrow our current tax base by reallocating a portion of it to other jurisdictions. The estimated impact of B&O apportionment removes \$9.6 million from the Forecast.

Prospects for other revenues (25% of all resources) are also generally positive with the exception of fines and forfeits which are projected to decrease in 2007 (\$140,000). This decrease is due to the change to the contract with King County executed in November 2005 for the provision of municipal court services (see detailed discussion in C: Other Revenue Groups).

B. Taxes

For the 2007-2008 biennium, taxes are estimated to comprise 75%, or \$206.5 million, of all General Fund resources. This group consists of sales, property, business and occupation (B&O), utility and other miscellaneous taxes. The following table illustrates the forecasted percentage and amount by tax category for the 2007-2008 biennial budget.

Each tax is discussed below.

Sales Tax (\$71.5 million or 34.6% of taxes). Collections are expected to increase at an average rate of 5.0% during the 2007-2008 biennium and 4.2% for the remainder of the forecast period. Ongoing sales tax growth will be supported by the addition of retail and service industry businesses. Retail trade, contracting and services, which comprise 83% of the sales tax base, grew between 9% to 18% in the first nine months of 2006 compared to the first nine months of 2005. The retail trade and services sectors are expected to continue this course of growth through the biennium. Contracting growth is projected to slow as development activities subside towards the end of 2008.

The Forecast does not include extraordinary one-time sales tax associated with the construction of Bravern, Wasatch and other projects with anticipated value of greater than \$100 million. The potential General Fund allocation of one-time sales tax associated with these projects is estimated at roughly \$2.0 million from 2007 to 2008.

Property Tax (\$50.8 million or 24.6% of taxes). Some increase is expected to occur in the early years of the Forecast as major new development is completed. The Forecast assumes no property tax levy increase, other than from the authorized increases for new construction and adjustments for refunds, omitted assessments for prior years, etc.

Business and Occupation Tax (B&O) (\$35.1 million or 17.0%). B&O tax projections incorporate growth due to the anticipated increase in employment for the region. Bellevue's B&O collections in wholesaling, retailing, and services grew by 14% in the first two quarters of 2006. These sectors comprise 89% of the B&O tax base. The model assumes that growth is a function of inflation and employment growth.

- **Impact of Apportionment.** State legislative changes to the B&O tax are projected to adversely affect Bellevue's General Fund and Capital Improvement Program Fund (CIP) beginning in 2008. Apportionment will likely narrow our current tax base by reallocating a portion to other jurisdictions. Growth is expected to average 4.4% through the forecast period, despite the effects of B&O apportionment in 2008. The legislative changes are very complex and impacts are difficult to estimate and prone to error. The Forecast includes an estimated reduction of \$9.6 million in General Fund B&O tax collections over the forecast period; the CIP impact will be reflected in the 2007-2013 CIP update.

Other Taxes (\$7.5 million or 3.6%). This tax category includes criminal justice sales tax, admissions tax and business tax penalty. Criminal justice sales tax is distributed based on the proportion of Bellevue's population compared to King County's and the State's population. This revenue is expected to grow an average of 4.6% during the Forecast. Admissions tax and business tax penalties are expected to rise at the rate of inflation.

Utility Taxes (\$41.6 million or 20.2% of taxes). Utility taxes consist of several taxes. The following table illustrates the relative proportion of each utility tax for the 2007-2008 biennium.

Projected 2007-2008 Utility Tax Revenues by Type (in \$ millions)		
<u>Utility Tax</u>		
Electric	\$12.6	30.4%
Gas	6.2	14.9%
Cellular Phone	8.2	19.6%
Telephone	5.9	14.1%
Sewer	3.1	7.5%
Garbage/Solid Waste	1.6	3.9%
Water	2.6	6.3%
Storm/Surface	1.4	3.3%
Total	\$41.6	100%

Electric (\$12.6 million or 30.4% of utility taxes) and Gas (\$6.2 million or 14.9% of utility taxes) Utility Taxes. Electric and gas utility taxes are expected to grow an average of 3.7% and 4.2% respectively per year through the Forecast period. This increase does not take into account additional growth associated with declining office vacancy rates as a conservative revenue estimating practice. The Forecast includes a recent increase in Gas rates (pass-through of increased gas costs) that took effect October 1, 2006, but does not include a pending request for electricity and natural gas rate increases (9.2% and 5.3% respectively).

Cellular Telephone Utility Tax (\$8.2 million or 19.6% of utility taxes). The Forecast assumes that the rate of growth will hold steady at 4.0% through the Forecast period, which equates to the average growth rate experienced over the past three years.

Telephone Utility Tax (\$5.9 million or 14.1% of utility taxes). Over the past several years telephone utility tax has continued to drop substantially. Much of this decline in telephone utility tax is due to an accelerated substitution of traditional telephone services with wireless, internet, and cable television technologies. With continued substitution, customers are disconnecting their traditional telephone and using an alternative technology. This trend is expected to continue indefinitely and projections have been revised downward substantially.

Wastewater Utility Tax (\$3.1 million or 7.5% of utility taxes). Wastewater utility tax collections are projected to increase by nearly \$140,000 in the 2007-2008 biennium. This increase is due to proposed wastewater utility rate increases necessary to support local program costs and pass-through cost increases from King County. The METRO/King County Council adopted an increase in wastewater treatment rates of 9.2% (from \$25.60 to \$27.95) per month for an equivalent residential unit for 2007. The Forecast assumes that wastewater tax collections will grow at an average of 8.4% for the remainder of the forecast period based on additional proposed utility rate increases.

Water (\$2.6 million or 6.3%), Storm and Surface Water (\$1.4 million or 3.3%), and Garbage (\$1.6 million or 3.9%) Utilities Taxes. Water utility tax collections are projected to increase by \$105,000 in the 2007-2008 biennium. This increase is due to proposed water utility rate increases necessary to support local program costs and pass-through cost increases from Cascade Water Alliance. The Forecast assumes that water tax collections will grow at an average of 7.3% for the remainder of the forecast period based on additional proposed utility rate increases.

Storm and surface water tax collections are projected to increase by 4.6% on average through the forecast period as a result of proposed utility rate increases necessary to support local program costs.

Garbage utility tax is expected to grow at roughly the rate of inflation from 2007 forward.

C. Other Revenue Groups

For the 2007-2008 biennium, other revenues are estimated to comprise 25%, or \$78.2 million, of all General Fund resources. Other revenues consists of intergovernmental, charges for services, beginning fund balance, miscellaneous, other finance sources, fines and forfeits, and licenses and permits. The following table illustrates the forecasted percentage and amount by revenue group for the 2007-2008 biennial budget.

<u>Revenue Group</u>		
Intergovernmental	\$34.5	44.1%
Charges for Services	26.0	33.4%
Beginning Fund Balance	10.3	13.2%
Miscellaneous	3.5	4.5%
Other Finance Sources	2.9	3.7%
Fines/Forfeits	0.4	0.4%
Licenses & Permits	0.6	0.7%
Total	\$78.2	100%

Each revenue group is discussed below, in order of largest to smallest.

Intergovernmental Revenues (\$34.5 million or 44.1% of other revenues). This group includes liquor excise tax, emergency medical services (EMS), and motor vehicle fuel tax (MVFT). Revenues such as motor vehicle fuel tax and liquor excise tax are tied to population growth and are projected to grow by 2.7% on average for the period. Projections for MVFT reflect the estimated impact of higher fuel costs as well as increases in fuel taxes. Revenue growth for regional contract services including EMS, fire services and dispatch are expected to grow at an average of 4.1% for the forecast period. This includes revenues contingent on the approval of proposed additions to fire services and passage of the EMS levy on the ballot in November 2007.

Charges for Services (\$26 million or 33.4% of other revenues). Charges for services, which include fire inspection fees, parks and recreation fees, probation charges, and interfund charges, are expected to increase 6.6% on average over the forecast period.

Beginning Fund Balance (\$10.3 million or 13.2% of other revenues). Beginning fund balance or resources forward, is assumed at 3% of total budget. Additionally, \$1.1 million of unanticipated B&O audit tax collections are included in resources forward from 2006.

Miscellaneous (\$3.5 million or 4.5% of other revenues). Investment interest is expected to increase significantly during the biennium and then level off as the economy continues to moderate.

Other Finance Sources (\$2.9 million or 3.7% of other revenues). Includes operating transfers from Cable Franchise and Development Services. Contributions from Cable Franchise are expected to rise at the rate of inflation. Transfers from Development Services, which reimburse the General Fund for staff support, are projected to increase at roughly the rate of salary and benefit costs.

Fines and Forfeits (\$0.4 million or 0.4% of other revenues). Due to changes in the King County Court Service contract, revenues associated with the contract cease in 2007.

- **Provision of Municipal Court.** Bellevue's contract with King County expires at the end of 2008. The provision of court services remains an area of significant uncertainty for Bellevue. If the City establishes a facility for these services, initial one-time costs are estimated at between \$500,000 and \$1 million. The current Forecast assumes the current relationship will continue indefinitely and does not include initial set-up costs. The City will continue to work on resolving this major uncertainty.

This revenue category is now made up primarily of false alarm fines which are projected to remain constant over the forecast period.

Licenses and Permits (\$0.6 or less than 0.7% of other revenues). Licenses and permits, which include business registrations and concealed weapons fees, are expected to increase modestly during the Forecast period.

Section IV: Expenditure Highlights

This section includes a) a general discussion of expenditures and b) a detailed discussion of major drivers.

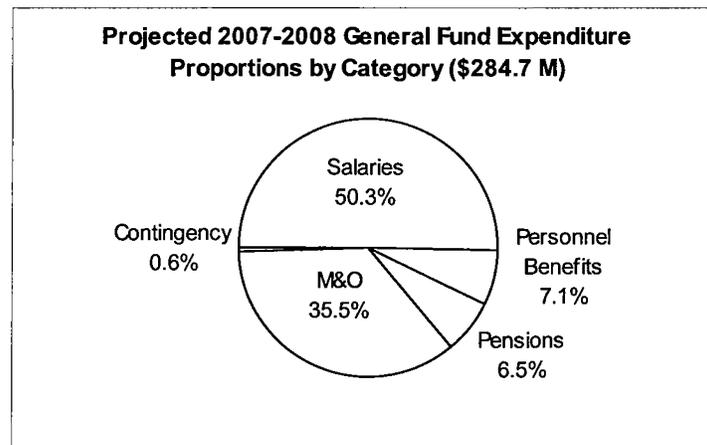

A. Summary

Expenditure growth is expected to average 5.8% in 2007 and 2008, declining to an average of 3.2% through 2012. Several significant cost drivers, which account for \$8.9 million of the \$11.1 million General Fund expenditure growth in 2007, contribute to the expenditure spike including:

- Inflationary increases for personnel
- State mandated retirement plans
- Population Growth
- Fuel and energy costs

The proposed 2007-2008 operating budget includes the addition of 17.19 FTEs to support increased service demands. Most FTE's proposed are revenue neutral, offset by expenditure reductions or LTE conversions necessary to meet ongoing service demands. Details of these proposed additional positions, along with other new investments proposal information, can be found in each individual department's budget discussion under the "Budget Issues" sections.

As the table illustrates below, salaries are the largest expenditure component, followed by maintenance and operating (M&O), personnel benefits, pensions, and General Fund contingency. Each expenditure group is discussed below.

Salaries (\$143.2 million or 50.3%). Total salary costs are expected to rise an average of 4.1% per year through the forecast period. The Forecast includes the addition of 17.19 new proposed positions and an update of wage inflation projections. June's CPI-W, which is the basis for 2007's general salary adjustment, equated to a 4.1% increase, while the Early Outlook Forecast assumed a 2.7% increase in salaries for 2007.

Maintenance and Operating (M&O) (\$101.2 million or 35.5%). M&O expenditures are projected to grow 10.8% in 2007, primarily due to increases in fuel costs, building space rates and new investments. Ongoing General Fund expenditures are expected to increase by \$5.0 million in 2007 with an additional increase of \$0.7 million in 2008.

Personnel Benefits (\$20.1 million or 7.1%) and Pensions (\$18.5 million or 6.5%). This includes workers' compensation, health benefits, and state pensions. Worker's compensation is expected to increase at approximately the rate of inflation. Health benefits costs have leveled out, with a 7.2% increase on average, while state pension costs are expected to rise substantially, averaging 16.4% over

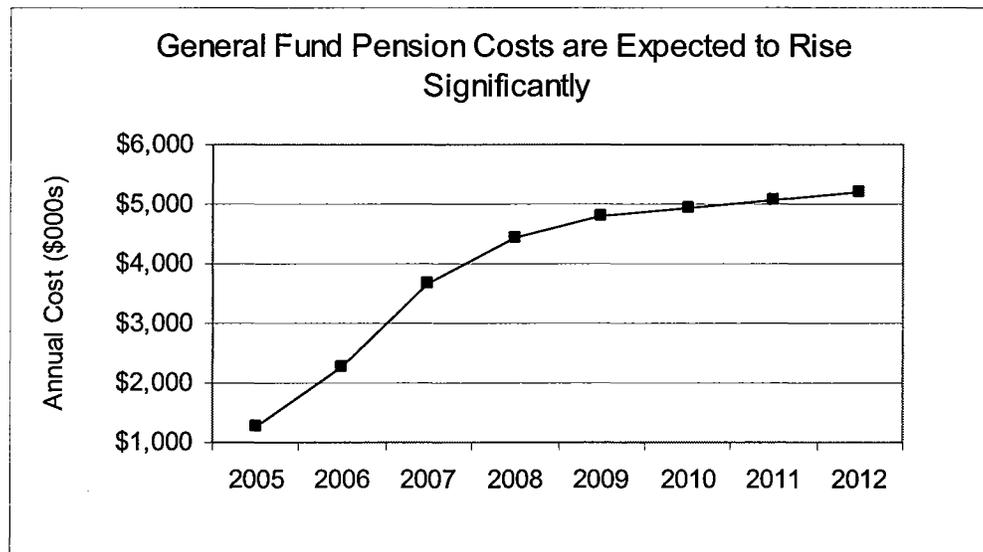

the forecast period. A detailed discussion of state pensions and health benefits is included in B. Major Drivers.

General Fund Contingency (\$1.7 million or 0.6%). Per City policy, contingency is assumed at 0.6% of the total budget.

B. Major Drivers

Expenditures are projected to grow by 4.0% over the forecast period. Key expenditure drivers include increases in pension cost, inflationary increases necessary to maintain existing service levels, as well as service additions to meet immediate needs in the community.

Pension Rate Increases. The State of Washington is increasing mandated retirement contributions from cities through the forecast period. As a consequence, City retirement contributions to PERS 1, 2, and 3 and LEOFF 2 will increase significantly in 2007 and beyond (with no change to LEOFF I employer rates). General Fund contributions are expected to raise \$1.4 million in 2007 and continue to rise on average \$0.8 million (7.5%) per year through the forecast period.

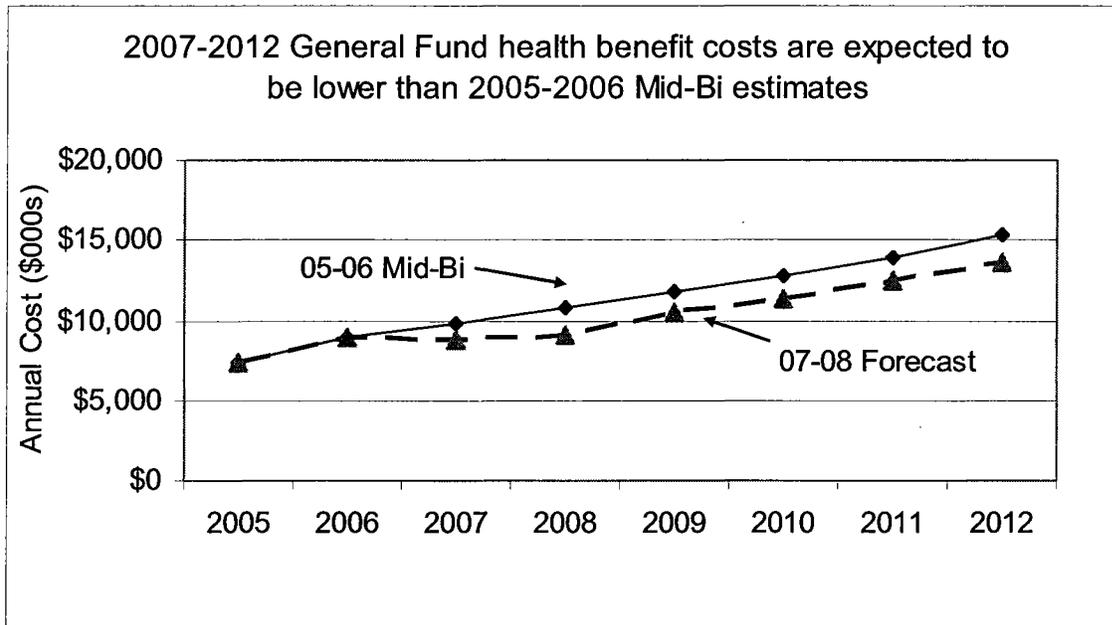

Inflationary Increases. Projected growth in salaries and maintenance and operating expenditures are based on the regional consumer price indices. The consumer price index for urban wage earners (CPI-W) used for general salary adjustments came in higher for 2007 than anticipated in the Early Outlook Forecast (4.6% compared 3.0%). Maintenance and operating expenditure budgets were increased by the consumer price index for all urban consumers (CPI-U) which is forecasted at 3.0% for 2007 and 2.6% for 2008. Other costs, such as utility and fuel expenses have been growing at a rate greater than inflation for the past several years. The Forecast incorporates increases in most utilities rates and fuel costs for the biennium. The combined impact of salary and other expenditure adjustments was approximately \$6.8 million for 2007-2008.

Population Growth. Bellevue's downtown residential population is projected to increase by 117% or an additional 5,600 residents over the forecast period. The daytime population, including employees at work, residents at home and visitors (i.e. shoppers and diners) is projected to grow by 30% or 16,000 over the next six year period. The Forecast includes 17.19 additional staffing to address increased service demands, which are in part associated with the projected growth in population. It is important to note that this is a preliminary assessment of increased service needs proposed to meet

immediate demands. Staff will return to Council with a more detailed analysis of increased service needs during the 2007-2008 Biennium.

Health Benefit Costs. Health benefit costs have stabilized in the current biennium. Health benefit costs are not rising as rapidly as in the recent past due to several factors including a change to Bellevue's provider network, higher co-payments, and fewer extraordinary claims. In addition, Bellevue's Health Benefits actuary has recommended lower growth projections and reductions in reserves held for outstanding medical and prescription claims. As a result, General Fund health benefits expenditures are expected to decline slightly in 2007 and rise by an average of 9.3% through the remainder of the forecast period (see chart below).

B. UTILITY FUNDS FINANCIAL FORECAST

This section contains the 2007-2012 Financial Forecasts for the City's Water, Sewer, and Storm & Surface Water Utility Funds, based on amounts reflected in the Utility's 2007-2008 Preliminary Budgets.

EXECUTIVE SUMMARY

Introduction

The following key financial policies approved by Council in 1995, and updated in subsequent budgets, are incorporated in these financial forecast results:

- Consolidated reserve funding policies which define target and minimum reserve levels for each Utility fund;
- Operating reserve management policies which stipulate the transfer of greater-than-anticipated year-end reserves (ending fund balances) to the CIP Renewal & Replacement (R&R) Account;
- Capital reinvestment policies for future replacement of Utility infrastructure systems which base transfers to the CIP R&R Account on long-term capital investment;
- System expansion and connection policies which stipulate all capital related Capital Recovery Charges (CRC) and Direct Facility Charges will be deposited directly to the CIP Renewal & Replacement (R&R) Account; and
- Rate-planning policies which set rates at a level sufficient to cover current and future expenses and maintain reserves consistent with Utility financial policies and the long-term financial plans, and to pass through wholesale cost increases directly to customers. Inflationary indices are used as a basis for evaluating rate increases but no longer limit the growth in local programs.

These forecasts assume no increases in Utility staffing levels or significant changes in current service programs for maintenance and operations, which is consistent with ongoing department cost containment efforts.

Significant Issues

Significant issues expected to impact the Utilities current and future financial performance are briefly discussed below.

King County/METRO Wastewater Treatment Costs

Sewage treatment charges from King County/METRO will increase by 9.2% (from \$25.60 to \$27.95) per residential equivalent unit in 2007. This increase is primarily driven by higher debt service resulting from increased capital costs (including the Brightwater treatment plant). Since this rate increase is expected to cover cost increases for both 2007-2008, there will be no rate increase for 2008. Per Council-adopted financial policies, wholesale cost increases are passed through to the customer. The increase in wastewater treatment costs will result in an increase to Bellevue ratepayers of approximately 7.0% in 2007.

Cascade Water Alliance

The Cascade Water Alliance (Cascade) has developed its proposed 2007 operating and capital budgets. Cascade's proposed 2007 operating budget is \$20 million, or 6.4% higher than 2006. Cascade's 2007 wholesale charges to Bellevue are currently projected to increase by \$1.1 million or 10.8%. This increase will be reduced by a one-time credit of \$0.5 million in 2007, resulting in a net increase to Bellevue of 5.8% or approximately \$0.6 million. Additionally, a one-time contingency of \$0.2 million for anticipated meter replacement has been budgeted in 2007, resulting in a total increase to the City of \$0.8 million, or 7.3%. Consistent with Council adopted policies of gradual and uniform rate increases, the impact of these one-time adjustments will be leveled over the 2007-2008 biennium. This will result in rate increases of 5.2% per year in 2007 and 2008 for wholesale water purchases.

New Capital Projects

There are several capital projects highlighted as being high priority during, and just beyond, this forecast period. These include projects to meet sewer capacity needs in the central business district and water infrastructure renewal projects.

Sensitivity and Risks

Each item discussed above could potentially affect annual Utility costs and rate requirements over the forecast period. Changes in inflation rates for various services can also affect annual cost levels. Each projection made in this forecast is based on the best information currently available, but actual costs and revenues in future years may be higher or lower than forecasted amounts, as changes in prevailing economic conditions or other circumstances influence actual Utility financial outcomes.

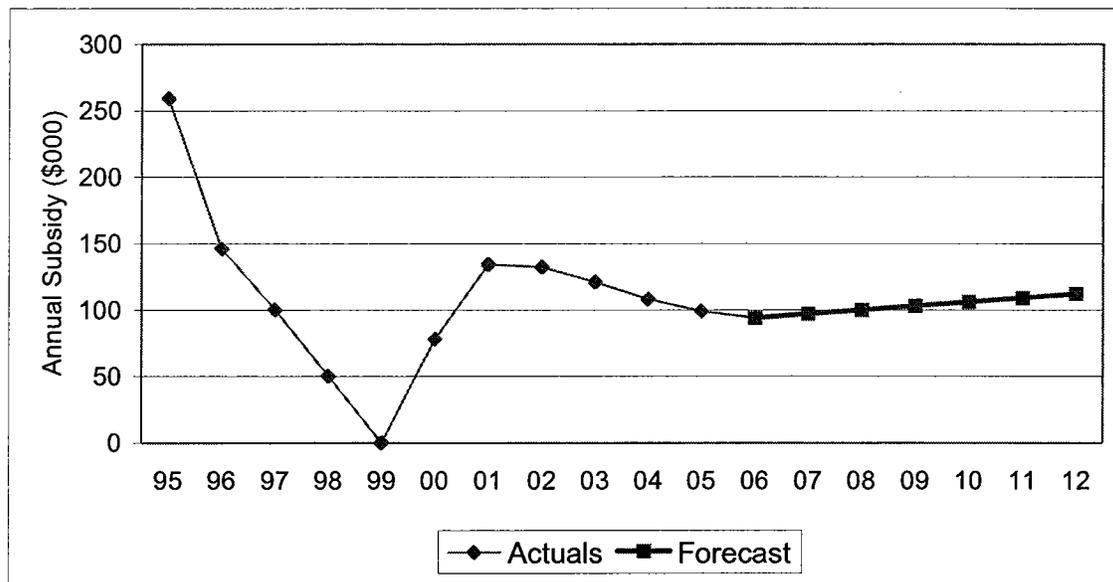

C. PARKS ENTERPRISE FUND 2007-2012 PRELIMINARY FINANCIAL FORECAST

Introduction

The Parks Enterprise Fund accounts for the services provided by the Enterprise Program within the Parks & Community Services Department. These services include golf, tennis, aquatics, adult sports, and facility rentals. Enterprise Programs are primarily supported through user fees but attempt to serve all residents regardless of ability to pay through the use of scholarships, sponsorships and fee waivers. The Parks Enterprise Fund receives a subsidy payment from the General Fund to ensure that programs are accessible to all Bellevue residents.

General Fund Subsidy

- The forecast shows that the Parks Enterprise Fund can continue to make progress in reducing the General Fund Subsidy to about \$100,000 per year.
- The graph below shows the actual and forecasted subsidy payment from the General Fund:

Note: Between 1997 and 1999, the Parks Enterprise Fund received an annual payment of \$140,000 from King County to offset a portion of the operating costs associated with the Bellevue Aquatic Center. Starting in 2001, the subsidy includes an adjustment for the impact of the benefited employee rule changes.

- The Aquatic Center continues to be the driver behind the need for a General Fund Subsidy throughout the forecast period. Due to the nature of Aquatic Center programs, the majority of services provided at this facility are not "Full Cost Recovery" services. Most of these services recover only the direct program costs in an effort to provide affordable and accessible programs to youth and physically challenged participants. In addition to the General Fund subsidy, approximately \$300,000 of other Parks Enterprise Fund revenues are needed to support the Aquatic Center operation each year. Overall, this level of subsidy is consistent with the financial performance that was anticipated in 1995 when the City took over the pool.

Parks Enterprise Fund Reserves

Parks Enterprise Fund reserves will be managed within the targeted reserve level of 2-months operating expenses, or approximately \$500,000 to \$780,000 over the forecast period.

Enterprise Capital Improvements

The Parks Enterprise program funds the Enterprise Facility Improvements Project (CIP project P-R-2), including capital projects at the Bellevue Golf Course. In 1999, the City acquired the 2.79-acre Miller Property primarily to protect the golf course maintenance facility hours of operations from residential development directly adjacent to the maintenance facility. The 2005-2011 Capital Investment Program Plan included sufficient capital funding from both Enterprise user fees and General CIP funding to make the final balloon payment for the Miller property without the need for a long-term interfund loan. This approach will continue to protect the viability of the golf course operations, while allowing for the ongoing renovation of the Bellevue Golf Course and the ongoing subsidy of the Bellevue Aquatics Center.

In December 2006, the City's contract with MRA, Inc. to operate the Bellevue Municipal Golf Course will expire. Consistent with contract policies, the City issued a request for proposal (RFP) in April 2006 to determine if there were other qualified parties interested in submitting bids to compete for this significant body of work. In May 2006, seven bids were received and the City is evaluating the revenue sharing, level of service, and capital contributions that may be available. Given the magnitude of this service, City Council action to approve a vendor will be requested this fall, and the final Enterprise Financial Forecast will be amended to reflect the final terms of the approved contract.

Budget Assumptions and Issues

Below are some of the major assumptions used in developing the early outlook 2007-2012 forecast:

- Parks Enterprise Fund revenues are assumed to increase at the same rate as expenditures from 2007-2012, or roughly 3.5% per year.
- City Council will be discussing pricing and resident/non-resident access policies as part of the Recreation Program Plan Update. While these policy decisions could impact the pricing strategy and customer base for Enterprise Programs, no fundamental policy changes have been incorporated into this forecast update.
- Golf course revenues and expenses were based on the terms contained in current golf course operator contract. The Parks Enterprise Financial Forecast will be updated to incorporate final terms negotiated between the selected vendor and the City.
- No new programs or capital investments were included in this forecast or the Parks Enterprise Fund budget.

D. DEVELOPMENT SERVICES FUND FINANCIAL FORECAST

Executive Summary

The Development Services Fund is responsible for administering the development review and inspection process, land use and comprehensive planning, and code enforcement.

The Development Services Fund forecast reflects continued growth in development activity through 2007 as a result of the addition of several major projects in 2005-2006. Additional staffing and contracted services were added in response to this rapid increase in activity.

Beginning in 2010, development activity levels stabilize and reflect moderate growth throughout the forecast period.

Background

Bellevue continues to experience unprecedented growth with the completion of several major projects (e.g. Lincoln Square residential tower, City Hall, Ashwood Commons Phase I) and the initiation of new projects (e.g. Washington Square, Bravern/Schnitzer NW, Ashwood Commons Phase II) in 2005 and 2006. In response to this rapid increase in activity, 32 Full-Time Employees (FTEs) have been added in 2005 and 2006 to respond to the high demand for project review and inspection. The construction valuation for issued permits, considered a key barometer of development activity, exceeded estimates in 2005 and 2006. This trend is expected to continue through 2007.

2007-2012 Outlook

Office vacancy rates in the central business district are a key indicator of the interest in development activity. Rates have fallen to 8.3% in the last year, which indicates that development activity will remain strong through the early years of the forecast (2007-2008). However, the number of design review applications (an early indicator of development activity) received through the first quarter of 2006 indicates that the demand for major projects in the central business districts will decline towards the latter part of 2008. In addition, as interest rates continue to rise, the demand for single family additions and remodel projects is expected to decline as well. As a result, the forecast reflects a decline in revenue (overall resources less the General Fund subsidy) from 2007 to 2009 by 32% or \$4.6 million, followed by moderate growth in revenue of 2.6% beginning in 2010. The forecast does not assume the continuation of the level of development activity experienced in 2006 and projected in 2007.

Total Expenditures	\$19,043	\$19,477	\$18,493	\$17,949	\$18,416	\$18,895
Ending Reserves	\$10,165	\$8,188	\$6,261	\$5,309	\$4,331	\$3,328

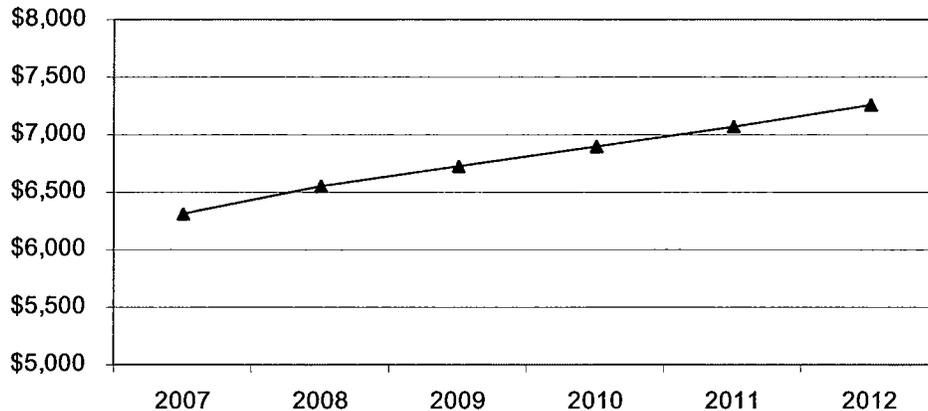

Forecast Drivers and Assumptions

- 1) The following major projects are assumed to be substantially completed in the early years of the forecast:
 - Lincoln Square Office Tower
 - Ashwood Commons Phase II
 - Belletini
 - Washington Square
 - Overlake Hospital
 - Avalon Meyedebnbauer
 - 1020 Tower
 - Bellevue Towers
 - 1200 Bellevue Way
 - City Center II
- 2) A significant spike in new major projects is not assumed beyond 2007. This results in a reduction of fee revenue of approximately \$4.6 million through 2009. Expenditures are expected to increase by inflation in 2008 and then decrease by approximately \$1.5 million or 8.0%, in through 2010 reflecting the completion of major projects.
- 3) The forecast reflects the addition of 32 FTEs to address the increase in workload associated with the major projects. Adjustments to resource levels are anticipated to begin towards the latter part of 2008.
- 4) This forecast assumes development fees grow at the rate of inflation (4.6% in 2007 and 2.6% from 2008, through 2012). A comprehensive Cost of Service Study was conducted in 2006 for Land Use, Fire, Transportation, and Utilities rates. In addition, recommendations to shift to the ICBO Valuation Table for Building fees will be proposed. Development fees may be adjusted to assure they are set accordingly to meet cost recovery objectives endorsed by Council.

General Fund Subsidy

The General Fund contribution to the Development Services Fund accounts for approximately 5% of the General Fund budget. This contribution (subsidy) supports personnel, M&O and capital costs for programs that have been designated as general funded activities. These programs include Comprehensive Planning, Neighborhood Outreach, Code Compliance, and Housing. Land Use activities supported by the General Fund include public information, policy development, and 50% of discretionary review.

General Fund Subsidy Forecast 2007-2012
(\$ in Thousands)

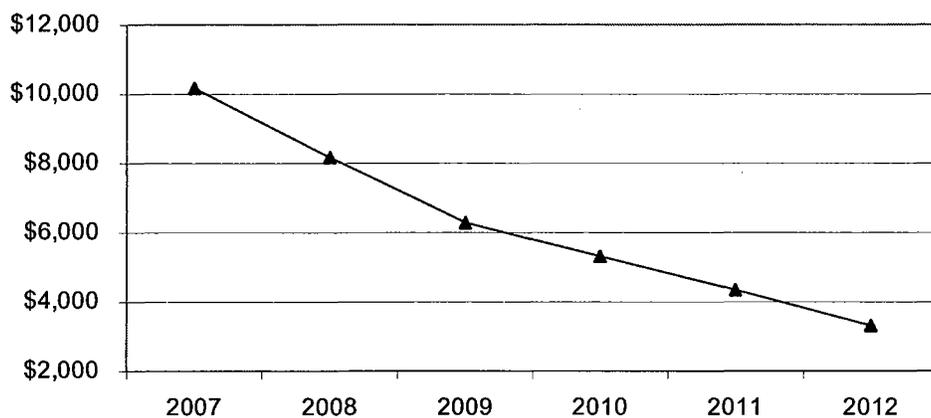

In 2006, the Economic Development program became its own department, and is no longer reflected in the General Fund subsidy. The General Fund contribution to the Development Services Fund is anticipated to grow at the rate of 3.8% from 2007 to 2008 and then by 2.6% over the forecast period.

Development Services Fund Reserves

The Development Services Fund maintains reserves to assure that core staffing levels are balanced with cyclical needs, thus mitigating the effects of downturns, and to account for prepaid building fees and development services deposits. The prepaid workload liability can extend for three years or more throughout the life of a project.

Development Services Fund reserves are anticipated to decline from \$10.2 million in 2007 to \$8.2 million in 2008. This reflects the completion of work on large projects that began in 2006 and 2007. Reserve levels are assumed to continue to decline by approximately \$4.9 million from 2008 through 2012, reflecting the completion of the major projects constructed during this development cycle. However, resourcing levels will continue to be evaluated over the forecast period to ensure alignment between resources, cost, and performance of the Development Services management model.

Development Services Reserves Forecast 2007-2012 (\$ in Thousands)

General Information About Bellevue

This chapter provides information about the City of Bellevue, its form of government, management structure, location, population, and business climate. This information will aid the reader in understanding Bellevue's service programs and means of providing these services. Budgetary values have more complete meaning when placed in this context.

A. FORM OF GOVERNMENT AND ORGANIZATION

The City of Bellevue is a noncharter optional code city. It was incorporated as a third class city on April 1, 1953. On June 1, 1970, however, Bellevue elected to become an optional code city and be governed under the provisions of the Optional Municipal Code of the Revised Code of Washington. Optional code city status increases the City's operating authority by extending to it the powers of all four city classifications which exist in Washington law.

From its incorporation, Bellevue has maintained a Council-City Manager form of government. The City Manager is appointed by the Council as the chief executive officer of the City and is responsible to the Council for the proper administration of all City affairs. Councilmembers are elected at large by Bellevue voters, and each serves a four-year term. They are part-time officials who exercise the legislative power of the City and determine City policy. Bellevue has a seven-member Council, one of whom is elected by his or her fellow members to serve as Mayor for two years. The Mayor serves as Chairperson of the Council, makes appointments to Council committees, and presides over weekly Council meetings. The Mayor has an equal vote with other Councilmembers.

The offices of City Clerk, City Treasurer, and Chief of Police are subordinate positions required by State statute. They are established by the Council and appointed by the City Manager. The City Clerk is responsible for keeping public records and the City Treasurer is responsible for the receipt, disbursement, and custody of public monies. Though the City Clerk position, by statute, can include the duties of Treasurer, the City of Bellevue has established both positions, with the City Treasurer being defined as the Finance Director. All officers and/or department directors of the City are appointed by the City Manager.

On the following pages several different organization and responsibility charts are presented. These charts illustrate the City's management organization from different perspectives.

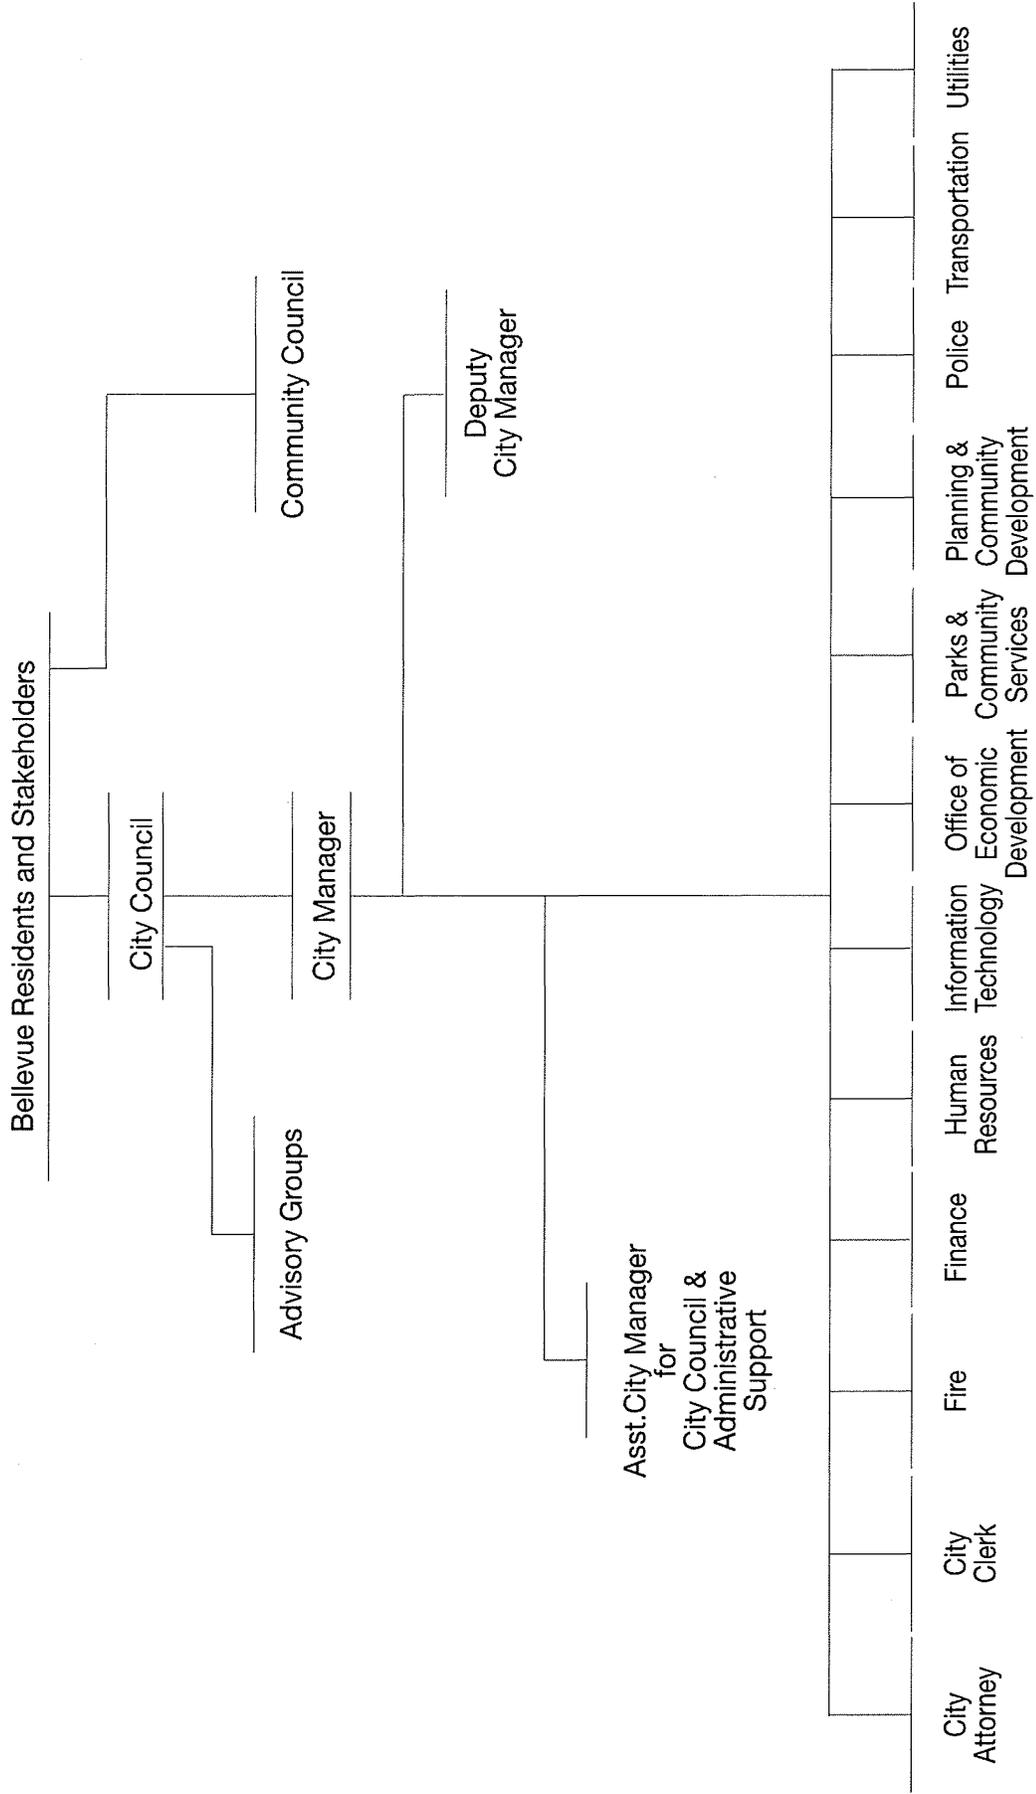

Figure 6-1 presents a hierarchical organization chart that shows the "chain-of-command" reporting relationships that currently exist.

Figure 6-2 presents a functional organization chart showing the principal activities for which each organization is responsible. These functional responsibilities are shown in detail in the department organization charts presented in the departmental chapters of the Preliminary Budget.

Figure 6-3 lists the current Councilmembers and department directors.

Figure 6-4 presents and describes the array of advisory boards and commissions.

**FIGURE 6-4
BOARDS & COMMISSIONS**

Arts Commission

Number of Members: 7

Appointed By: Mayor, Confirmed by City Council

Purpose/Comments: To perform the necessary functions in order that Bellevue may provide leadership in the Arts and to advise the City Council on matters of the Arts.

The Board meets once a month, and staffing is provided by the Planning and Community Development Department.

Bellevue Convention Center Authority Board

Number of Members: 7

Appointed By: City Manager, Confirmed by City Council

Purpose/Comments: To govern the affairs of the Bellevue Convention Center Authority (BCCA) which was established by City Council action on December 4, 1989. All corporate powers of the BCCA are exercised by or under direction of the Board of Directors.

The BCCA Board meets monthly, and staffing is provided by the Meydenbauer Center staff.

Building Code Board of Appeals

Number of Members: 7

Appointed By: City Manager

Purpose/Comments: 1) To hear appeals of any order issued by the City related to the Uniform Building and related codes; 2) to determine the suitability of alternative materials or methods of construction; and 3) to make recommendations to the City Council for new legislation related to the City's building codes.

The Board meets when convened to hear appeals filed with the City Building Official, and staffing is provided by the Planning and Community Development Department.

FIGURE 6-4 (Continued)Civil Service Commission

Number of Members:	5
Appointed By:	City Manager
Purpose/Comments:	<p>1) To provide for, formulate, and hold competitive tests to determine the relative qualifications of persons who seek employment for the position of Police Officer or Firefighter with the City of Bellevue; 2) to provide for promotion on the basis of merit; 3) to give uniformed personnel tenure; and 4) to provide for a commission to investigate, by public hearing, suspensions, demotions, and discharges.</p> <p>The Board meets quarterly and as needed, and staffing is provided by the Human Resources Department.</p>

Disability Board

Number of Members:	5
Appointed By:	Two members appointed by the mayor, one firefighter elected by the City's firefighters, one law enforcement officer elected by the City's law enforcement officers, and one member of the public appointed by the other four members.
Purpose/Comments:	<p>To act upon, approve, or deny firefighters' and law enforcement officers' claims for disability leave/retirement or medical benefits.</p> <p>The Board meets once a month, and staffing is provided by the Risk Management Office.</p>

Environmental Services Commission

Number of Members:	7
Appointed By:	Mayor, Confirmed by City Council
Purpose/Comments:	<p>To act in an advisory capacity to the City Council regarding City Water, Sewer, Storm & Surface Water, and Solid Waste Utility programs. The Commission makes recommendations to the Council as needed regarding short- and long-term planning, rates and rate structures, annual budgets, bond issues, and other policies directly related to utility functions.</p> <p>The Commission meets at least once a month, and staffing is provided by the Utilities Department.</p>

FIGURE 6-4 (Continued)Human Services Commission

Number of Members:	7, plus City staff from the Police and Parks & Community Services Departments appointed as ex officio members by the City Manager
Appointed By:	Mayor, Confirmed by City Council
Purpose/Comments:	To make recommendations to the City Council regarding human services issues such as the community's needs, policy development, and the allocation of local and federal funds. The Commission meets once a month, and staffing is provided by the Parks & Community Services Department.

Library Board

Number of Members:	7
Appointed By:	Mayor, Confirmed by City Council
Purpose/Comments:	1) To serve as a liaison between the libraries and the community; and 2) to cooperate with the local, regional, and national trustees associations to participate in library matters. The Board meets once a month, and staffing is provided by the local libraries.

Parks & Community Services Board

Number of Members:	7
Appointed By:	Mayor, Confirmed by City Council
Purpose/Comments:	The Parks & Community Services Board advises the City Council on policies regarding parks and open space issues such as park planning; design and construction; development, redevelopment and renovation; enterprise management; natural resources, land stewardship, and environmental education. The Board also advises the City Council on policies regarding community services issues such as recreation opportunities for a wide range of interests, ages, and abilities; cultural diversity; community centers; Parks & Community Services Department-related special events; and probation services. The Board meets once a month, and staffing is provided by the Parks & Community Services Department.

FIGURE 6-4 (Continued)Planning Commission

Number of Members:

7

Appointed By:

Mayor, Confirmed by City Council

Purpose/Comments:

To make recommendations to the City Council regarding land use issues such as the City's Comprehensive Plan, Subarea Plans, land use management ordinances, potential annexations, etc.

The Commission meets once a week, and staffing is provided by the Planning and Community Development Department.

Transportation Commission

Number of Members:

7

Appointed By:

Mayor, Confirmed by City Council

Purpose/Comments:

To advise the City Council on transportation issues and to make recommendations to the City Council regarding Transportation Facility Plans and related transportation capital investment projects.

The Commission meets weekly, and staffing is provided by the Transportation Department.

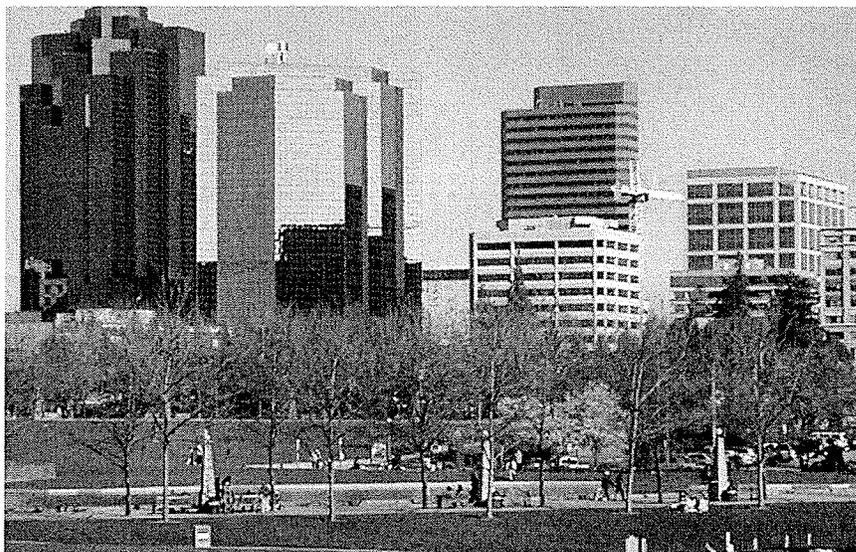

B. LOCATION, POPULATION, AND BUSINESS CLIMATE

A Growing City

Bellevue, the fifth largest city in the state with a population of 117,000 in 2006, is located on the eastern shore of Lake Washington near the population and geographical center of the Puget Sound region. It is just 11 miles from Seattle and 40 miles from Tacoma with the mountains of the Cascades to the east, and Mount Rainier to the south. Bellevue is about three hours north of Portland, Oregon, and two hours south of Vancouver, Canada.

As a thriving central city encompassing an area of approximately 31.5 square miles, Bellevue is a major and growing employment center within the Puget Sound region.

Bellevue demographics are viewed as particularly favorable for economic growth and well positioned to meet the needs of dynamic and resilient economy. City planners estimate that residential population will rise significantly over the next several years gaining more than 7,000 new residents by the year 2010. In the downtown central business district, the residential population will grow from about 4,500 current residents to 14,000 residents by 2020. Citywide jobs will increase at a rapid pace also with close to 18,000 more jobs added through 2010. Office

vacancy rates in the central business district (CBD) continue to drop (8.3% reported for the 2nd quarter of 2006) with over 50,000 square feet of office space being absorbed in the last year alone.

Between 2001 and 2002, Bellevue, like the region as a whole, experienced a loss of jobs, and Bellevue was hard hit and lost approximately 8 percent of its employment base, or nearly 10,000 jobs during this time and experienced an office vacancy rate of 26.4% in the third quarter of 2002. Today, the city has bounced back from difficult economic times and is in the midst of an unprecedented development boom. Many residential and office projects dot the city's horizon, including Lincoln Square's Office Tower, which has been fully pre-leased and is expected to be completed in mid-2007. Downtown office vacancy rates are expected to remain low due to the strong employment growth in the region.

Bellevue's employment base is expected to grow about 30 percent over the next 25 years, resulting in an increase of more than 50,000 new jobs. Bellevue's daytime population is more than 180,000. Bellevue ranks second in the state in both retail sales and property values (as measured by assessed valuation). Its location at the crossroads of the Eastside between the shores of Lake Sammamish and Lake Washington strategically positions Bellevue as a strong economic force in the Puget Sound region.

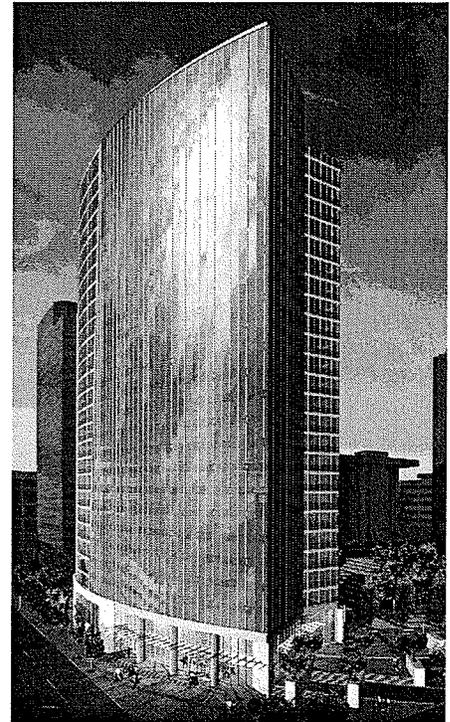

Expanding Economy

Bellevue started as a pastoral market hub for blueberry fields and farms. Founded in 1869 by William Meydenbauer, the rural community did not change much until the first floating bridge crossed Lake Washington in 1940. In the past two decades the City has grown to skyscraper heights and shed its "suburban" status to become a thriving metropolis and a "Technology Corridor" that is home to many of the world's leading high-tech companies. Bellevue is the metropolitan hub for leading high-tech companies encompassing such sectors as software development, internet and network services, multi and digital media, and biotech. Its prestigious high-rise core provides office space for thousands of

professionals. Microsoft Corporation and the University of Washington, one of the nation's largest public research institutions, are within close proximity.

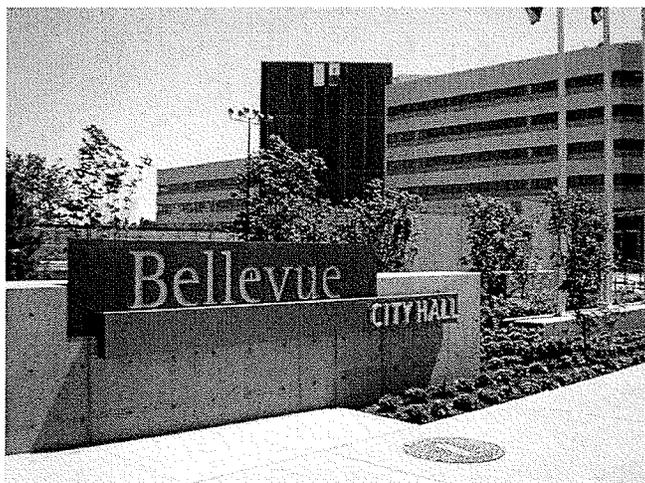

A diversified mix of industries exists within Bellevue with retail and service sectors being the largest. Department stores, automobile dealerships, and electronic/computer stores lead the retail sector. The service sector has a high concentration of real estate companies, engineering firms, financial institutions, accounting firms, and computer software companies. Bellevue is home to several of the top 25 largest public companies in Washington including Puget Sound Energy, a regional electric and natural gas utility; PACCAR, a manufacturer of trucks and other heavy equipment; Western Wireless, a cellular communication company; and Esterline Technologies, a diversified manufacturing company. Newer companies located in Bellevue make up many of the top 50 fastest-growing public companies in Washington and include: Infospace, a provider of software and high-tech applications, Drugstore.com, an online retailer, and Coinstar, Inc. which provides a network of supermarket-based coin counting and other electronic services.

Bellevue is also a major trading center that is well-linked to established transportation corridors. Two interstate highways converge at Bellevue: I-90 links the City to the east-west interstate system and I-405 connects Bellevue with the north-south interstate system. Its convention center attracts over a quarter of a million people to the City each year. The Port of Seattle, the second largest container port in the United States, is less than 20 minutes by interstate highway from downtown Bellevue. The City is also less than one-half hour from Seattle-Tacoma International Airport and several commuter airfields which provide links to other cities in the Pacific Northwest as well as internationally.

Downtown Development

Downtown Bellevue continues to evolve as a vibrant urban center with a diverse mix of retail, residential, office, and cultural uses. Downtown Bellevue is recovering from the national economic downturn that saw office vacancy rates surpass 25% in mid-2002. Major new tenants are choosing Bellevue as the economy recovers, with available office space absorbed to the point where the vacancy rate in mid-2006 was 8.3% and is expected to decline in the 3rd quarter. A major signing at the end of 2004 brought Symetra Financial, a former division of insurance company Safeco, who leases nearly 300,000 square feet in two prominent office towers in the core of downtown. Bellevue looks forward to becoming the national headquarters of Eddie Bauer and of Microsoft NA. Both will move into the new Lincoln Tower office complex in 2007.

2.8 million square feet are proposed/in review, or currently under construction. Many new residential and retail projects will add greatly to street-level pedestrian activity and the attractiveness of Downtown Bellevue as a place to both live and do business. These recent projects include mixed-use buildings, including residential units and ground-floor retail space. Nearly 4,500 people now call Downtown Bellevue home, with another 35,000 plus working downtown. Large projects under construction in 2006 include Lincoln Tower, The Braven (2 towers), Tower 333, and the City Center Plaza. A 256-room Courtyard by Marriott Hotel recently

opened and more than 1,000 city employees occupied a new downtown City Hall.

With completion of the Access Downtown project, the City has largely implemented its 1989 downtown plan. An update of the downtown plan, completed in 2003, identifies new recommendations to support ongoing growth and development through 2020, including transportation, parks, and community character. A major project component of the Downtown Plan underway is the extension of NE 10th Street. This project will ultimately extend NE 10th Street from 112th Ave NE across I-405 & through the Overlake Hospital Medical Center campus to connect with 116th Ave NE, resulting in improved access to the Overlake Hospital and Group Health Cooperative Medical Centers and reducing pressure on the already busy NE 8th Street crossing of I-405. Construction of a first phase of NE 10th will begin 2006 and be complete in 2007.

Bellevue Schools and Higher Education

The Bellevue School District is one of the most "high-tech" in the country. Bellevue public schools have computers in every classroom. Many technically oriented courses, such as drafting, are taught exclusively on computers. With a total enrollment of 16,179 students in 2005, the Bellevue School District consists of 16 elementary schools, 6 middle schools, 5 high schools, and 3 alternative schools. All five Bellevue School District's large high schools were ranked in the top 1% of high schools in America according to the 2005 assessment and ranking of *America's Best High Schools* reported by Newsweek Magazine.

Bellevue is home to one of the nation's finest community colleges. The National Workforce Center for Emerging Technologies, located on the campus of Bellevue Community College (BCC), focuses on cutting-edge information technology. BCC has a student body of nearly 35,000 total students for the year. Based on information from the 2000 Census, Bellevue's adult population is very highly educated, with over half (54 percent) having a bachelor's degree or higher. This is well above the countywide average of 40 percent.

A Wired City

Bellevue residents value information technology and are among the nation's most "connected" citizens. Based on a survey conducted in January 2006, about 87% have Internet access at home and 80% of those surveyed have high-speed access by either a cable modem or DSL. People use the Internet for a variety of daily activities including access to the City of Bellevue's web page. Seventy-three percent of Bellevue residents are aware of the City's Internet site. Of these residents, sixty-five percent have used the City's web site.

Climate

Mild winters and cool summers characterized Bellevue. High temperatures in July average about 75° F (24° C) while low temperatures in winter drop below freezing an average of only 15 days per year. Average rainfall in the region is about 38 inches per year compared to 19.5 inches in San Francisco, 34.5 inches in Chicago, and 40.3 inches in Washington, D.C.

Recreation Opportunities

Bellevue provides residents, visitors, and other stakeholders with a wealth of year-round outdoor recreation and spectacular natural beauty. Sailing, fishing, hiking, canoeing, kayaking, bicycling, golf, and water skiing are all popular activities. The City preserved over 1,700 acres of parks and open space, and nearly 50 miles of trails. It is truly a community for the future.

General Demographics

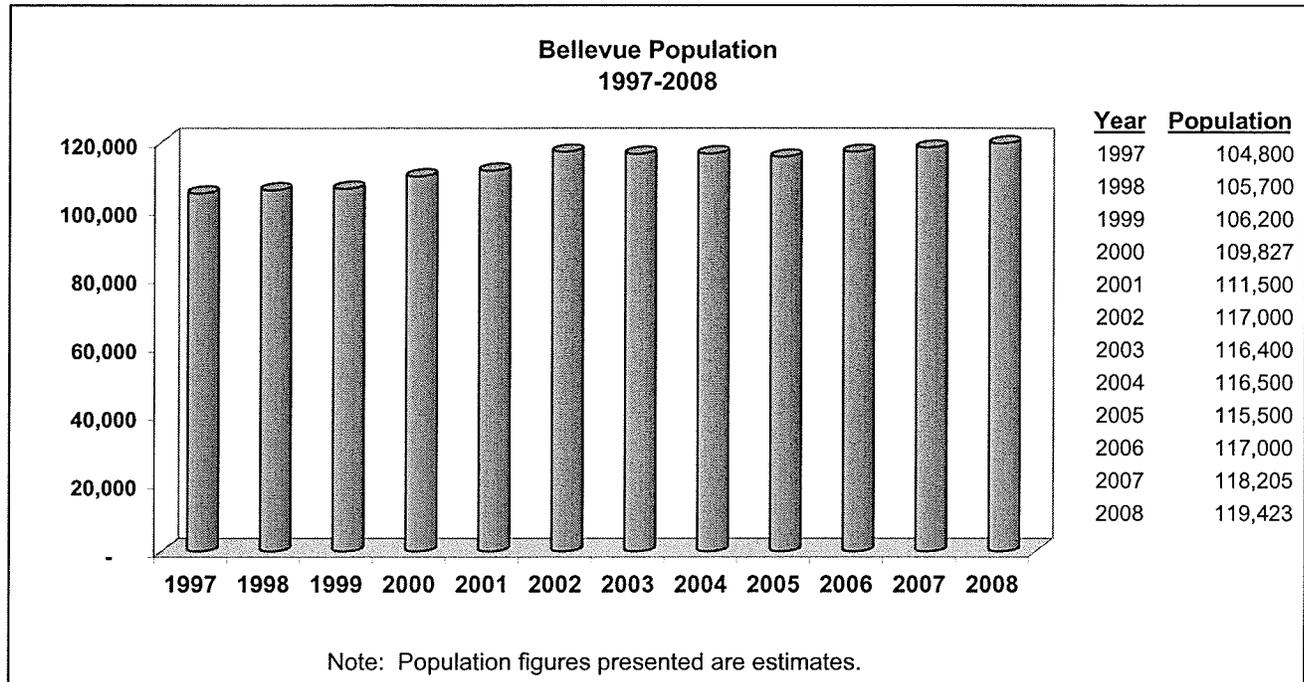

Bellevue's official 2005 population was 115,500 and is projected to be 117,000 in 2006. As the population has grown over the years, so has the median age and the diversity in Bellevue's ethnic makeup.

In 2000, the median age was 38.2 years, up from 35.4 in 1990. During this period, residents age 65 or over went from comprising 10 percent of the population to making up 13.4 percent of the population. Bellevue's per capita income was \$36,905 in 1999 (as reported in the 2000 Census), which was significantly higher than the per capita income in the county as a whole. As a reflection of the diversity of Bellevue's increasing population, almost 25 percent of Bellevue's residents in 2000 were born outside of the United States, and almost 27 percent of Bellevue residents over the age of five speak a language at home other than English. Nearly 50 different languages are now spoken by children in Bellevue public schools. The City is also much more racially diverse, with over 17 percent of its residents being Asian. The City's Asian and Hispanic populations more than doubled during the 1990s.

Figure 6-5 displays key demographic trends for Bellevue.

Figure 6-5

Key Demographic Trends

Other Key Demographics 2005-2008						
	Actual 2005	Actual 2006	Projected 2007	Projected 2008	Unit Change 2007-2008	% Change 2007-2008

Council Vision/Mission/Priorities

This section includes the Bellevue City Council's vision and mission statements for the City of Bellevue organization and priorities for future years.

- The Vision Statement and Mission Statement were adopted by the City Council on April 28, 1997 and represent their vision for the City government.
- The Bellevue City Government Priorities were adopted by the City Council in 2001 and reaffirmed in 2002, and represent the overall priorities for the City government.
- In preparation for the 2007-2008 Budget, The Council engaged in several Budget retreats and workshops during 2006 and provided a framework for departments to use in developing their proposed budgets.

Additionally, the Council held two public hearings prior to receiving the Preliminary 2007-2008 Budget and will conduct a third public hearing in November to hear comment from residents and other stakeholders on the proposed budget.

Vision Statement
for Bellevue City Government
(adopted by City Council on April 28, 1997)

Bellevue City Government is innovative, efficient
and fiscally responsible.

Council and staff are customer oriented,
believe in quality, and work together
to provide excellent
basic services.

The City cares about its citizens and employees
and values its roots.

Mission Statement
for Bellevue City Government
(adopted by City Council on April 28, 1997)

Through accessible, proactive
leadership
and governance,
provide high-quality services
and facilities
that meet the needs of the community.

2006 City Council Retreats Discussion Topics

- Transportation
- Neighborhood Assistance Strategy
- Technology
- Arts and Cultural Infrastructure
- Community Outreach
- Human Infrastructure
- Regional Leadership Role and Messages
- Economic Vitality
- Environmental Stewardship
- Public Safety
- Neighborhood Livability
- Parks and Open Space

2006 Council Discussion Topics

Transportation

- *Create City-wide circulation network/circulator*
- *Integrate regional and local transportation visions /Exert regional and national leadership*
- *Implement the transportation visions*
- *Refine street and transit solutions that will serve Downtown for next ten years*
- *Achieve higher level of neighborhood satisfaction*

Neighborhood Livability

- *Help neighborhoods identify their distinctive characteristics, unique identity and pride*
- *Establish strategy for neighborhood redevelopment/renewal*
- *Rethink services delivered to neighborhoods and how we are internally organized/structured to provide these services*
- *Develop packet of information detailing Neighborhood Services*
- *Work with neighborhood partnerships on Code enforcement*

Technology Advancement

- *Become a "Wired City" – provide equal access to technology/bandwidth*
- *Promote electronic service delivery to enhance convenience and accessibility for the public*
- *Leverage existing technology to streamline business processes*
- *Provide leadership to the region in integrating service delivery systems for users*
- *Explore opportunities for regional collaboration and sharing of information related to technology*
- *Continue to invest in research and development, partnerships, and innovative initiatives to maximize the benefits from our investments in technology*

Arts and Cultural Infrastructure

- *Create community and neighborhood festivals/events*
- *Support cultural enhancements/performing arts center*
- *Define City role in promoting/sponsoring cultural arts*
- *Define what actions would be necessary for Bellevue to become the cultural center of the Eastside (see Vision Statement)*

Community Engagement

- *Connect with and get involved with neighborhoods – Council more interactive/involved with neighborhoods*
- *Create additional opportunities for public forums for general outreach as well as specific topical discussions*
- *Utilize the City's website to reach out and interact with neighborhoods and individual citizens*
- *Explore integrated communication network that serves all segments of the community*
- *Develop and implement "push" communication technologies to notify, inform and educate users based on their expressed interests*

Human Services Infrastructure

- *Leverage work of existing human services agencies and religious institutions*
- *Consult with schools and religious institutions to learn about major changes in immigrant populations and needed revisions to programs affecting people*
- *Continue to partner with BCC and the schools on programming for disadvantaged/technology introduction/skill building*
- *Identify ways to leverage skills and smarts of retired residents into public/community service*
- *Increase multi-generational programs*
- *Continue to reach out to seniors, youth, immigrants, and disadvantaged citizens*
- *Explore relevance and applicability of federal human services initiatives to Bellevue's human services network*

Regional Leadership Role and Messages

- *Address regional transportation, water, and human services governance issues*
- *Monitor and advocate for favorable Eastside Jail solutions*
- *Improve coordination of criminal justice programs/services*

Environmental Leadership

- *Preserve the environment for future generations*

Economic Vitality

- *Foster ability to retain and enhance competitive advantage*
- *Rethink parking philosophy/consider building Downtown garage*
- *Promote neighborhood shopping center vitalization*
- *Link marina property to the City/Pedestrian Corridor*
- *Articulate the importance of economic vitality to citizens and employees*

Public Safety

- *Keeping our neighborhoods and downtown business center safe*
- *Minimizing property loss due to fire or natural disaster*

Parks and Open Space

- *Increase recreational opportunities, land acquisition and open space vision*

**8. Comprehensive Financial
Management Policy**

Comprehensive Financial Management Policy

Purpose

The Comprehensive Financial Management Policy assembles all of the City's financial policies in one document. They are the tools used to ensure that the City is financially able to meet its immediate and long-term service objectives. The individual policies contained herein serve as guidelines for both the financial planning and internal financial management of the City.

The City of Bellevue is accountable to its citizens for the use of public dollars. Municipal resources must be wisely used to ensure adequate funding for the services, public facilities, and infrastructure necessary to meet the community's present and future needs. These policies safeguard the fiscal stability required to achieve the City's goals and objectives.

Objectives

In order to achieve its purpose, the Comprehensive Financial Management Policy has the following objectives for the City's fiscal performance.

- A. To guide City Council and management policy decisions that have significant fiscal impact.
- B. To set forth operating principles that minimize the cost of government and financial risk.
- C. To employ balanced and fair revenue policies that provide adequate funding for desired programs.
- D. To maintain appropriate financial capacity for present and future needs.
- E. To promote sound financial management by providing accurate and timely information on the City's financial condition.
- F. To protect the City's credit rating and provide for adequate resources to meet the provisions of the City's debt obligations on all municipal debt.
- G. To ensure the legal use of financial resources through an effective system of internal controls.
- H. To promote cooperation and coordination with other governments and the private sector in the financing and delivery of services.

Significant Changes

The development of the biennial budget provides the opportunity to review the City's Comprehensive Financial Management Policies and make necessary adjustments due to new or revised City ordinances and policies, State laws, or recommendations made by national accreditation and/or approval authorities. The Comprehensive Financial Management Policies were reviewed by Finance and other department staff and warrant only minor changes in the 2007-2008 Budget. These changes are highlighted in the following table.

2007-2008 Policy Changes

Page/Section	Title	Change Summary
Page 8-6 Section II, C.	Public Hearings	Reflects the public hearing dates of the 2007-2008 Budget. Two public hearings were held prior to the publication of the preliminary budget; the third and final hearing was held after the preliminary budget was presented to Council and before the final budget was adopted.
Page 8-10 Title V. (various sections)	Budget Development Process	Corresponds to the enhanced budget development process adopted by the Council for review of the 2007-2008 Budget.
Page 8-60 Figure 8-5	Investment Policy / Performance	Increases weighted average maturity from 24 months to 36 months.

Comprehensive Financial Management Policy Outline

- I. Financial Planning Policies
 - A. General Fund
 - B. Utility Funds
 - C. Parks Enterprise Fund
 - D. Development Services Fund
 - E. Resource/Expenditure Estimating

- II. General Budget Policies
 - A. Resources Greater than Budget Estimates
 - B. Budget Preparation
 - C. Public Hearings
 - D. Overhead and Full Cost Allocation
 - E. Examination of Existing Base Budget
 - F. Services to Keep Pace with Needs of Community
 - G. Maintenance of Quality Service Programs
 - H. Maintenance of Existing Services vs. Additional or Enhanced Service Needs
 - I. Budget Monitoring
 - J. Performance Budgeting
 - K. Interfund Charges Based on Full Cost
 - L. Program Budget Presentation Format
 - M. Distinguished Budget Presentation

- III. Utility & Other Fund Budget Policies
 - A. Utilities Department Financial Policies (*Figure 8-1*)
 - B. Building Permit Revenues and Expenditures
 - C. Parks Enterprise Revenues and Expenditures

- IV. State-Mandated Budget Requirements (*Figure 8-2*)
 - A. Key Requirements
 - B. Fund Types

- V. Budget Development Process

- VI. Budget Adjustment & Amendment Processes
 - A. Adjustment
 - B. Amendment

- VII. Agenda Memorandum Review

- VIII. Revenue Policies
 - A. Mix of Revenues
 - B. Taxes Should Be Selected for Balance, Applicability, and Probable Economic Impact
 - C. Property Tax Revenues for Park Maintenance
 - D. Charges for Services
 - E. Backup Convention Center Financing (*Figures 8-3 and 8-4*)

- IX. Operating Policies
 - A. Expenditures Should be Within Current Resource Projections
 - B. Unrestricted Revenues Should Remain Unrestricted
 - C. Continual Improvement of Service Delivery
 - D. Cash Management
 - E. Cash Reserves
 - F. Fund Balances
 - G. Fixed Asset Inventories
 - H. Allocation of Overhead Costs
 - I. Utility Debt Coverage Ratio Target

- X. Fund Description & Reserve Policies
 - A. Fund Descriptions
 - B. Reserve Policies

- XI. Capital Investment Program Plan Policies
 - A. Relationship of Long-Range Plans to the CIP
 - B. Establishing CIP Priorities
 - C. Types of Projects Included in the CIP
 - D. Scoping and Costing Based on Predesign Study
 - E. Required Project Features and Financial Responsibility
 - F. Predictability of Project Timing, Cost, and Scope
 - G. Local Improvement Districts
 - H. CIP Non-Utility Maintenance and Operating Costs
 - I. Preserve Existing Capital Infrastructure Before Building New Facilities
 - J. New Facilities Should be of High Quality, Low Maintenance, Least Cost
 - K. Public Input at All Phases of Projects
 - L. Basis for Project Appropriations
 - M. Balanced CIP Plan
 - N. Use of Debt in the CIP
 - O. Finance Director's Authority to Borrow
 - P. CIP Plan Update and Amendment
 - Q. Formalization of Monetary Agreements
 - R. Projected Grant Reserves
 - S. Projected Revenues from Future Land Sales
 - T. Land Sale Remnants
 - U. Applicable Project Charges

- XII. Intergovernmental Revenues
 - A. Grants Should Not Fund Ongoing Services
 - B. Grant Agreements Reviewed for Compliance with Regulations
 - C. Budgeting for Grant Expenditures
 - D. Protecting the City's Interests
 - E. Intergovernmental Agreements

- XIII. Accounting, Auditing, & Financial Reporting Policies
 - A. Accounting Records and Reporting
 - B. Auditing
 - C. Excellence in Financial Reporting
 - D. Simplified Fund Structure
- XIV. Investment Policy (*Figure 8-5*)
- XV. Debt Policy (*Figure 8-6*)

I. FINANCIAL PLANNING POLICIES

The City shall develop and maintain a six-year Financial Forecast that estimates resource and expenditure behavior for the two bienniums beyond the current budget period. This Forecast will provide the City's decision-makers with an indication of the long-term fiscal impact of current policies and budget decisions. This planning tool must recognize the effects of economic cycles on the demand for services and the City's resources. To this end, the Forecast should differentiate between revenue associated with one-time economic activities and revenues derived as a result of base economic growth. City financial planning should ensure the delivery of needed services (many of which become more critical during economic downturns) by assuring adequate reliance on ongoing resources in order to support continued City services during economic downturns.

The City is a major force in a complex regional economic system. The City must understand and anticipate changes in both regional and national economic trends in order to engage in strategic financial and management planning.

A. General Fund:

1. The Finance Department will prepare and maintain a Financial Forecast for General Fund operations based on current service levels and current funding sources. This forecast will include the upcoming biennium as well as the two bienniums beyond the current period (a total of six forecast years). This future-oriented look will provide insight into whether the current mix and level of resources are likely to continue to be sufficient to cover current service levels. The forecast also allows staff and City Council to test various "what-if" scenarios and examine the fiscal impact on future bienniums.
2. The City will constantly test both its planning methodology and use of planning tools in order to provide information that is timely, accurate, and widely disseminated to users throughout the City.
3. Departments will forecast and monitor their respective revenues and expenditures with assistance from the Finance Department. The Finance Department will assist departments in developing appropriate systems for such monitoring and will retain overall fiscal oversight responsibility for the General Fund.
4. The Financial Forecast is updated at least two times each year. Any unexpected changes in economic conditions or other circumstances may prompt more frequent updates. Any significant changes are reported to the Leadership Team, City Manager, and Council.

B. Utility Funds:

1. Financial forecasting will be done for the three Utility Funds in a manner similar to the General Fund. The purpose of these forecasts will be to allow the City Council and citizens to evaluate the longer-term financial needs of these programs.
2. The forecasts should rely on the same basic economic assumptions as the General Fund Forecast. These forecasts will also identify other assumptions used in their preparation and the risks associated with them.
3. The forecasts must identify how they will impact rate structures.

C. Parks Enterprise Fund

1. Financial forecasting will be done for the Parks Enterprise Fund in a manner similar to the General Fund. The purpose of this forecast will be to allow the City Council and citizens to evaluate the longer-term financial needs of the funds' programs.
2. The forecasts should rely on the same basic economic assumptions as the General Fund Forecast. This forecast will also identify other assumptions used and the risks associated with them.

D. Development Services Fund

1. Financial forecasting will be done for the Development Services Fund in a manner similar to the General Fund. The purpose of this forecast will be to allow the City Council and citizens to evaluate the longer-term financial needs of the funds' programs.
2. The forecasts should rely on the same basic economic assumptions as the General Fund Forecast. This forecast will also identify other assumptions used and the risks associated with them.

E. Resource/Expenditure Estimating

The financial planning and subsequent budgeting for all funds will be based on the following principles:

1. Resource and expenditure estimates should be prepared on a realistic basis with a target of $\pm 2\%$ variance from the estimate for resources and $\pm 1\%$ variance for expenditures.
2. Expenditure estimates should anticipate contingencies that are reasonably predictable.

II. GENERAL BUDGET POLICIES

- A. Resources Greater than Budget Estimates: Resources (fund balance) greater than budget estimates in any internal service fund shall be refunded to the contributing funds unless circumstances warrant retaining such monies for future expenditure in the current fund.
- B. Budget Preparation: Department directors have primary responsibility for formulating budget proposals in line with City Council, Leadership Team, and City Manager priority direction, and for implementing them once they are approved.

The Finance Department is responsible for coordinating the overall preparation and administration of the City's biennial budget and Capital Investment Program Plan. This function is fulfilled in compliance with applicable State of Washington statutes governing local government budgeting practices.

The Finance Department assists department staff in identifying budget problems, formulating solutions and alternatives, and implementing any necessary corrective actions.

- C. Public Hearings: The City Council will hold three public hearings on the budget. The first two will be held sufficiently early in the budget process to allow citizens to influence budget decisions and to allow the Council to indicate special priorities before City staff develops a preliminary budget recommendation. The third and final public hearing will be held shortly after the preliminary budget's initial presentation to the Council and before the Council's final budget deliberations. The final public hearing will be held prior to the time the Council fixes the annual property tax levy.

- D. Overhead and Full Cost Allocation: Department budgets should be prepared in a manner to reflect the full cost of providing services.
- E. Examination of Existing Base Budget: During each biennial budget development process, the existing base budget will be thoroughly examined to assure removal or reduction of any services that could be eliminated or reduced in cost.
- F. Services to Keep Pace With Needs of Community: The City will strive to ensure that City service priorities keep pace with the dynamic needs of the community by incorporating a service needs review as part of the budget process.
- G. Maintenance of Quality Service Programs: Quality service programs will be offered by the City of Bellevue. If expenditure reductions are necessary, service elimination is preferable to poor or marginal quality programs.
- H. Maintenance of Existing Services Versus Additional or Enhanced Service Needs: Significant annual resource allocations needed to maintain existing service quality will compete directly with investment proposals during the budget evaluation process. Inflation adjustments will be provided for all operating budgets.
- I. Budget Monitoring: The Finance Department will maintain a system for monitoring the City's budget performance. This system will provide the City Council with quarterly presentations to Council regarding fund level resource collections and department level expenditures. Included will be provisions for amending the budget during the year in order to address unanticipated needs, emergencies, or compliance with State of Washington budgetary statutes. Budget amendments requiring City Council approval will occur through a process coordinated by the Finance Department. Significant financial issues that need to be addressed between regular monitoring reports will be provided to Council as warranted.
- J. Performance Budgeting: Performance measures will be utilized and reported in department budgets. The City will prepare trends, comparisons to other cities, and other financial management tools to monitor and improve service delivery in City programs.
- K. Interfund Charges Based on Full Cost: Interfund charges will be based on recovery of the full costs associated with providing those services. Internal Service Agreements shall be established between vendor and client departments reflecting full cost recovery unless special circumstances exist. Any disputes will be brought to the City Manager or Deputy City Manager for resolution after thorough evaluation by the Finance Department.
- L. Program Budget Presentation Format: The focus of the City's biennial budget presentation is directed at displaying the City's services plan in a Council and constituent-friendly format.
- M. Distinguished Budget Presentation: The City will seek to obtain the Government Finance Officers Association Distinguished Budget Presentation Award for each biennial budget. The Budget will be presented in a way that clearly communicates the budget to members of the public.

III. UTILITY & OTHER FUND BUDGET POLICIES

- A. Utilities Department Financial Policies: The Utilities Department Financial Policies, including Solid Waste Reserves policies, were last updated in conjunction with the 2005-2006 Budget. These policies have been included as Figure 8-1.

- B. Building Permit Revenues and Expenditures: Revenues derived from building permit fees shall be designated for the exclusive support of the development activities in the Development Services Fund. This fund will provide permit processing and compliance inspection services. Building permit fees shall include an overhead rate component to recover its share of general overhead costs, as well as department overhead from those departments directly involved in permit processing activities.
- C. Parks Enterprise Revenues and Expenditures: Revenues derived from golf and certain culture and recreation fees shall be designated for the exclusive support of activities in the Parks Enterprise Fund. This fund will maintain and operate the golf course, tennis center, and Robinswood House, administer adult athletic programs, pay approved maintenance services and overhead charges to the General Fund, and fund golf course improvements in the Capital Investment Program Fund. The Parks Enterprise Fund may also charge the General Fund for a portion of their programs that are offered with a "fee subsidy". This charge is designed to allow youth and special populations access to programs at less than full cost, to encourage participation.

IV. STATE-MANDATED BUDGET REQUIREMENTS

Washington State law (RCW 35A.34) specifies requirements that must be followed in budgeting each of the City's funds. The following summarizes the key areas covered in Washington State law:

A. Key Requirements:

1. The timing, process, and responsibility for each step.
2. A standard account classification system prescribed by the State Auditor.
3. Preparation and filing of a preliminary budget by the chief administrative officer.
4. A "budget message" from the chief administrative officer explaining the content, financial policies, and major proposed changes.
5. A public hearing on the proposed preliminary budget conducted before adoption of a final budget, which shall be held on or before the first Monday in December.
6. Procedures for handling special situations such as mid-biennium emergencies.
7. Limitations on the expenditure of City funds and procedures for amending the budget.
8. Quarterly or more frequent reporting to the City's legislative authority on the revenue and expenditure status of each fund.
9. Budgeting of nonoperating/special purpose funds on a different basis from operating budget funds.

B. Fund Types:

The City budgets all funds in accordance with the Optional Municipal Code, Section 35A.34 of the Revised Code of Washington, which is attached as Figure 8-2. In accordance with State law, the City prepares its biennial budget on an estimated cash receipts and disbursements basis and by a process that conforms to the stated timing requirements. The only exceptions are the following special purpose funds: special assessment (e.g., Local Improvement District (LID) Bond Fund) and custodial agency funds (e.g., Firemen's Pension Fund), where the City acts in a custodial capacity as the bookkeeper for monies belonging to others. The City maintains three primary types of funds: operating, capital project and other special purpose funds.

1. Operating funds finance the continuous, traditional service delivery functions of a municipality in Washington State. Expenditure authority (appropriations) for each of these funds lapses at the end of each biennium, and a new budget must be adopted by the City Council.
2. Capital project funds include the General and Utility Capital Investment Program Funds and the 2004 New City Hall Bond Fund which provide for the City's seven-year capital funding. This budget establishes the 2007-2008 appropriations for the Funds.
3. Special purpose funds are distinguished from operating/budgetary funds by their limited objectives and/or finite life spans. Special purpose fund budgets do not lapse at the end of the biennium, but are carried forward until the monies are fully expended or their objectives are accomplished or abandoned (RCW 35A.34.270). Examples of special purpose funds are the Operating Grants and Donations Fund, and the Housing Funds. The City has nine active special purpose funds.

As required by State law, the 2007-2008 Budget reflects balanced expenditure and revenue estimates for each of the City's funds. Although revenue estimates are made only at the fund level, expenditure budgets are prepared at the department and division level for the purpose of administrative control.

V. BUDGET DEVELOPMENT PROCESS

The Finance Department is responsible for coordinating the overall preparation of the City's budgets. To accomplish this, staff issues budget instructions, conducts budget preparation training sessions, and communicates regularly with department staff. Their guidance provides the overall "rules of the game" within which the more detailed budget instructions and coordinating efforts are developed.

The following are key procedural steps in the City's budget development process. Note that the process and dates indicated below match the 2007-2008 process, and may be changed for future processes.

1. In March, the official "budget call" required by State law was made to all department directors or fund managers by the Budget Office as designees of the City Manager and Finance Director. Budget development instructions and other materials were provided to the departments at that time.
2. During February and March, an operating and CIP budget telephone survey was conducted. The telephone survey reached a statistically valid sample of Bellevue residents and queried residents on a variety of City services, including how important and satisfied residents were with these services.
3. Early in the process a budget retreat was held to provide an overview of the 2007-2008 Budget and 2007-2013 CIP, and to identify Council initiatives.
5. From late April to early October, departments reviewed and updated their existing budget, including expenditure and revenue estimates, performance data, and financial and program delivery outcomes. Additionally, Directors met with staff to gather their input on the budget.
6. Revenue and expenditure estimates were developed and updated by the Finance Department throughout the budget process. "Early Outlook" Financial Forecasts were prepared and presented to the Council.

7. The initial public hearing was held during May and a second public hearing was held in July to provide the public with ample opportunity to comment on recommended programs and/or ideas for new programs.
8. Between April and July the Council met in a series of Review Sessions to discuss all aspects of the budget with City management staff. Council held two budget retreats and provided policy guidance to the City Manager and the Leadership Team.
9. From March through July, departments prepared investment requests (cost/benefit proposals for new spending) and reduction proposals (cost/service reductions) for review and discussion by City management staff.
10. During August and September the City Manager met with all Leadership Team members to review department budget submittals and to jointly develop recommended spending levels for departments. By early October, the preliminary budget proposal was established.
11. During October, preliminary budget documents were prepared, printed, and filed with the City Clerk. This proposed budget was presented to the City Council in late October, and copies were made available to the public immediately after the presentation.
12. Between late October and early December, the City Council will meet in a series of budget sessions to review and discuss the recommended budget.
13. The third and final public hearing will be held in November during the time the City Council discusses the preliminary budget proposal. Citizens will be able to comment on recommended programs and/or ideas for new programs at these public hearings.
14. In early December, the City Council will adopt the budget by ordinance and establish the budget appropriation for the next biennium (January 1, 2007 through December 31, 2008).
15. The final budget is published and distributed during the first quarter of the following year. Copies are made available to the public and is available on the City's website.
16. Monthly and quarterly budget monitoring reports are prepared by the Finance Department to report on actual performance compared to budget estimates and to identify any remedial actions that may be needed.
17. As required by State law, a mid-biennium update will occur during the year following adoption of the biennial budget. This update is required by state law and allows for budget modifications and technical adjustments.
18. The budget development process described above is supplemented by information generated by the City's Financial Forecast. The forecast is a financial tool that provides the City's decision-makers with an indication of the long-term fiscal impact of current policies and budget decisions.
19. The budget process is also supplemented by information on service delivery performance and benchmarking with discussions and publication of a Comparative Cities Performance Report and an Annual Scorecard of Performance Measures.

VI. BUDGET ADJUSTMENT & AMENDMENT PROCESSES

Under the provisions of State law and the City's operating procedures, the operating budget may be adjusted or amended in two different ways. Adjustment of the budget involves a reallocation of existing appropriations and does not change the budget "bottom line". Amendment of the budget involves an addition to or reduction of existing appropriations.

A. Adjustment

Under the first method, departmental expenditures and requirements are monitored throughout the year. Certain departments may develop the need for additional expenditure authority to cover unanticipated costs that cannot be absorbed within the budget, while other departments will not require their full budget authorizations. The Finance Department reviews and analyzes all department and/or fund budgets to determine what adjustments are necessary and whether the adjustments can be made within existing appropriation limits. These changes are then reviewed with the affected department and/or fund managers. When an adjustment is needed, Finance staff will look first to savings within the department; and then transfers between departments. No City Council action is needed as State law allows budget adjustments to be done administratively.

B. Amendment

Amending the City's budget occurs whenever the requested changes from department and/or fund managers will cause the existing appropriation level for the fund to change. This situation generally occurs when the City Council authorizes additional appropriation. This is done by an ordinance that amends the original budget and states the sources of funding for the incremental appropriations.

VII. AGENDA MEMORANDUM REVIEW

The Finance Department will review all agenda items submitted for City Council action. The objective of these reviews will be to ensure compliance with the budget and disclosure of all fiscal issues to the Council. This information will be presented in the fiscal impact section of each agenda memorandum.

VIII. REVENUE POLICIES

The City must be sensitive to the balance between the need for services and the City's ability to raise fees, charges, and taxes to support those services.

- A. Mix of Revenues: The City should strive to maintain a diversified mix of revenues in order to balance the sources of revenue amongst taxpayers and to provide ongoing stability and predictability.
1. Property taxes and other stable revenues provide a reliable base of revenues during periods of economic downturn.
 2. The City's overall revenue structure should be designed to recapture for the City some of the financial benefits resulting from City economic and community development investments.
 3. The City will strive to keep a total revenue mix that encourages growth, and keeps Bellevue economically competitive and a City of choice for people to live and do business.
- B. Taxes Should Be Selected for Balance, Applicability, and Probable Economic Impact: The following factors will be considered when the City's taxes are increased, decreased, extended, or changed in any way.
1. Stability of the tax source over its expected life.
 2. Suitability for a pledge against future debt, if that is part of the City Council's long-range intent for the revenue source.

4. Spread the tax burden throughout the City's tax base by utilizing a broad array of the tax sources available, and by investigating mitigation of inequities and hardships where appropriate (e.g., property tax exemptions and deferrals, and utility tax rebates for low-income elderly people). State and local legislative remedies for detrimental tax impacts should be sought where appropriate.
 5. Apply the tax impact information for both residential and business taxpayers against a future vision of what the tax policy decision is intended to foster.
- C. Property Tax Revenues for Park Maintenance: Revenues derived from the Property Tax Lid Lift for Park Maintenance, which Bellevue voters approved in May 1988, shall be deposited in the General Fund to pay all costs necessary to fund the maintenance and operating costs of specific park facilities.
- D. Charges for Services: As much as is reasonably possible, City services that provide private benefit should be supported by fees and charges in order to provide maximum flexibility in use of general City taxes to meet the cost of services of broader public benefit. Charges for services that benefit specific users should recover full costs, including all direct costs, capital costs, department overhead, and Citywide overhead. Departments that impose fees or service charges should prepare and periodically update cost-of-service studies for such services. A subsidy of a portion of the costs for such services may be considered when consistent with legal requirements to meet other City interests and objectives, such as remaining competitive within the region.
- E. Backup Convention Center Financing: In accordance with Ordinance No. 4094 (passed on 12/4/89) and Ordinance No. 4229 (passed on 3/4/91), 0.01% of the City's total gross receipts business and occupation taxing authority of 0.2%, is reserved as a backup financing mechanism for the Convention Center should additional financing beyond that contemplated in the adopted Convention Center Financing Plan become necessary. In addition, any additional increase in the City's B&O tax (measured by gross receipts) shall first require an analysis of the status of the Convention Center Financing Plan. This information must be included in any fiscal impact notes on agenda materials presented to the City Council for the purpose of increasing the B&O tax rate described above. Ordinance Nos. 4094 and 4229 are attached as Figures 8-3 and 8-4.

IX. OPERATING POLICIES

The City should accommodate both one-time and ongoing expenditures within current resources, establish and adequately fund reserves, regularly monitor and report on budget performance, evaluate the fiscal impact of new proposals, operate as efficiently as possible, and constantly review City services for appropriateness and effectiveness.

- A. Expenditures Should be Within Current Resource Projections: Ongoing expenditures should be equal to or less than ongoing revenues. Each City fund budget must identify ongoing resources that at least match expected ongoing annual requirements. One-time resources and non-recurring ending fund balances will be applied to reserves or to fund one-time expenditures; they will not be used to fund ongoing programs.
- B. Unrestricted Resources Should Remain Unrestricted: Unless otherwise stated explicitly by the City Council, unrestricted resources will not be earmarked for specific purposes in the General Fund. This will preserve the ability of the Council to determine the best use of available resources to meet changing service requirements.
- C. Continual Improvement of Service Delivery: The City will seek to optimize the efficiency and effectiveness of its services through Business Process Improvement (BPI) efforts, performance budgeting and measuring, and by assessing its services with comparable cities to reduce costs and improve service quality.

- D. Cash Management: The Finance Department will develop, maintain, and constantly seek to improve cash management systems which ensure the accurate and timely accounting, investment, and security of all cash assets. All cash received by City departments will be deposited with Finance within 24 hours of receipt.
- E. Cash Reserves: The City will maintain adequate cash reserves in order to reduce the potential need for borrowing or service reductions during periods of economic downturn. A Rainy Day Reserve Fund has been established with a target balance of 5% of unrestricted General Fund resources. (See separate Reserve Policies section for more information on the Rainy Day Reserve.)
- F. Fund Balances: Accruals and non-cash enhancements to revenues will not be made as a means to influence fund balances at year-end or during budget discussions.
- G. Fixed Asset Inventories: Accurate inventories of all physical assets (including roads infrastructure), their condition, life spans, and cost will be maintained to ensure proper stewardship of public property. The Finance Director will establish policies and appropriate procedures to manage fixed assets, including establishing the threshold dollar amount for which fixed asset records are maintained and how often physical inventories will be taken.
- H. Allocation of Overhead Costs: Overhead costs will be allocated to determine the full cost of providing services. Overhead costs will be allocated according to consistent methodology developed in consultation between the Finance Department and other operating departments.
- I. Utility Debt Coverage Ratio Target: The City Council adopted the following debt service coverage policy for the bonds issued by the City's Waterworks Utility on March 7, 1994 by Resolution No. 5759:

"The City Council will establish utility rates/charges and appropriations in a manner intended to achieve a debt service coverage ratio (adjusted by including City taxes as an expense item) of approximately 2.00. The City Council authorizes the Waterworks Utility to utilize this policy in development of pro forma projections which will be disseminated to the bond rating agencies and to the financial community generally."

X. FUND DESCRIPTION & RESERVE POLICIES

Fund descriptions and reserve policies have been developed in a standard format for all City funds and are included in the 2007-2008 Budget Detail volume.

A. Fund Descriptions include the following:

1. Fund Type
2. Fund description
3. Year Created
4. Major Revenue Sources
5. Major Expenditures
6. Fund Custodian
7. Reserve Policy
8. Other Notes

B. Reserve Policies include the following:

1. Budgeting for Reserves: The City will maintain and justify budgeted reserves.
2. Expenditure of Budgeted Reserves: Reserves included in the operating budget shall not be expended without the express written approval of the Finance Director.

3. Rainy Day Reserve Target and Purpose: A Rainy Day Reserve Fund, with a target reserve balance of 5% of General Fund unrestricted resources, will be maintained.

The Rainy Day Reserve's primary purpose is to protect the City's essential service programs during periods of economic downturn, which may temporarily reduce actual resources or cut the growth rate of City resources below that necessary to maintain pre-existing service levels.

XI. CAPITAL INVESTMENT PROGRAM PLAN POLICIES

A number of important policy considerations are the basis for the Capital Investment Program (CIP) Plan. These policies provide guidelines for all financial aspects of the CIP, and ultimately affect the project selection process.

- A. Relationship of Long-Range Plans to the CIP: Virtually all of the projects included in the CIP are based upon formal long-range plans that have been adopted by the City Council. This ensures that the City's Capital Investment Program, which is the embodiment of the recommendations of these individual planning studies, is responsive to the officially stated direction of the City Council as contained in the Comprehensive Plan and supporting documents. Examples of these supporting documents are: Transportation Facility Plans [Central Business District (CBD), Bellevue-Redmond Overlake Transportation Study (BROTS), East Bellevue Transportation Study (EBTS), Newcastle], the Parks and Open Space Plan, the Municipal Facilities Plan, the Fire Master Plan, the CBD Implementation Plan and the Comprehensive Plans of the Water, Sewer, and Storm & Surface Water Utilities. There are exceptions, but they are relatively small when compared to the other major areas of expenditure noted above. These exceptions include activities such as the Neighborhood Enhancement Program (NEP) and the Community Development Program.
- B. Establishing CIP Priorities: The City uses the following basic CIP project prioritization and selection process.
 1. Each CIP program area establishes criteria to be used in the prioritization of specific projects submitted for funding. These specific criteria are developed in conjunction with City Council priorities and input from citizens and associated City boards and commissions (if applicable). The criteria established for this CIP are displayed in the 2007-2013 CIP Plan document in the tab titled "CIP Project Prioritization Criteria".
 2. The Finance Department determines revenue projections available to the non-utility CIP in consultation with various revenue-generating departments and the amount of resources available for new projects for each new seven-year Plan.
 3. The Finance Department and City Manager evaluate the various CIP projects and selects those with the highest priority.
 4. Within the available funding, the highest priority projects are then selected and funded in the CIP.
 5. CIP program area managers recommend an expenditure plan to the Finance Department and City Manager, which includes all capital costs and any applicable maintenance and operations (M&O) and/or required short-term financing costs. Program area managers are responsible for the cost estimates of their proposed programs, including future M&O costs related to the implementation of completed projects.
 6. A Preliminary CIP Plan is recommended to the City Council by the City Manager along with the operating budget recommendations.
 7. The City Council reviews the Operating and Preliminary CIP Plan, holds a public hearing(s) to allow for citizen input, makes desired alterations, and then officially adopts the budget and establishes related appropriations as a part of the City's biennial budget process.

- C. Types of Projects Included in the CIP Plan: The CIP Plan will display, to the maximum extent possible, all major capital projects in which the City is involved. While the following criteria may be used as a general guide to distinguish which projects should be included or excluded from the CIP Plan, there are always exceptions which require management's judgment.

For purposes of the CIP Plan, a CIP project is generally defined to be any project that possesses all of the following characteristics:

1. Exceeds an estimated cost of \$100,000;
 2. Involves totally new physical construction, reconstruction designed to gradually and systematically replace an existing system on a piecemeal basis, replacement of a major component of an existing facility or computer system, or acquisition of land or structures; and
 3. Involves City funding in whole or in part, or involves no City funds but is the City's responsibility for implementing, such as a 100% grant-funded project or 100% Local Improvement District funded project.
- D. Scoping and Costing Based on Predesign Study: It has proven difficult to develop accurate project scopes, cost estimates, and schedules on which no preliminary engineering or community contact work has been done. To address this problem, some projects are initially proposed and funded only for preliminary engineering and planning work. This funding will not provide any monies to develop final plans, specifications, and estimates to purchase rights-of-way or to construct the projects. However, generally, an estimated amount, sufficient to cover these costs based on a rough preliminary estimate is earmarked within the program area.
- E. Required Project Features and Financial Responsibility: If a proposed project will cause a direct impact on other publicly-owned facilities, an equitable shared and funded cost plan must be coordinated between the affected program areas.
- F. Predictability of Project Timing, Cost, and Scope: The predictability of timing and costs of projects is important to specific private developments, such as the provision of street improvements or the extension of major sewer lines or water supply, without which development could not occur. These projects generally involve significant financial contributions from such private development through impact fees, developer extension agreements, LIDs, and other means. Once a project has been approved by the City Council in the CIP, project scheduling is a priority to maintain.
- G. Local Improvement Districts (LID): This policy limits the use of LIDs to specific instances. Examples of when future LIDs may be formed are as follows: 1) where old agreements exist committing property owners to LID participation on future projects; 2) when current development activity or very recently past development activity has exempted these projects from the assessment of Transportation Impact Fees; 3) when a group of property owners wish to accelerate development of a certain improvement; 4) when a group of property owners desire a higher standard of improvement than the City's project contemplates; or 5) when a group of property owners request City assistance in LID formation to fund internal neighborhood transportation facilities improvements, which may or may not have City funding involved. If City funding is proposed by the project sponsors (property owners), they shall so request of the City Council (through the City Clerk) in writing before any LID promotion activity begins. The City Manager shall analyze such request within 45 days and report his conclusions and recommendation to Council for their consideration. The Council shall by motion affirm or deny the recommendation. The Council's affirmative motion to financially participate shall expire in 180 days, unless the project sponsors have submitted a sufficient LID petition by that time.

In the event the request is for street resurfacing in advance of the City's normal street resurfacing cycle, the City's contribution shall not exceed 50% of all project eligible costs.

On capital projects whose financing depends in part on an LID, interim financing will be issued to support the LID's portion of the project budget at the same time or in close proximity to the issuance of the construction contract. The amount of the interim financing shall be the current estimate of the final assessment roll as determined by the administering department.

In the event that the project is 100% LID funded, interim financing shall be issued either in phases (i.e., design phase and construction phase) or up front in the amount of the entire estimated final assessment roll, whichever means is estimated to provide the lowest overall cost to the project as determined by the Finance Department.

- H. CIP Non-Utility Maintenance and Operating (M&O) Costs: Non-utility CIP project M&O costs identified in the project description, as approved by the City Council, shall have a funding plan. Preferably, operating budget tax sources will not be provided for this purpose. More suitable sources of funding include: General CIP Revenue (the combination of the 5/10 and 3/100 of 1% of sales and B&O tax rates that have been allocated to the CIP for general capital purposes), property tax lid lifts, project-generated revenues e.g., user fees, or other new taxes. When the fund source for a project is General CIP Revenue, costs will be budgeted in the operating budget and an amount equivalent to their estimated cost will be reallocated from the CIP to the operating budget. This amount is adjusted upward each year by the anticipated inflation rate after first making any necessary adjustments (e.g., partial vs. full-year costs) and eliminating any one-time items. The amounts of these transfers are checked periodically for reasonableness.
- I. Preserve Existing Capital Infrastructure Before Building New Facilities: It is the City's policy to ensure that adequate resources are allocated to preserve the City's existing infrastructure before targeting resources to build new facilities that also have operating and maintenance obligations. This policy addresses the need to protect the City's historical investment in capital facilities and to avoid embarking on a facility enhancement program, which when coupled with the existing facilities requirements, the City cannot afford to adequately maintain.
- J. New Facilities Should Be of High Quality, Low Maintenance, Least Cost: This policy has guided the development and execution of the CIP Plan through an emphasis on lowest life-cycle cost. Projects should only be built if the necessary funding to operate them is provided. Also, priority is given to new facilities that have minimal ongoing maintenance costs so as to limit the impact upon both the CIP and the operating budget.
- K. Public Input for Capital Projects: The City makes a serious commitment to public involvement. All of the City's long-range plans have been developed through an extensive citizen involvement program. Citizen involvement occurs at the long-range plan development stage, during CIP review and adoption, during master planning processes, during design and construction of specific projects, and through public processes associated with City boards and commissions. Public hearings are held during the CIP Plan development process to allow the public to comment on the recommended projects. The projects themselves call for an extensive public outreach effort, allowing those most closely effected to influence the design of the projects. While public input is essential to the successful implementation of the CIP Plan, staff and Council must also remain conscious of the overall effect upon costs when responding to requests of project neighbors.
- L. Basis for Project Appropriations: During the City Council's biennial CIP Plan review, the City Council will appropriate the estimated project costs for the biennium for all projects in the CIP Plan. Subsequent adjustments to appropriation levels for amendments to the CIP Plan may be made by the City Council at any time.

- M. Balanced CIP Plan: The CIP Plan is a balanced seven-year plan. This means that for the entire seven-year period, revenues will be equal to project expenditures in the Plan. It is anticipated that the plan will have more expenditures than revenues in single years of the Plan, but this imbalance will be corrected through the use of interim financing as needed. However, over the life of the seven-year plan, all planned interim debt will be repaid and all Plan expenditures, including interest costs on interim debt will be provided for with identified revenues. Any project funding plan, in which debt is not retired within the current seven-year Plan, must have specific City Council approval.
- N. Use of Debt in the CIP: The CIP is viewed as a long-term program that will continually address capital requirements far into the future. As such, the use of long-term debt has been minimized, allowing the City to put money into actual projects that benefit Bellevue residents and businesses rather than into interest payments to financial institutions. To that end, this policy limits debt to short-term obligations, primarily for cash flow purposes. Debt incurred will be paid back before the end of the current CIP. Finance staff monitor CIP cash flow regularly and utilizes fund balances to minimize the amount of borrowing required. Projected financing costs are included within a project in the General Government program area. There are exceptions to this policy for extraordinary circumstances, where Councilmanic or voted long-term debt have been issued to achieve major City goals that otherwise could not have been achieved, or would have been delayed an unacceptable amount of time.
- O. Finance Director's Authority to Borrow: The Finance Director is authorized to initiate interim and long-term borrowing measures, as they become necessary, as identified in the current CIP Plan.
- P. CIP Plan Update and Amendment: The CIP Plan will be updated at least biennially as a part of the City's biennial budget process. The City Council may amend the CIP Plan at any time if a decision must be made and action must be taken before the next CIP review period. The City Council has delegated authority to the City Manager to administratively approve CIP Plan adjustments, except for changes in project scope or changes that total more than 10% of a project's adopted CIP Plan budget (unless a 10% adjustment is less than \$10,000), or regardless of the percentage, budget changes totaling more than \$100,000. The Council has further authorized the City Manager to administratively approve the acceleration of project schedules so long as they can be accomplished without causing cash flow problems and with the understanding that any controversial issues would be brought before the City Council. All project additions or deletions must be approved by the City Council.
- Q. Formalization of Monetary Agreements: All agreements between the City and outside jurisdictions shall be in writing specifying the financial terms of the agreement, the length of the agreement, and the timing of any required payments. Formalization of these agreements will protect the City's interests. Program areas shall make every effort to promptly request any reimbursements that are due the City. Where revenues from outside jurisdictions are ongoing, these requests shall be made at least quarterly, unless alternative arrangements are approved by the City Manager or City Council.
- R. Projected Grant Revenues: At the Finance Director's discretion, grant-funded capital expenditures are budgeted prior to the specific grant award. City overhead or indirect costs for grant-funded programs will be included in all grant proposals, where permitted. With grant-funded capital acquisitions, the City will attempt to recover ongoing M&O costs, and replacement costs associated with the acquisition.

- S. Projected Revenues from Future Land Sales: The City recognizes that City-owned land is an asset that can be sold to finance CIP projects. With this in mind, the City shall cautiously allow land sale proceeds to be used as a funding source by program areas that have oversight responsibility for the land. The land shall be valued based on an appraisal performed either by the Transportation Department or an outside appraisal company. A conservative value shall be used to provide a cushion for economic shifts. The timing of the proceeds shall be estimated based on the length of time the property is likely to be on the market. However, if the land does not sell in a timely manner or its value turns out to be overestimated, then the program area must either reallocate revenue sources from other projects within its area, find an agreeable replacement funding source, or cease work on the project, if possible.
- T. Land Sale Remnants: The City is frequently left with property remnants following the completion of a project that required rights-of-way (ROW) acquisition. These remnants represent an asset to the program area that purchased them. If the project selling the land remnants is still active, the revenue from the sale shall be receipted as land sale proceeds in the project, therefore serving to partially offset the ROW acquisition costs. If the project is already completed at the time of the remnant sale, the land sale proceeds can either be used by the selling program area to help fund another of that program area's projects, or they can be deposited in the Land Purchase Revolving Fund for future use by the purchasing program area.
- U. Applicable Project Charges: CIP projects should reflect all costs that can be clearly shown to be necessary and applicable. Staff charges to CIP projects will be limited to time spent actually working on those projects and shall include an overhead factor to cover the applicable portion of that person's operating cost.

XII. INTERGOVERNMENTAL REVENUES

Many service costs of the City are influenced by other governments, either because of service overlap or service mandates imposed by the county, state, or federal government. The City should take advantage of opportunities to enhance service delivery through intergovernmental cooperation, shared revenues, and grants while aggressively opposing mandates that distort local service priorities.

- A. Grants Should Not Fund Ongoing Services: The City will refrain from using grants to meet ongoing service delivery needs. In the City's financial planning, grants will be treated in the same manner as all other temporary and uncertain resources and will not be used to fund ongoing, basic service needs. With grant-funded capital acquisitions, the City will attempt to recover ongoing maintenance and operating costs, and replacement costs associated with the acquisition.
- B. Grant Agreements Reviewed for Compliance with Regulations: All grant agreements will be reviewed by the appropriate City staff, including Finance, City Attorney's Office, and sponsoring department, to ensure compliance with state, federal, and City regulations.
- C. Budgeting for Grant Expenditures: At the City Manager's discretion, grant-funded capital expenditures are budgeted prior to the specific grant award. City overhead or indirect costs for grant-funded programs will be included in all grant proposals, where permitted. With grant-funded capital acquisitions, the City will attempt to recover ongoing maintenance and operating costs, and replacement costs associated with the acquisition.
- D. Protecting the City's Interests: The City will aggressively oppose state or federal actions that mandate expenditures that the City Council considers unnecessary. The City will pursue intergovernmental funding to support the incremental cost of those mandates.
- E. Intergovernmental Agreements: The City will work with other governments to identify the jurisdiction most capable and appropriate to provide specific public services. All intergovernmental agreements and contracts for service delivery will be brought forward to the City Council for approval.

XIII. ACCOUNTING, AUDITING, & FINANCIAL REPORTING POLICIES

The City shall maintain a system of financial monitoring, control, and reporting for all operations and funds in order to provide effective means of ensuring that overall City goals and objectives are met.

- A. Accounting Records and Reporting: The City will maintain its accounting records in accordance with state and federal law and regulations. Budgetary reporting will be in accordance with the state's budget laws and regulations. The City will report its financial condition and results of operations in accordance with state regulations and generally accepted accounting principles (GAAP) applicable to governments.
- B. Auditing: The State Auditor will annually perform the City's financial and compliance audit. Their opinions will be contained in the City's Comprehensive Annual Financial Report (CAFR). Results of the annual audit shall be provided to the Council in a timely manner.
- C. Excellence in Financial Reporting: As an additional independent confirmation of the quality of the City's financial reporting, the City will annually seek to obtain the Government Finance Officers Association Certificate of Achievement for Excellence in Financial Reporting. The CAFR will be presented in a way designed to communicate with citizens about the financial affairs of the City.
- D. Simplified Fund Structure: The City will minimize the number of funds. The funds will be categorized in accordance with generally accepted accounting principles (GAAP) for reporting purposes, although some funds may be functional classifications but may also be referred to by City of Bellevue fund types.

XIV. INVESTMENT POLICY

The City shall maintain a current investment policy. A copy is attached as Figure 8-5.

As an additional independent confirmation of the integrity of the City's Investment Policy, the City's policy has been certified by the Municipal Treasurers' Association of the United States and Canada.

XV. DEBT MANAGEMENT POLICY

The City shall maintain a current debt policy. A copy is attached as Figure 8-6.

Figure 8-1

Waterworks Utility Financial Policies

December, 2006

INTRODUCTION

The Waterworks Utility is the financial consolidation of the Sewer, Storm & Surface Water and Water Utilities of the City of Bellevue for debt rating and coverage purposes as established in Ordinance No.'s 2169, 2845, 3158 and 4568. It pledges the strengths and revenues of the three separate Utilities for the common financial good while keeping each Utility financially separate for budgeting, rate-setting, revenues, expenditures, debt and accounting.

These "Financial Policies" apply uniformly to the Sewer, Storm & Surface Water and Water Utilities with few, unique exceptions which are identified separately. This update reflects changes consistent with current long-range financial planning, particularly with regard to renewal and replacement funding, the use of debt and rate policies. They supersede the Financial Policies, which were adopted under Resolution No. 5967 in 1995.

These policies do not stand-alone. They must be taken in context with the other major City and Utilities documents and processes. For instance, each Utility has its own Comprehensive Plan, which documents its unique objectives, planning, operations and capital needs. These Comprehensive Plans have historically had a 20-year planning horizon. Future Comprehensive Plans will need to evaluate long term renewal and replacement of aging facilities, much of which were constructed in the 1950's and 1960's during periods of high growth rates and are approaching the end of their useful life. Life cycle costs should be considered in planning the future capital facilities and infrastructure needs.

The City has a seven-year City-wide Capital Investment Program (CIP) Plan which is updated with each biennial budget cycle. All major City capital projects are included. Generally, they are described as over \$25,000; involving new physical construction, reconstruction or replacement; and involving City funding. The CIP identifies the level and source of funding for each project. The CIP includes specific sections for each Utility which identify near-term capital projects consistent with each current Utility Comprehensive Plan and several projects of general scope including renewal and rehabilitation, capital upgrades, response to growth and other system needs.

I. GENERAL POLICIES

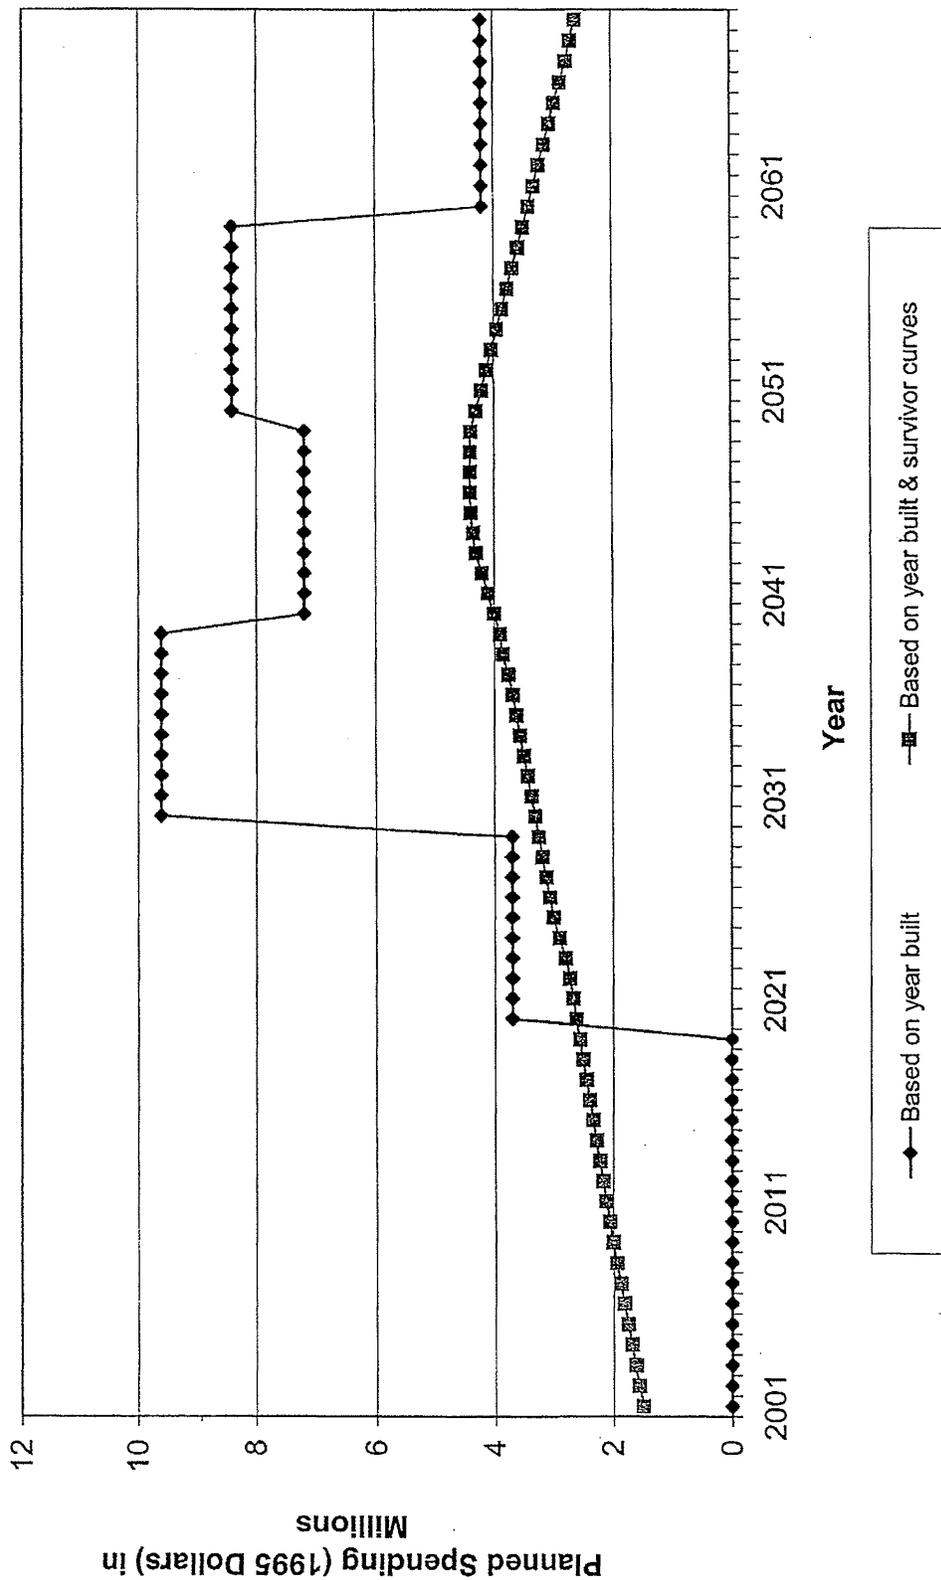

A. *Fiscal Stewardship*

The Waterworks Utility funds and resources shall be managed in a professional manner in accordance with applicable laws, standards, City financial practices and these Financial Policies.

Discussion:

It is incumbent on Utility management to provide professional fiscal management of utility funds and resources. This requires thorough knowledge of and conformance with the City financial management processes and systems as well as applicable laws and standards. It also requires on-going monitoring of revenues and expenses in order to make decisions and report to City officials, as needed, regarding the status of Utilities financing. Independent financial review, analysis and recommendations should be undertaken as needed.

Exhibit 1
Watermain Replacement Spending
(Based on 75-Year Expected Asset Life)

II. CAPITAL INVESTMENT PROGRAM POLICIES

A. *General Scope*

The Utilities Capital Investment Program (CIP) will provide sufficient funds from a variety of sources for implementation of both short- and long-term capital projects identified in each Comprehensive Plan and the City-wide Capital Investment Program as approved by the City Council.

Financial planning for long-term capital investment shall be based on principles that result in smooth rate transitions, maintain high credit ratings, provide for financial flexibility and achieve inter-generational equity.

Discussion:

These near-term capital projects are usually identified in each Comprehensive Plan which also provides the criteria and prioritization for determining which projects will be constructed. Several projects of general scope are also included to allow for on-going projects that are less specifically identified due to their more inclusive nature.

In addition to these near-term projects, funding should be provided for long-term capital reinvestment in the system to help minimize large rate impacts as the systems near the end of their useful life and have to be renewed or replaced. Ordinance No. 4783 established a Capital Facilities Renewal & Replacement (R&R) Account for each Utility to provide a funding source for this purpose. Other policies describe how this Account is to be funded and expended.

A reinvestment policy by itself, without some form of planned and needed expenditure, could lead to excessive or unneeded expenditures, or conversely unnecessary accumulations of cash reserves. The reinvestment policy needs to tie the planned expenditures over time with a solid, long-term financial plan that is consistent with these policies.

The actual needs for the renewal/replacement expenditures should relate to the on-going need to minimize system maintenance and operating costs consistent with providing safe and reliable service, the age and condition of the system components, and any regulatory or technical obsolescence. In essence, plant should be replaced when it is needed and before it fails. As such, the goal setting measure of how much is an appropriate annual or periodic reinvestment in renewals and replacement of existing assets should be compatible with the age and condition of the infrastructure and its particular circumstances.

Section 2. The following new accounts are established in the Utility Capital Investment Fund:

- Capital Facilities Replacement Account - Sewer
- Capital Facilities Replacement Account - Water
- Capital Facilities Replacement Account - Storm and Surface Water

Section 3. There is hereby authorized the 1995 transfer from the Water Utility Operating Fund to the Capital Facilities Replacement Account - Water the amount of \$600,000.

Section 4. This ordinance shall take effect and be in force five days after its passage and legal publication.

PASSED by the City Council this 24th day of July, 1995, and signed in authentication of its passage this 24th day of July, 1995.

C. Use of Debt

The Utilities should fund capital investment from rates and other revenue sources and should not plan to use debt except to provide rate stability in the event of significantly changed circumstances, such as disasters or external mandates.

Resolution No. 5759 states that the City Council will establish utility rates/charges and appropriations in a manner intended to achieve a debt service coverage ratio (adjusted by including City taxes as an expense item) of approximately 2.00". Please note that the Moody's Investor Services rating should be Aa2 (not Aa as stated in Resolution No. 5759).

Discussion:

The Utilities are in a strong financial position and have been funding the Utility Capital Investment Program from current revenues for a number of years. The current 20 year and 75 year capital funding plans conclude that the entire long-term renewal and replacement program can be funded without the use of debt if rates are planned and implemented uniformly over a sufficient period. Customers will pay less over the long-term if debt is avoided, unless it becomes truly necessary due to unforeseen circumstances such as a disaster or due to changes in external mandates. Having long-term rate stability also assures inter-generational equity without the use of debt because the rate pattern is similar to that achieved by debt service.

Use of low interest rate debt such as the Public Works Trust Fund loans, by offering repayment terms below market rates, investment earnings or even inflation, should be viewed as a form of grant funding. When available or approved, such sources should be preferred over other forms of rate or debt funding, including use of available resources. Since such reserves would generate more interest earnings than the cost of the loan, the City's customers would be assured to benefit from incurring such debt.

III. SYSTEM EXPANSION AND CONNECTION POLICIES

A. *Responsibilities*

Those seeking or who are required to have Utility service are responsible for extending and/or upgrading the existing Utility systems prior to connecting.

Discussion:

It is the responsibility of the party seeking Utility service to make and pay for any extensions and/or upgrades to the Utility systems that are needed to provide service to their property. The extensions or upgrades must be constructed to City standards and requirements. This is typically accomplished through a Developer Extension Agreement with the City wherein requirements are documented, standards are established, plans are reviewed and construction is inspected and approved. Service will not be provided until these requirements are met.

The philosophical underpinning of this policy is that "growth pays for growth". Historically, developers constructed much of the City's utility infrastructure. If the infrastructure eventually would benefit more than the initial developer, the Utility signed a Latecomer Agreement to reimburse the original financier from charges to those connecting and receiving benefit at a later point in time. When the cost to extend and/or upgrade the system to accommodate development or redevelopment is beyond the means of a single developer, the Utility has employed a variety of methods to assist in the construction of the necessary infrastructure. Local Improvement Districts (LID's) historically have been used to provide financing for infrastructure for new development, with the debt paid over time by the property owners. Most of the older Utilities infrastructure was financed by this method.

The Utility has in some cases up-fronted the infrastructure construction for new development or redevelopment from rate revenues which are later reimbursed with interest, in whole or in part, by subsequent development through direct facility connection charges (see Cost Recovery Policy). Examples are the water and sewer infrastructure for Cougar Mountain housing development and Central Business District (CBD) redevelopment. Another example is the use of the Utility's debt capacity to provide for development infrastructure whereby the City sells bonds at lower interest rates than can private development, constructs the infrastructure, and collects a rate surcharge from the benefited area to pay off the bonds. Examples of this type of financing include the Lakemont development drainage infrastructure and the Meydenbauer Drainage Pipeline in the CBD.

B. *Cost Recovery*

The Utility shall establish fees and charges to recover Utility costs related to: (1) development services, and (2) capital facilities that provide services to the property.

The Utility may enter into Latecomer Agreements with developers for recovery of their costs for capital improvements, which benefit other properties in accordance with State law. The Utility will add an administrative charge for this service.

Discussion:

In general, Utility costs related to development services are recovered through a variety of fees and charges. There are fixed rates for some routine services based on historical costs and inflation. There are fixed plus direct cost charges and applicable overhead for developer extension projects to cover the lengthy but variable level of development review and inspection

IV. RATE POLICIES

A. *Rate Levels*

Rates shall be set at a level sufficient to cover current and future expenses and maintain reserves consistent with these policies and long-term financial forecasts.

Changes in rate levels should be gradual and uniform to the extent that costs (including CIP and R&R transfers) can be forecast.

Cost increases or decreases for wholesale services shall be passed directly through to Bellevue customers.

Local and/or national inflation indices such as the Consumer Price Index (CPI) shall be used as a basis for evaluating rate increases.

At the end of the budget cycle, fund balances that are greater than anticipated and other one-time revenues should be transferred to the R&R account until it is shown that projected R&R account funds will be adequate to meet long-term needs, and only then used for rate relief.

Discussion:

A variety of factors including rate stability, revenue stability, the encouragement of practices consistent with Utility objectives and these Waterworks Utility Financial Policies are considered in developing Utility rates. The general goal is to set rates as low as possible to accomplish the on-going operations, maintenance, repair, long-term renewal and replacement, capital improvements, debt obligations, reserves and the general business of the Utility.

Long-range financial forecast models have been developed for each of the Utilities, which include estimated operating, capital and renewal/replacement costs for a 75 year period in order to plan for funding long-term costs. Operating costs are assumed to remain at the same level of service and don't include impacts of potential changes due to internal, regional or federal requirements. Capital costs, including renewal/replacement, are projected based on existing CIP costs and approximated survival curves for the infrastructure. The models are used to project rate levels that will support the long-term costs and to spread rate increases uniformly over the period. This is consistent with the above policy that changes in rate levels should be gradual and uniform. Uniform rate increases help ensure that each generation of customers bears their fair share of costs for the long-term use and renewal/replacement of the systems.

The biennial budget process provides an opportunity to add to or cut current service levels and programs. The final budget, with the total authorized expenses including transfers to the CIP Fund and the R&R Account, establishes the amount of revenue required to balance the expenses. A balanced budget is required. The budgeted customer service revenue determines the level of new rates. For example, if the current rates do not provide sufficient revenues to meet the projected expenses, the costs have to be reduced or the rates are increased to make up the shortfall.

For purposes of these policies, wholesale costs are defined as costs to the Utilities from other regional agencies such as the Seattle Public Utilities and/or the Cascade Water Alliance (CWA), and King County Department of Natural Resources for sewer treatment and any agreed upon Storm & Surface Water programs. Costs which are directly based on the Utilities' revenues or budgets such as taxes, franchise fees and reserve levels that increase proportionally to the wholesale increases are included within the definition of wholesale costs.

The revenue requirements are based on the "average" single-family winter average volume calculated annually from the billing database. The charge for an individual customer is based on their winter average and then charged at that level each bill for the entire year to avoid charging for irrigation use. The customer's winter average is based upon the prior year's three winter bills because the current year's bills include winter months, which would result in the average constantly changing. Customers without prior winter averages to use for a basis are charged at the "average" volume until they establish a "winter-average" or sufficient evidence that their use is significantly different than the "average".

E. Rate Structure - Storm & Surface Water

The Storm & Surface Water Utility rate structure will be based on a financial analysis considering cost-of-service and other policy objectives, and will provide adjustments for actions taken under approved City standards to reduce related service impacts.

Discussion:

In the existing Storm & Surface Water rate structure, customer classes are defined by categories of development intensity, i.e., *undeveloped*, *lightly developed*, *moderately developed*, *heavily developed* and *very heavily developed*. Based on theoretical run-off coefficients for each of these categories, higher rates are charged for increasing degrees of development to reflect higher run-off resulting from that development. Under this structure, billings for both residential and non-residential customers are determined by total property area and rates assigned to applicable categories of development intensity. Customers providing on-site detention to mitigate the quantity of run-off from their property receive a credit equal to a reduction of one rate level from their actual development intensity. Property classified as "wetlands" is exempt from Storm & Surface Water service charges.

Large properties, over 35,000 square feet, with significantly different levels of intensity of development may be subdivided for rate purposes in accordance with Ordinance No. 4947. In addition, properties with no more than 35,000 square feet of developed area in the light and moderate intensity categories may, at the option of the owner, defer charges for that portion of the property in excess of 66,000 square feet. The property owner may apply for a credit against the Storm & Surface Water charge when they can demonstrate that the hydrologic response of the property is further mitigated through natural conditions, on-site facilities, or actions of the property owner that reduce the City's costs in providing Storm & Surface Water quantity or quality services.

Future design of a water quality rate component will also use cost-of-service principles to assign defined water quality costs to customer classes, according to their proportionate contribution to Utility service demand. It is anticipated that these rate structure revisions will also provide financial incentives to customers taking approved actions to mitigate related water quality impacts.

F. Rate Structures - Water

The water rate structure will be based on a financial analysis considering cost-of service and other policy objectives, and shall support water conservation and wise use of water resources.

Discussion:

The water rate structure consists of fixed monthly charges based on the size of the customer's water meter and volume charges, which vary according to customer class and the actual amount of water that the customer uses. There are three different meter rate classifications: domestic,

H. *Rate Uniformity*

Rates shall be uniform for all utility customers of the same class and level of service throughout the service area. However, special rates or surcharges may be established for specific areas, which require extraordinary capital investments and/or maintenance costs. Revenues from such special rates or surcharges and expenses from capital investments and/or extraordinary maintenance shall be accounted for in a manner to assure that they are used for the intended purposes.

Discussion:

The City Water and Sewer Utilities originally formed by assuming ownership of three separate operating water districts and two sewer districts. In the assumption agreements, each included a provision that requires the Utility to uniformly charge all customers of the same class throughout the entire service area. The basic rates are set for all customers, inside and outside of the City, except for local utility taxes in Bellevue, and franchise fees in Clyde Hill, Hunts Point, Medina, and Yarrow Point. Unlike the Water and Sewer Utilities, the Storm & Surface Water Utility only serves areas within the City limits.

Under state law, Utilities are required to charge uniform rates to all customers in a given customer class, regardless of property location within the service area. The only exception permitted is for certain low-income customers (see below).

However, when conditions in particular service areas require extraordinary capital improvement or maintenance costs to be incurred, special rates or surcharges may be adopted to recover those costs directly from properties contributing to the specific service demand, instead of assigning that cost burden to the general Utility rate base. This will only apply for costs above and beyond normal operations, maintenance and capital improvements. For example, rate surcharges are being used to recover debt service costs for capital facilities in Lakemont and the CBD. An additional rate surcharge for Lakemont properties is being collected for extraordinary maintenance costs of the storm water treatment facility.

I. *Rate Assistance*

Rate assistance programs shall be provided for specific low-income customers as permitted by State law.

Discussion:

Continual increases in all utility rates have had a significant impact on low-income customers. The City has adopted a rate discount or rebate program for disabled customers and senior citizens over 62 years old and with income below certain levels as permitted under State law and defined in Ordinance No. 4458. It has two levels, one discounting Utility rates by 40 percent and the other level by 75 percent, based on the customer's income level. Customers that indirectly pay for Utility charges through their rent can obtain a rebate for the prior year's Utility charges on the same criteria. The City also rebates 100 percent of the Utility Tax for these customers. The cost of this program is absorbed in the overall Utility expenses and is recovered through the rate base. The General Fund provides for the Utility tax relief.

There are other low-income customers who are less than 62 years old and currently receive no Utility rate relief. However, the City has instituted a separate rebate of Utility taxes for qualified low-income citizens.

City of Bellevue Summary of Recommended Consolidated Reserve Levels						
Type of Reserve	Water		Wastewater		Storm Drainage	
	Basis	Level	Basis	Level	Basis	Level
Working Capital – Reserves against revenue and expense fluctuations within the 2 month billing cycle and during the budget year.	70 days of budgeted O&M costs (excludes debt service, capital funding).	\$4,569,000	30 days of Metro costs and 20 days of City O&M costs (excludes debt service, capital funding).	\$2,038,000	29 days of budgeted O&M costs (excludes debt service, capital funding).	\$603,000
Operating Contingency – Reserves against annual budget shortfalls due to poor financial performance.	7.5% of water purchase costs and 11% of other water O&M costs.	\$2,102,000	2% of Metro costs and 5% of other wastewater O&M costs.	\$732,000	2.5% of O&M costs.	\$190,000
Plant Emergency Contingency – Reserves against failure of a major facility or piece of equipment.	Cost for repair of water main break.	\$100,000	Cost of repair for wastewater main break.	\$100,000	\$500,000 based on potential net cost of flood damage.	\$500,000
Less: Allowance for duplicating or offsetting reserves	None.	\$0	Working Capital and Operating Contingency include offsetting reserves equal to 2% of all O&M.	\$(523,000)	None.	\$0
Less: Allowance for consolidating reserves	2.5% of City O&M for interfund charges between utilities.	\$(340,000)	1% City O&M for interfund charges between utilities.	\$(70,000)	1% of City O&M for interfund charges between utilities.	\$(76,000)
	Share of reduced plant emergency reserve.	\$(15,000)	Share of reduced plant emergency reserve.	\$(15,000)	Share of reduced plant emergency reserve.	\$(70,000)
	Lesser of min. working capital or plant emergency reserves.	\$(85,000)	Lesser of min. working capital or plant emergency reserves.	\$(85,000)	Lesser of min. working capital or plant emergency reserves.	\$(220,000)
Total		\$6,331,000		\$2,177,000		\$927,000

Note: Reserve levels based on amended 2006 utility budgets.

Below Minimum - Rate increases would be imposed sufficient to ensure that even with adverse financial performance, reserves would return at least to the minimum at the end of the following year. To meet this "worst case" standard, a year of normal performance would be likely to recover reserve levels rapidly toward target levels.

Negative Balance - Reserves would be borrowed from another utility to meet working capital needs. Similar to the "below minimum" scenario, rate increases would be imposed sufficient to ensure that even with adverse financial performance, reserves would return from the negative balance to at least the minimum target at the end of the following year, which would allow for loan repayment within that time frame.

Discussion:

"Adverse financial performance" or "worst case" are defined by the 95% confidence interval based on historical patterns. The worst case year is currently defined as a year with sales volumes 15% below the sales volume for a normal year. This was determined by using statistical measurements of sales volumes for 18 years with a 95% confidence interval. That is, in any given year there is only a 5% chance that the worst case year would be more than 15% below the normal year. Another way to say the same thing is that in 19 out of 20 years the worst case year would not be more than 15% below the normal year.

Maintaining the 95% confidence interval, as more and more data becomes available, a worst case year could change upward or downward from the 15% variation from a normal year.

The recommended reserve policies are premised on the vital expectation that reserves are to be used and reserve-levels will fluctuate. Although budget and rate planning are expected to use the target reserve number, reserve levels planned to remain static are by definition unnecessary. It is therefore important to plan for managing the reserves within a working range between the minimum and target levels as stated in the above policies. There may be situations in short-range financial planning where reserves are maintained above target levels to overcome peaks in actual expenses.

In the event of an inter-utility loan, the balance for the borrowing utility would essentially be any cash balance less the amount owed. The lending utility would count the note as a part of its reserves, so that it does not unnecessarily increase rates to replenish reserves that are loaned.

In this management approach, there is still a risk that a major plant emergency could exceed the amount reserved. Such a major shortfall would require rate action to assure a certain level of replenishment in one year. To avoid rate spikes due to this type of action, they should be considered on a case-by-case basis. This will provide the flexibility to use debt or capital reserves in lieu of operating reserves to cover the cost and allow a moderated approach to replenishing reserves out of rates.

C. *Asset Replacement Reserves*

Utility funds will maintain separate Asset Replacement Accounts to provide a source of funding for future replacement of operating equipment and systems.

Anticipated replacement costs by year for the upcoming 20-year period, for all Utility asset and equipment items, will be developed as a part of each biennial budget preparation process. Budgeted contribution to the Asset Replacement Account will be based on the

RCW 35A.34.010 Legislative intent.

See RCW 35.34.010.

RCW 35A.34.020 Application of chapter.

This chapter applies to all code cities which have by ordinance adopted this chapter authorizing the adoption of a fiscal biennium budget. [1985 c 175 § 34.]

RCW 35A.34.030 Definitions.

Unless the context clearly indicates otherwise, the definitions in this section apply throughout this chapter.

- (1) "Clerk" includes the officer performing the functions of a finance or budget director, comptroller, auditor, or by whatever title the officer may be known in any code city.
- (2) "Department" includes each office, division, service, system, or institution of the city for which no other statutory or charter provision is made for budgeting and accounting procedures or controls.
- (3) "Legislative body" includes the council, commission, or any other group of officials serving as the legislative body of a code city.
- (4) "Chief administrative officer" includes the mayor of cities having a mayor-council plan of government, the commissioners in cities having a commission plan of government, the manager, or any other city official designated by the charter or ordinances of such city under the plan of government

receipts for the ensuing fiscal biennium, which shall include the amount to be raised from ad valorem taxes and unencumbered fund balances estimated to be available at the close of the current fiscal biennium. However, if the city was not utilizing a fiscal biennium budget for the previous three years, it shall set forth its fiscal years' revenues to reflect actual and estimated receipts as if it had previously utilized a biennial budgetary process.

The expenditure section shall set forth in comparative and tabular form for each fund and every department operating within each fund the actual expenditures for the last completed fiscal biennium, the appropriations for the current fiscal biennium, and the estimated expenditures for the ensuing fiscal biennium. However, if the city was not utilizing a fiscal biennium budget for the previous three years, it shall set forth its fiscal years' expenditures to reflect actual and estimated levels as if it had previously utilized a biennial budgetary process. The expenditure section shall further set forth separately the salary or salary range for each office, position, or job classification together with the title or position designation thereof. However, salaries may be set out in total amounts under each department if a detailed schedule of such salaries and positions be attached and made a part of the budget document. [1985 c 175 § 39.]

RCW 35A.34.080 Preliminary budget.

The chief administrative officer shall prepare the preliminary budget in detail, making any revisions or additions to the reports of the department heads deemed advisable by such chief administrative officer. At least sixty days before the beginning of the city's next fiscal biennium the chief administrative officer shall file it with the clerk as the recommendation of the chief administrative officer for the final budget. The clerk shall provide a sufficient number of copies of such preliminary budget and budget message to meet the reasonable demands of taxpayers therefor and have them available for distribution not later than six weeks before the beginning of the city's next fiscal biennium. [1985 c 175 § 40.]

RCW 35A.34.090 Budget message -- Hearings.

(1) In every city, a budget message prepared by or under the direction of the city's chief administrative officer shall be submitted as a part of the preliminary budget to the city's legislative body at least sixty days before the beginning of the city's next fiscal biennium and shall contain the following:

- (a) An explanation of the budget document;
- (b) An outline of the recommended financial policies and programs of the city for the ensuing fiscal biennium;
- (c) A statement of the relation of the recommended appropriation to such policies and programs;
- (d) A statement of the reason for salient changes from the previous biennium in appropriation and revenue items; and
- (e) An explanation for any recommended major changes in financial policy.

(2) Prior to the final hearing on the budget, the legislative body or a committee thereof shall schedule hearings on the budget or parts thereof, and may require the presence of department heads to give information regarding estimates and programs. [1985 c 175 § 41.]

RCW 35A.34.100 Budget -- Notice of hearing.

Immediately following the filing of the preliminary budget with the clerk, the clerk shall publish a notice once a week for two consecutive weeks stating that the preliminary budget for the ensuing fiscal biennium has been filed with the clerk, that a copy thereof will be made available to any taxpayer who will call at the clerk's office therefor, that the legislative body of the city will meet on or before the first Monday of the month next preceding the beginning of the ensuing fiscal biennium for the purpose of fixing the final budget, designating the date, time, and place of the legislative budget meeting, and that any taxpayer may appear thereat and be heard for or against any part of the budget. The publication of the notice shall be made in the official newspaper of the city if there is one, otherwise in a newspaper of general circulation in the city. If there is no newspaper of general circulation in the city, then notice may be made by posting in three public places fixed by ordinance as the official places for posting the city's official notices. [1985 c 175 § 42.]

RCW 35A.34.110 Budget -- Hearing.

The ordinance shall not be voted on until five days have elapsed after its introduction, and for passage shall require the vote of one more than the majority of all members of the legislative body of the city.

Any taxpayer may appear at the meeting at which the emergency ordinance is to be voted on and be heard for or against the adoption thereof. [1985 c 175 § 47.]

RCW 35A.34.160 Emergency expenditures -- Warrants -- Payment.

All expenditures for emergency purposes as provided in this chapter shall be paid by warrants from any available money in the fund properly chargeable with such expenditures. If, at any time, there is insufficient money on hand in a fund with which to pay such warrants as presented, the warrants shall be registered, bear interest, and be called in the same manner as other registered warrants as prescribed in RCW 35A.21.110.

[1985 c 175 § 48.]

RCW 35A.34.170 Registered warrants -- Payment.

In adopting the final budget for any fiscal biennium, the legislative body shall appropriate from estimated revenue sources available, a sufficient amount to pay the principal and interest on all outstanding registered warrants issued since the adoption of the last preceding budget except those issued and identified as revenue warrants and except those for which an appropriation previously has been made. However, no portion of the revenues which are restricted in use by law may be appropriated for the redemption of warrants issued against a utility or other special purpose fund of a self-supporting nature. In addition, all or any portion of the city's outstanding registered warrants may be funded into bonds in any manner authorized by law.

[1985 c 175 § 49.]

RCW 35A.34.180 Adjustment of wages, hours and conditions of employment.

Notwithstanding the appropriations for any salary or salary range of any employee or employees adopted in a final budget, the legislative body of any city may, by ordinance, change the wages, hours, and conditions of employment of any or all of its appointive employees if sufficient funds are available for appropriation to such purposes.

[1985 c 175 § 50.]

RCW 35A.34.190 Forms -- Accounting -- Supervision by state.

The state auditor is empowered to make and install the forms and classifications required by this chapter to define what expenditures are chargeable to each budget class and to establish the accounting and cost systems necessary to secure accurate budget information.

[1995 c 301 § 59; 1985 c 175 § 51.]

RCW 35A.34.200 Funds -- Limitations on expenditures -- Transfers and adjustments.

(1) The expenditures as classified and itemized in the final budget shall constitute the city's appropriations for the ensuing fiscal biennium. Unless otherwise ordered by a court of competent jurisdiction, and subject to further limitations imposed by ordinance of the city, the expenditure of city funds or the incurring of current liabilities on behalf of the city shall be limited to the following:

- (a) The total amount appropriated for each fund in the budget for the current fiscal biennium, without regard to the individual items contained therein, except that this limitation does not apply to wage adjustments authorized by RCW 35A.34.180;
- (b) The unexpended appropriation balances of a preceding budget which may be carried forward from prior fiscal periods pursuant to RCW 35A.34.270;
- (c) Funds received from the sale of bonds or warrants which have been duly authorized according to law;
- (d) Funds received in excess of estimated revenues during the current fiscal biennium, when authorized by an ordinance amending the original budget; and
- (e) Expenditures authorized by budget modification as provided by RCW 35A.34.130 and those required for emergencies, as authorized by RCW 35A.34.140 and 35A.34.150.

(2) Transfers between individual appropriations within any one fund may be made during the current fiscal biennium by order of the city's chief administrative officer subject to such regulations, if any, as may

preceding reporting period and like information for the whole of the current fiscal biennium to the first day of the current reporting period together with the unexpended balance of each appropriation. The report shall also show the receipts from all sources. [1985 c 175 § 56.]

RCW 35A.34.250 Contingency fund -- Creation.

Every city may create and maintain a contingency fund to provide moneys with which to meet any municipal expense, the necessity or extent of which could not have been foreseen or reasonably evaluated at the time of adopting the annual budget, or from which to provide moneys for those emergencies described in RCW 35A.34.140 and 35A.34.150. Such fund may be supported by a budget appropriation from any tax or other revenue source not restricted in use by law, or also may be supported by a transfer from other unexpended or decreased funds made available by ordinance as set forth in RCW 35A.34.200. However, the total amount accumulated in such fund at any time shall not exceed the equivalent of thirty-seven and one-half cents per thousand dollars of assessed valuation of property within the city at such time. Any moneys in the emergency fund at the end of the fiscal biennium shall not lapse except upon reappropriation by the council to another fund in the adoption of a subsequent budget. [1985 c 175 § 57.]

RCW 35A.34.260 Contingency fund -- Withdrawals.

No money shall be withdrawn from the contingency fund except by transfer to the appropriate operating fund authorized by a resolution or ordinance of the legislative body of the city, adopted by a majority vote of the entire legislative body, clearly stating the facts constituting the reason for the withdrawal or the emergency as the case may be, specifying the fund to which the withdrawn money shall be transferred. [1985 c 175 § 58.]

RCW 35A.34.270 Unexpended appropriations.

All appropriations in any current operating fund shall lapse at the end of each fiscal biennium. However, this shall not prevent payments in the following biennium upon uncompleted programs or improvements in progress or on orders subsequently filled or claims subsequently billed for the purchase of material, equipment, and supplies or for personal or contractual services not completed or furnished by the end of the fiscal biennium, all of which have been properly budgeted and contracted for prior to the close of such fiscal biennium, but furnished or completed in due course thereafter.

All appropriations in a special fund authorized by ordinance or by state law to be used only for the purpose or purposes therein specified, including any cumulative reserve funds lawfully established in specific or general terms for any municipal purpose or purposes, or a contingency fund as authorized by RCW 35A.34.250, shall not lapse, but shall be carried forward from biennium to biennium until fully expended or the purpose has been accomplished or abandoned, without necessity of reappropriation.

The accounts for budgetary control for each fiscal biennium shall be kept open for twenty days after the close of such fiscal biennium for the purpose of paying and recording claims for indebtedness incurred during such fiscal biennium; any claim presented after the twentieth day following the close of the fiscal biennium shall be paid from appropriations lawfully provided for the ensuing period, including those made available by provisions of this section, and shall be recorded in the accounts for the ensuing fiscal biennium. [1985 c 175 § 59.]

RCW 35A.34.280 Violations and penalties.

Upon the conviction of any city official, department head, or other city employee of knowingly failing, or refusing, without just cause, to perform any duty imposed upon such officer or employee by this chapter, or city charter or city ordinance, in connection with the giving of notice, the preparing and filing of estimates of revenues or expenditures or other information required for preparing a budget report in the time and manner required, or of knowingly making expenditures in excess of budget appropriations, the official or employee shall be guilty of a misdemeanor and shall be fined not more than five hundred dollars for each separate violation. [1985 c 175 § 60.]

1247C

sales) on business located within a geographical area which benefits from the Convention Center.

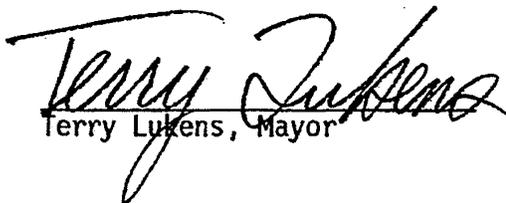

Section 2. Section 2 of Ordinance No. 4094 is hereby amended to read as follows:

The City Council hereby states its intent to reserve a rate of .0001 from the City's unlevied capacity under RCW 35.21.710 for business and occupation taxes upon business activities measured by gross receipts or gross income from sales of tangible personal property; and further states its intent that the Convention Center has first priority call on any additional, unlevied business and occupation tax capacity under RCW 35.21.710.

Section 3. The City Manager is hereby directed to issue an administrative order regarding any proposed use of the City's business and occupation tax capacity, and providing that whenever an item is included on the Council agenda which would include the use of any City business and occupation tax capacity, the agenda materials prepared by staff shall include a section indicating that such use is proposed and describing the nature and extent of such use. Further, the agenda materials shall address the financial status of the Meydenbauer Center.

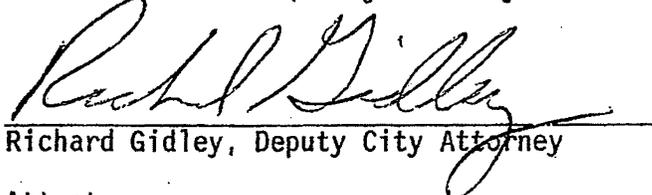

PASSED by the City Council this 4th day of March, 1991, and signed in authentication of its passage this 4th day of March, 1991.

City of Bellevue Investment Policy

Revised: August 9, 2006

Objectives

This policy sets forth criteria for the operation of the investment portfolio. It will be recognized that the primary objective of the Investment Policy is to establish a conservative set of investment criteria that will prudently protect Bellevue's (hereafter referred to as the City) principal sums and enable the City to generate a fair rate of return from its investment activities while assuring adequate liquidity to meet its cash flow needs. All investment activity will be in compliance with RCW 35A.40.050 "Fiscal - Investment of Funds" and any other statutes or regulatory requirements, such as Internal Revenue Codes, which may apply.

Scope

This policy guides the investment of all available City funds except it does not include assets held in escrow in order to defease refunded debt, nor does it include retirement funds managed by others such as the state, the Municipal Employees Benefit Trust, and deferred compensation plan providers.

Responsibility

Authority to manage the investment program is derived from Bellevue City Code Section 3.37.060. This section gives the Finance Director authority to determine the amount of money available in each fund administered by the City for investment purposes, and the authority to invest such moneys in all forms of investments that are authorized by law. This section also authorizes the Director to appoint a subordinate employee(s) to assist in the performance of these duties.

The Finance Director will provide a letter(s) of authorization to individuals or firms on the approved broker/dealer list specifically designating City staff who have the authority to commit the City to investment transactions.

The Finance Director or his designee will establish written investment procedures including a glossary of investment terms for the operation of the investment program, consistent with this investment policy.

Types of Investment and Diversification

The City may invest in any of the securities identified as eligible investments as defined by RCW 35A.40.050 "Fiscal - Investment of Funds". For purposes of this policy, the major eligible investment categories have been further restricted as follows:

1. United States Treasury Debt Obligations

- Maximum % of Portfolio 100%
- Maximum Maturity 5.5 years
- Securities will be held by the City's third party safekeeping agent in the City's name.

- Collateral equal to 102% of the repurchase agreement must be delivered to the City's third party safekeeping agent.
- Only US Treasury and US Agency securities may be accepted as collateral.
- Securities will be held by the City's third party safekeeping agent in the City's name.

5. Certificates of Deposit, and other Interest Bearing Bank Deposits with instate financial institutions recognized by the State of Washington Public Deposit Protection Commission (PDPC) as qualified to hold public deposits.

- Maximum % of Portfolio 50%
- Maximum Maturity 1 year
- Maximum % of Portfolio Per Issuer 10%

6. Bankers Acceptances purchased on the secondary market

- Maximum % of the Portfolio 50%
- Maximum Maturity 6 months
- Maximum % of Portfolio Per Issuer 10%
- Securities will be held by the City's third party safekeeping agent in the City's name.

7. Commercial Paper Issued by United States Corporations in compliance with the provisions adopted by the State Investment Board.

- Required Investment Rating A1, P-1
- Maximum % of Portfolio 15%
- Maximum Maturity 90 days
- Maximum Percent of Portfolio Per Issuer 5%
- Securities will be held by the City's third party safekeeping agent in the City's name.

8. State of Washington Local Governmental Investment Pool

- Maximum % of Portfolio 100%
- A copy of the pool's investment policy must be obtained and reviewed.

This letter shall also certify that the firm and broker assigned to this account have the required credentials and licenses with the NASD, SEC or appropriate agencies and that they must immediately notify the City if at any time the firm or broker is not in compliance with SEC rule 15C3-1, the firm's capital position falls short of the Capital Adequacy or uniform Net Cap Rule standard, or a material control weakness is identified by the firm's independent auditor. In addition, each institution must also provide the City with a copy of their annual audited financial report or Consolidated Report of Condition (call report).

In the case of certificates of deposit, those financial institutions recognized by the PDPC (Public Deposit Protection Commission) are qualified to hold public deposits

Broker Allocation

Investment transactions will be based upon the financial institution or brokerage firm that offers the best price to the City on each particular transaction. The City will make its best effort to obtain three bids for purchase or sale of government agency securities other than new issues. If circumstances dictate fewer than three bids due to the volatility of the market place, lack of bids, etc., the Finance Director or the Accounting, Tax and Treasury Manager has the authority to waive this. Generally all brokers will not have the same inventory of agency securities available to sell, but should be able to offer comparable alternatives. Treasury security transactions will be accomplished at or within the bid or asked price spread indicated on the live DTN screens or similar reliable real time investment information service. Issues not actively traded on such services will be subject to the three bid requirement. Bankers Acceptances and Certificates of Deposit (other than a compensating balance CD) also require the acquisition of at least three bids, and acceptance of the most attractive rate from among comparable alternatives. Where two or more institutions or brokers have offered the same low bid, allocation will go to the lowest bidder that has provided the best service to the City.

Safekeeping and Custody

All security transactions, including collateral for repurchase agreements, entered into by the City shall be conducted on a delivery versus payment (DVP) basis. Securities will be held by a third party custodian designated by the Finance Director or his designee as evidenced by safekeeping receipts in the City's name.

Investment Committee

An Investment Committee will be established by the City Manager, and will include at least three members from the business community knowledgeable in the area of institutional investment management. This Committee will periodically meet to review the investment program and make recommendations to the Finance Director with regard to proposed changes to the investment policy.

Internal Control

Investment procedures will be defined, documented, and implemented by the Finance Director or his designee to assure adequate internal control of the investment process.

The Finance Director or his designee will establish a process of periodic independent review by an external auditor or competent staff not assigned to the investment function.

The Washington State Auditor's Office will customarily conduct independent annual reviews of the investment function.

Figure 8-6

Debt Policy

October 23, 2006

Background

The City of Bellevue (City) maintains conservative financial policies to assure strong financial health both in the short- and long-term. The City is an infrequent issuer of debt with debt primarily used as a tool to finance large capital investments such as property acquisitions.

Maintaining the City's bond rating is an important objective of the City's financial policies. To this end, the City is constantly working to improve its financial policies, budgets, forecasts, and financial health.

Purpose

This policy sets forth the criteria for issuance and repayment of debt. The primary objective of the Debt Policy is to establish criteria that will protect the City's financial integrity while providing a funding mechanism to meet the City's capital needs. The underlying approach of the City is to borrow only for capital improvements that cannot be funded on a pay-as-you-go basis. The City will not issue long-term debt to finance current operations.

All debt issued will be in compliance with this policy, Bellevue City Code (BCC) Chapter 2.30 - Registration Procedure for Bonds and Obligations, Chapter 35A.40 Revised Code of Washington (RCW) - Fiscal Provisions Applicable to Code Cities and Chapter 43.80 RCW - Fiscal Agencies along with all other City, State, and Federal laws, rules, and regulations.

Scope

This Policy provides general guidance for the issuance and management of all City debt. In addition, it includes the management of all debt absorbed by the City through utility assumptions or the like. It does not include the debt issued by the Bellevue Convention Center Authority.

Responsibility

Authority to issue and manage debt is derived from BCC 2.37.030. This section gives the Finance Director authority to act in the capacity of City Treasurer, which includes the duties of debt management.

This section also authorizes the Finance Director to appoint a subordinate employee from the Department to assist in the performance of the duties of City Treasurer. The Finance Director has appointed the Investment and Debt Manager to act as the Debt Manager to assist in the duties of debt issuance, interest payments, principal repayments and other debt-related activities.

The Finance Director is responsible for assuring that the activities related to the issuance and payment of bonds or other obligations not jeopardize the bond rating.

3. Local Improvement District (LID) Debt

LID bonds are payable solely from assessments of property owners within the local improvement district. Similar to revenue debt, no taxing power or general fund pledge is provided as security, and LID bonds are not subject to statutory debt limitations.

The debt is backed by the value of the property within the district and a LID Guaranty Fund. The LID Guaranty Fund is required by State law.

Short-Term Debt and Interim Financing

The City may utilize short-term borrowing in anticipation of long-term bond issuance or to fund cash flow needs in anticipation of tax or other revenue sources. Short-term borrowing excludes the City's warrant redemption process.

In accordance with BCC 3.37.070, the Finance Director is authorized to make loans from one City fund to another City fund for periods not exceeding three months. The Finance Director or designee is required to assure that the loaning fund will have adequate cash balances to continue to meet current expenses after the loan is made and until repayment from the receiving fund.

Limitation of Indebtedness

In addition to the limitations required by the RCW, the City's indebtedness is further limited by this policy to assure strong financial health. The limitations are applied to the assessed value of the City to arrive at a dollar value of indebtedness. For example, the 2005 assessed valuation used to determine the 2006 property tax levy was \$24.0 billion, and the statutory limitation for general obligation debt is 2.5%. Therefore, the City's statutory debt limitation is \$598.9 million. The following matrix shows the general limitation by type of debt. These limitations may be modified by the City Council up to the statutory limitation at the Council's discretion.

Type of Debt	Statutory Limitations	Policy Limitations	2005 Bellevue Actual
General Obligation:	2.5%	1.75%	0.76%
Non-Voted	1.5%	1.0%	0.75%
Voted	1.0%	0.75%	0.01%
Open Space and Parks	2.5%	1.75%	0.01%
Utilities	2.5%	1.75%	0.00%
Revenue	no limit	no limit *	NA
Local Improvement District	no limit	no-limit *	NA

* Revenue and LID debt is not limited because no taxing power or general fund pledge is provided as security.

- The nature of the debt is unique and requires particular skills from the underwriter(s) involved.
- The debt issued is bound by a compressed time line due to extenuating circumstances such that time is of the essence and a competitive process cannot be accomplished.

Credit Ratings

The City will maintain good communication with bond rating agencies about its financial condition. This effort will include providing periodic updates on the City's general financial condition, coordinating meetings, and presentations in conjunction with a new issuance. The City will continually strive to maintain its bond rating by improving financial policies, budgets, forecasts and the financial health of the City.

Credit enhancements may be used to improve or establish a credit rating on a City debt obligation. Credit enhancements should only be used if cost effective.

Refunding Debt

A debt refunding is a refinance of debt typically done to take advantage of lower interest rates. Unless otherwise justified, such as a desire to remove or change a bond covenant, a debt refunding will require a present value savings of three percent of the principal amount of the refunding debt being issued.

Arbitrage Rebate Monitoring and Reporting

The City will, unless otherwise justified, use bond proceeds within the established time frame pursuant to the bond ordinance, contract or other documents to avoid arbitrage. Arbitrage is the interest earned on the investment of the bond proceeds above the interest paid on the debt. If arbitrage occurs, the City will pay the amount of the arbitrage to the Federal Government as required by Internal Revenue Service Regulation 1.148-11. The City will maintain a system of recordkeeping and reporting to meet the arbitrage rebate compliance requirement of the IRS regulation. For each bond issue not used within the established time frame, the recordkeeping shall include tracking investment earnings on bond proceeds, calculating rebate payments, and remitting any rebatable earnings to the federal government in a timely manner in order to preserve the tax-exempt status of the outstanding debt.

Covenant Compliance

The City will comply with all covenants stated in the bond ordinance, contract, etc.

Ongoing Disclosure

The Debt Manager shall be responsible for providing annual disclosure information to established national information repositories and for maintaining compliance with disclosure statements as required by state and national regulatory bodies. Securities & Exchange Commission disclosure shall occur by the date designated in the bond ordinance, which is currently July 31 of each year. Disclosure shall take the form of the Comprehensive Annual Financial Report (CAFR) unless information is required by a particular bond issue that is not reasonably contained within the CAFR.

Figure 8-5

City of Bellevue Investment Policy

Revised: August 9, 2006

Objectives

This policy sets forth criteria for the operation of the investment portfolio. It will be recognized that the primary objective of the Investment Policy is to establish a conservative set of investment criteria that will prudently protect Bellevue's (hereafter referred to as the City) principal sums and enable the City to generate a fair rate of return from its investment activities while assuring adequate liquidity to meet its cash flow needs. All investment activity will be in compliance with RCW 35A.40.050 "Fiscal - Investment of Funds" and any other statutes or regulatory requirements, such as Internal Revenue Codes, which may apply.

Scope

This policy guides the investment of all available City funds except it does not include assets held in escrow in order to defease refunded debt, nor does it include retirement funds managed by others such as the state, the Municipal Employees Benefit Trust, and deferred compensation plan providers.

Responsibility

Authority to manage the investment program is derived from Bellevue City Code Section 3.37.060. This section gives the Finance Director authority to determine the amount of money available in each fund administered by the City for investment purposes, and the authority to invest such moneys in all forms of investments that are authorized by law. This section also authorizes the Director to appoint a subordinate employee(s) to assist in the performance of these duties.

The Finance Director will provide a letter(s) of authorization to individuals or firms on the approved broker/dealer list specifically designating City staff who have the authority to commit the City to investment transactions.

The Finance Director or his designee will establish written investment procedures including a glossary of investment terms for the operation of the investment program, consistent with this investment policy.

Types of Investment and Diversification

The City may invest in any of the securities identified as eligible investments as defined by RCW 35A.40.050 "Fiscal - Investment of Funds". For purposes of this policy, the major eligible investment categories have been further restricted as follows:

1. United States Treasury Debt Obligations

- Maximum % of Portfolio 100%
- Maximum Maturity 5.5 years
- Securities will be held by the City's third party safekeeping agent in the City's name.

2. United States Agency Coupon Securities

- Maximum % of Portfolio 100%
- Maximum Maturity 3 years
- Maximum % of Portfolio Per Issuer 25%
- Defined by RCW 43.84.080 to include obligations of any United States government-sponsored corporation whose obligations are eligible as collateral for advances to member banks as determined by the Board of Governors of the Federal Reserve System.
- Does not allow investment in variable rate securities (those where the interest rate changes based on an index or reference rate) or securities whose value depends on the value of an underlying asset (such as a pool of mortgages or small business loans). Variable rate securities held prior to the adoption of this policy may be held to maturity.
- Securities will be held by the City's third party safekeeping agent in the City's name.

3. United States Agency Discount Notes

- Maximum % of Portfolio 100%
- Maximum Maturity 1 year
- Maximum % of Portfolio Per Issuer 25%
- Defined by RCW 43.84.080 to include obligations of any United States government-sponsored corporation whose obligations are eligible as collateral for advances to member banks as determined by the Board of Governors of the Federal Reserve System.
- Does not allow investment in variable rate securities (those where the interest rate changes based on an index or reference rate) or securities whose value depends on the value of an underlying asset (such as a pool of mortgages or small business loans). Variable rate securities held prior to the adoption of this policy may be held to maturity.
- Securities will be held by the City's third party safekeeping agent in the City's name.

4. Repurchase Agreements secured by United States Government and United States Agency Debt Obligations

- Maximum % of Portfolio 50%
- Maximum Maturity 30 days
- Collateral Maximum % of Portfolio Per Issuer. Agency amounts should stay within the 25% limit.
- A Master Repurchase Agreement must be executed with the broker/dealer prior to initiating a repurchase agreement investment with the broker/dealer.

- Collateral equal to 102% of the repurchase agreement must be delivered to the City's third party safekeeping agent.
- Only US Treasury and US Agency securities may be accepted as collateral.
- Securities will be held by the City's third party safekeeping agent in the City's name.

5. Certificates of Deposit, and other Interest Bearing Bank Deposits with instate financial institutions recognized by the State of Washington Public Deposit Protection Commission (PDPC) as qualified to hold public deposits.

- Maximum % of Portfolio 50%
- Maximum Maturity 1 year
- Maximum % of Portfolio Per Issuer 10%

6. Bankers Acceptances purchased on the secondary market

- Maximum % of the Portfolio 50%
- Maximum Maturity 6 months
- Maximum % of Portfolio Per Issuer 10%
- Securities will be held by the City's third party safekeeping agent in the City's name.

7. Commercial Paper Issued by United States Corporations in compliance with the provisions adopted by the State Investment Board.

- Required Investment Rating A1, P-1
- Maximum % of Portfolio 15%
- Maximum Maturity 90 days
- Maximum Percent of Portfolio Per Issuer 5%
- Securities will be held by the City's third party safekeeping agent in the City's name.

8. State of Washington Local Governmental Investment Pool

- Maximum % of Portfolio 100%
- A copy of the pool's investment policy must be obtained and reviewed.

The portfolio and issuer limits listed above shall be complied with at the time of a security purchase. However, no sale of securities shall be required to meet revised limits due to a decrease in the total size of the portfolio.

Distribution of Portfolio Maturities and Liquidity

The maturity structure will be maintained such that the weighted average maturity of the portfolio using the maximum maturity of each investment security does not exceed 36 months.

The portfolio should be laddered with staggered maturities to assure that: 1) adequate resources are available to meet cash flow requirements without forced liquidation of investments, and 2) price volatility and reinvestment risks are minimized.

Prudence

“Investments shall be made with the same judgement and care which persons of prudence, discretion and intelligence exercise in the management of their own affairs, not for speculation, but for investment, considering probable safety of their principal as well as probable income to be derived.”

The standard of prudence to be used by employees authorized to commit the City to investment transactions shall be the "prudent person" standard. Employees meeting the prudent person standard shall be relieved of personal responsibility for an individual security's subsequent performance, provided appropriate action is taken to control adverse developments.

Performance

The portfolio shall be managed to obtain a fair rate of return, keeping in mind the primary objectives of protecting the City's capital and assuring adequate liquidity to meet cash flow needs.

For purposes of this policy, "fair rate of return" will be a band between the average yield of the ninety-day Treasury Bill and the 2-year Treasury Note for the period of time being evaluated. The goal is for the portfolio to generally perform within or above the band.

Ethics and Conflicts of Interest

Employees involved in the investment process shall refrain from personal business activity that could conflict with proper execution of the investment program, or which could impair their ability to make impartial investment decisions. These employees shall disclose to the City Manager and Finance Director any material financial interests in financial institutions that conduct business within this jurisdiction, and they shall further disclose any large personal financial/investment positions that could be related to performance of the City's portfolio, particularly with regard to the time of purchases and sales. Employees shall subordinate their personal investment transactions to those of the City.

Authorized Financial Dealers and Institutions

The Finance Director will approve financial institutions to be eligible to conduct investment business with the City. A current list of approved brokerage firms will be maintained by the Finance Director or his designee. This list may include primary dealers (government securities reporting to the Market Reports Division of the Federal Reserve Bank of New York), regional dealers that qualify under Securities and Exchange Commission (SEC) Rule 15C3-1 (uniform net capitalization), and national banks.

To become authorized to provide investment services to the City, each institution must provide an annual letter to the City from the individual providing the service certifying that he or she has read the City's investment policy and assures that all transactions with the City will fall within the policy boundaries.

This letter shall also certify that the firm and broker assigned to this account have the required credentials and licenses with the NASD, SEC or appropriate agencies and that they must immediately notify the City if at any time the firm or broker is not in compliance with SEC rule 15C3-1, the firm's capital position falls short of the Capital Adequacy or uniform Net Cap Rule standard, or a material control weakness is identified by the firm's independent auditor. In addition, each institution must also provide the City with a copy of their annual audited financial report or Consolidated Report of Condition (call report).

In the case of certificates of deposit, those financial institutions recognized by the PDPC (Public Deposit Protection Commission) are qualified to hold public deposits

Broker Allocation

Investment transactions will be based upon the financial institution or brokerage firm that offers the best price to the City on each particular transaction. The City will make its best effort to obtain three bids for purchase or sale of government agency securities other than new issues. If circumstances dictate fewer than three bids due to the volatility of the market place, lack of bids, etc., the Finance Director or the Accounting, Tax and Treasury Manager has the authority to waive this. Generally all brokers will not have the same inventory of agency securities available to sell, but should be able to offer comparable alternatives. Treasury security transactions will be accomplished at or within the bid or asked price spread indicated on the live DTN screens or similar reliable real time investment information service. Issues not actively traded on such services will be subject to the three bid requirement. Bankers Acceptances and Certificates of Deposit (other than a compensating balance CD) also require the acquisition of at least three bids, and acceptance of the most attractive rate from among comparable alternatives. Where two or more institutions or brokers have offered the same low bid, allocation will go to the lowest bidder that has provided the best service to the City.

Safekeeping and Custody

All security transactions, including collateral for repurchase agreements, entered into by the City shall be conducted on a delivery versus payment (DVP) basis. Securities will be held by a third party custodian designated by the Finance Director or his designee as evidenced by safekeeping receipts in the City's name.

Investment Committee

An Investment Committee will be established by the City Manager, and will include at least three members from the business community knowledgeable in the area of institutional investment management. This Committee will periodically meet to review the investment program and make recommendations to the Finance Director with regard to proposed changes to the investment policy.

Internal Control

Investment procedures will be defined, documented, and implemented by the Finance Director or his designee to assure adequate internal control of the investment process.

The Finance Director or his designee will establish a process of periodic independent review by an external auditor or competent staff not assigned to the investment function.

The Washington State Auditor's Office will customarily conduct independent annual reviews of the investment function.

Reporting

Investment reports will be prepared and provided on a monthly basis to meet the needs of the users including sufficient detail to provide an accurate and meaningful representation of the portfolio, showing its performance in relation to established benchmarks and its compliance with the investment policy.

Policy Adoption

The Investment Policy is adopted by the City Council as part of the biennial budget. The Finance Director has authority to approve changes to this Investment Policy.

Debt Policy

October 23, 2006

Background

The City of Bellevue (City) maintains conservative financial policies to assure strong financial health both in the short- and long-term. The City is an infrequent issuer of debt with debt primarily used as a tool to finance large capital investments such as property acquisitions.

Maintaining the City's bond rating is an important objective of the City's financial policies. To this end, the City is constantly working to improve its financial policies, budgets, forecasts, and financial health.

Purpose

This policy sets forth the criteria for issuance and repayment of debt. The primary objective of the Debt Policy is to establish criteria that will protect the City's financial integrity while providing a funding mechanism to meet the City's capital needs. The underlying approach of the City is to borrow only for capital improvements that cannot be funded on a pay-as-you-go basis. The City will not issue long-term debt to finance current operations.

All debt issued will be in compliance with this policy, Bellevue City Code (BCC) Chapter 2.30 - Registration Procedure for Bonds and Obligations, Chapter 35A.40 Revised Code of Washington (RCW) - Fiscal Provisions Applicable to Code Cities and Chapter 43.80 RCW - Fiscal Agencies along with all other City, State, and Federal laws, rules, and regulations.

Scope

This Policy provides general guidance for the issuance and management of all City debt. In addition, it includes the management of all debt absorbed by the City through utility assumptions or the like. It does not include the debt issued by the Bellevue Convention Center Authority.

Responsibility

Authority to issue and manage debt is derived from BCC 2.37.030. This section gives the Finance Director authority to act in the capacity of City Treasurer, which includes the duties of debt management.

This section also authorizes the Finance Director to appoint a subordinate employee from the Department to assist in the performance of the duties of City Treasurer. The Finance Director has appointed the Investment and Debt Manager to act as the Debt Manager to assist in the duties of debt issuance, interest payments, principal repayments and other debt-related activities.

The Finance Director is responsible for assuring that the activities related to the issuance and payment of bonds or other obligations not jeopardize the bond rating.

Budgeting and Capital Planning

The City shall develop and maintain a capital planning process such as the biennial Capital Investment Program Plan for consideration and adoption by the City Council as part of the City's budget process. The Finance Department is responsible for coordinating and analyzing the debt requirements. This will include timing of debt, calculation of outstanding debt, debt limitation calculations and compliance, impact on future debt burdens, and current revenue requirements.

Prior to issuance of debt, the City will prepare revenue projections, such as the biennial budget or the Financial Forecast, to ensure that there is adequate revenue to make principal and interest payments.

Types of Long-Term Debt

The following is a description of the types of long-term debt the City may issue:

1. General Obligation

This debt is backed by the full faith and credit of the City. The State RCW limits this debt to 2.5% of the assessed valuation of the City for each of three purposes:

A. General Purposes

Debt issued in this category can be used for any purpose allowed by law.

Non-Voted

The City Council may authorize the issuance of general obligation debt up to 1.5% of the City's assessed value without a vote of the public as long as there is an available source of funding to pay the debt service. This funding source can be the diversion of an existing revenue source or a new revenue coming from the enactment of a new tax or other revenue source. The debt can take the form of bonds, lease-purchase agreements, conditional sales contracts, certificates of participation, or other forms of installment debt.

Voted

The City Council may place any general obligation debt issue before the electorate. According to State law, if a debt issue is placed before the City's electorate, it must receive a 60% or greater yes vote and have a turnout of at least 40% of those voting at the previous general election. Voted issues are limited to capital purposes only.

B. Open Space and Parks

Debt issued in this category must be used for park and open space and/or recreation facilities. All debt in this category must be approved by the voters.

C. Utilities

Debt issued in this category must be used for utility infrastructure. All debt in this category must be approved by the voters.

2. Revenue Debt

Revenue bonds are generally payable from a designated source of revenue generated by the project which was financed. No taxing power or general fund pledge is provided as security. Unlike general obligation bonds, revenue bonds are not subject to the City's statutory debt limitation nor is voter approval required.

3. Local Improvement District (LID) Debt

LID bonds are payable solely from assessments of property owners within the local improvement district. Similar to revenue debt, no taxing power or general fund pledge is provided as security, and LID bonds are not subject to statutory debt limitations.

The debt is backed by the value of the property within the district and a LID Guaranty Fund. The LID Guaranty Fund is required by State law.

Short-Term Debt and Interim Financing

The City may utilize short-term borrowing in anticipation of long-term bond issuance or to fund cash flow needs in anticipation of tax or other revenue sources. Short-term borrowing excludes the City's warrant redemption process.

In accordance with BCC 3.37.070, the Finance Director is authorized to make loans from one City fund to another City fund for periods not exceeding three months. The Finance Director or designee is required to assure that the loaning fund will have adequate cash balances to continue to meet current expenses after the loan is made and until repayment from the receiving fund.

Limitation of Indebtedness

In addition to the limitations required by the RCW, the City's indebtedness is further limited by this policy to assure strong financial health. The limitations are applied to the assessed value of the City to arrive at a dollar value of indebtedness. For example, the 2005 assessed valuation used to determine the 2006 property tax levy was \$24.0 billion, and the statutory limitation for general obligation debt is 2.5%. Therefore, the City's statutory debt limitation is \$598.9 million. The following matrix shows the general limitation by type of debt. These limitations may be modified by the City Council up to the statutory limitation at the Council's discretion.

Type of Debt	Statutory Limitations	Policy Limitations	2005 Bellevue Actual
General Obligation:	2.5%	1.75%	0.76%
Non-Voted	1.5%	1.0%	0.75%
Voted	1.0%	0.75%	0.01%
Open Space and Parks	2.5%	1.75%	0.01%
Utilities	2.5%	1.75%	0.00%
Revenue	no limit	no limit *	NA
Local Improvement District	no limit	no-limit *	NA

* Revenue and LID debt is not limited because no taxing power or general fund pledge is provided as security.

Structure and Term of Debt

1. Debt Repayment

The City shall pay all interest and repay all debt in accordance with the terms of the bond ordinance. The maturity of bonds issued should be the same or less than the expected life of the project for which the bonds were issued. To the extent possible, the City will seek level or declining debt repayment schedules.

2. Variable-Rate Securities

When appropriate, the City may choose to issue securities that pay a rate of interest that varies according to a pre-determined formula or results from a periodic remarketing of the securities. However, the City will avoid over use of variable-rate debt due to the potential volatility of such instruments.

Professional Services

The City's Finance Department shall be responsible for the solicitation and selection of professional services that are required to administer the City's debt program.

1. Bond Counsel

All debt issued by the City will include a written opinion by bond counsel affirming that the City is authorized to issue the proposed debt. The opinion shall include confirmation that the City has met all city and state constitutional and statutory requirements necessary for issuance, a determination of the proposed debt's federal income tax status and any other components necessary for the proposed debt.

2. Financial Advisor

A Financial Advisor(s) will be used to assist in the issuance of the City's debt. The Financial Advisor will provide the City with objective advice and analysis on debt issuance. This includes, but is not limited to, monitoring market opportunities, structuring and pricing debt, and preparing official statements of disclosure.

3. Underwriters

An Underwriter(s) will be used for all debt issued in a negotiated or private placement sale method. The Underwriter is responsible for purchasing negotiated or private placement debt and reselling the debt to investors.

4. Fiscal Agent

A Fiscal Agent will be used to provide accurate and timely securities processing and timely payment to bondholders. In accordance with Chapter 43.80 RCW, the City will use the Fiscal Agent that is appointed by the State.

Method of Sale

The City will generally issue its debt through a competitive process but may use a negotiated process under the following conditions.

- The bond issue is, or contains, a refinancing that is dependent on market/interest rate timing.
- At the time of issuance, the interest rate environment or economic factors that affect the bond issue are volatile.

Stakeholder Outreach Summary

A. INTRODUCTION

Obtaining stakeholder feedback is one of several tools the City of Bellevue uses to plan its biennial budget. As part of the 2007-2008 Budget process, the City of Bellevue conducted a telephone survey to obtain resident feedback on budget priorities and held three public hearings

B. BELLEVUE BUDGET SURVEY

Each budget cycle, the City of Bellevue conducts a statistically valid survey of residents' perceptions of community needs and services. The Budget Survey is designed to enhance the City's knowledge of Bellevue residents' perceptions about the City and to help City leaders better understand community priorities and expectations regarding City services. The survey has been conducted on a biennial basis since 1998 to help support decision making for each upcoming budget. The City Council and management staff used the 2006 Budget Survey along with other information to help understand the broader community context for making decisions regarding the 2007-2008 Budget and the 2007-2013 Capital Investment Plan.

The 2006 survey was based on past surveys to facilitate trend analysis but contained some changes and enhancements. Northwest Research Group conducted the 2006 survey and analyzed the results. Interviewing was conducted by phone between March 1 and March 14. A total of 408 residents were interviewed in the 2004 survey. For a survey sample of this size, the margin of sampling error is about plus or minus 5% at the 95% level of confidence.

Survey Highlights

- Nearly all of those responding to the survey rate the quality of life in the city and in their own neighborhood as "good" or "excellent." Almost all (96%) residents who participated in the Budget survey say the quality of life in the City is either "good" or "excellent." Nearly the same percentage (94%) of respondents rate the quality of life in their own neighborhood as "good" or excellent."
- The most highly noted reason among respondents who did not give an "excellent" rating regarding quality of life in their City or neighborhood was traffic and road concerns.
- When respondents were asked what they consider to be the biggest budget priority in allocating funds to programs and services, public safety was the top issue among six service areas (the six service areas include: transportation, public safety, neighborhood preservation, parks, economic development, and environmental protection). Notably transportation was a close second place to public safety in regards to allocation of funds. The 2004 results also ranked public safety as a top budget priority, and transportation as the second greatest budget priority.
- Residents generally perceive City services and facilities to be important, with all City services receiving a mean importance score of at least a 4.9 (greater than the mid-point on the 1 to 7 importance scale). Similar to 2004 results, police, fire and emergency services tend to rank as the services that are most important to respondents. In addition to the emergency services provided, protecting water quality, maintaining streets and sidewalks, street lights, clean and well maintained parks, preparing for disasters, providing recreational activities, and preserving open spaces and natural areas are also in the top tier of importance.
- City services and facilities also receive generally high satisfaction scores – with all areas acquiring at least a mean satisfaction score of a 4.4 (greater than the mid-point on the 1 to 7 satisfaction scale). Many of the areas that are rated with the greatest importance also receive the greatest average satisfaction ratings.

- Only two service/ facility items have a gap (when comparing the mean importance score to the average satisfaction score) of greater than 1.0, indicating that residents' satisfaction is generally comparable to how important they perceive a service to be: building or widening city roads to help ease traffic congestion and promoting affordable housing for city residents.
- Respondents this year continue to be very satisfied with the level of service the City provides, and there have been some significant improvements compared to 2004 such as "reducing traffic accidents through enforcing traffic laws" and "promoting jobs and economic development".
- When assessing their agreement with strategies designed to deal with increased traffic, respondents most often agree that the City should "work with regional agencies to improve local transit service within Bellevue" as well as "encourage and make it more attractive for people to choose transportation alternatives" and "work with regional agencies to develop a reliable regional mass transit system."
- The majority of respondents, more than eight in ten (82%), say they are getting their money's worth for their tax dollar.

Objectives

The Operating Budget Survey is designed to provide a statistically valid tool to enhance the City's knowledge of Bellevue residents' perceptions about the City and to better understand community priorities and expectations regarding City services. It has been performed on a biennial basis since 1998 to help support decision making for each upcoming budget. The 2006 Budget Survey has been used as part of the framework for making City budget decisions.

The survey addresses the following areas:

- General feelings about the direction in which the City is headed;
- Attitudes toward quality of life at citywide and neighborhood levels;
- Biggest problems at citywide and neighborhood levels;
- Importance and satisfaction ratings for specific City facilities and services;
- Priorities for the City Budget;
- Preferences on strategies for addressing traffic congestion; and
- Value received for tax dollars and opinion of tax and service levels.

Survey Instrument – Changes over Time

The 2006 survey instrument is very similar to the Operating Budget/CIP Surveys that were conducted in 1998, 2000, 2002 and in 2004, though the 2006 survey asks respondents to rate four new questions on importance and satisfaction. The new questions are related to four additional City services, “providing recreation for youth, seniors, and special needs populations”, “providing opportunities for individuals to lead a healthy lifestyle”, “sponsoring community festivals” and “protecting water quality in Bellevue’s lakes and streams”. The similarity in the surveys provides the opportunity to compare results between the 2006, 2004, 2002, 2000 and 1998 survey years. Some of the 2006 Operating Budget Survey results can also be compared to results from the 1996 Bellevue Services Survey and the 1997 Capital Facilities Survey, given these surveys were the foundation for the biennial Budget Survey.

Methodology

This telephone survey was designed to collect statistically valid data that can be projected to the general population of residents in Bellevue households. The survey sample was randomly selected from households in Bellevue. Both listed and unlisted telephone numbers were included.

A total of 409 Bellevue City residents were interviewed. All respondents were asked to verify that they live within Bellevue City limits. Quotas were used to ensure that the proportion of single-family and multi-family households in the sample were representative of the proportions in the larger Bellevue population (55% single-family; 45% multi-family).

The interview averaged 23.18 minutes in length. Interviews were conducted Thursday, February 16th through Sunday, March 3rd (on 12 weekdays and 6 weekend days).

City staff developed the questionnaire and overall research design. Northwest Research Group, Inc. (NWRG), a Bellevue-based survey research consulting firm, administered the survey and conducted all interviewing. Northwest Research Group also compiled the statistical analysis of data and the survey report was written by Northwest Research Group, Inc., with consulting and review provided by Gail Samowitz, an independent consultant, and Rich Siegel of the City of Bellevue Finance Department, Budget Office.

The results of the Budget Survey provide City leaders with valuable insights into residents’ concerns and priorities. These survey results need to be viewed in context and as a complement to the many other tools and sources of information available for making budget allocation decisions.

Interpretation of Data

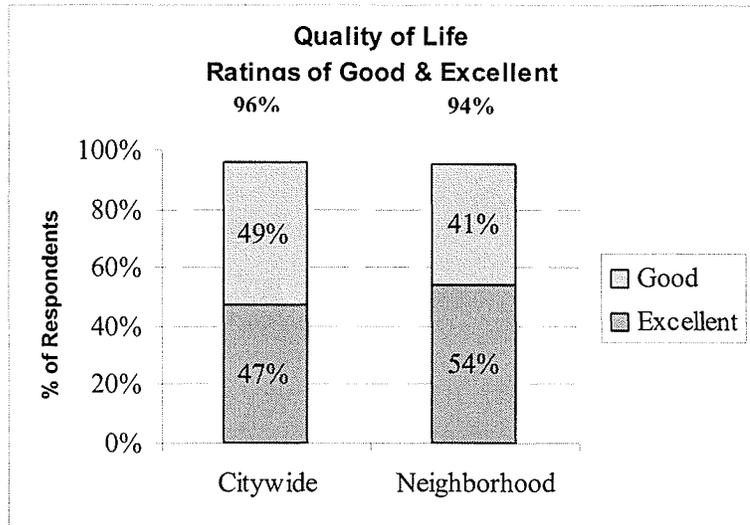

There are practical limitations to the representativeness of any survey. Typically, some residents tend to be under-represented in telephone surveys, including younger residents and (in the case of English-language surveys) residents whose main language is not English. All survey research results are also subject to sampling error. For the total citywide sample of 400, the sampling error is about plus or minus 5% at the 95% level of confidence.

There are several open-ended questions in this survey. Open-ended questions are very valuable in that they explain reasons why people feel the way they do about certain issues. In-depth opinions are very time sensitive. They are a snapshot of current opinion at a particular point in time, and can be influenced by many factors including the media. Results from open-ended questions should not be used to gauge how people would vote or their level of support for specific issues.

Quality of Life

Nearly all of those responding to the survey rate the quality of life in the city and in their own neighborhood as “good” or “excellent.” Almost all (96%) residents who participated in the Budget Survey say the quality of life in the City is either “good” or “excellent.” A similar amount (94%) of respondents rate the quality of life in their own neighborhood as “good” or excellent.” Respondents are significantly more likely to give an “excellent” rating to both the quality of

life in Bellevue and their neighborhood in the 2006 Budget Survey than in past years (39% in 2004, and 35% in 2002 respectively citywide; and 46% in both 2004 and 2002 respectively for their neighborhood).

The table below summarizes the reasons respondents most commonly gave for rating quality of life in the city and in their own neighborhood as “good” or “excellent.”

REASONS FOR GOOD/EXCELLENT QUALITY OF LIFE MOST FREQUENT RESPONSES* (BASE: RESPONDENTS GIVING RATING OF “GOOD” OR “EXCELLENT”)			
CITYWIDE (n = 393)		NEIGHBORHOOD (n = 386)	
Location/Convenience	36%	Nice People/Sense of Community	32%
Parks/Recreation/Open Space/The Environment	27%	Location/Convenience	31%
Clean City/Attractive/Well-Planned	25%	Safe/ Police/ Fire Services	19%
General Availability of Amenities & Services	22%	Parks/Recreation/Open Space	19%
Public Safety/Low Crime Rates	22%	Quiet/Peaceful	18%
Quality Schools	18%	Nice/Well-Maintained Homes	17%
Good Neighborhood(s)/Sense of Community	13%	Good Transportation/Streets	9%

Good	13%	Quality Schools	9%
Transportation/Streets/Public Transportation			
Arts and Culture	5%	Sense of Community/Community Involvement	6%
Opportunities			
City Gov't Doing a Good Job	5%		
Other	7%	Other	10%

***Respondents could give more than one response (in more than one net category or within a net category); therefore percentages may add to more than 100%. Top responses are shown.**

For both the citywide and the neighborhood quality of life questions, **respondents giving a rating below “excellent” were asked to indicate what would need to change or improve to make the quality of life “excellent.”** As reported for the 2004 Budget Survey, 2006 respondents rating their own neighborhood as less than excellent and those rating the City as less than excellent both most often cite transportation related issues as the things that would need to improve to make their neighborhood or the City “excellent.” Among the transportation issues mentioned, **traffic is most often cited as the problem that would need to improve** to make the quality of life “excellent”, as previously seen in the 2004 Budget Survey.

The table on the following page indicates the percentages of survey participants giving responses within each of the categories into which responses were coded. Responses within some categories (for example, the “improve transportation” category) were also organized into sub-categories, which are also shown in the table. Note that respondents were allowed to name more than one issue or problem that would need to change or improve – therefore percentages may add to more than one hundred percent and as well, respondents’ comments may be coded into more than one code within each net response code.

Responses to the two questions about what would need to improve at the neighborhood and citywide level are very similar in their relative importance compared to responses given in 2004. However, there are a few significant increases and decreases in the frequency with which some responses were given.

At the citywide level:

- Significantly more 2006 respondents mentioned parks and recreation improvements that could be made (11% compared to 4% in 2002), and transportation system improvements (8% in 2006, compared to 1% in 2004 and 2002, respectively).
- A significantly smaller percentage of 2006 respondents, compared to 2002 respondents, also gave suggestions related to controlling or reducing traffic (41% in 2002 vs. 29% in 2006).

At the neighborhood level:

- Significantly fewer respondents mentioned crime and safety issues (5% in 2006 vs. 13% in 2004)
- It should be noted that a significantly greater number of respondents don’t know what would change their opinion of the quality of life in their neighborhood (19% in 2006 compared to 10% in 2004).

**WHAT WOULD IMPROVE QUALITY OF LIFE TO BE GOOD OR EXCELLENT

Biggest Problems Residents Want City to Address

All respondents were then asked to consider the “city as a whole” and identify the biggest problem that they feel the City should do something about over the next two years. **More than half (52%) of all respondents say that traffic and/or transportation issues are the biggest problems the City should address over the next two years***. Complaints about traffic were most frequently mentioned in regards to the overall issues about traffic and transportation; more than one-third of respondents (36%) say it is the prevalent issue the City needs to address in the next two years. **Among transportation issues, respondents mention road improvements as the biggest problem the City should do something about.**

Notably, the percentage mentioning overall traffic and transportation issues and the percentage mentioning traffic are significantly less than reported in 2004 and 2002

- 52% mentioned overall transportation/ traffic issues in 2006; 64% mentioned these in 2004 and 71% in 2000.
- 36% mentioned traffic as a specific problem in 2006; 47% mentioned traffic in 2004 and 55% in 2002.

When asked if there was any problem in the respondent’s own neighborhood that the City should do something about over the next two years, almost four in ten (39%) respondents said that there was a problem in their own neighborhood that the City should do something about. This percentage is similar to what was reported in 2004 (34%) and 2002 (35%).

Almost half (49%) of those respondents who said there was a problem, say that transportation and traffic related issues are the problem in their neighborhood*. This is equal to those who mentioned transportation issues in 2002, and slightly lower than respondents in 2004 (46%).

While traffic is the most often cited, transportation problems *at the citywide level*, road maintenance and repair and street or traffic light concerns are the most often cited transportation problems *at the neighborhood level* (23% of those who say there is a neighborhood problem the City should do something about mention roads, while only 12% mention traffic as a problem in their neighborhood).

The table below illustrates, in more detail, the top responses given as the biggest citywide and neighborhood problems.

BIGGEST PROBLEM RESIDENTS WANT CITY TO ADDRESS OVER THE NEXT TWO YEARS

Importance of Resources

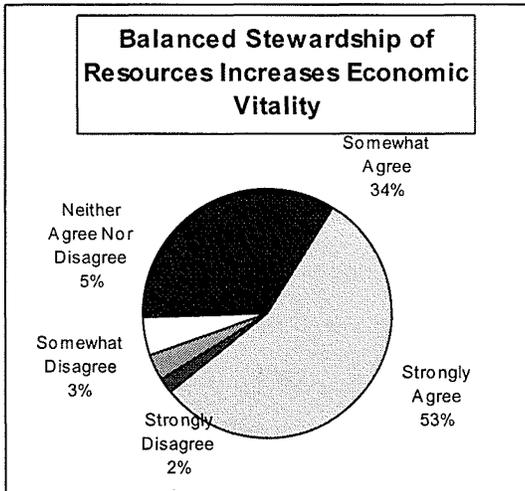

Newly added to the 2006 Budget Survey were a series of questions about natural resources and their effect on the quality of life in Bellevue.

The majority of respondents (93%) agree (somewhat or strongly) that careful and balanced stewardship of our natural environment and natural resources will result in a long-term increase in the quality of life of Bellevue. Female respondents are significantly more likely to agree with this statement. Furthermore, residents who have lived in Bellevue for less than 25 years are more likely to agree it will increase the quality of life in Bellevue. In addition, respondents that lived in the 98006 zip code were also more likely to strongly agree than were those that live in either the 98004 or the

98007 zip codes.

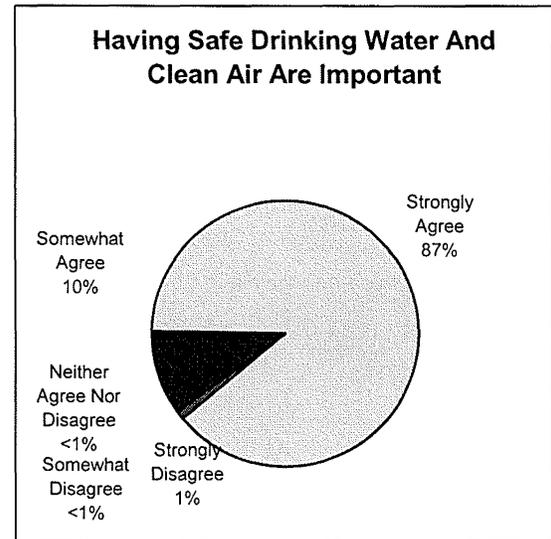

Interestingly, respondents that *did not* vote were also significantly more likely to strongly agree that careful and balanced stewardship of our natural environment and natural resources will result in a long-term increase in the quality of life of Bellevue than were those that vote.

Almost 9 in 10 respondents (87%) agree (somewhat or strongly) that careful and balanced stewardship of our natural environment and natural resources will result in a long-term increase in the economic vitality for Bellevue. **More than half**

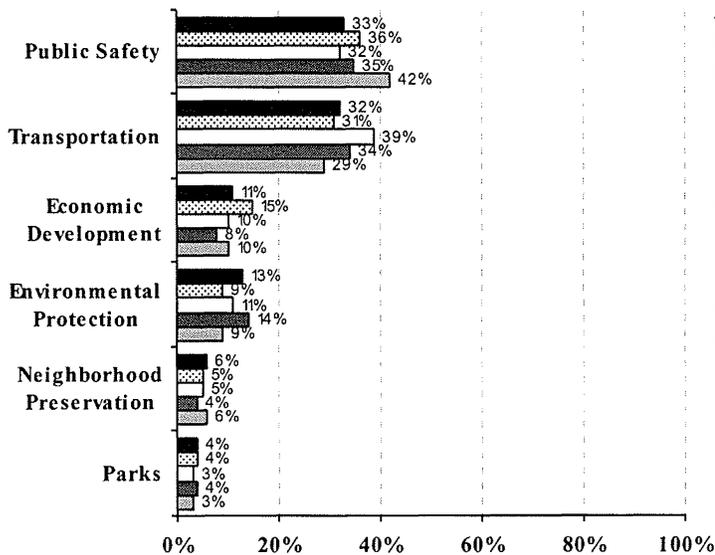

of those respondents (53%) strongly agree with the statement. A significantly greater amount of female respondents agree that the natural resources have an effect on the economic vitality of Bellevue.

Almost all respondents (97%) agree, either somewhat or strongly, that having safe drinking water and clean air are important factors in quality of life in Bellevue. Nearly nine in ten respondents (87%) strongly agree with this statement. Multi-family residents and respondents under the age of 35 are significantly more likely to agree. Furthermore, female respondents are significantly more likely than males to agree on the importance of clean drinking water, as well as clean air and its impact on the quality of life in Bellevue.

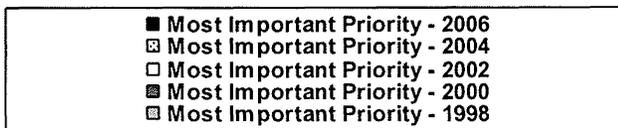

Budget Priorities

Top Budget Priority

TOP BUDGET PRIORITY: As in past surveys, respondents were asked to select their top budget priority from among six general service areas. Similar to the 2004 survey, Public Safety is ranked as the top budget priority by 33% of 2006 respondents. Transportation is considered a top budget priority by nearly a third of respondents (32%). This is nearly the same percentage naming Transportation as the top budget priority in 2004 (31%) but significantly less than reported in 2002 (39%). The percentage of respondents naming Economic Development as the top budget remains relatively stable, from 15% in 2004 to 13% in 2006.

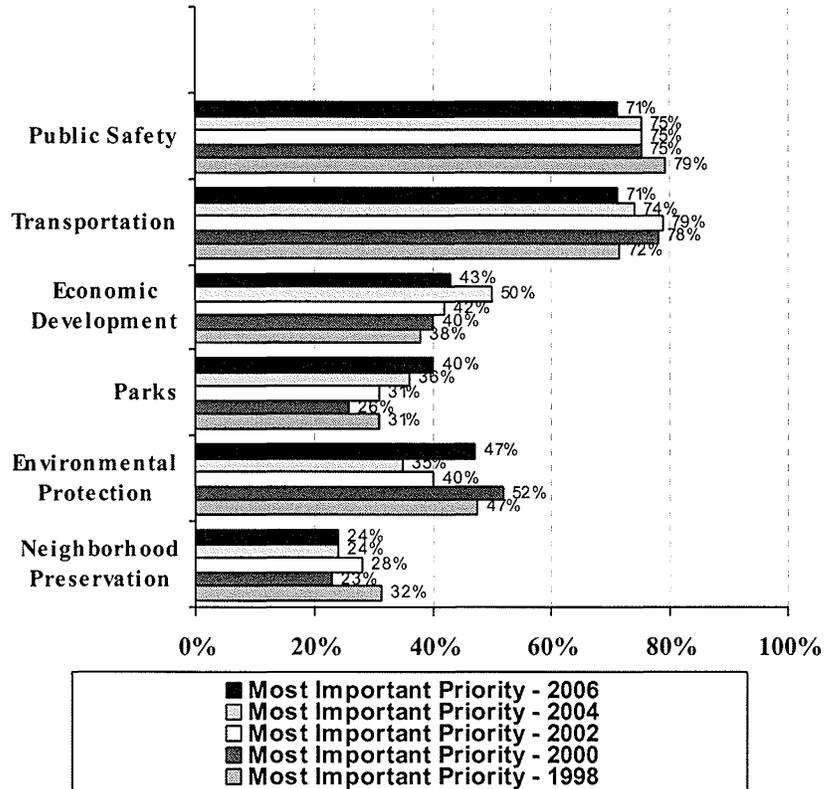

TOP 3 BUDGET PRIORITIES:

In addition, respondents were also asked to name their second and third budget priorities. Results were combined for each service area to ascertain which service areas were most often considered to be one of the top three budget priorities.

- Almost three-quarters (71%) of respondents name Public Safety as either a first, second or third budget priority. This is less than previous survey waves reported.
- An equal percentage of respondents say transportation (71%) should be the first, second or third budget priority – this is a slight decline when compared to the combined percentage in 2004 (74%) and in 2002 (79%).
- Down from 2004, less than half (43%) of 2006 respondents consider Economic Development to be one of the top three budget priorities, compared to 50% in 2004.
- One in four respondents (40%) say that Parks are a first, second or third budget priority. This is greater than the combined percentage in all previous survey waves, (36% in 2004, 31% in 2002 and 1998, and 26% in 2000, respectively).
- Nearly half (47%) of 2006 respondents say Environmental Protection should be the first, second or third priority. This is an increase from 2004, where slightly more than one third (35%) report it as a top three budget priorities.
- Neighborhood Preservation is considered a first, second or third budget priority by one-quarter (24%) of 2006 respondents – this is equal to the 2004 budget survey.

Top 3 Budget Priorities

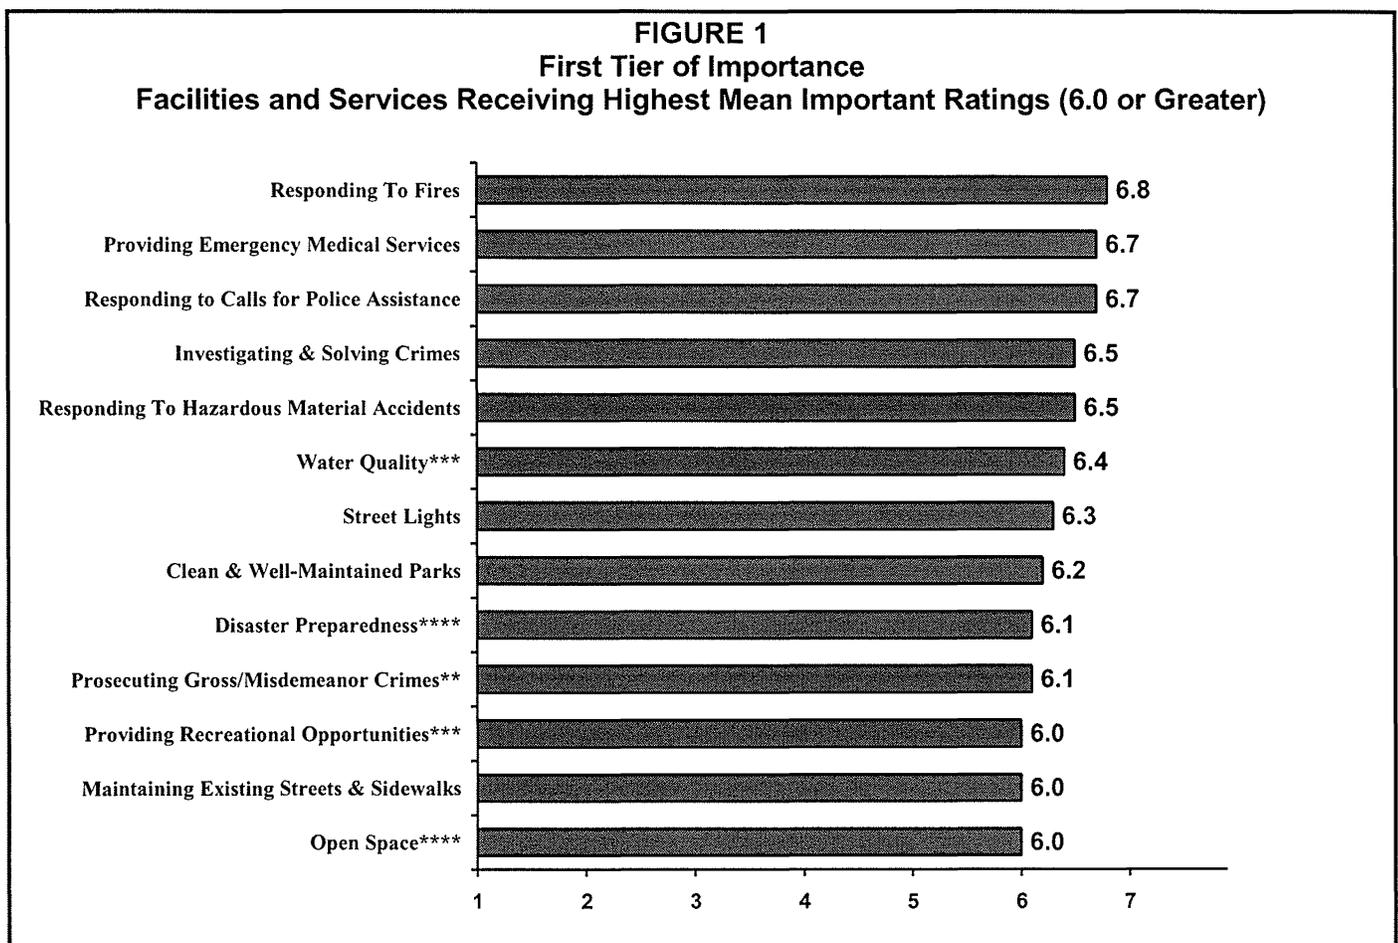

Importance and Satisfaction Ratings for Facilities and Services

The heart of the Budget Survey is a series of questions asking respondents to rate 36 specific types of services and facilities on 1) how important they believe it is for the City to provide the service or facility and 2) how satisfied they are with the City's job in providing the service or facility. Respondents were asked to provide ratings on a 1 to 7 scale with 7 being the highest rating for both importance and satisfaction.

Similar to the mean importance ratings reported in 2004, in the 2006 survey every service item received a mean rating of at least a 4.9 ranging upward to a high mean rating of 6.8.

The First Tier of Importance continues to generally be comprised of those services and facilities relating to public safety. This year, respondents rated two services areas above 6.0 in importance that had been rated lower than 6.0 in 2004 (and therefore were not in the First Tier of Importance in 2002). These are denoted with a **.**

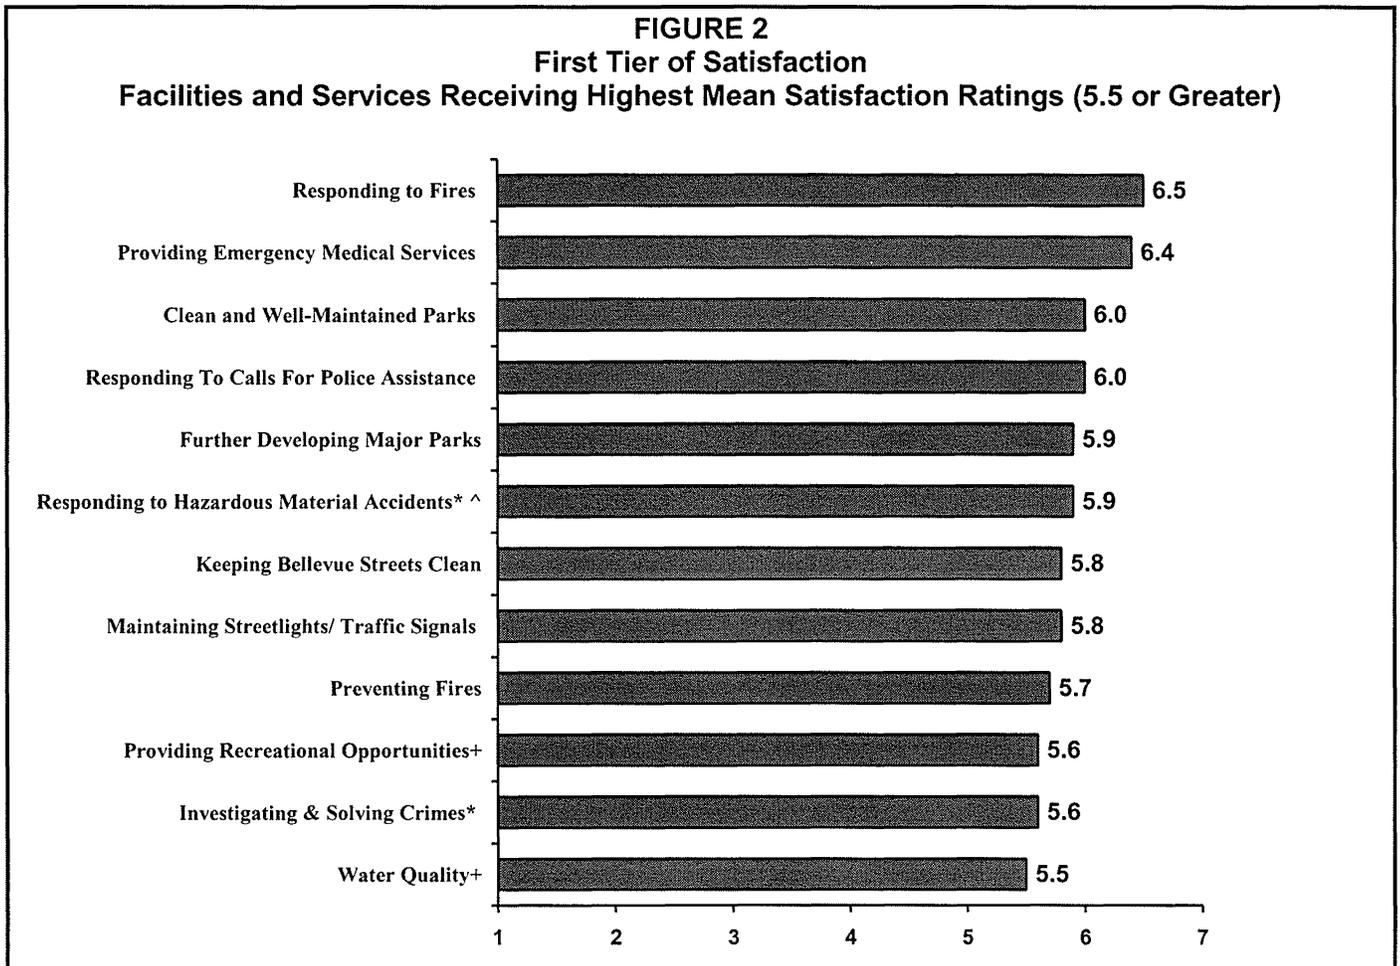

***The service item "prosecuting misdemeanor and gross misdemeanor crimes committed in Bellevue" was new to the 2004 Budget Survey.*

****The service items "water quality" and "providing recreational opportunities are new to the 2006 Budget Survey.*

***** The service items marked with an asterisk (****) were reported in the Second Tier of Importance in the 2004 Budget Survey.*

As in 2004, in 2006 all service and facility items were given average satisfaction ratings of at least a 4.4. Those services garnering the greatest satisfaction among respondents received mean satisfaction ratings of almost 6.5.

Among the thirteen services receiving a mean satisfaction rating of 5.5 or greater – the First Tier of Satisfaction – eleven of those services are also most important to respondents (in the First Tier of Importance). Services that were rated as the most important but that are not in the First Tier of Satisfaction deal with preparing for disasters, prosecuting misdemeanor and gross crimes as well as maintaining existing streets and sidewalks. The differences between those services that are most important to respondents and the satisfaction level with services are discussed in more detail on the following pages.

*High Percentage of respondents (20% or more) report "don't know" for service area satisfaction.

^ These service areas were also in the 2004 First Tier of Importance.

+ The service items are new to the 2006 Budget Survey.

The two-page table beginning on the next page shows importance and satisfaction ratings for all services included in the 2006 survey. The order in which services and facilities are listed is based on mean importance ratings, with areas receiving the highest ratings shown first. On this table, mean importance ratings and satisfaction ratings are shown for each service and facility about which the survey asked. This table then shows both the percentages giving the highest possible rating (a "7") and the combined percentages giving a rating of "6" or "7." The last column shows the percentage giving a response of "don't know" related to satisfaction with each service or facility.

In evaluating satisfaction ratings, it is important to note that "don't know" responses are quite common for several areas. Four (4) out of 36 areas receive responses of "don't know" from 20 percent or more of respondents, and 2 areas receive "don't know" responses from 17 to 19 percent of respondents.[^] As in the past there, there may be opportunities for the City to build awareness among residents about the City's work in these areas. It should be noted that the areas which receive high percentages of "don't know" responses in relation to the satisfaction questions, such as "responding to hazardous material accidents", only a small amount of respondents have direct experience. Furthermore, the percentage of "don't know" responses is much less common when respondents rate importance of services than satisfaction of services.

IMPORTANCE AND SATISFACTION RATINGS

	Importance				Satisfaction			
	Mean	% Rating 7	% Rating 6 or 7	Don't Know ^	Mean	% Rating 7	% Rating 6 or 7	Don't Know ^
1st Tier of Importance (Mean Rating of 6.0 or More)								
Responding To Fires	6.77	84%	94%	1%	6.47	55%	79%	12%
Providing Emergency Medical Services	6.70	81%	92%	1%	6.40	55%	77%	11%
Responding to Citizen Calls for Police Assistance^	6.58	68%	88%	4%	5.96	34%	59%	18%

Building or Widening City Roads	5.85	44%	68%	<1%	4.80	14%	32%	2%
Providing Services for Residents in Needs@	5.84	22%	35%	1%	5.14	8%	18%	11%
Providing Recreation Programs For Youth, Seniors and Special Needs Population @	5.83	18%	32%	1%	5.40	10%	23%	5%
Further Developing Major Parks@	5.80	17%	32%	1%	5.91	15%	32%	2%
Community Policing	5.78	43%	65%	1%	5.44	22%	48%	9%
Preventing Fires	5.77	40%	65%	2%	5.70	25%	53%	14%
Economic Development	5.77	41%	62%	3%	5.17	13%	35%	13%
Providing Traffic Patrols in Residential Neighborhoods	5.70	38%	64%	1%	5.38	24%	50%	5%

Large gaps may also reflect broad frustration with challenges that have aspects that are regional in scope and that local government has limited ability to impact.

Results of the 2006 Budget Survey reveal that two services have gap scores of 1.0 or greater; compared to six services in 2004 (and 5 in 2002). It should be noted the respondents in 2006 reported significant improvement in many of the service areas that had large gaps in 2004.

The charts on the next page show the gap scores for those services with large gaps in 2006 and 2004. The first chart lists the service areas with the largest gaps in 2006 by tier of importance. The second chart shows additional service areas that had large gaps in 2004 with their respective 2006 gap.

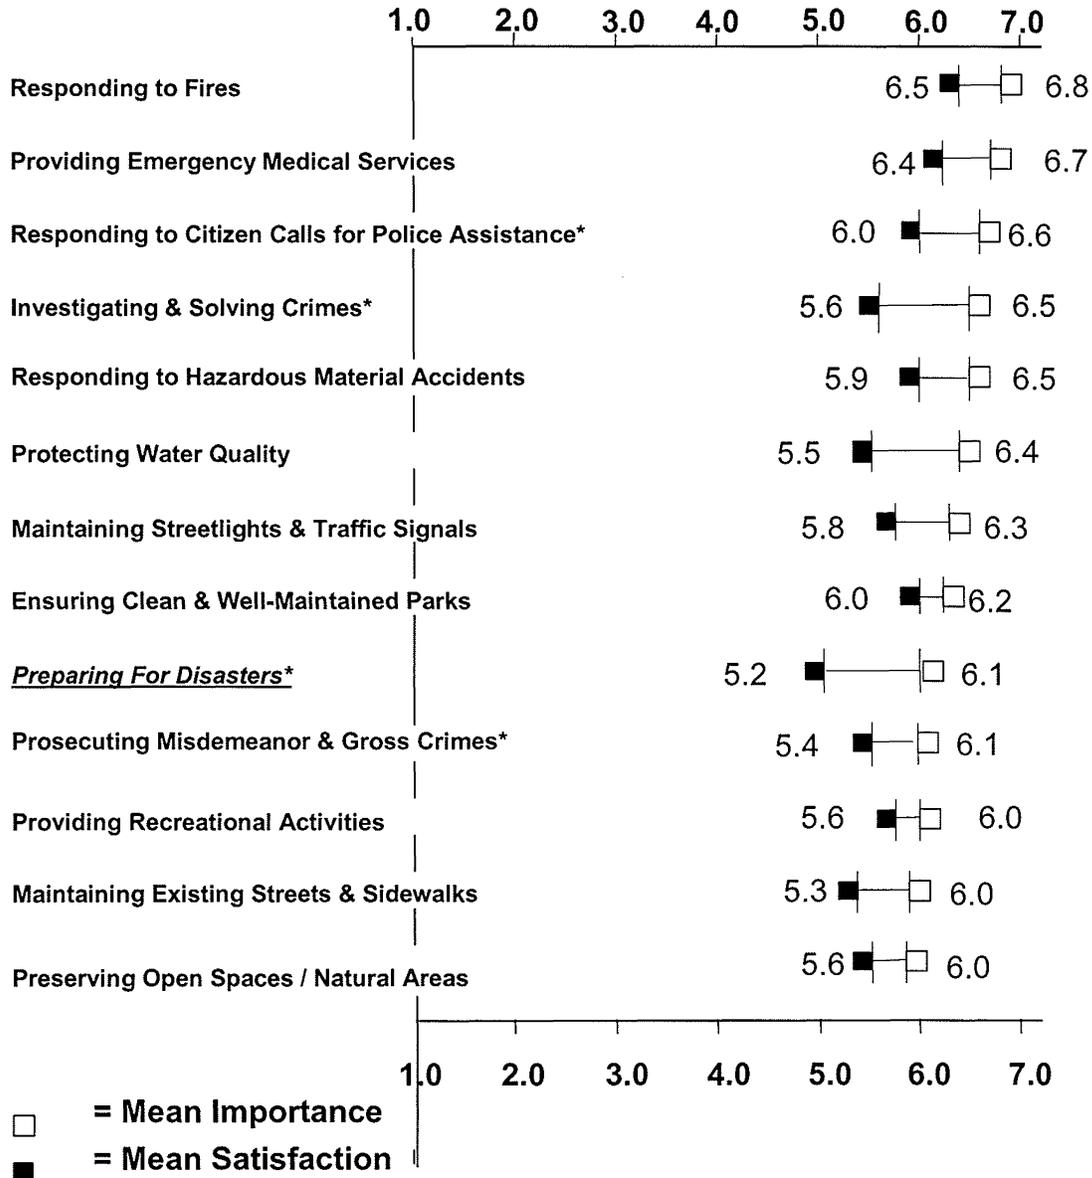

SERVICES AND FACILITIES WITH LARGEST GAPS IN <u>2006</u> SURVEY		
	2004 Budget Survey Gap (Importance > Satisfaction)	2006 Budget Survey Gap (Importance > Satisfaction)
1st Tier of Importance (6.0 or higher): Preparing For Disasters Such As Earthquakes And Major Storms Protecting Water Quality In Bellevue's Lakes And Streams	.56 <i>New in 2006</i>	.94 .84
2nd Tier of Importance (5.5 – 6.0): Building Neighborhood Improvements Such As Sidewalks, Crosswalks And Neighborhood Parks Building Additional Sidewalks Along Major Roads	.34 .51	.47 .63
3rd Tier of Importance (Less than 5.5): Making Improvements For Bicycle Riders	.21	.46

OTHER SERVICES AND FACILITIES WITH LARGE GAPS IN <u>2004</u> SURVEY		
	2004 Budget Survey Gap (Importance > Satisfaction)	2006 Budget Survey Gap (Importance > Satisfaction)
1st Tier of Importance (6.0 or higher): Prosecuting Misdemeanor & Gross Misdemeanor Crimes Maintaining Streets/ Sidewalks	.95 .81	.74 .68
2nd Tier of Importance (5.5 – 6.0): Building Or Widening City Roads to Help Ease Traffic Congestion Reducing Traffic Problems In Residential Neighborhoods	1.35 .99	1.05 .58
3rd Tier of Importance (Less than 5.5): Supporting The Arts	.13	-.03

**In figuring gaps between importance and satisfaction, importance and satisfaction ratings were carried out to two decimal places before the gaps were calculated. Only then were the gaps rounded to one decimal place.*

A series of three charts is provided next to show the size of gaps between average importance and satisfaction ratings for all service areas about which the 2006 survey asked. The services are arranged by tier of importance.

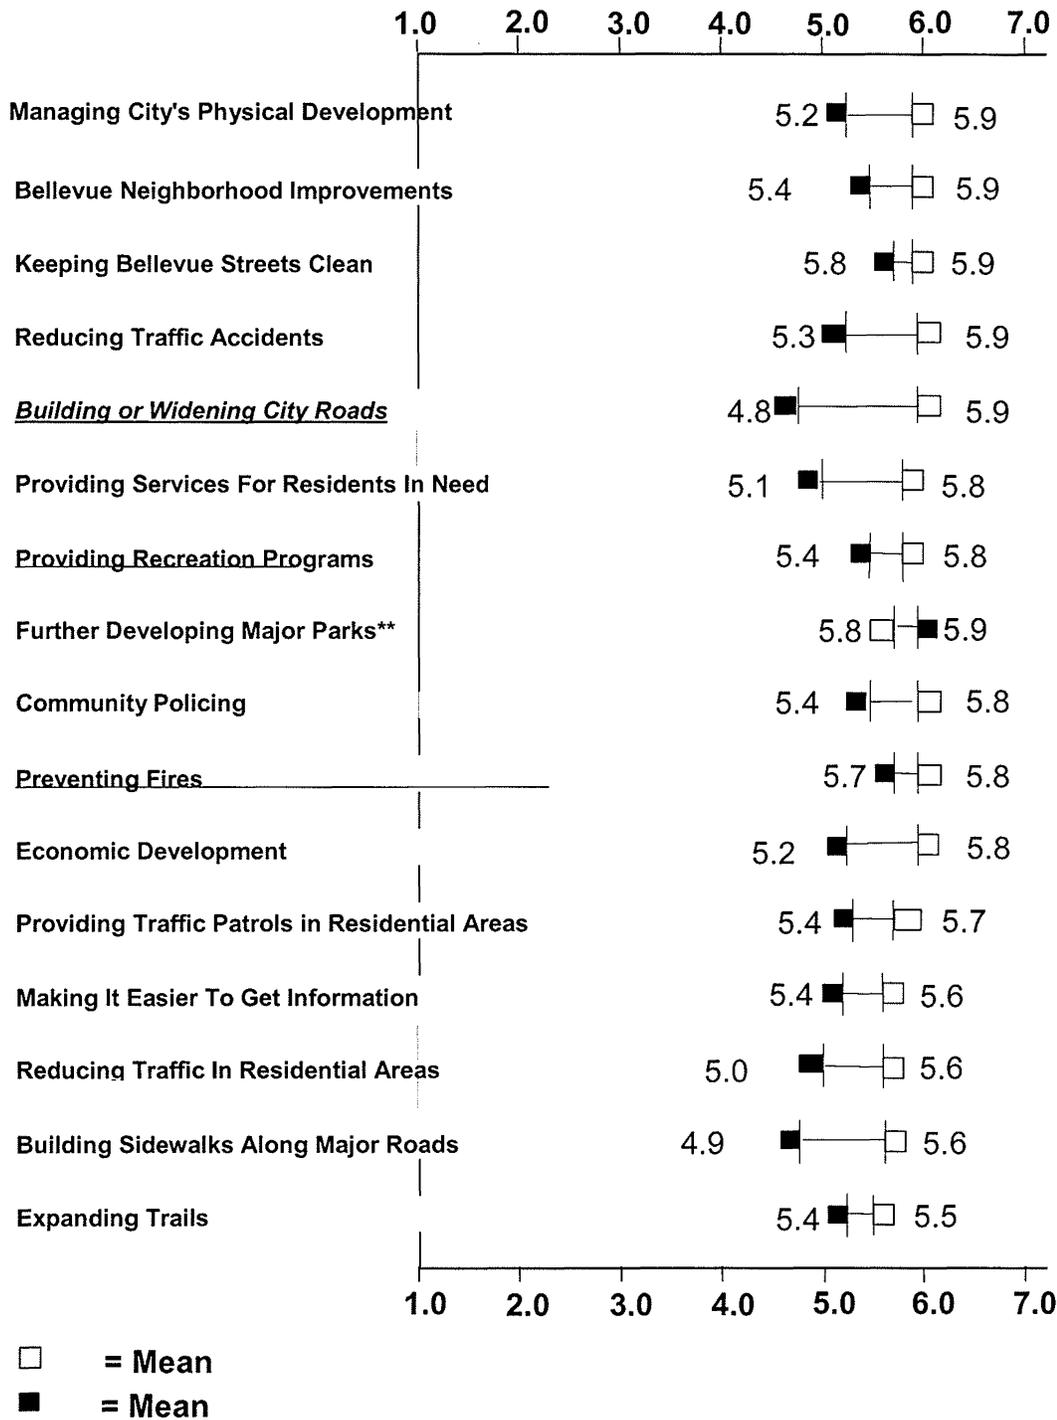

Gap Analysis 2006
First Tier of Importance (Mean 6.0 or Greater)

*High percentage of respondents "don't know" how satisfied they are with service/facility.

Services or facilities with a gap score of 1.0 or greater are underlined and italicized.

Gap Analysis 2006
Second Tier of Importance (Mean of at least 5.5 and less than 6.0)

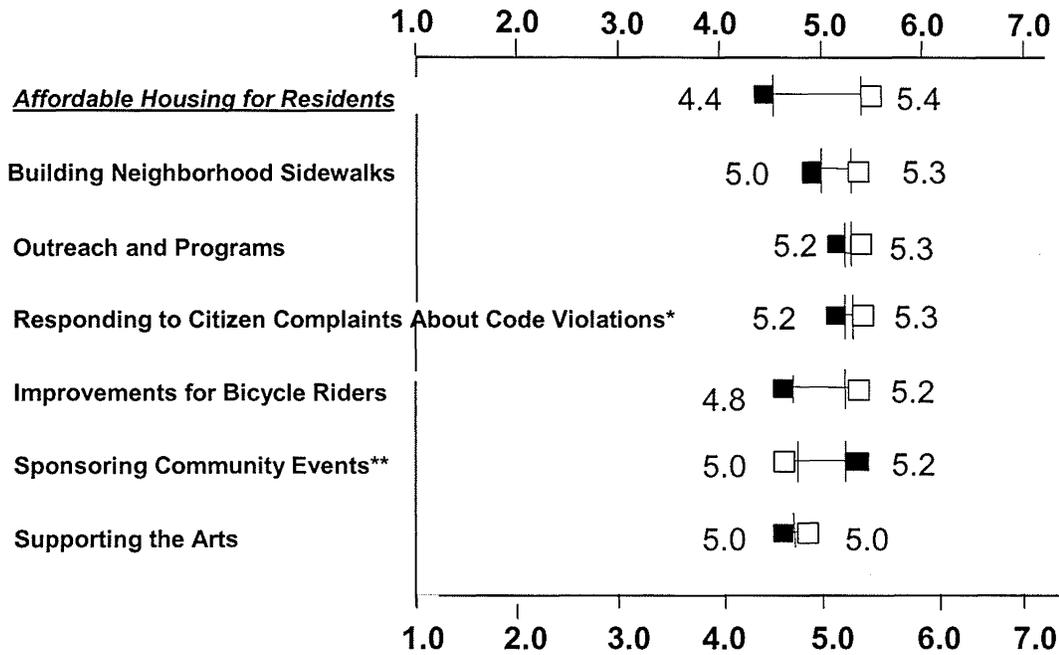

*High percentage of respondents "don't know" how satisfied they are with service/facility.

Services or facilities with a gap score of 1.0 or greater are underlined and italicized.

**Note, the mean satisfaction rating is greater than the mean importance rating

Gap Analysis 2006
Third Tier of Importance (Mean less than 5.5)

□ = Mean Importance
 ■ = Mean Satisfaction

*High percentage of respondents "don't know" how satisfied they are with service/facility.

**Note, the mean satisfaction rating is greater than the mean importance rating

Services or facilities with a gap score of 1.0 or greater are underlined and italicized.

Trends in Importance and Satisfaction Ratings

When making a direct comparison between mean scores in 2006 and mean scores in 1998, the majority of service areas increased in their *importance* ratings than decreased. At the same time, the majority of service areas increased in their *satisfaction* ratings. For several service areas, the differences between 1998 and 2006 ratings are statistically significant.

There are only 3 service areas of *importance* where the 2006 mean score has decreased in comparison to the 1998 score. These include:

- Building or widening City roads to help ease traffic congestion
- Community policing such as bike patrols and neighborhood Police officers
- Reducing traffic problems in residential neighborhoods

However, **every *satisfaction* rating of service areas has improved** when comparing 1998 and 2006 mean scores.

There are trends of **increasing *satisfaction*** for several service areas. In addition, these areas with increasing satisfaction have also shown decreasing gaps in the disparity between the importance of the service compared to the satisfaction with the service area:

- Investigating And Solving Crimes
- Ensuring Clean And Well Maintained Parks And Park Facilities
- Preserving Open Spaces And Natural Areas
- Providing Traffic Enforcement In Residential Neighborhoods
- Making It Easier To Get Information About City Services And Programs
- Responding To Citizen Calls For Police Assistance
- Maintaining Existing Sidewalks And Streets
- Managing City's Physical Development
- Keeping Bellevue Streets Clean
- Building Or Widening City Roads To Help Ease Traffic Congestion
- Community Policing Such As Bike Patrols And Neighborhood Police Officers
- Reducing Traffic Problems In Residential Neighborhoods
- Promoting Affordable Housing For City Residents
- Providing Outreach And Programs To Give Neighborhoods Better Access To City Services
- Responding To Citizen Complaints About Code Violations

The table on the next page shows trends for service areas that have had **substantial gaps** between importance and satisfaction ratings in 1998, 2000, 2002, 2004 and/or 2006. Gap scores that are statistically greater than that reported in another year are shown in bold.

An indication is also made regarding whether the gap score (importance minus satisfaction) has widened, narrowed or remained stable between 1998 and 2004.

Importance and Satisfaction Trends:						
Services with substantial gaps in 1998, 2000, 2002, 2004 and/or 2006						
	<u>Gap</u>					<u>Trends 1998 to 2006</u>
	<u>1998</u>	<u>2000</u>	<u>2002</u>	<u>2004</u>	<u>2006</u>	-
<i>1st Tier of Importance</i>						
Investigating And Solving Crimes	1.06	1.09	0.98	0.9	0.89	Narrowing
Building Or Widening City Roads To Help Ease Traffic Congestion	1.72	1.37	1.66	1.35	1.05	Appears to be narrowing (gap is influenced by transit and construction projects on Bellevue roads and freeways)
Maintaining Existing Streets & Sidewalks	0.96	0.96	1.08	0.81	0.68	Narrowing overall with slight increase in gap score in 2002
Providing Services For Residents In Need	0.83	1.08	0.71	0.95	0.69	No trend – varying gap
Preparing For Disasters Such As Earthquakes And Major Storms	1.14	0.74	0.79	0.56	0.94	Narrowing since 1998, but now widening
<i>2nd Tier of Importance</i>						
Managing City's Physical Development	1.25	1.16	1.22	0.83	0.76	Narrowing
Preserving Open Spaces And Natural Areas	1.01	1.11	0.80	0.53	0.40	Narrowing
Promoting Jobs and Economic Development	0.42	0.36	0.90	1.12	0.60	Narrowing through 2002; widened gap in 2002-2004, but slightly declining again
Reducing Traffic Problems In Residential Neighborhoods	1.41	1.02	1.29	0.99	0.58	Narrowing
<i>3rd Tier of Importance</i>						
Promoting Affordable Housing For City Residents	1.43	1.21	0.88	1.03	1.01	Narrowing overall but slight increase in gap for 2004 and 2006

Trends in Importance and Satisfaction Ratings and Gaps for all City Services and Facilities

The tables on the next few pages summarize trends in ratings and gaps for *all service areas between 1998 and 2006*. Importance and satisfaction mean scores that have increased significantly over any of the previous survey years are in **bold**. Within the table, City services are listed in descending order by the average importance score in 2006 (by tier of importance).

First Tier of Importance

	<u>Importance</u>					<u>Satisfaction</u>					<u>Gap</u>				
	<u>1998</u>	<u>2000</u>	<u>2002</u>	<u>2004</u>	<u>2006</u>	<u>1998</u>	<u>2000</u>	<u>2002</u>	<u>2004</u>	<u>2006</u>	<u>1998</u>	<u>2000</u>	<u>2002</u>	<u>2004</u>	<u>2006</u>
Responding To Fires	Stable					Stable; slightly increasing					Stable over time				
	6.77	6.80	6.78	6.81	6.77	6.36	6.37	6.44	6.41	6.47	0.41	0.43	0.34	0.40	0.30
Providing Emergency Medical Services Such As Medic One	Peaked in 2000; now decreasing					Stable					Narrowing since 2002				
	6.66	6.81	6.78	6.75	6.70	6.26	6.35	6.41	6.41	6.40	0.40	0.46	0.37	0.34	0.31
Responding To Citizen Calls For Police Assistance	Stable					Significant increase in 2004 & 2006					Narrowing since 2002; significant decrease in 2006				
	6.57	6.57	6.52	6.62	6.58	5.75	5.75	5.74	5.93	5.96	0.82	0.82	0.78	0.69	0.62
Investigating And Solving Crimes	Stable					Generally increasing					Narrowing; significant decrease in 2006				
	6.44	6.40	6.45	6.46	6.47	5.38	5.31	5.47	5.56	5.58	1.06	1.09	0.98	0.90	0.89
Responding To Hazardous Material Accidents	Increasing					Increasing until 2006					Gap relatively stable since 2002				
	6.16	6.36	6.42	6.43	6.46	5.63	5.59	5.92	6.03	5.91	0.53	0.77	0.50	0.40	0.55
Protecting water quality in Bellevue's lakes and streams (<i>new in 2006</i>)	*	*	*	*	6.36	*	*	*	*	5.52	*	*	*	*	0.84
Maintaining Street Lights & Traffic Signals	Significant decrease in 2006					Stable					Significantly narrowing in 2006				
	6.27	6.37	6.42	6.46	6.32	5.73	5.69	5.72	5.77	5.78	0.54	0.68	0.70	0.69	0.54
Ensuring Clean And Well-Maintained Parks & Park Facilities	Increasing					Slight decreases in 2000 and 2002; significant increase in 2004 & 2006					Significantly narrowing since 2004				
	5.88	5.90	6.00	6.14	6.16	5.70	5.61	5.62	5.82	5.99	0.18	0.29	0.38	0.32	0.16
Preparing For Disasters Such As Earthquakes And Major Storms	No trend, varies					Peaked in 2004, now decreasing					No trend varying gap				
	5.77	5.84	6.06	5.97	6.13	4.63	5.10	5.27	5.41	5.19	1.14	0.74	0.79	0.56	0.94
Prosecuting Misdemeanor and Gross Misdemeanor Crimes (<i>Added in 2004</i>)	Slightly decreasing					Slightly increasing					Significantly narrowing since 2004				
	*	*	*	6.26	6.13	*	*	*	5.31	5.38	*	*	*	0.95	0.74

	Importance					Satisfaction					Gap

Strategies for Addressing Traffic Congestion

The 2006 Budget Survey asks respondents to state how strongly they agree or disagree with six different strategies (listed below) the City could employ to deal with increased traffic congestion.

- Widen major City roads.
- Encourage the state to widen state highways.
- Work with regional agencies to improve local transit service within Bellevue.
- Work with regional agencies to develop a reliable regional mass transit system.
- Divert traffic away from local neighborhoods even if it may increase travel time.
- Encourage and make it more attractive for people to choose transportation alternatives such as riding the bus, carpooling, and vanpooling. This could include building more carpool lanes and working to get more reliable and frequent bus service.

The greatest majority of respondents agree that in order to deal with increased traffic congestion, the City should work with regional agencies to improve local transit service within Bellevue (91% somewhat or strongly agree with this strategy).*

Newly added to the 2006 Budget Survey, respondents report the second greatest percentage of agreement ratings, eighty-six percent (86%) of respondents somewhat or strongly agree that the City should work with regional agencies to develop a reliable regional mass transit system. Furthermore, an equal percentage of respondents agree (somewhat or strongly) that the City should encourage and make it more attractive for people to choose transportation alternatives (86% respectively). Nearly three-quarters of respondents agree that the City should encourage the state to widen state highways (73%), or widen major City roads (67%). The strategy that least amount of people agree that the City should do is diverting traffic away from local neighborhoods. Although this was the least popular strategy, a significantly greater amount of respondents agree with the statement than they did in the 2004 Budget Survey (65% vs. 57% respectively). Similar to 2004, a small percentage of respondents report strong disagreement for any of these strategies (9% or fewer respondents strongly disagree with each statement).

The table on the next page shows breaks out the percentage of agreement and disagreement ratings given for each of the five strategies.

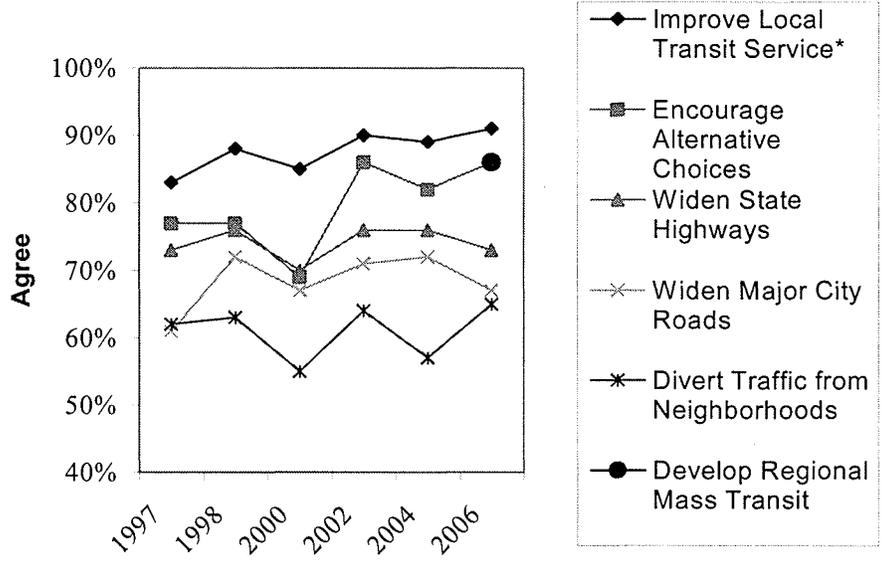

** Note that the wording on this question was slightly altered in 2006. In the 2004 survey the phrase was: "Work with regional agencies to improve transit service for Bellevue." In 2006 it was changed to: "Work with regional agencies to improve local transit service within Bellevue."*

(see table on next page)

<p align="center">OPINIONS REGARDING TRANSPORTATION STRATEGIES 2006 Survey</p>

**Individual percentages do not add exactly to combined sum due to rounding.*

**Opinions of Strategies for Addressing Traffic
1997-2006**

The chart on the right shows trends in the transportation strategy series since it was first asked in 1997. In each survey year, every strategy has garnered a majority in support. Prior years have also yielded similar patterns in responses in which transit service-related strategies and strategies to help people choose alternatives to driving alone are most popular.

Over the years respondent's level of agreement with strategies has remained fairly stable. Particularly two strategies in 2006, "encourage alternative choices", and divert traffic from neighborhoods" increased in comparison to the 2004 Budget Survey.

Although when respondents rate "widen state highways" and "widen major City roads" strategies it is not a significant decrease from the previous survey wave.

*Opinions of Strategies for addressing Traffic – "Improve Local Transit Service" wording have changed from "within Bellevue" to "local".

Survey Changes

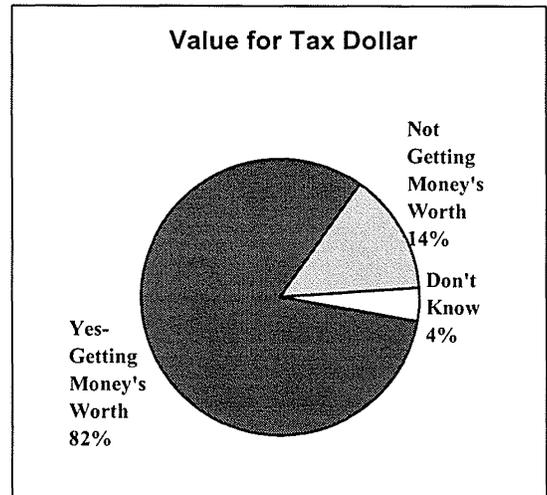

As has been noted from the 2004 Budget Survey, the percent agreeing had trended significantly upward between 1997 and 2002 for several of these strategies: improving transit, encouraging alternative choices, and widening major city roads. The steep increase between 2000 and 2002 in the percent agreeing with encouraging alternative transportation choices is likely partly related to the change in wording on this item. In 2000 and before, it was worded: "Develop ways that encourage individuals to change the ways in which they travel." In 2002, it was changed to provide respondents with more detail on how the City can encourage use of alternatives: "Encourage and make it more attractive for people to choose transportation alternatives such as riding the bus, carpooling, and vanpooling. This could include building more carpool lanes and working to get more reliable and frequent bus service."

"Work[ing] with Regional Agencies to Improve Local Transit Service within Bellevue" has been the most popular strategy for dealing with congestion each year this series has been on a budget survey. (In 2000 and prior years this question was worded slightly differently to read "Work with Metro to provide Bellevue with better bus service, and from 2002 to 2004 the question read "Work[ing] with Regional Agencies to Improve Transit Service for Bellevue." The question was again changed in 2006 to read: "Work with Regional Agencies to Improve Local Transit Service within Bellevue")."

Opinions regarding Taxes and Service Levels

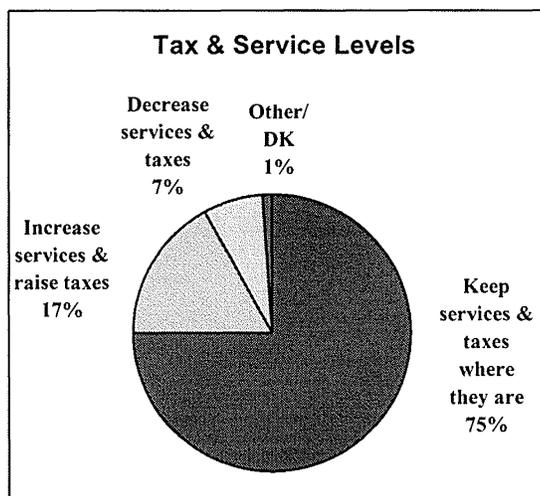

The Budget Survey inquires of residents whether they feel they are getting their money's worth for the taxes they pay for city services. More than eight out of ten (82%) 2006 respondents say they are getting their money's worth for their tax dollar. Fourteen percent (14%) of respondents do not feel they are getting their money's worth for their tax dollar.

The percentage of respondents who report getting their money's worth for their tax dollar has increased slightly each survey year. The table below shows the percentage reporting they are getting their money's worth and the percentage who report they are not getting their money's worth during each survey year.

In general, there are few statistically significant differences between demographic groups. However, it is interesting to note that respondents who have annual household incomes of less than \$35,000 were significantly more likely to report they were getting their money's worth for their tax dollar than were those with higher annual household incomes.

VALUE FOR TAX DOLLAR: TRENDS IN RESPONSES (BASE: ALL RESPONDENTS)						
	1996	1998	2000	2002	2004	2006
Getting Money's Worth	72%	73%	78%	79%	81%	82%
Not Getting Money's Worth	20%	22%	16%	16%	16%	14%
Don't Know / Refused	8%	5%	6%	5%	3%	4%

A second question asks respondents to weigh the corresponding relationship between services received for their tax dollar to identify the preferred level of taxes and services.

Similar to the previous survey wave, three-quarters (75%) of all respondents say that the City should keep taxes and services about where they are. Seventeen percent (17%) indicate they would prefer to see an increase in service levels and taxes, while seven percent (7%) of respondents say they want a decrease in taxes and service levels.

TAX AND SERVICE LEVELS: TRENDS IN RESPONSES (BASE: ALL RESPONDENTS)						
	1996	1998	2000	2002	2004	2006
Keep Where They Are	77%	74%	74%	76%	75%	75%
Increase	10%	10%	9%	15%	15%	17%
Decrease	9%	8%	9%	6%	8%	7%
Don't Know / Refused	4%	8%	8%	3%	2%	1%

Suggested Services/ Facilities to Increase or Decrease

Respondents who said the City should either increase or decrease services and taxes were asked to suggest what services or facilities should be increased or decreased.

Among the seventy (70) respondents who say the City should increase services and taxes, almost two-thirds (63%) say that transportation services (such as road improvement & maintenance, transit and traffic improvements) should be increased. Almost one-quarter of respondents (23%) report the City should increase parks and recreation. Sixteen percent (16%) of respondents say schools and/or education services should be increased. Slightly more than one in ten respondents (13%) stated Police and public safety services should be increased. In addition almost one in ten (9%) respondents reported increasing affordable housing, and six percent (6%) reported wanted increases related to planning, zoning and development. Notably, ten percent (10%) of respondents do not know which services should be increased.

Among the twenty-seven (27) respondents who say the City should decrease services and taxes, one in five (19%) suggest cutting parks and recreation services, one in ten (11%) suggest development, zoning and planning. Seven percent (7%) of respondents say that the City government should decrease public transportation options, and an additional seven percent (7%) of respondents reported that each of the following areas should be decreased: providing outreach and programs, support for the arts, and should be more efficient with tax dollars in order to lower taxes. More than one-quarter (26%) of respondents do not know which services should be decreased.

Other Comments

Interviewers asked respondents whether they had any additional comments for the City regarding needs and priorities for the next two-year budget. Two-thirds (65%) of respondents did not offer any final comments. Of the respondents who did have a concern regarding budget priorities, transportation/traffic/roads is perceived as the most important.

Demographics - Survey Respondent Profile

Household Size

A majority (62%) of respondents surveyed in the 2006 Budget Survey report they have two adults (including themselves) living in their household. One-quarter (25%) of respondents report they are the only adult in their household; slightly more than one in 10 respondents (13%) report they have three or more adults living in their household.

Children in Household

Sixty-six percent (66%) of respondents do not have children currently living in their household, while 15% have one child and 14% have two children living in their household. Five percent (5%) of respondents report they have three or more children in their household. As reported in 2000, 2002 and in 2004, respondents who live in a multi-family dwelling are more likely than single-family dwelling residents to *not* have any children (76% of multi-family residents have no children compared to 58% of single-family residents).

Dwelling Type

Fifty-five percent (55%) of survey respondents interviewed live in single-family dwellings; 45% live in multiple family dwellings. The survey proportion is representative of households in Bellevue and was ensured with a screening quota.

Years Lived in Bellevue

In conjunction with previous survey results, on average, respondents have lived in the City of Bellevue for sixteen (16.5) years. Approximately one in five respondents has lived in the City for one to two years (18%). More than one-quarter of respondents (27%) report living in Bellevue for three to nine years. The majority of respondents (55%) of the 2006 survey respondents have lived in the City for ten or more years.

Gender

Half of survey respondents interviewed are male (50%); half are female (50%). Quotas were employed during respondent screening to ensure an equal split between proportions of males and females.

Age

Equal to the 2004 survey four out of ten (41%) respondents are between the ages of 35 to 54. Sixteen percent (16%) of respondents are under 35 years of age; this is a significantly lower percentage in this age group than reported in 2004 (22%). More than one-quarter of respondents are 65 years or older (27%). Similar to previous surveys, 16% of respondents are between the ages of 55 and 64. Multi-family residents are more likely than single-family residents to be under the age of 35 (26% compared to 8%, respectively). Furthermore, single-family residents are more likely than multi-family residents to be between the ages of 35 and 54 (50% compared to 30%).

Ethnicity/Race

The majority of respondents are white (75%). Eleven percent (11%) are of Asian descent, while three percent (3%) of respondents say they are African American; 3% are Eastern European; 2% say they are Hispanic / Latino; 1% are Native American; and 3% refused to disclose their ethnic background.

Annual Household Income

Similar to 2004 survey results, more than one in ten (15%) respondents have annual household incomes of less than \$35,000. More than one in three respondents (36%) report annual household incomes of \$35,000 to \$75,000, and nearly half (49%) of respondents have annual household incomes of \$75,000 or more. More than one in five respondents (21%) of respondents refused to disclose their income.

C. PUBLIC HEARINGS

Although only a single public hearing is required by State of Washington code, the City of Bellevue will hold three public hearings on the 2007-2008 Budget to provide stakeholders multiple opportunities to officially comment on the budget. Two public hearings -- one in May and the other in July -- were held prior to the submission of the Preliminary Budget to the Council. These two public hearings offered residents and other stakeholders the opportunity to let the Council know what issues were important to them before City management leaders formulated their budget request. The third (final) public hearing will be held in November after the Council receives the Preliminary Budget. This third and final public hearing gives interested parties the chance to address new budget proposals, comment on significant budget issues, and ask the Council to include funding for initiatives not recommended by City managers.

During the first two public hearings, approximately 50 stakeholders addressed the Council. Human service issues dominated the public hearings with individuals testifying about the needs of number of social, health, recreational, and educational service providers. Others who testified asked for a number of neighborhood and park improvements. Still others addressed the Council on ambitious projects such as an performing arts center for the Eastside, and a new aquatic center in Bellevue.

Following are the highlights for each of the two public hearings.

1st Budget Hearing May 15th 8:00 PM

Human Services

Sara Langtn / Casey Otley (Director financial ops @ T-Mobile)—Kidsquest Museum

Issues:

- Requests funding for children's museum expansion.

Marty Jacobs—Parent Services for Childcare Resources

\$\$\$\$\$:

- CDBG funding possibly running out in 2008. Looking for funding for "childcare scholarships".

Loretta Story—Eastside Legal Assistance Program (ELAP)

\$\$\$\$\$:

- Requests funding to help provide free legal assistance to poor in Bellevue.

David Smukowski—Boys and Girls Club

Issues:

- Requests downtown Community/Teen center, BelRed corridor community center.

Lisa Goodman, Jim Praft—Bellevue Youth Theater Association

Issues:

- Requests a renovated theater for rehearsals.

\$\$\$\$\$:

- \$1.8 million from city, \$70,000 from them.

Linda Wolf—Hopelink

Issues:

- Talked about Hopelink & services provided to Bellevue residents.

DARE / SROs in schools

Sharon Taubel—Parent

Issues:

- Requests to budget for new school resource officer in elementary schools

\$\$\$\$:

- \$170,000 a year

Wayne Rector—(address or affiliation unclear)

Issues:

- Requests police officers to keep a presence in elementary schools

Bellevue Downtown Association

Leslie Lloyd—Bellevue Downtown Association

Issues:

- Managing traffic/congestion, increasing “walkability” of downtown, open spaces/parks.

\$\$\$\$:

- \$180 million thru 2020, want debt to cover it. City should immediately bond about \$40 million; this new line of credit would fund the \$180 million of projects thru end of period (2020).
- Would like City to evaluate all resources—including bonding. Claims city has \$1.6 billion in debt capacity.

Lisa Rowe—Bellevue Downtown Association chair, Bentel Capital

Issues:

- Transportation and accessibility.

Bellevue Chamber of Commerce

Jim Hill—Bellevue Chamber of Commerce

Issues:

- Doesn't like the way the City forecast shows a reduction in capital spending.
- Thinks New City Hall should be funded by debt, not out of CIP.
- Chamber doesn't want an increase in property, B&O tax.
- Improving transportation should be a top priority.

Bellevue Economic Partnership

Steve Gilbert—Bellevue Economic Partnership

Issue:

- Requests continued funding

Neighborhood improvements

Lindy Bruce—Sunset Community Association

Issues:

- For 145th pl SE in 2007-2008, Requests sidewalk and bike lane from SE 16th to SE 8th
- For 145th PL SE in 07-13, Requests various improvements south from Camber Rd to 24th SE.

Marty Nizlek—West Lake Sammamish Board

Issues:

- West Lake Sammamish Parkway—shoulder of road is a worry

Bellevue Fire Department

Bruce Ansell—President of Bellevue Professional Firefighters IAFF local #1604

Issues:

- “Vertical” response time. Not enough firefighters for various catastrophic scenarios.

\$\$\$\$\$:

- Want more staff. Also mentioned, but did not directly request, a downtown fire station.

PACE

Skip Rowley, Kemper Freeman and Karen Lytle—PACE

Issues:

- \$14 million already raised.
- Should be completed in 2009.
- Want 75% private, 25% public funding (local, state, fed).
- Land already donated, located @ NE 10th & 106th NE.
- Council passed a resolution in 2002 stating that they may consider donating money to this facility.

\$\$\$\$\$:

- Requests \$10 million from Bellevue’s CIP in 07-08

Swimming Pool

Sharon Simas—President of SPLASH

Issues:

- Requests a new public swimming pool complex for Bellevue.

\$\$\$\$\$:

- Requests \$\$ for planning in 07-08 and partnership to build & operate. Pool estimated to cost \$25-30 million

Also for swim pool:

- Carolyn Behse—Pacific NW Aquatic, USMS
- Tom Hutchnison—Issaquah swim team
- Michael McKenly—Older Swimmer
- Candy Bondgaard (address or affiliation unclear)

2nd Budget Hearing—July 17, 2006

Human Services

Kari Andrews—Children's Response Center board member

Issues:

- Asking for continued financial support of the Children's Response Center. Need for services in increasing.

Elizabeth Westburg—Regional Director for YWCA and
member of Alliance of Eastside Agencies

Issues:

- Alliance of Eastside Agencies is a group of 40+ social service agencies.
- Asked for more investment in human/social services.
- Asked for funding to help a new YWCA pilot project, which would provide a drop-in 1-stop referral center in Bellevue for women.

Ellen Rush—Former client of YWCA

Issues:

- Would like continued support for programs to assist women escaping domestic violence

David Downing—Youth Eastside Services (YES)

Issues:

- Would like continued, on-going funding for YES. The number and intensity of services are increasing.

Amber Wolf—Elder and Adult Day Services

Issues:

- Asked for continued support.

Marcy Curtain, Michael Speer, Chris Jones—Friends of Youth and "The Landing"

Issues:

- Shelter to house homeless youth. 9-10 clients a night. Asked for increased funding.
- "The Landing" is currently open 5 nights a week. 1 of 2 youth shelters in the region (the other is in Seattle). 200 people through last year.

Rachael Black—Eastside Domestic Violence Program

Issues:

- Asking for continued support. 1 in 4 women will be victims. Turn-away rate currently 19:1.

Alaric Bien—Chinese Information and Service Center

Issues:

- Would like funding to provide a "cultural navigator"—a translator and guide who would help immigrants gain access to current services.

Debby Lacey—Eastside Refugee and Immigrant Coalition

Issues:

- More support of the "cultural navigator" (see Chinese Information and Service Center above).

Cameron Kyna—Catholic Community Services of King County Offices in Bellevue

Issues:

- Needs increased funding for services. Difficulties in affording qualified staff, and finding an affordable place for staff to live.

Jeannette Yudovski—Director Jewish Family Services in Kirkland

Issues:

- Thanked Council for their continued support.

Joe Cunningham—Kindering Center

Issues:

- Serves 0-3 year old children with special needs—provides speech and language therapy. Enrollment has doubled. Asking for continued support.

Steve Roberts—Congregation for the Homeless and Eastside Homeless Advisory Council

Issues:

- Coordinator of the Eastside response to the 10 yr. plan to end homelessness in King County.
- Would like to see a women's shelter (see YWCA), expanded services from the youth shelter (see "the Landing")

Fire Department

Bruce Ansell— President of Bellevue Professional Firefighters IAFF local #1604

Issues:

- Expressed the urgency of their concerns re current and future staffing requirements
- Believes that without staffing increases, Fire department will not be able to respond, and services will degrade.

Bellevue Downtown Association

Leslie Lloyd—Bellevue Downtown Association

Issues:

- A preliminary study claims that City will receive \$40 million in additional revenues in the next five years from current development.
- Want's to earmark this "development dividend" towards projects that will help improve downtown.
- Currently working a more detailed study of effects of downtown growth.

PACE

Karen and Chuck Lytle, Skip Rawley, Kemper Freeman —PACE

Nancy Walker—ACT funding Guild

Issues:

- Gave an update on the project. Contract selection in Sept., construction expected to begin end of 2007.
- Working with Cong. Richert to get federal funds. Also in contact with 48th District representatives, staff of 41st district, and Gov Gregoire.
- "Everybody is watching; they will look to see what the City of Bellevue does."
- Fundraising arm for PACE. Brought in a large group of supporters to the meeting. Raised \$144,000 for PACE so far.

- Listed various contributors—there will be more. Passed the \$15 million mark in funding. This is a grassroots effort on the Eastside.

\$\$\$\$\$:

- Requested at least \$10 million in funds. Ideally, the project would be 25% public supported, 75% private.

Leadership Eastside

Stephanie Marpelli—President of Leadership Eastside

Issues:

- Requested continued funding. Seeking funding from other cities.

Neighborhood improvements

Lisa Schiling—Concerned Parent

Frank Klein—Concerned neighbor

Issues:

- A portion of Sommerset Ave is dangerous for her children. Would like to see a sidewalk for 11 homes.
- Tried to get improvements through the NEP, but not selected. Various school renovations also did not improve the conditions. Many people use the road to walk or run. Potential safety hazard.

Teri Fujinawa—Families from Clyde Hill Elementary

Issues:

- Requests to replace a playground at Clyde Hill Elementary. Other school districts, cities participating.

\$\$\$\$\$:

- Asking for \$28,000 from City. Have already raised \$47,000 of a needed \$75,000.

Parks

Denise Lane—Bellevue Botanical Garden Society

Issues:

- Asking for a new, expanded visitor's center at the Bellevue Botanical Gardens. Possibility of rental income.

Lizel Zappler—Bellevue IMP Committee (IPM stands for Integrated Pest Management)

Issues:

- Requests City Parks department to reduce its use of pesticides.

\$\$\$\$\$:

- Would require additional staffing, operating, and record's management costs. New parks would be models of IPM

Bellevue Youth Theater

Jim Praft—President of Bellevue Youth Theater Foundation

Kevin Hagen—Treasurer

Issues:

- Requests to renovate the Youth Theater.

\$\$\$\$\$:

- City would provide money; they would make up the difference. Have raised \$70,000 so far.

**City of Bellevue
2007-2008 Biennial Budget**

City Attorney

Program Outcome Statement

The mission of the Office of the City Attorney is to assist City government in protecting lives and property and preserving and enhancing the quality of life of the public by delivering effective and high quality advice, code enforcement, litigation, claims management, employee safety, risk management, and prosecution services that further the policies and programs adopted by the City Council.

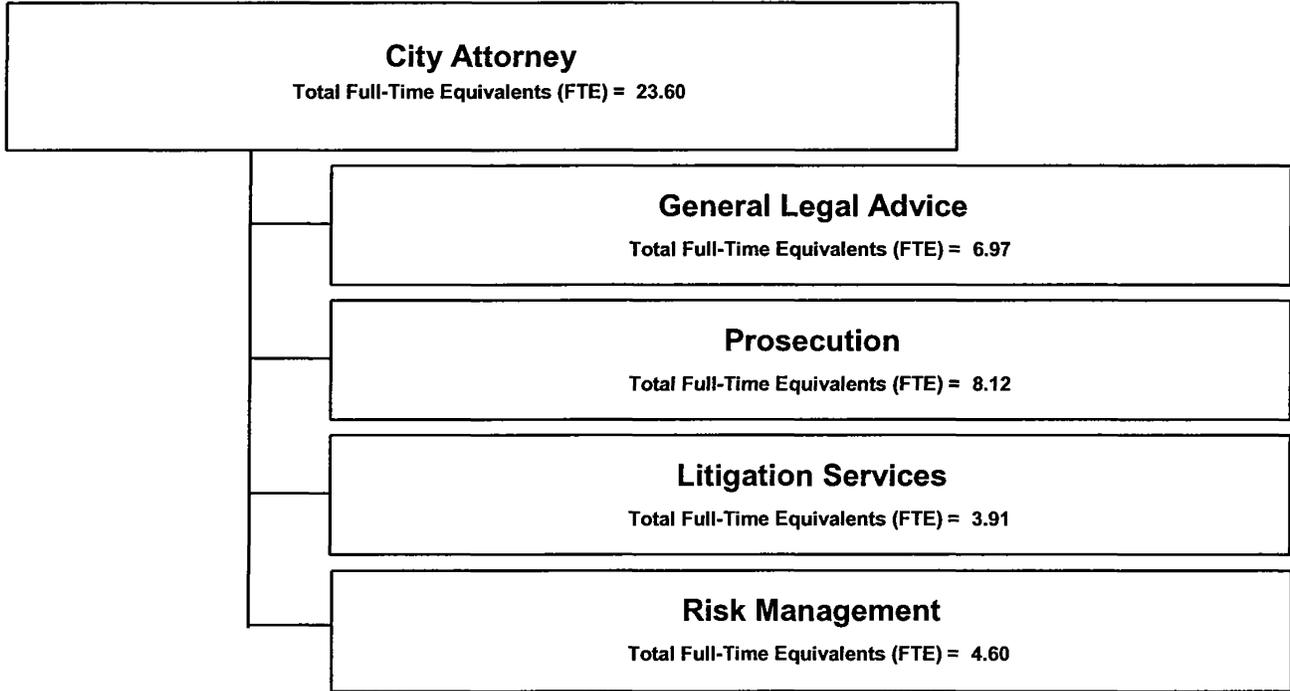

Services and Accomplishments

The City Attorney's Office consists of the following divisions: Legal Advice, Litigation, Prosecution, Public Defense, and Risk Management. The goals of this department are to provide high-quality, cost-effective legal advice and services to all City departments as well as protecting the interests of the City and its residents by defending the City against damage claims and legal proceedings challenging City actions. The City Attorney's Office strives to minimize potential City liability and resulting costs by training and advising staff to avoid actions which may result in liability and claims. Further, this department endeavors to protect the lives and property of the public through effective enforcement of criminal laws.

The following are the major 2005-2006 accomplishments:

- Successfully resolved litigation surrounding City ordinance and permit related to homeless encampments; Consent decree preserved the majority of health and safety provisions, and added a one-year period between encampments;
- Successfully resolved litigation surrounding development of the New City Hall; City's contribution towards \$20 million cost overrun contained at below 50%;
- Closed on the purchase of Meydenbauer expansion parcel for future convention center expansion;
- Assisted with land use approvals, property acquisitions and condemnation proceedings for NE 10th extension/Overlake Hospital expansion;
- Assisted with the transfer of Coal Creek Natural Area and Surrey Downs property from County to City;
- Partnered with Parks and Fire Departments to institute a Public Access Defibrillator Program in nine City facilities;
- Revised all prosecution-related forms to comply with new District Court requirements for electronic document filing and began scanning all existing criminal files to electronic format;
- Successfully argued for admissibility of Breath Test results in DUI cases. Multiple challenges were made to this evidence;
- Laid the groundwork to secure blood samples, via search warrant, in cases where a person refuses the breath test in a DUI case;
- Streamlined City's criminal code to align with state criminal laws;
- Provided legal training locally, state-wide and nationally, including presentations to state prosecutor and municipal attorney organizations, judging law school competitions, courtroom training for new officers, participation in Police Department's citizen's academy and speaking to local schools and other community groups;
- Successfully integrated risk management function into City Attorney's office;
- Provided significant support for successful national accreditation efforts of Police, Emergency Communications, Parks and Utilities from four nationally recognized accrediting bodies defining best practices standards. Included review of Liability, Safety, and Workers Compensation Programs managed by Risk Management division.
- Initiated two major loss control efforts:
 - Replaced 15 passenger vans used for transporting children with 8-passenger vans and Access Buses and developed training program for operators;
 - Addressed several risk issues at the new South Bellevue Community Center prior to its opening, including the Challenge Course and Climbing Wall.
- Obtained over \$252,000 from our property insurer for repair of a water detention vault located on private property.
- Completed further enhancements to the Risk Management website on employee safety, upgrading the on-line Ergonomics tool, providing computer-based training on Blood borne Pathogens, and placing chemical inventories on-line for staff working in Parks, Utilities and Graphics.

City Attorney

2007-2008 Work Initiatives

- Pursue clarification and coordination of noise regulations across City departments and improve code.
- Review and update Sign Code for consistency with constitutional constraints on sign regulation.
- Assist Finance Department in enhanced enforcement of tax code.
- Partner with Human Resources Department to offer supervisory and other trainings for managers in order to decrease exposure for personnel issues.
- Continue work on electronic records management, including implementation of prosecution case management module allowing better coordination with Police and courts.
- Continue to adapt to changes at District Court that will arise from retirement of sitting judge, new judges assigned to Bellevue cases, anticipated procedural changes, and new court rules that may require prosecutors to attend hearings currently not attended.
- Continue to work with partner cities and counties to provide district/municipal court program and misdemeanor prisoner facilities.
- Continue to enhance the availability of information and training via both the Risk Management website and computer based training, with emphasis on enhancing the defensive driving program.
- Assist the Transportation Department in its pursuit of national accreditation by demonstration and validation of the requested criteria on Risk Management policies and practices.
- Complete subrogation effort in concert with the City's property insurer to recover all or part of \$100,000 deductible expended in the repair of a water detention vault on private property.

Major Challenges for the Biennium

Aligning the City Attorney's Office, as well as the City in general, to better respond to the challenges of managing and producing public documents with the increasing shift of focus to electronic formats will be a major challenge in coming years. We have seen increased complexity and time involved in gathering documents in response to public records requests and discovery requests in litigation due to the increased reliance on electronic means of communication. City liability for failing to appropriately manage and control such forms of communication may be significant. City-wide document management tools will be necessary to appropriately manage this risk.

Risk Management division will be engaged in review of the City's self-insurance funds and retentions to manage increasing risk of aging infrastructure.

Solutions to current issues with municipal court and contracted jail services may lead to budget impacts as the City seeks other ways to provide these government functions.

City of Bellevue
2007-2008 Biennial Budget

**City Attorney
General Legal Advice**

Program Statement

Provide accurate, ethical, and timely legal advice to the City Council and city departments to support the provision of services to Bellevue citizens while at the same time reducing risk to the City and promoting fiscal responsibility.

Summary of Services Provided

To provide legal advice to the City Council, City Boards and Commissions, City Manager, City departments, and Community Council on a full range of municipal legal matters as well as the drafting and reviewing of ordinances, resolutions, contracts, and other documents relating to City business.

**City Attorney
General Legal Advice**

Issues related to Department Performance

Legal Advice - Customer Satisfaction Level. 92.8% of respondents rated services as good or better in 2005 (survey conducted in October 2005). This customer satisfaction level represents more than a five percent improvement over 2004, but fell slightly short of the 95.0% target. Follow-up discussions with respondents revealed that concerns were largely related to responsiveness due to staffing shortages in the City Attorney's Office during 2005. These staffing shortages were not fully addressed until mid-2005, when the Office filled all attorney vacancies. With a full staff and attorney re-alignments undertaken in 2005, we expect to meet or exceed our satisfaction target for 2006.

Cost per hour for in-house legal advice services compared to outside counsel exceeded target (54.9% compared to the target of 45%), but reflected an improvement over last year's performance. As with litigation services, the costs to the City for both outside counsel and in-house legal advice went down. In fact, outside counsel costs as an average hourly rate dropped by nearly \$40. This drop is a reflection of the successful efforts to retain outside counsel specialists with more competitive hourly rates, and efficient use of associates and paralegals.

2007-2008 Biennial Budget

**City Attorney
Litigation Services**

Program Statement

The mission of this section is to provide, manage, and coordinate quality legal counsel and representation for the City of Bellevue in litigation matters and administrative/regulatory hearings in an efficient, expeditious, and professional manner.

Summary of Services Provided

Defend the City, its elected and appointed officials, and employees in civil litigation, including representation before administrative agencies, trial courts, and appellate courts.

Minimize risk associated with City services and related claims costs, reduce litigation exposure, and ensure legal compliance.

Issues related to Department Performance

Litigation Cost Per Hour. Cost per hour for in-house litigation services compared to outside counsel cost for litigation did not meet target (61.6% compared to a target of 52%). This is not a reflection of significantly higher in-house costs, in fact, both in-house and outside counsel hourly costs went down in 2005 compared to 2004. Tort defense hourly charges are the lowest of any type of legal service contracted by the City. Many tasks associated with litigation can be handled by associates and paraprofessionals, providing additional cost savings.

Issues related to Department Performance

Prosecution – Cost Per Criminal Case. Cost per case in 2005 was significantly above target (\$486 versus a target of \$315), due to fewer criminal cases being filed, as was the case in 2004. Despite the reduction in the number of cases, however, prosecutors report that cases filed were more complicated and required more prosecution time prior to resolution. Several constitutional challenges to DUIs were raised in 2005, requiring significantly more preparation. These cases were resolved in the City's favor. In addition, increasing numbers of continuances are granted to courts to allow defense counsel to prepare for the proceedings. As a result of continuances, a single criminal case requires more prosecutor time at hearings and responding to requests.

Program Notes

None

**City of Bellevue
2007-2008 Biennial Budget**

**City Attorney
Public Defender**

Program Statement

To provide quality defense services for indigents charged with violating criminal laws within the City of Bellevue, as required by state law.

Summary of Services Provided

The Public Defense Program provides indigent defendants with qualified attorneys, who are on contract with the City, to represent them through their criminal proceedings.

This program strives to control public defender costs by maintaining or reducing the percentage of those assigned a public defender by carefully screening each individual before an assignment is made.

Recoupment for these costs is sought from those who are deemed eligible to pay back the City over time.

City of Bellevue
2007-2008 Biennial Budget

**City Attorney
Public Defender**

Issues related to Department Performance

Public Defender - Recoupment of Costs. 14.0% of public defender costs were recouped in 2005, an improvement over the 8% recoupment rate of 2004. The rate did fall short of the 18.0% target, possibly reflecting decreased earning prospects for defendants in the current economic environment. Recoupment is reimbursement for the costs of public defender services from persons who are able to repay the City over time.

Program Notes

None

**City of Bellevue
2007-2008 Biennial Budget**

**City Attorney
Risk Management**

Program Statement

Safeguard the City's property, financial assets and human resources from the adverse impact of loss.

Summary of Services Provided

Manage and administer the City's General Self-Insurance, Workers' Compensation, Safety and Unemployment Programs, including fund management and addressing all tort, worker compensation and unemployment claims filed against the City; reimbursing City departments for property damage claims incurred, and proceeding via subrogation to recover costs from responsible third parties who have damaged City property.

Advise all City departments regarding the risks of proposed or on-going activities, providing loss control assistance to help reduce risk exposures and potential liabilities.

Provide general employee safety training classes, develop safety programs and ensure City safety compliance with State and Federal regulations.

Key Departmental Metrics	Unit of Measure	Type of Indicator	FY 2005 Actual	FY 2006 Target	FY 2007 Target	FY 2008 Target
Maximize loss recovery for damages incurred						
% of Risk losses recovered	%	Effectiveness	77	68	68	68
Customer Service ratings are good to excellent	%	Effectiveness	98	92	95	95
Minimization of Risk loss exposures						
% of liability claims adjusted within timeliness standard	%	Effectiveness	98	90	94	94
% of liability claims filed that proceeded to litigation	%	Effectiveness	7	7	7	7

Issues related to Department Performance

In 2005 we were able to exceed the target for percent of Risk losses recovered by 9%. Reduction and turnover in both Risk's and other City departments' staff greatly impact effectiveness in this area. Turnover in 2006 and reduced staff in 2007-08 will impact Risk's ability to meet the 2006 target and beyond. We project it will be under target by 7% in 2006.

Risk received customer service ratings of good to excellent from 98% of their clients in 2005, which exceeded target by 6%. Accordingly we have increased our targets for 2007 and 2008 and will continue to strive to provide excellent customer service.

In efforts to minimize the City's losses, Risk successfully adjusted liability claims in a timely manner (98% of claims filed were adjusted within the timeliness standard). The number of claims which proceeded to litigation in 2005 were lower than projected by 1% and will be at or below target for 2006. These results are due to the strengthened relationship between the City Attorney's Office and Risk Management with Risk joining the department in January, 2005.

Program Notes

The Risk Management Division joined the City Attorney's Office in 2005, prior to then it was a division in the Finance Department.

City Attorney

Convert 1.0 Attorney LTE to FTE --- Cost Avoidance

Enhancement: CAO002

Enhancement Description

This is a request to convert a LTE to a FTE. Conversion of this position to an FTE is also expected to provide long-term cost avoidance. As noted above, the number and complexity of active contested matters has been too high for one attorney and one part-time paralegal to manage effectively. Our reliance on outside counsel to handle the overflow of work has been at a substantial cost to the City.

In 2005 we requested and received City Manager approval to create an LTE position for a two-year period. The purpose of the request was to test a different business approach to legal services than the City Attorney's Office has employed for many years. This new model focuses on employing strategies to bring as many services in the department back in-house, reducing costs associated with high outside legal fees and allowing the City's legal staff to develop additional expertise in important areas of municipal law and litigation.

Our current staffing model has one civil attorney position assigned to handle all civil litigation. Typically, the City is involved in 35 to 40 active contested civil matters at any given time. This caseload is high for one attorney with only part-time paralegal assistance. A caseload approaching 30 active cases could be manageable if they consisted of administrative record appeals. However, many of the cases in this office are litigated cases that require a substantial amount of discovery and motion practice. A significant number of cases had to be assigned to outside counsel for various reasons, including lack of adequate staffing. To assist in addressing the impact to City finances and to ease the burden on the litigation staff, we received permission in 2005 to create an LTE position for an Attorney I. That position splits duties between assisting with litigation and providing day to day advice to just one City department. The attorney is supervised by the litigation attorney, and is being trained as a litigator. It is this Attorney I LTE position that we are seeking to convert to an FTE so that we can decrease our reliance on costly outside counsel.

State/Federal/Industry Mandates

N/A

Goals and Objectives

N/A

Consequences of Not Funding

Under the City's human resources policies, LTE's may be hired for no longer than three years. Once the approval for this temporary position expires, the current employee will be let go. The City will again be facing increased reliance on outside counsel, with the corresponding ever-increasing costs. We can also expect to see a decline in satisfaction from the City departments as their needs will be competing with litigation and claims matters if we return to a business model with split responsibilities for civil attorneys. Our Customer Satisfaction Survey for 2005 indicated a significant increase in department satisfaction with the responsiveness of the attorneys in the office, due to the increased availability of the attorneys afforded by the LTE position.

City Clerk

Program Outcome Statement

The mission of the City Clerk's Office is to support the City Council and City Manager in public policy setting and the legislative process; facilitate communication, information sharing and organization-wide information/records management; and to facilitate participation by citizens in their municipal government.

Services and Accomplishments

The Bellevue City Clerk's Office consists of the following divisions: City Clerk's Official Functions; Public Records Center; Hearing Examiner's Office; and Word Processing. The Clerk's Office provides legislative and administrative support for Council members and City Council proceedings as well as supporting the work of the City Manager's Office and City administration. The Clerk's Office maintains the official public records of the City, administers the centralized records management program, manages the public hearing process for land use and administrative decisions, provides centralized word processing services, and aids open communication, information sharing and participation by citizens in their municipal government.

Over the course of the biennium, the City Clerk's Office has implemented several new tools to improve public access to information about the issues coming before the City Council, their meetings and their decision making. In addition to posting full Council agendas and meeting packets on the City's website, during 2005 the City began live videostreaming of Council meetings, with ability to play back whole meetings or portions of meetings on demand. This service furthers the City's open public government philosophy while providing a valuable research tool for both public and staff.

In preparation for the move to our New City Hall, Records Center staff completed a City-wide space analysis for records storage, and designed and implemented the new Records Center service delivery model now deployed on the Concourse of City Hall. The impending move also prompted a significant level of activity for the Records Center in working with staff across the City to convert one million pages of documents to digital format for the Electronic Content Management System. As part of this project, Records staff coordinated scanning and indexing of thousands of frequently used City Clerk's Office records, assisted staff of departments in preparing for the move, and helped to make most effective use of limited file storage space in the New City Hall. "RAID" events managed by the Records Center diverted the equivalent of 700 four-drawer file cabinets worth of duplicate or otherwise unneeded records to recycling or secured destruction, thus saving moving and handling costs as well as space in the new City Hall. Additionally, the Records Center implemented use of a high-density storage unit that provides innovative vertical storage for Development Services and other key records that are frequently requested by the public. This storage unit spans three floors in City Hall and minimizes the floor plate required for on-site, secured records storage.

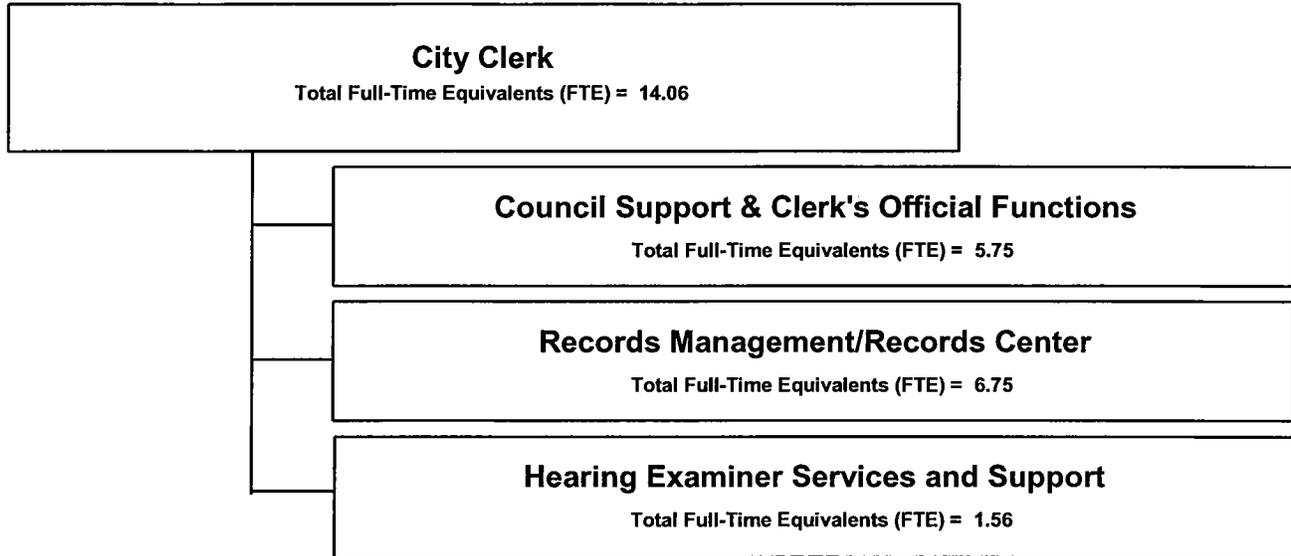

Records Management remains strongly committed to providing high quality, responsive service for all customers. Maintaining an open government and meeting the increasing demands for government information have created new challenges for managing public records. The records program has addressed these challenges by centrally managing public disclosure requests for records, seeking innovative ways for providing information to the public through technology, and having a visible presence as part of the Service First concept. These new demands were met through looking internally for resources, recognizing and capitalizing on synergies, and reorganizing existing staff. The Records division also significantly enhanced the records management training program, which is being rolled out to staff across the organization, and collaborated with other departments to make better use of staff resources and technology advances.

The Hearing Examiner's Office processed 328 sign code violations in 2005. The reinstatement of a warning system together with education of the business community was anticipated to lead to a reduction in the number of sign code matters processed. Actual results indicate that the sign code caseload remains relatively steady, with some cases heard by Hearing Examiners and many others handled administratively due to achievement of compliance. Sign code violations processed, together with other case assignments, resulted in an average of 74 matters handled by each of the Examiners in 2005. The reduction in the matters heard from the previous year is directly attributable to the addition of two contract examiners. Other civil violations and appeals processed in 2005 numbered 27 cases.

The Hearing Examiners collectively achieved 100% timeliness goals for 2005 for issuance of decisions/recommendations, a goal that the office continues to strive for. For 2006 thus far, it is anticipated that the timeliness goals will decline to 99% (one case overdue). Hearing Examiner decisions and recommendations issued resulted in only one appeal to City Council and only one appeal filed with Superior Court during 2005.

City Clerk

2007-2008 Work Initiatives

- Continue to expand the amount of public information routinely made available to public and staff;
- Implement Phase 2 of the Enterprise Content Management System (CIP Plan No. G-57), including integrations with other key enterprise systems, electronic document submittal, and records-intensive business process improvements
- Complete the application process for the State's Electronic Imaging System certification allowing for maintenance of records in electronic format;
- Complete comprehensive revisions of Bellevue City Code and City policies and procedures relating to public records to assure compliance with changes in State law, model rules published by the State Attorney General, and new requirements identified by the Secretary of State;
- In collaboration with the City Attorney's Office, prepare additional proposed administrative updates to the Bellevue City Code for City Council consideration;
- Continue to manage centralized public records/public disclosure requests in alignment with State regulations and City policy;
- Implement enhanced Public Records training program for all staff on new policies and procedures;
- Provide professional consultation to staff on records-related issues. Work with departments to provide the necessary capabilities to manage all types of information through its lifecycle (creation to disposition);
- Ensure backup and protection of vital records, allowing for the continuity of operations in the event of a disaster, and complete a formal records restoration plan for the City;
- Provide analysis and recommendations on meeting records management needs for potential Municipal Court and regional Police/Fire communications facility;
- Continue efforts to provide clear information about and enhance citizen participation in the Hearing Examiner processes
- Finalize scanning and indexing of historical Hearing Examiner cases as a part of the City's records management program. This will result in enhanced public and staff access to historical Hearing Examiner decisions, case files and history of sites within Bellevue.

Major Challenges for the Biennium

Key drivers of the City Clerk's Office work program include enhancing accessibility to public information, customer service, improving the efficiency/effectiveness of our processes, and compliance with best management practices.

The Records Management program is focused on ensuring the City's compliance with all State and Federal regulations for information management, while managing the substantial increase in volumes of electronic records and pursuing technological improvements to address current deficiencies. A recent ICMA-sponsored work on government records management projects that approximately 80% of government electronic information is housed as unstructured documents as opposed to structured databases. Information management has therefore shifted from work that could be accomplished by a small group of professionals to one where all staff needs to be aware of record keeping requirements and concepts. The Records Center staff is committed to supporting employees through outreach and training programs and works collaboratively with staff of the Information Technology Department to provide training on existing tools to help staff manage their work.

Through implementation of Phase 2 of the ECM project, the City will become better equipped to manage information in all formats. The current challenge for all organizations is to find a way to address unmanaged information being created electronically and stored in multiple places. The ECM project will apply traditional records management principles and create an environment for managing and organizing records. Instead of having multiple copies of documents saved in both paper and electronic format, the ECM will provide a central location to store information. Records retention will be applied to records in accordance with State and City regulations, and confidential information will be protected in a securely-managed environment. Records management staff will work with City departments collaboratively to ensure the system is designed in a way that will meet the needs of staff; integrate with other systems; improve the flow of information within the city; and provide secure submittal and presentation of information to citizens and City customers.

As Bellevue continues to build out, the issues before the Hearing Examiners have become more complex, many requiring multiple hearings to address legal issues and to accommodate the numbers of persons testifying. Sign Code violation hearings are on the decline as Bellevue's business community is becoming more knowledgeable. However, the numbers of violations issued requiring administrative handling have not decreased, still averaging over 300 per year. There is no significant downward trend in case management.

**City of Bellevue
2007-2008 Biennial Budget**

**City Clerk
Council Support & Clerk's Official Functions**

Program Statement

The Council Support & Clerk's Official Function program provides legislative and administrative support for Council members, Council proceedings and facilitates the public process by providing timely and relevant public information.

Summary of Services Provided

This program manages preparation of Council meeting packets and logistics for Council's weekly meetings, administers the legislative process, public notification and legal publication of documents. This Division manages all official records of City Council actions as required by state law, coordinates the appointment process and operating procedures for Boards and Commissions, and is the intake point for the City's Claims for Damages and land use and administrative appeals.

With the opening of the new City Hall in February, 2006, the Information Center function that was formerly part of the City Clerk's Office budget was transferred to the Service First center located in the Concourse to provide "one stop shopping" for many City services. Also during the 2005-2006 biennium, in an effort to better align staffing resources and work functions, the centralized Word Processing function was transferred from the Finance Department to the City Clerk's Office and centralized mail services/postage management was transferred from the Clerk's Office to the Finance Department.

Issues related to Department Performance

The 2005 Customer Service Survey conducted by the City Clerk's Office rated overall satisfaction levels at 97%, surpassing the target of 92%.

Since the City Council meets on an almost weekly basis throughout the year, managing preparation and delivery of the weekly Council "packet" of information is a major focus of this division. Agenda materials included in the weekly Council packets help Council define issues, understand complex problems, recognize the policy implications of proposed actions, consider alternative solutions, and determine a recommended course of action. Staff makes every effort to have packets delivered to Council four days in advance of Council meetings to allow sufficient time for review and to receive responses from staff on any questions. Although the Council continues to address approximately 500 issues/agenda items a year, complexity of the items varies significantly.

By year-end 2005, the Department had made 54% of targeted City Council records available on the City's intranet, just short of the 60% goal. However, migration to a more advanced technology was identified to allow more comprehensive management of the growing volume of electronic documents and other records. In 2005, the Records Management Division led the implementation of Phase 1 of the Electronic Content Management System. Currently, this pilot enterprise-wide system contains over one million pages of documents. Of the public records managed by the Clerk's Office, by mid-year 2006 approximately 85% of all Council-adopted ordinances, resolutions and meeting minutes, as well as many other frequently requested public documents, had been imported and indexed into the new system. Public access to these records utilizing the internet will be provided in Phase 2 of Electronic Content Management System, which is included within the proposed 2007-2013 CIP Plan.

The City Council Office tracks and monitors responses to citizen concerns that have been presented to City Council, but individual departments are generally responsible for actual response times. In 2005, the City met the citizen issue/complaint resolution 10-day timeframe 75% of the time, improving on the previous year's 69% but still short of the 80% goal. The fluctuation between one year and the next can be explained in part by the number and types of issues raised.

City Clerk Council Support & Clerk's Official Functions

Many of the questions posed by the public that can be quickly answered are now easily found on the internet, allowing citizens to "self help" a good part of the time. In years of high profile issues, more matters rise to the City Council level. More complicated, multi-departmental responses often take additional time for research or to coordinate a multi-faceted response. Over the past two years, several complex matters have required greater staff research and/or coordinated multi-departmental responses. Citizen concerns brought to Council in 2005 and 2006 included temporary encampments, critical areas regulations, planning for Sound Transit deployment on the Eastside, hospital districts, I-405 noise mitigation, and other noise/aesthetic issues.

Program Notes

This program represents 34.3% of the City Clerk's budget and 46% of its staffing.

**City of Bellevue
2007-2008 Biennial Budget**

**City Clerk
Records Management/Records Center**

Program Statement

As the professional manager of the City's records and information, the Records Center is charged with managing the integrity and preservation of the City's records in compliance with state law, Bellevue City Code, and the City's policies and procedures; assuring continuity of business and managing institutional knowledge in accordance with record keeping standards and best business practices; and providing responsive and helpful services to our customers.

Summary of Services Provided

The Records Management division (Records Center) establishes organization-wide records management policies and procedures and oversees management of the City's active, inactive and historical records and information. This program's charge includes managing public disclosure requests for records and information; assuring regulatory compliance with State and Federal recordkeeping rules; centralized recordkeeping for the Development Services group and other primary records of the City; and providing professional records management training, advice and services to departments, including recommending use of appropriate recordkeeping technologies and business process improvements.

The Records Center is also leading the implementation of the enterprise Electronic Content Management System (CIP Plan No G-57). Phase 1 of this system is currently being provided utilizing an outsourced Application Service Provider which is hosting the hardware and software for the City. Over the course of the past year, the Records Center has been assembling information and planning for Phase 2 of this system implementation, which is included in the proposed 2007-2008 budget. Phase 2 includes purchase of the software and hardware, integrations with other key enterprise systems (such as JD Edwards, Amanda (permitting) and GIS), the ability to electronically submit documents to or from the City (i.e., permits, traffic incident reports, and court records), and records-intensive business process improvements including automated routing/workflow.

Issues related to Department Performance

During 2005 the Records Management Division was reorganized in an effort to support the City's Service First (one-stop shopping) customer service model. Two records-related positions within Development Services and two positions within the City Clerk's Official Functions division were transferred to the Records Center in recognition of the emerging need for a more centralized and professional records management program.

As part of this realignment, the public records request process was centralized, and the Records Center now serves as the coordination point for almost all public records requests. In addition, changes in public records law and the promulgation of new Model Rules for public disclosure by the State Attorney General require a significantly greater investment of staff time to manage public disclosure requests. It is anticipated that centralization of responses will help improve the efficiency and responsiveness of the process.

The foundation for managing the City's electronic records was laid with the successful implementation of the Enterprise Content Management (ECM) system pilot program (Phase 1) utilizing an outsourced system provider. A major emphasis of this project was to identify information used throughout the City and to create a managed electronic repository for its shared use. The Records staff worked with City employees to identify records for inclusion in this system and created a structured and secure repository. One major outcome of this system development effort was the significant enhancement of the professionalism of the City's records program. Records Center staff and departmental Records Coordinators engaged in an enhanced training program where they developed technical knowledge of the new system, began developing and implementing enterprise-wide information architecture for key documents, identified new standards for protecting the City's confidential information, and initiated work on a comprehensive overhaul of the City's records-related policies and procedures. This work sets the stage for comprehensively addressing organization-wide needs to better manage electronic records, including email and website content.

City of Bellevue
2007-2008 Biennial Budget

**City Clerk
Records Management/Records Center**

Program Notes

This program represents 53.4% of the City Clerk's budget and 43% of its staff.

The Records Management program will continue to focus efforts on systematic, enterprise-wide efficiencies, best business practices and appropriate technologies to fulfill customer needs and meet regulatory requirements.

City of Bellevue
2007-2008 Biennial Budget

**City Clerk
Hearing Examiner Services and Support**

Program Statement

The Hearing Examiner's Office functions as a quasi-judicial hearing body for the City Council, and provides a forum which encourages citizen participation. Hearing types include land use applications, appeals of administrative determinations, civil violations and sign code infractions.

Summary of Services Provided

The City Clerk's Office manages contracts with several attorneys who act as independent Hearing Examiners on quasi-judicial land use and administrative matters on behalf of the City Council. The Hearing Examiners conduct open public hearings to determine facts and hear arguments. Depending on the type of matter being heard, after the hearing process concludes the Examiners make a final determination for the City, which is then appealable to City Council or Superior Court, or a recommendation to the City Council for Council's action. All administrative staff support for the Hearing Examiners, including management of the official court-like public record, is provided by 1.56 staff positions in the Hearing Examiner's Office.

Issues related to Department Performance

The Hearing Examiners' timeliness in rendering decisions remains steady at 99%. This level of service can be attributed to the conscientious efforts of the City's five contract Examiners.

Volumes of cases before the Hearing Examiners are dependent upon the filing of land use applications, administrative appeals of various City department determinations, and miscellaneous hearings requested by City Council or Boards. For this reason, anticipated case loads are not easily predictable.

In 2005 contracts were established with two additional Hearing Examiners to allow greater flexibility in assignments, coverage when Examiners are ill or on vacation, and the ability to assign cases according to expertise.

Program Notes

This program represents 12.3 % of the City Clerk's Office budget and 11% of its staffing.

The Hearing Examiner's Office continues to manage Hearing Examiner services through the use of contract attorneys, which has proven efficient and cost effective. The practice of contracting out Hearing Examiner services, rather than performing these services with City staff, began in 1989.

Under Regulatory Reform, the contract Examiners were given greater decision-making responsibility. In addition, they are now being assigned a broader array of matters and code enforcement actions, including sign code enforcement actions and street latecomer agreements.

City Clerk

Convert .75 Records LTE to .75 FTE

Enhancement: CCOCBA01

Enhancement Description

The Planning and Community Development Department's records services have been performed by 1 FTE and one temporary position for the past several years. With the advent of the Development Services Initiative this temporary position was converted to a .75 LTE to better meet records-related business needs.

Both the full-term and limited-term positions provide direct service to citizens, DSI and other staff requiring research, management of and access to the City's development-related records. The body of work includes management of Development Services' current and historic records. Development Services is responsible for one of the largest and fastest growing bodies of records required to be held/managed by the City. This work is ongoing and reflects a normal cost of doing business for Development Services, and is a fully fee-supported activity. This body of work will not decline with a development down cycle and is considered core staffing.

There are no additional costs associated with conversion of this position, which supports PCD, Transportation, Utilities, and Fire development services activities. This action is simply intended to recognize a staffing conversion from temporary and/or LTE (which suggest a temporary staffing need) to FTE (which reflects an accurate portrayal of the actual business need and ongoing cost of doing business).

State/Federal/Industry Mandates

Management of the City's active and inactive records to ensure compliance with recordkeeping requirements and sound business practices is mandated by the State Public Records Act (RCW 42.17), Model Rules promulgated by the State Attorney General, and Bellevue City Code Chapter 2.26. The City may determine at what level to support this function. However, a major goal of DSI was to streamline the permitting and plans review processes and to provide more timely services to our customers.

Goals and Objectives

This position provides timely response/support to Development Services customers and staff records needs.

Consequences of Not Funding

Were conversion of this position from LTE to FTE to not be approved, the position will revert back to temporary status at year-end 2007 (a reduction of approximately 25%). This would result in significantly slowed service times for citizens, developers, and staff requiring access to DS records, as well as potential for compromise of proper records management methods due to high volumes. Workloads of other CCO Records staff do not permit their absorbing DSI records activities without compromising Records services elsewhere in the organization.

New Revenues Generated	-	-
Additional Staff (FTE)	0.75	0.75

City Clerk

M&O ECM Project

Enhancement: CCOCIP02

Enhancement Description

The Electronic Content Management System (ECM) will provide a centralized, electronic repository for storage and access to all forms of electronic information. This system is expected to significantly enhance customer service by providing staff and the public a central place to develop, route and share documents and information electronically. In addition, the ECM will enable efficient compliance with federal and state record keeping requirements.

This proposal will fund the purchase of a set of software tools to improve citizen access to government, customer service, and enhance internal efficiency through the automation of document and records management functions. The City is currently successfully using a limited set of these tools.

State/Federal/Industry Mandates

The City will also be unable to meet State-mandated record keeping requirements for electronic records, including RCW 40.14 (Preservation and Destruction of Public Records); RCW 42.56 (Public Records Act); and the Attorney General's Model Rules for Public Records (WAC 44-14). Additionally, this system reduces legal risk (public disclosure/discovery and legal holds).

Goals and Objectives

This project supports the following organizational goals and objectives:

- Provides platform for electronic submittal of documents, meeting development services customer needs and other governmental agencies (State Patrol, courts, etc.);
- Provides cost savings associated with records storage;
- Increases staff's ability to respond promptly and thoroughly to information requests;
- Replaces obsolete technology such as microfilm and microfiche;
- Meets record keeping standards and state requirements;
- Key component of the City's strategic IT infrastructure;
- Provides an enterprise approach to information management.

Consequences of Not Funding

The current contract for the limited set of tools was implemented as a 28-month contract, ending YE 2006, with an option for only a one-year renewal. The pilot was intended as an interim solution while major components of ERP were implemented, the move to New City Hall occurred, and staff documented that ECM was the right approach for the City. The current hosted system is limited to only 200 users and a repository capacity of only 50 key document types. No additional functionality such as public access, integrations with other systems, electronic document submittal, and use of business process improvement tools is able to be provided in the hosted environment.

Should the City not buy the system and implement it in-house, the current investment and the electronic content amassed to date in the hosted repository will essentially be lost. The City will be unable to meet State-mandated recordkeeping requirements for electronic records and will lose the opportunity to adopt an enterprise, cost-effective solution to address customer service, records management, and business process needs.

Equipment Requirements

See Capital Project Detail page located in CIP section.

City Council

Program Outcome Statement

The City Council has established the following goals and underlying principles that guide their work:

- Protect the livability and vitality of all the City's neighborhoods;
- Maintain a vital downtown;
- Work together with citizens and community groups to solve problems;
- Provide quality and responsive City services and infrastructure;
- Ensure public safety;
- Respond to the needs of youth and families;
- Improve transportation systems;
- Maintain an attractive and clean City;
- Protect and enhance our natural environment;
- Manage the City's finances prudently;
- Provide regional leadership and cooperation.

Services and Accomplishments

The City Council continues to devote significant energy to improving the quality of life for Bellevue residents and businesses. Transportation and traffic issues top citizen concerns and remain a Council priority. The Council has invested a significant portion of their work efforts on local, regional, state, and federal transportation issues to attack congestion on a variety of fronts.

Similarly, the Council has continued to focus on neighborhood preservation and standards, including approving projects to enhance neighborhood character and livability, evaluating opportunities to improve neighborhood vitality, and promoting opportunities for neighborhood involvement.

The move to the New City Hall and the public inauguration of the Service First center occurred in February, 2006. The City's 2002 acquisition of the Qwest building to address long-standing public safety facility needs culminated in the development of a full-service City Hall located in Downtown Bellevue. At the same time, the City innovatively combined many of its customer service functions into the centralized Service First center located in the Concourse at City Hall to provide "one stop shopping" for many City services.

The City Council has also significantly enhanced the Economic Development program and continues to position Bellevue as a regional business center. This investment focuses Bellevue's resources on long-term economic and regional strategies aimed at stimulating economic growth and strengthening the local economy.

The Council continues their active role on regional committees and efforts to influence legislation at the state and federal levels on natural resources, regional transportation improvement projects on I-90, I-405 and SR 520, Sound Transit, water supply, human services, and other significant issues.

In 2005, Council influenced legislation at the state and federal levels. Under Council direction, City staff tracked 1,156 state legislative issues and secured full funding (\$67 million) for the NE 10th Street overcrossing; \$1.5 billion in state funding for I-405; \$552 million for SR 520 bridge replacement; \$30 million for I-90 2-way transit/HOV; \$400,000 for a synthetic sports field at Robinswood Park; and \$750,000 to complete purchase of waterfront property for Meydenbauer Bay Park.

Other significant accomplishments during 2005 and 2006 include:

Neighborhoods and Community Outreach

- Formulated the Neighborhood Livability Action Agenda and launched a three-part program to address property maintenance concerns, neighborhood development impacts, and unmet needs for neighborhood infrastructure.
- Continued coordination of final Neighborhood Investment Strategy projects and supported grassroots citizen involvement in East Bellevue neighborhoods.
- Completed the Neighborhood Enhancement Program process in six neighborhoods and funded twenty projects valued at \$1.7 million during 2005 to 2006.
- Completed six traffic calming projects during 2005 and will install four additional traffic calming projects during 2006. Also deployed 5 stationary radar signs in neighborhoods to reduce traffic speed.
- Initiated a coordinated interdepartmental project to analyze neighborhood sidewalk needs, define problems and gaps, and propose solutions.
- Redesigned the City's website as a primary communication vehicle to organize content around user needs and make the City's website more usable.
- Introduced video streaming of City Council meetings and other public information including It's Your City monthly magazine program in video format.
- Completed the Neighborhood Resource Guide and Homeowner's Home Improvement Guide.

**City of Bellevue
2007-2008 Biennial Budget**

City Council

Transportation

- Completed NE 29th Place connection, Kamber Road, Forest Drive-Phase 1, 148th Avenue SE, and final elements of Access Downtown projects.
- Initiated NE 10th Street extension project to serve as a new entry point to the medical campus (and ultimately a new freeway interchange) in cooperation with Overlake Hospital, Group Health, and WSDOT.
- Completed the Factoria Area Transportation Study (FATS), began implementation of transportation improvements, and secured new transit service from Sound Transit.
- Selected a preferred design alternative for West Lake Sammamish Parkway with strong community support
- Improved resident and commuter access to traffic information by implementing an online real time traffic map for Bellevue arterials.
- Began implementing the Intelligent Transportation System Plan (ITS).

Public Safety

- Continued to achieve reduced rates of both violent and property crimes.
- Achieved greater than 40% cardiac arrest save rate.
- Retained I.S.O. Class II fire rating.
- Made steady progress toward ensuring that technology resources would be available post-disaster to assist the organization and the community.
- Initiated assessment of regionalizing Police and Fire dispatch services.
- Completed construction and outfitting of the new Criminal Forensics lab.
- Enhanced regional capabilities to respond to emergency incidents through unprecedented cooperation with surrounding agencies, particularly the City of Seattle, Eastside Fire agencies, and King County. These efforts included planning, training, and exercising scenarios.
- Realized \$650,000 in federal and state Homeland Security grants used for improved equipment and training for disaster preparedness.
- Received \$711,790 for 35 defibrillator units for Advanced Life Support and Basic Life Support responses that will assist treatment of patients experiencing cardiac arrest.

Parks and Open Space

- Opened South Bellevue Community Center and Lewis Creek Park and Visitor Center; expanded Crossroads Community Center.
- Completed Meadow Wood Park and two skate parks at Lakemont Park and Crossroads Park.
- Acquired Wilburton and Meydenbauer Bay properties, leveraging over 40% of their costs through external funding.
- Assumed 450-acre Coal Creek Natural Area and Surrey Downs properties from King County.
- Attracted over 60,000 spectators to the annual Family 4th of July event.
- Received the National Gold Medal Award for overall excellence in Park management from the National Recreation and Park Association.
- Provided and supported significant community events including July 4th, Seafair Marathon, 24 Hour Relay, Strawberry Festival, Farm Fair, Sheep Shear and Garden Delights.
- Provided and supported needs of our diverse community through community events including Multi-Cultural Festival, Hispanic Heritage Month and Black History Month celebrations, workshops for cultural organizations and non-profits to build cultural competency, citizenship classes for new immigrants, and the Voices of Diversity radio and TV show.
- Bellevue Youth Theatre presented "Building Community Through Theatre" at National Professional Recreation Association (NRPA) Conference.

Human Infrastructure

- Funded 60 human services programs that provide direct services to Bellevue residents in need.
- Provided health and safety repairs to 43 low or moderate income homeowners in 2005 and 36 to date in 2006 through the Home Repair Program.
- Participated in the Eastside Human Services Forum and the development of King County Veterans and Human Services Levy funding strategies.
- Developed Tent City ordinance that balances the legal rights of those hosting and residing in temporary encampments with the right of Bellevue residents to enjoy their property and feel secure in their homes.
- Provided relief to victims of Hurricanes Katrina and Rita.

City of Bellevue
2007-2008 Biennial Budget

City Council

Environmental Stewardship

- Furthered implementation of Cascade Water Alliance action plan for securing a new regional water supply.
- Finalized WRIA 8 salmon conservation plan as part of regional watershed planning.
- Constructed \$10 million in utility infrastructure improvements in 2005 and \$4 million in 2006.
- Implemented Coal Creek Stabilization Program.
- Influenced outcomes of draft National Pollution Discharge Elimination System (NPDES) Phase 2 stormwater permit.
- Influenced development of regional Solid Waste Export Plan.

Economic Vitality

- Provided permitting/inspection services for Lincoln Square development (2nd largest mixed use development in North America) and Bellevue School District.
- Issued over 12,000 permits totaling approximately \$350 million in valuation in 2005, and 9,473 permits totaling approximately \$421.5 million in valuation through August, 2006.

Technology

- Continued implementation of additional components of the financial/human resources system.
- Completed implementation of the Public Safety wireless system, including installation of mobile data computers in Public Safety vehicles, wireless dispatch functionality, and automatic vehicle location.
- Implemented the CLASS online Parks program registration and enterprise cash receipting system which facilitates payment for services by a variety of methods to increase convenience for our customers.
- Implemented Phase 1 of the enterprise Electronic Content Management System.
- Implemented an automated application process for the citywide roster of eligible, pre-qualified vendors who are interested in providing services to the City.
- Furthered work in partnership with other neighboring cities on multi-jurisdictional technology systems as part of the eGov Alliance.
- Launched MyParksandRecreation.com and NW Maps.net.
- Completed fiber optic connections between the University of Washington; Kirkland and Bellevue City Halls; Bellevue School District; Lake Washington School District; and Overlake and Evergreen Hospitals. Work is under way to extend the fiber infrastructure to Renton City Hall and Bellevue Community College's two Bellevue campuses.
- Implemented the online Crime Map as a service to citizens and the media.

Cultural Infrastructure

- Installed two permanent public art works, Currents and Compass, at new City Hall.
- Installed Temple of the Stones at South Bellevue Community Center.
- Attracted thousands of residents to the Downtown Park and City Hall for the 7th biennial Bellevue Sculpture Exhibition.
- Installed 800 art tiles designed by children and youth into the NE 8th wall.
- Installed Wild in the City at Bellefield Office Park in partnership with Equity Office Properties Trust.
- Updated vision and direction for Public Art Program.
- Allocated \$220,000 to strengthen local arts programming through a process that reviews the artistic, fiscal and managerial excellence of its applicants. 39 allocations were made.
- Worked with developers of the 1020 Tower project to construct a "shell" for a black box theatre to provide 150-200 seats to accommodate smaller arts groups or special events presenters looking for a more intimate setting.

Regional Leadership

- Worked with Sound Transit, other Eastside communities, and WSDOT on the continued development of Sound Transit Phase 2, other High Capacity Transit planning, and I-405, I-90, and SR 520 regional projects.
- Continued efforts to pursue consolidated regional public safety dispatching with other Eastside cities.
- Negotiated the extension of municipal court services with King County.
- Funded high priority City of Bellevue homeland security projects through \$1 million in federal grants.
- Contributed local feedback to Puget Sound Regional Council's Vision 2020 + 20 preliminary preferred growth strategy for employment and housing.

City of Bellevue
2007-2008 Biennial Budget

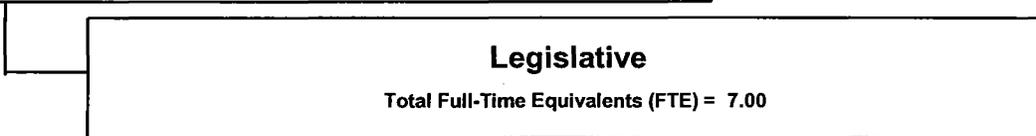

City Council

Other accomplishments

- Continued to hold Aaa bond rating from Moody's.
- Continued to make systematic improvements to the City's permitting and inspection services through the Development Services Initiative (DSI).
- Initiated the Bel-Red Corridor study intended to identify the preferred long-term land use and transportation vision for that area of the City, as well as the Crossroads Center and Wilburton/NE 8th planning studies.
- Completed the state-required Comprehensive Plan Update and Critical Areas review.
- Successfully negotiated a new Solid Waste contract which is expected to achieve \$23 million in savings by ratepayers over ten years.
- Successfully negotiated a new 10-year franchise with Olympic Pipe Line Company.
- Coordinated with Bellevue Downtown Association, SeaFair, adjacent jurisdictions and others to successfully run multiple special events, generating positive publicity and revenue for the City.
- Achieved national accreditations for Police Operations, Public Safety Communications, and Parks and Recreation during 2005, which demonstrate the professional management of these City programs. Accreditations of Fire, Emergency Management, and Utilities programs had previously been achieved.

Major Challenges for the Biennium

The Council anticipates the following challenges for the biennium:

- Responding to additional service needs generated by community growth and diversification;
- City fiscal health and flexibility;
- Scope and range of facilities necessary to retain a high quality of life;
- Land use and environmental stewardship;
- Economic vitality;
- Continuing collaboration with other Eastside cities and regional agencies on high-profile regional issues;
- Continuing need to support legislative actions that are supportive of cities and oppose legislative actions that are detrimental to cities.

**City of Bellevue
2007-2008 Biennial Budget**

**City Council
Legislative**

Program Statement

The City Council is charged with protecting, enhancing, and promoting the health, welfare, and safety of the people living in, working in, and visiting Bellevue. Their mission is to provide high quality services and facilities that meet the needs of the community.

Summary of Services Provided

The City Council provides accessible and proactive leadership and governance for the City. The Council meets four times per month, with the exception of August and December when fewer meetings are scheduled, where they establish laws and policies through study and adoption of legislation. Among the primary duties of the Council are review and adoption of the operating budget to fund City services and programs, and review and adoption of the Capital Investment Program (CIP) Plan to fund City infrastructure. City Councilmembers meet with residents, citizen groups, and business leaders to hear concerns and resolve problems, and oversee a wide-ranging agenda for the community. They also represent Bellevue citizens' interests by serving on local and regional bodies such as regional committees established by the Metropolitan King County Council and Sound Transit Board, and on state and national committees addressing pipeline safety and transportation project funding.

Issues related to Department Performance

Of the citizens surveyed in 2005, 95% responded that the City was a "good" or "excellent" place to live, meeting the targeted goal and demonstrating residents' overall satisfaction. Almost nine out of ten residents (88%) feel they are getting their money's worth for the tax dollars they pay.

Citizen agreement with the direction in which the City is heading increased to 86% in 2005. This level of residents' concurrence is the highest since the City began tracking this performance measure and points to the Council's efforts to better communicate about current issues as well as their determination to make themselves available to listen and respond to the needs of the citizenry.

Sixty-six percent of Bellevue residents feel the City is responsive to its residents, and 74% report satisfaction with the job the City is doing in planning for the future.

City Council maintained an active role on regional issues as indicated by their participation on 49 regional committees and organizations addressing regional decision making.

City of Bellevue
2007-2008 Biennial Budget

City Council

Program Notes

The City Council's budget has remained stable over time with only a slight increase attributable to inflation. Legislative and administrative support for the City Council and their proceedings is provided by the City Clerk's Office.

Current City Council compensation was established by Ordinance No. 5163 and, under state law, no increase or decrease in compensation can apply to an incumbent during the term being served. Monthly salary levels held by the Mayor, Deputy Mayor and Councilmembers were established at the recommendation of the 1999 citizen-based Council Compensation Task Force.

City Manager's Office

Program Outcome Statement

The mission of the City Manager's Office is to provide for organizational leadership in the implementation of Council vision, goals, policies, and direction.

Services and Accomplishments

Services

The City Manager's Office consists of the following program areas:

- Overall City Management and Planning;
- Intergovernmental Relations;
- Communications Office;
- International Relations (Sister Cities).

The Office Economic Development also joined the City Manager's Office as a program during the 2005-2006 biennium but it will be reflected as a separate department in the 2007-2008 budget.

The goals of the City Manager's Office are to:

- Provide leadership to the organization based on the City's Core Values: Exceptional Public Service, Stewardship, Commitment to Employees, Integrity, and Innovation;
- Ensure that the goals and objectives of City departments fulfill City Council directives, and that the City's work is carried out through effective management of human, financial, and material resources;
- Provide leadership and coordinate the City's role in local, regional, state, and federal intergovernmental issues, while promoting effective partnerships with Bellevue's businesses and residential communities;
- Provide leadership and coordinate communications with citizens and the news media on citywide issues, and maximize the effectiveness of city-owned media (such as Bellevue Television - BTV, the City web site, It's Your City - the City's newsletter, etc.) for enhancing understanding of City issues and programs by residents, businesses, and City staff;
- Provide opportunities for citizens, staff, and Council to actively participate in the Sister Cities Program.

Accomplishments

The City Manager's Office accomplished the following items during the 2005-2006 biennium:

Overall City Management and Planning

- Achieved high satisfaction ratings in 2005:
 - 95% of residents rated Bellevue as a good or excellent place to live, down slightly from 97% in 2004;
 - 86% felt that Bellevue was headed in the right direction in 2005, improving upon 78% in 2004;
 - 74% said they are fairly satisfied or very satisfied with the job the City is doing in planning for the future, an increase over 71% in 2004;
 - 88% of respondents felt they were getting their money's worth for their tax dollar in 2006's budget survey, significantly higher than 82% from 2004.
- Bellevue's departments are operating at the highest levels of professionalism:
 - The Bellevue Police Department, the Eastside Communications Center (911 center), and the Parks & Community Services Department earned accreditation in 2005;
 - The Parks & Community Services Department also won the Gold Medal Award for Excellence in Park and Recreation Management from the National Recreation and Park Association (NRPA) in 2005; it is the highest honor that NRPA bestows upon a public agency;
 - The Fire and Utilities Departments earned accreditation prior to the 2005-2006 budget period while other City departments are currently pursuing accreditation.
- The City's finance/human resources system implementation continued to proceed on time and on budget.
- Continued improvements in development activities through the Development Services Initiative (DSI), an effort to reform how the City provides development services.

**City of Bellevue
2007-2008 Biennial Budget**

City Manager's Office

- Completed renovation and occupied new City Hall with minimal disruption to City operations.
- Neighborhood Outreach continues to be a priority:
 - Percentage of residents rating their neighborhood good or excellent reached 90%;
 - Satisfaction levels for all neighborhood outreach programs remain above 90%.
- Successfully implemented first stage of Service First, an enhanced customer service program.
- Provided staff support and guidance to the eGov Alliance, A Regional Coalition for Housing, the Eastside Public Safety Communications Agency, and other regional partnerships that save money through economies of scale while providing higher levels of service to Bellevue citizens.

Intergovernmental Relations Program

- Worked with Sound Transit and other Eastside communities on the continued development of Sound Transit 2, a transportation services package that will go to voters during the fall of 2007 that includes a light rail line across I-90, through Downtown Bellevue, and along the Bel-Red Road Corridor to Redmond.
- Continued efforts to pursue the concept of consolidated regional public safety dispatching with other Eastside cities, moving the project to the verge of implementation.
- Negotiated an extension of municipal court services from King County.
- Significantly enhanced City grant revenues:
 - Funded high-priority City of Bellevue homeland security projects, worth \$1.0 million, through federal grants;
 - Funded high-priority transportation projects through state and federal sources: \$67 million from the State and over \$10 million from the Federal Government for the NE 10th Street overcrossing; \$1.5 billion for I-405 improvements; \$552 million for SR 520 and \$30 million for I-90 2-way HOV;
 - Secured state funding of \$400,000 for synthetic sports field at Robinswood and \$750,000 for Meydenbauer Bay.

Communications

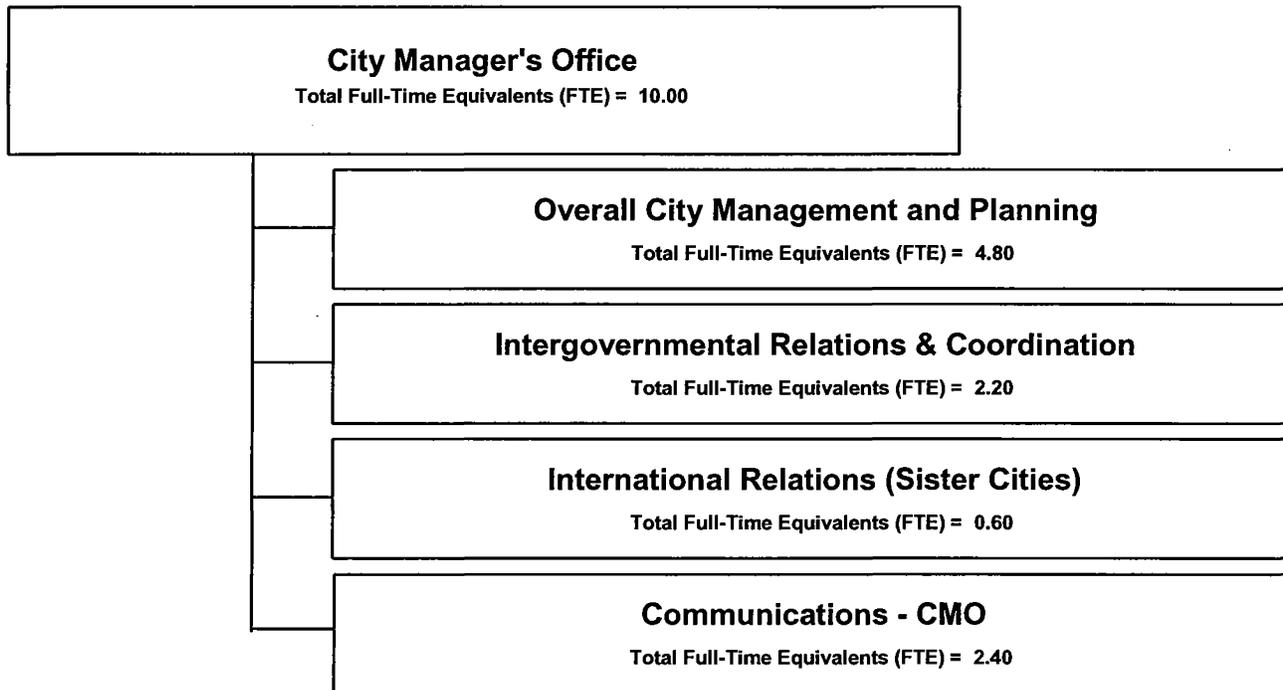

- Managed re-design of City's website in coordination with the Information Technology Department, hired an Online Editor to manage site from citywide perspective.
- Enhanced quality of City's newsletter and BTV programming, focusing content on strategic policy initiatives.
- Worked closely with the City Manager and other staff to enhance media relations.

International Relations (Sister Cities)

- Sister Cities exchanges in 2005-2006 included:
 - Elected official visit from Liepaja, Latvia;
 - Staff Exchange to, Kladno, Czech Republic;
 - Staff Exchange to, Yao, Japan;
 - Staff Exchange to Liepaja, Latvia;
 - Staff exchange from Yao, Japan;
 - Staff exchange from Kladno, Czech Republic.
- Official delegations and conventions:
 - Bellevue Sister Cities Association sponsored official delegation to Kladno, Czech Republic and Liepaja, Latvia led by Mayor Grant Degginer and Councilmember Claudia Balducci;
 - Bellevue Sisters Cities Association representatives attended the 2005 Sister Cities International 50th Anniversary Annual Convention in Spokane, WA.

City Manager's Office

2007-2008 Work Initiatives

Overall City Management and Planning

- Continue efforts to improve interdepartmental coordination, collaboration, and staffing to shift from a more decentralized vertical organizational structure to a more centralized, coordinated, and consolidated approach.
- Continue to implement the Service First customer service initiative.
- Continue work on the Development Services Initiative.
- Work to guide the deployment of the Downtown Implementation Plan.
- Continue to implement the City's enhanced economic development efforts through the Office of Economic Development.

Intergovernmental Relations

- Provide leadership among Eastside and Puget Sound Region cities to promote collaborations in mutual best interest to create efficiency of delivery and improve service levels, such as the Northeast King County Regional Communications Center (NORCOM).
- Effectively promote the City's legislative agenda at the federal, state, and local levels to the appropriate stakeholders that will influence positive outcomes.
- Continue to aggressively pursue grants through state and federal sources.
- Provide strong emphasis on achieving additional regional and state funding for key transportation needs such as SR 520, I-405, I-90 and Sound Transit.

Communications

- Continue to ensure good communications between the City Council, staff, and the public in the coordination of citywide communications and public involvement.
- Evaluate and selectively implement new web-based technology and other communications enhancements.
- Continue to develop the City's new website.
- Continue to improve City publications.

Sister Cities

- Continue to support the grassroots efforts of Bellevue citizens through cooperation with Bellevue's four Sister Cities and with the Bellevue Sister Cities Association.

Major Challenges for the Biennium

The City Manager's Office anticipates challenges in a variety of citywide areas including:

- Responding to additional service needs generated by community growth and diversification;
- City fiscal health and flexibility;
- Scope and range of facilities necessary to retain a high quality of life;
- Land use and environmental stewardship;
- Economic vitality;
- Continuing collaboration with other Eastside cities and regional agencies on high-profile regional issues;
- Continuing need to support legislative actions that are supportive of cities and oppose legislative actions that are detrimental to cities.

Program Statement

The Intergovernmental Relations Program is responsible for working with other governments to achieve outcomes that are consistent with the City Council's policies and direction.

Summary of Services Provided

The Intergovernmental Relations Program:

- Works with other jurisdictions at the local, state, and national level to promote the City's interests;
- Advocates and secures the passage of legislation that enhances the City's capacity to govern and provide essential services;
- Opposes legislation that lessens the City's legal authority to provide essential services, reduces revenue required to maintain services, or that imposes unfunded mandates on the City.

International Relations (Sister Cities)**

Program Statement

The International Relations Program (Sister Cities) promotes international communication and understanding between Bellevue and its four sister cities, as well as other international visitors, and facilitates trade and economic development as opportunities arise. Bellevue's four Sister Cities are: Yao, Japan (1969), Hualien, Taiwan (1984), Leipaja, Latvia (1992), Kladno, Czech Republic (1993).

Summary of Services Provided

The International Relations Program (Sister Cities) provides the following services:

- Coordinates logistics for incoming and outgoing Sister Cities delegations;
- Facilitates City's participation with Sister Cities International and relationship with the Bellevue Sister Cities Association (BSCA);
- Evaluates potential new Sister Cities, as requested.

Community Council

Program Outcome Statement

The East Bellevue Community Council represents the residential perspective on land use matters within the Community Council boundaries and provides a forum for citizen involvement. They advise and cooperate with the City Council on formulation of policies that directly or indirectly affects neighborhoods within their jurisdictional boundaries.

Services and Accomplishments

The East Bellevue Community Council continues to take part in various planning and advisory groups to seek a higher level of proactive participation and involvement. Their participation has broadened their understanding of neighborhood and development issues and enhanced their partnership with the City's efforts to enhance and preserve neighborhood livability.

The Community Council continues to represent their constituents by providing input to the City Council and various boards and commissions charged with land use and regulatory matters, as well as working with the City in seeking solutions to neighborhood concerns within their jurisdictional boundaries.

Community Council

2007-2008 Work Initiatives

The 2007-2008 priorities of the East Bellevue Community Council continue to be review of land-use-related issues within their jurisdictional boundaries and continued early involvement with proposed land use matters.

Major Challenges for the Biennium

As the Community Council area becomes built out, redevelopment of established areas presents new challenges. The Council is concerned with densification and the trend towards minimum lot size as another permitted zoning.

City of Bellevue
2007-2008 Biennial Budget

Community Council Community Council Land Use Review

Program Statement

The East Bellevue Community Council, under RCW 35.14, is granted local approval/ disapproval authority over designated land use issues within their jurisdictional boundaries. In addition to the powers and duties related to approval of zoning regulations, they may also make recommendations concerning any proposed comprehensive plan amendment or other proposal which directly or indirectly affects the use of property or land inside their service area. The Community Council provides a forum for public participation on issues such as conservation, improvements, or development occurring within the East Bellevue Community Municipal Corporation boundaries.

Summary of Services Provided

The East Bellevue Community Council represents the residential perspective on land use matters within the Community Council boundaries and provides a forum for citizen involvement. They advise and cooperate with the City Council on formulation of policies that directly or indirectly affect neighborhoods within their jurisdiction.

Issues related to Department Performance

The Community Council's land use review is dependent on City Council and privately-initiated land use issues within Community Council jurisdictional boundaries. In 2005, the Community Council advocated three issues of citywide interest before City Council.

The number of Council's 2005 agenda items analyzed and scheduled on their calendar fell below estimated projections. The number of agenda items scheduled is directly linked to the number of land use issues initiated within their boundaries and legislative authority. As the Council area becomes built out and activities mainly surround redevelopment, the number of new land use issues is expected to decline.

The Community Council's proactive and early involvement in land use matters resulted in their approving 7 of the 8 City Council land use decisions that came before them in 2005.

Program Notes

The Deputy City Clerk provides administrative/legislative support to the Community Council. Legal, land use and other support by City departments is not reflected in the Community Council's budget.

Finance

Program Outcome Statement

Maintain the public trust through sound financial management and the efficient and effective use of Bellevue's financial resources.

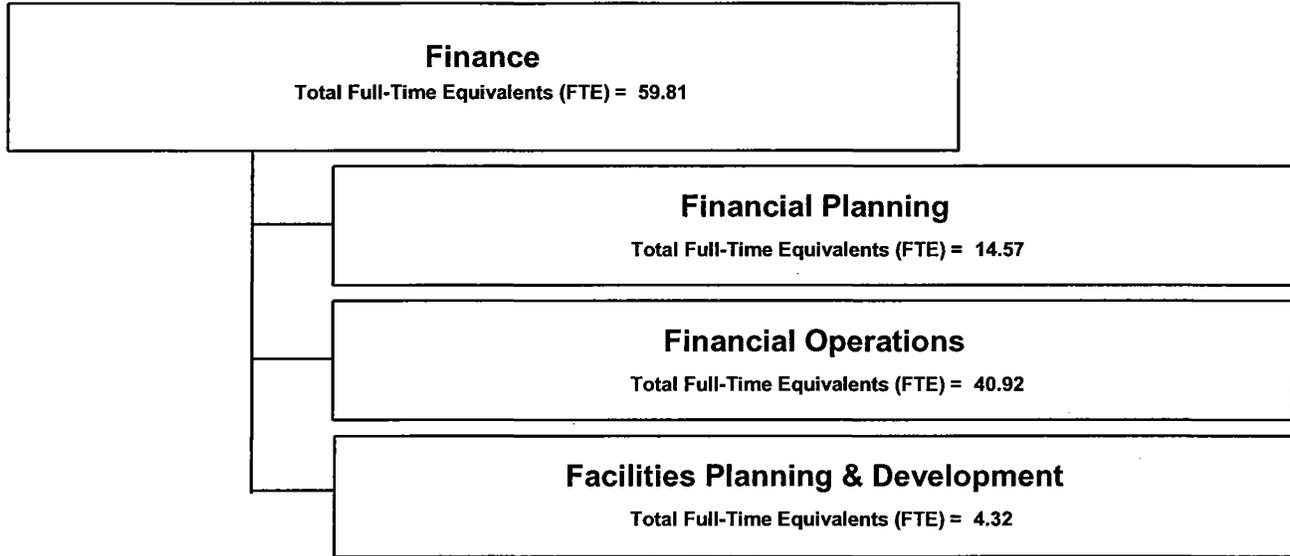

Services and Accomplishments

The City of Bellevue's Finance Department consists of the following teams: Purchasing, Payroll, Accounts Payable, Contracting Services, Tax, Treasury, Accounting and Budget. The Finance Department provides financial services for all City operations. It assists departments in purchasing supplies, paying vendors, managing the contract process, and developing budgets. It provides payroll services for all City employees, is responsible for cash management, collects business and other taxes, and performs city accounting functions. The Finance Department also produces official reports for City Council and the general public, including operating and capital budgets, and the Comprehensive Annual Financial Report.

The following are the major 2005-2006 accomplishments:

- Received a "no exceptions" clean audit opinion from the State Auditor's Office for 2005;
- Successfully implemented the Fixed Assets module of JDE, the City's financial and human resources system;
- Received the Government Financial Officers Award for Distinguished Budgetary Presentation;
- Implemented automated vendor registration processes for expanded competitive contracting;
- Maximized investment earnings by implementing a laddered portfolio strategy;
- Successfully implemented human resources and payroll modules of the financial and human resources system;
- Implemented on-line Employee Action processes resulting in elimination of many manual payroll/human resources forms;
- Entered into 85 different inter-local purchasing agreements with local government agencies;
- Attained total business tax audit recoveries in 2005 of \$2 million and over \$3.5 million in 2006;
- Collected over \$350K as a result of a newly implemented system to detect unregistered business tax payers;
- Implemented CLASS Point of Sale cash receipting system;
- Completed major upgrade to the City's financial and human resources system;
- Implemented a new budget development/reporting system to produce the 2007-2008 budget.

City of Bellevue
2007-2008 Biennial Budget

Finance

2007-2008 Work Initiatives

- Develop a statewide contract portal, making all government contracts available to all Washington entities.
- Convert budgetary systems from cash basis to modified accrual basis by 1/1/2008.
- Continue efforts on audit, delinquency and detection programs to ensure tax compliance.
- Implement new tax collection system to modernize tax administration.
- Implement performance assessment program, evaluating 10 program areas by 2008.
- Refine Operating Budget process to simplify interfunds, labor distribution, and overhead methods.
- Implement cash flow methodology to forecast funds available for investment.
- Implement self service functionality in the City's financial and human resources system.
- Implement process and system improvements in purchasing, contracts, accounts payable, and reporting.
- Develop and implement updated citywide cash receipting policy.

Major Challenges for the Biennium

- Optimizing the functionality of the financial, human resources and other systems for enhanced efficiency and cost savings.
- Recruiting and retaining high quality employees.
- Clarifying our roles, both internally and externally, within a changing organizational structure.
- Providing leadership and guidance to departments while promoting innovation.
- Building division/department coordination while getting our core work done.
- Staying on top of the increased demand for services and expectations in the midst of system changes and resource instability fluctuations.

Issues related to Department Performance

- The Budget Office works closely with departments in projecting revenues. With careful attention to the economy and a good understanding of economic indicators, revenue collections were within 0.4% of the projections made in the 2nd Quarter Budget Monitoring Report.
- The Budget Office also worked closely with departments to project year-end expenditures. Expenditure projections stated in the 2nd Quarter Budget Monitoring Report varied only 0.8% from actual year-end expenditures.

Program Notes

Budget staff continue to enhance the quality of the City's budget process. Some examples include improved links to outcome and performance budgeting; more in-depth analyses; and heightened scrutiny of City budgets.

The New City Hall project was completed in 2006. This project was shown in the 2005-2006 budget as a separate function. Since the project is complete, that section of the budget has been eliminated and the 2005-2006 funding for the Bond Fund and CIP costs are shown in the Finance Department - Financial Planning Program budget.

Receive unqualified audit opinion	Yes=1, No=2	Effectiveness	1	1	1	1
% Increase in ERP Use	%	Effectiveness	-	-	10	10
Pay less for quality goods						
Amount saved through central purchasing savings	\$	Efficiency	-	-	150,000	150,000
Cost savings through use of Interlocal Agreements	\$	Efficiency	-	-	-	100,000

Issues related to Department Performance

- The City received an unqualified audit opinion for its Comprehensive Annual Financial Report (CAFR).
- The Tax Office collected \$3.0 million in local tax revenues for delinquency collections and audit work, 167% of the total target.

Program Notes

The purpose of this program is the ongoing financial operations for City resources.

Facilities Planning & Development

Program Statement

The Facilities Planning & Development Program provides coordinated and cost-effective planning, development, and management services to preserve the City's investment in its general government facilities.

Summary of Services Provided

This program plans and implements major maintenance and capital projects programmed for the Facilities Services Fund to provide facilities that meet or exceed customer expectations for cleanliness & safety and enable City staff to effectively and efficiently deliver services to the public.

Budgeted Cost Summary	FY 2005 Budget	FY 2006 Budget	FY 2007 Budget	FY 2008 Budget

Major Maintenance cost per sq ft	\$	Efficiency	3.67	1.18	2.00	1.00
# of Projects per Project Manager	#	Efficiency	16	20	20	20

Issues related to Department Performance

- Major Maintenance costs at the Bellevue Service Center (BSC) were high in 2005 due to the replacement of the entire roof system. The new roof has an anticipated life of 30+ years.

Program Notes

The major maintenance cost per square foot can vary significantly from year to year based on the timing, complexity and costs of the major maintenance projects.

2007/2008 Tax Audit Program

Enhancement: FinCBA1

Enhancement Description

To request additional budget for 1) contract audit services to reflect the current level of contract audit activity and 2) contract legal services to support the tax audit program. The current budget reflects approximately half of the current cost of contract audit services. An additional \$115,000 per year is needed to reflect the true cost of the current tax audit program. During 2006, these dollars were taken from the non-departmental budget. In addition, we are finding an increased need for legal services to support the audit program. There are currently two audits under appeal and one of them is in court. The court case will continue into 2007. We may have other audits that may get appealed in 2007/2008. \$125,000 per year is requested for contract legal services to defend these issues.

The tax audit program has a revenue goal of \$1.0 million per year for 2007/2008 and \$1.2 million for years beyond that. These revenue amounts have been built into the current budget. Approximately 55% of the revenue goal (\$550,000 per year for 2007/2008) is associated with this proposal. Actual collections from the tax audit program have exceeded goal in the past two years and will exceed goal this year. Actual collections are as follows: 2004 - \$2.8 million, 2005 - \$2.0 million and 2006 YTD - \$3.3 million. The goals are established on a conservative basis as the amounts collected over goal are primarily the result of a few large assessments.

Fire

Program Outcome Statement

The Bellevue Fire Department exists to assist the public in the protection of life and property by minimizing the impact of fire, medical emergencies, and potential disasters or uncontrolled events that affect the community and environment.

Services and Accomplishments

The City of Bellevue Fire Department consists of the following major programs: Fire Suppression and Rescue, Emergency Medical Services, Fire Prevention, and Emergency Preparedness. The Fire Department responds within the City of Bellevue and contract communities to all types of emergencies including, fires, emergency medical, technical rescue, hazardous materials, and other. The Department's Fire Prevention, Public Education, and Emergency Preparedness efforts help to maximize the value, efficiency and effectiveness of all fire department and community resources. In 2005 & 2006, the Department accomplished the following work initiatives:

- Participated as a member and provided leadership to the regional task force and King County Emergency Medical Services (EMS) to bring before King County voters in 2007 a levy that provides continued funding for Emergency Medical Services;
- Successfully prepared and relocated Fire Department work groups (Administration, Fire Prevention, EOC, and Emergency Preparedness) to the New City Hall building insuring operational continuity;
- Ongoing evaluation of community safety and compliance with recognized standards of fire protection coverage;
- Performed timely project plans review and oversight inspections to ensure that newly constructed buildings are in compliance with the International Fire Code and related standards;
- Served an active role as a regional provider and participant in King County EMS Strategic Plan initiatives;
- Provided on-going basic training to "entry-level" and "in-service" training to firefighters that meets national standards, State law, and departmental priorities;
- Continued to participate, support, and review programs associated with maintaining a Class II Fire Protection Rating for the community;
- Conducted regular audits and review of departmental operations and policies for continuous improvement;
- Provided on-going training for operating safely during tactical events and/or environments, including weapons of mass destruction or terrorism;
- Continued our partnership with the City of Bellevue Transportation Department in analyzing the impact of traffic calming/diversion devices on emergency response outcomes;
- Managed and directed the Department's capital improvement renovation plan to ensure timely maintenance with the goal of increasing the longevity of fire facilities and grounds through a scheduled repair and maintenance program;
- Continued collaboration with the Utilities Department in the mitigation of wild-land urban interface;
- Continued active participation in the Development Services Initiative process;
- Performed an annual program of fire inspections which reflect our continued efforts to reduce the incidence of fires through the continued efforts to conduct fire and life safety inspections;
- Performed on-going analysis of traffic congestion and community fire risk based on structural and/or industry hazard classification to ensure that appropriate standards of response are in place;
- Continued to participate in the Enterprise Resource Program (HR/Finance);
- Negotiated new six-year contracts with the communities of Medina, Hunts Point, Yarrow Point, Clyde Hill, Beaux Arts, City of Newcastle, and King County Fire Protection District #14 to provide Fire and EMS services;
- Performed research and submitted application(s) for grant funding to support emergency response and/or preparedness;
- Effectively partnered with the Parks Department to implement an automatic external defibrillator (AED) program for City facilities;
- Complied with new National Incident Management System and National Response Plan standards, including providing mandated training to City personnel;
- Facilitated City's homeland security activities including regional strategic planning, training, exercising, and equipping of personnel;
- Participated in numerous community-wide events providing educational opportunities in fire safety, EMS, and Emergency Preparedness;
- Participated in the Regional Firefighter Testing Consortium and working with regional partners to enhance opportunities for diversity recruitment.

Other Major Work Initiatives not previously listed:

- Participated in the Technical Stakeholders committee in preparation of the 2008-2013 King County Emergency Medical Services Levy;
- Hosted and participated in regional training exercises to strengthen inter-agency operations at large-scale emergency events;

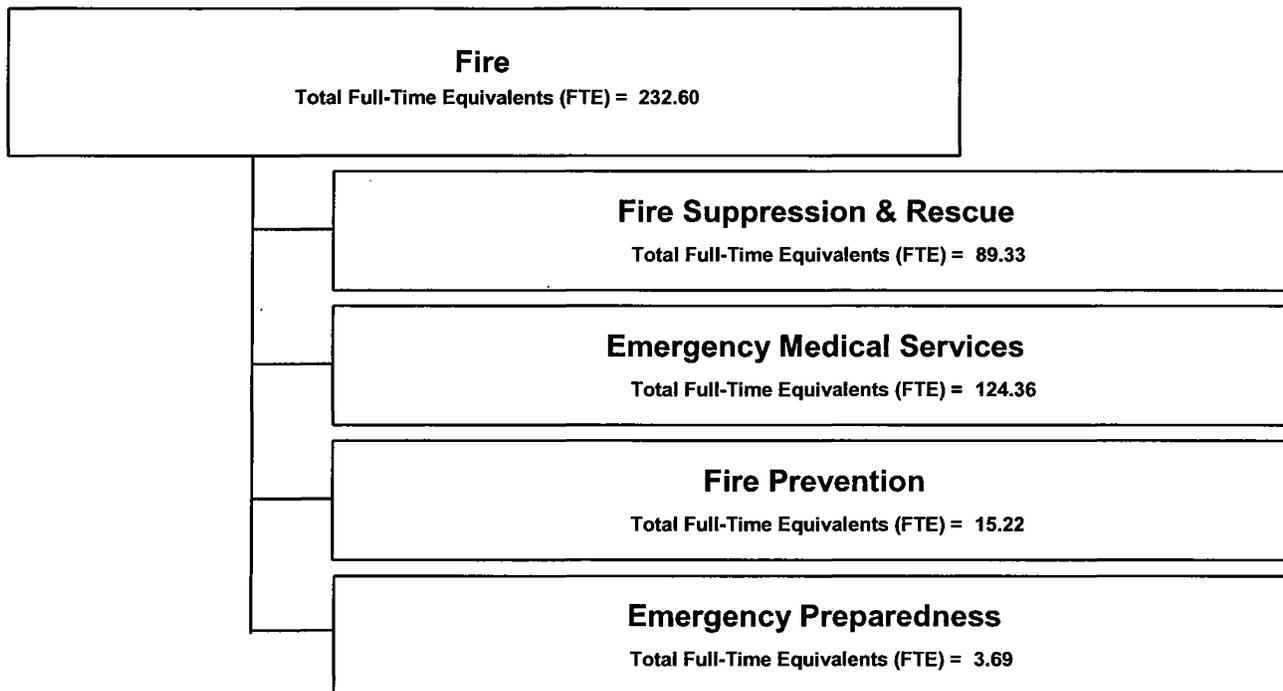

City of Bellevue
2007-2008 Biennial Budget

Fire

- Established a departmental Pandemic Influenza Response Plan working group with management-level representatives from each department, which developed a response matrix and identified and prioritized departmental essential services, and purchased supplies for City employees;
- Updated the Emergency Operations Plan (EOP) through the review of all the emergency support functions;
- Conducted a functional exercise of the Emergency Operations Center (EOC) in collaboration with other Zone 1 emergency management jurisdictions and agencies; conducted a series of trainings and tabletops in preparation for the exercise;
- Established an Emergency Assistance Mutual Aid Agreement with Bellevue School District;
- Established a Mass Vaccination Agreement with Public Health – Seattle & King County;
- Began transitioning the EOC into the Incident Command System structure requiring development of operational procedures and policies and interfacing with Department Command Centers;
- Skills-based trainings were provided to schools, childcare facilities, businesses and neighborhoods; coordinated with key representatives, utilized department fire personnel as trainers and delivered training in light search and rescue, disaster medical and parent/student reunion;
- Participated in Regional Disaster Plan and provided the City Council with updates;
- Participated at the King County regional level in the development, modification and coordination of the Region 6 Homeland Security Strategic Plan;
- Represented the City on several regional committees on the King County Emergency Management Advisory Committee (EMAC) which is responsible for addressing region-wide emergency management and homeland security endeavors;
- Coordinated the development of the Hurricane Katrina Employee Response program whereby City employees were deployed to assist the hurricane ravaged areas; coordinated the initial deployments and any follow-up processes;
- Completed a re-organization of the Fire Prevention Division in order to more effectively manage the division's work;
- Initiated, developed and implemented a multi-media Fire Prevention training series targeted at both our staff and our customers that provides a more efficient delivery method, will increase the consistency of the training, and disseminates the information to a much wider audience;
- Updated Fire Department Development Standards to reflect current codes, ordinance and department policy.

Fire

2007-2008 Work Initiatives

- Strive to meet the City Council adopted response time target of 6 minutes or less, 90% of the time.
- Continue to provide fire medical and other emergency services to meet public expectations and maintain the Department's "number one" approval rating.
- Continue to participate as a member and provide leadership to the regional task force and King County Emergency Medical Services (EMS) to bring before King County voters in 2007 a levy for a six-year period (2008–2013).
- Continue to evaluate overall community safety and comply with recognized standards of fire protection coverage and emergency services, with a specific focus on the Central Business District.
- Continue to provide timely project plans review and oversight inspections to ensure that newly constructed buildings are in compliance with Fire Code and related standards.
- Continue to participate, as a regional provider, in King County EMS Strategic Plan initiatives and Emergency Medical Services Advisory Committee.
- Continue to provide basic training to "entry-level" and "in-service" training to firefighters that meets national standards, State law, and departmental priorities.
- Continue to participate in, support, and review programs associated with maintaining a Class II Fire Protection Rating for the community.
- Continue to monitor and review all department opportunities for continuous improvement.
- Improve dispatch time, management information, and increase response effectiveness by purchase and implementation of a station alerting system.
- Continue to provide on-going training for operating safely during tactical events and/or environments, which may include weapons of mass destruction or terrorism.
- Continue to participate in the International City/County Management Association (ICMA) Comparative Performance Measures processes.
- Continue to work with the City of Bellevue Transportation Department in analyzing the impact of traffic calming/diversion devices on emergency response outcomes.
- Continue to monitor the Department's renovation plan to ensure timely maintenance to increase longevity of fire facilities and grounds through a scheduled repair and maintenance program.
- Continue to work with the Utilities Department in the mitigation of Wild-land urban interface.
- Continue to participate in the Development Services Initiative process.
- Continue efforts to reduce the incidence of fires through the annual fire and life safety inspection program.
- Complete sprinkler retrofit for four (4) fire stations and review options for the Training Center.
- Continue to analyze traffic congestion and community fire risk based on structural and/or industry hazard classification to ensure that appropriate standards of response are in place.
- Continue to participate in the City's video streaming pilot project to provide more effective and efficient training for community outreach educational opportunities and department personnel while on-duty.
- Continue to monitor continuing education requirements for technical rescue and train additional firefighters to the technician standard.
- Formalize, develop and implement a succession plan for key management staff.
- Continue partnership with Overlake Hospital to secure adequate quarters for Medic One and/or evaluate potential relocation to a fire station.
- Formalize, develop, and implement an Officer Development program.
- Comply with new National Incident Management System and National Response Plan standards.
- Facilitate City's homeland security activities including regional strategic planning, training, exercising, and equipping of personnel.
- Develop and seek Council adoption of new elements of the Regional Disaster Plan for Public and Private Organizations in King County.
- Design, conduct, and evaluate a city-wide exercise in 2007 designed to test the Emergency Operations Plan (EOP).
- Expand partnership with Consulting Nurse Services to use fire facilities to provide flu shots, immunizations, and health screenings for citizens.
- Continue to provide EMS support for community events and visiting dignitaries.
- Target educational opportunities to reach disadvantaged citizens, e.g. increase the number of multi-language educational programs and materials.
- Continue to participate in the Regional Firefighter Testing Consortium and work with regional partners to enhance opportunities for diversity recruitment.
- Develop comprehensive emergency response and evacuation plan for Overlake Hospital with a specific focus on the evacuation of patients located in ICU and CCU.

City of Bellevue
2007-2008 Biennial Budget

Fire

- Implement internal High-Rise Committee and evaluate current high rise procedures and public education efforts and guidelines for evacuation.
- Prepare and conduct 35 year anniversary of Bellevue Fire Department Medic One program.
- Host and participate in regional training exercises to strengthen inter-agency operations at large-scale emergency events.
- Develop a city-specific annex to the Regional Hazard Mitigation Plan (comply with the Mitigation Act of 2000, 44 CFR 201) with formal approval by King County and Washington State Emergency Management offices and FEMA, and City Council adoption.
- Continue the transition of the Emergency Operations Center (EOC) into the Incident Command System (ICS) structure under the National Incident Management System (NIMS) federal guidance.
- Participate in regional homeland security and emergency management initiatives and grant programs with such projects involving training; planning in evacuation, debris management, mass sheltering, vulnerable populations and mass medical support; interoperable communications; Zone 1 emergency management coordination.
- Address business continuity/continuity of operations (COOP) internally to City departments as well as advocating such planning for local businesses. Work with Department Command Centers and their transition to ICS.
- Continue to develop and enhance the Pandemic Influenza Response Plan.
- As required under the Emergency Management Program Grant, conduct a functional exercise of the Emergency Operations Center (EOC).
- Deliver skills-based trainings to schools, businesses and neighborhoods.
- Continue to coordinate our EARS volunteer group (75+ members); conducting monthly meetings/training, participating in quarterly WA State radio drills, and conducting routine drills with local jurisdictional agencies.
- Participate in Regional Disaster Plan development and meetings; provide the City Council with necessary updates and information sharing on plan progress.
- Represent the City of Bellevue (city with population of 100,000) on the King County Emergency Management Advisory Committee (EMAC) responsible for addressing region-wide emergency management and homeland security endeavors.
- Continue to utilize volunteer trainers and EPD staff to deliver SPAN (Strengthening Preparedness Among Neighbors) program training to neighborhoods.
- Participate in community-based events providing emergency preparedness information.
- Continue to participate in the Urban Areas Security Initiative (UASI) by representing the City on the UASI Working Group and the UASI Core Group.
- Cooperatively work with other Zone 1 departments, and prepare for the adoption of the 2006 International Fire Code Scope of work includes: develop consistent adopting ordinance to the greatest extent possible; coordinate training for our staff and customers; and identify opportunities to effectively communicate with our customers.
- Work proactively with the development community and the Development Services departments to manage the significant number of high rise projects that will be seeking Certificate of Occupancy.
- Analyze, evaluate, and create preliminary design documents for the major renovation of Fire Station # 5.
- Prepare for and participate in site visit by the Commission on Fire Accreditation International (CFAI) for determination as to whether or not the Bellevue Fire Dept will receive re-accredited status in 2008.

Fire

Major Challenges for the Biennium

- By 2010, call volume for Fire and Emergency Medical Services is projected to increase by 18% due to growth in residential and workforce population, increased development, and increasing calls for services due to new legal mandates and public expectation. The Department is currently not meeting the City Council adopted response time target of 6 minutes or less, 90% of the time. As call volumes increase, the Fire Department will continue to evaluate all options to meet response time objectives and to maintain current service levels.
- Bellevue Fire Department is a regional provider of Advanced Life Support (ALS) paramedic services within the King County EMS Program, providing services to a population of 250,000 citizens within 301 square miles. The Department's ALS program is entirely funded by a county-wide EMS property tax levy which is up for renewal in 2007.
- Over the next five years, 33% (73) of the Fire Department's employees will be eligible for retirement. This turnover will impact the department in the following areas: increased need for overtime to meet minimum staffing levels; increased hiring and recruitment expenditures; increased need for specialized training for new personnel assigned to lightforce companies and the hazardous materials unit; and increased need for employee professional development.
- Over the course of the next three years, twenty-two (22) new high-rise construction projects in the downtown core will be reaching the Certificate of Occupancy stage. During this time, the Department will have periods where all Fire Prevention Division resources will be dedicated to inspections of these buildings impacting the annual fire and life safety inspections in the Biennium.
- Recent national events clearly demonstrate the need for community and business preparedness, as well as having in place comprehensive planning, training, exercise, response and recovery programs. Over the next several years emergency management agencies must continue to meet ever increasing state and federal directives in order to access any federal funding. There is also the likelihood that nation-wide certification of all emergency management programs will be required in the near future. As the City's economic center expands, and population grows and diversifies, there is an increased need for preparedness planning and education including multilingual requirements.

City of Bellevue
2007-2008 Biennial Budget

Fire Emergency Medical Services

Program Statement

The Emergency Medical Division seeks to provide the highest quality of medical care possible under emergency conditions to mitigate loss of life, pain and suffering, and enhance the possibilities for rapid and complete patient recovery.

Summary of Services Provided

The Emergency Medical Services (EMS) program is designed to quickly respond to medical or traumatic emergencies. Prompt response to emergency medical incidences is reliant upon rapid response, assessment, treatment, and transportation to the nearest medical facility when appropriate, with the care of the patient being the primary focus. An enhanced 911 system and the strategic location of Fire Department resources capable of delivering basic and advanced life support services. An additional impact to a successful outcome is rapid access to 911 and citizens trained to perform basic first aid and CPR.

Issues related to Department Performance

Cardiac arrest survival rate: Bellevue Fire Department utilizes the Utstein formula to determine its cardiac survival rate. This is a standard performance criterion that King County EMS uses to measure cardiac survival rate. This formula defines survival as witnessed cardiac patients who were resuscitated and discharged from the hospital. In 2005, Bellevue Fire Department's survival rate was 50% which exceeds the King County average of 45.5%. Bellevue Fire and King County EMS continue to work with the international Resuscitation Outcomes Consortium (ROC) to study ways to improve cardiac survival rates. Bellevue is expected to participate in a ROC trial of new defibrillators that monitor the quality of CPR (Q-CPR) and provide feedback to rescuers.

City of Bellevue
2007-2008 Biennial Budget

Fire Emergency Medical Services

Ventricular fibrillation (V-fib) is the only electrocardiogram (EKG) arrhythmias that can be immediately affected by the application of a defibrillator. Thus, it is the most survivable of the life threatening arrhythmias and is a good indicator of the efficacy of BLS response in a system. Although other arrhythmias may be survivable, the application pharmacologic agents in concert with defibrillation has much more favorable outcomes. By utilizing the Utstein protocol to evaluate Cardiac Arrest patients, King County EMS is evaluating system outcomes on only those patients that it may be possible to save. Approximately one percent of Bellevue Fire EMS calls are Cardiac Arrests.

Emergency response times: In 2005, the Department implemented several non-staffing mitigation measures to help slow the increase in response time. Despite these efforts, the Department still fell short of meeting the City Council adopted standard for response times. The use of the new mobile data terminals and automatic vehicle locaters have begun to stabilize after experiencing technical difficulties and should begin to provide more accurate data. A significant focus on turnout times was implemented in the Fall of 2005. Turnout times are reported out to each fire station captain and the platoon battalion chiefs for monitoring performance coupled with an internal effort to determine best practice for our fire stations that cross-staff a fire engine and Basic Life Support (BLS) unit. The Department experienced an immediate fifteen to twenty second improvement in the first 30 days, and the trend continues, which is reflected in the 2005 actual. Travel time and percent of incidents where total emergency response time was six minutes or less also improved.

Number of EMS service requests/unit responses generated: Requests for emergency medical assistance increased from 12,274 in 2004 to 13,156 in 2005, or 882 additional calls; due to the change in the NFIRS standard the majority of these calls were counted as Fire service calls in previous years. The moderate growth in EMS call volumes is in part due to the success of the Advanced Life Support (ALS) Dispatch Criteria revisions, nurse referral program and injury prevention programs. 40% of all ALS patients and 34% of all BLS patients are over age 65. ALS units respond most frequently to cardiac (28%), neurological (15%), respiratory (14%) and trauma (8.7%) incidents.

Program Notes

The Fire Department seeks to respond with appropriate resources in an effective time frame and takes the appropriate action to mitigate pain, suffering, and morbidity for critically ill and injured citizens. The Bellevue Fire Department operates four full time regional Advanced Life Support units covering 300 square miles and a population of 250,000. The paramedic units are located at Overlake Hospital Medical Center, Fire Station Two in Eastgate, Issaquah and North Bend. The data indicates an effective use of strategically placed EMS resources. In 2006, the Bellevue Fire Department placed into operation a new Mass Casualty Medical Supply Unit funded through a grant from Homeland Security, which is located at Bellevue Fire Station 9. This unit provides supplies for command and control as well as a cache of medical supplies and equipment for major emergency medical incidents and natural disasters.

City of Bellevue
2007-2008 Biennial Budget

Fire Emergency Preparedness

Program Statement

The Emergency Preparedness program directs and coordinates City and community activities designed to minimize the impact of disaster and uncontrolled events that affect the community and environment. These activities include preparedness, mitigation, response readiness and recovery planning.

Summary of Services Provided

The Emergency Preparedness Division of the Bellevue Fire Department leads an interdepartmental effort to develop and maintain an emergency operations program for the City of Bellevue that maximizes the use of all City resources and prepares all segments of the community for disaster. The program also integrates plans, resources, and training with all necessary public agencies to most effectively manage the City's preparation for, response to, and recovery from the effects of any disaster.

Issues related to Department Performance

Emergency Preparedness Response Hands On Skilled Training Programs: The community continues to be interested in receiving emergency response training. Firefighters provide the instruction for the "Search & Rescue and Disaster Medical Treatment" segments of this training program. The majority of these programs delivered in 2005 were in school settings; however, we experienced a good balance of residential community participation. On average, attendance increased by 60% in the training sessions; however, due to employee vacancies the number of training programs fell short of the target level for 2005. Approximately 80% of these trainings occurred in the fourth quarter – post hurricane event timeframe.

Emergency Preparedness audiences reached: Post Hurricane Katrina and Rita, there was a significant public interest in emergency preparedness education programs. The hurricane events provided that "teachable moment" where we take advantage of the public's heightened interest and actively engage them in the benefits of personal preparedness and planning. Our SPAN (Strengthening Preparedness Among Neighbors) program also saw a large increase, in that we went from reaching five neighborhoods in 2004 to 24 neighborhoods in 2005. Due to employee vacancies the number of audiences reached fell short of the target level for 2005.

In addition to experiencing an increase in public education activities and post hurricane events, we also experienced an increase in internal interest and enthusiasm. In response to the hurricane devastation and nation-wide resource requests for people and equipment, the Emergency Preparedness Division assisted in developing a city-wide policy to allow employees to deploy to the hurricane-affected areas and provide assistance, in addition to learning invaluable experience in a disaster zone. Additionally, this post-hurricane event enlightened a number of people who regained enthusiasm in emergency preparedness and subsequently began reassessing and reanalyzing response plans, procedures, operational readiness and capabilities. These efforts will continue into 2007 and 2008.

The federal government continues to restructure FEMA and at the same time has been requiring a number of compliancy requirements in order for jurisdictions to continue accessing federal grant funds. To meet 2005 compliancy, the Department spent time training Emergency Management Committee (EMC) and Emergency Operations Board (EOB) members on IS 700 – National Incident Management System (NIMS). Such NIMS compliancy issues will also likely continue into the coming years in order for the City to be eligible for federal grant funding.

Fire Emergency Preparedness

Program Notes

Citizens and private sector awareness has increased due to national and international events (i.e. 9/11, Hurricane Katrina and the tsunami in Indonesia). Local emergency management programs are increasingly inundated by the Department of Homeland Security and Presidential directives. This is reflected in an increase in emergency preparedness demands on educational programs and resources. To remain eligible for any federal grant funding, Bellevue must continue to comply with the requirements of the National Incident management System. Efforts will continue to seek grant funds and other resources to facilitate in meeting increased demands for planning, education and recovery.

City of Bellevue
2007-2008 Biennial Budget

Fire Fire Prevention

Program Statement

The Fire Prevention program, through the process of fire protection engineering, fire code enforcement, and fire investigation ensures a safe environment for the people who live, visit or conduct business in the City of Bellevue.

Summary of Services Provided

The Fire Prevention program is designed to support the Fire Department's mission through quality delivery of a multifaceted fire and life safety improvement strategy. This program consists of six functional areas: Plans Review, Code Enforcement, Investigation, Hazardous Materials, Special Projects and Administration. These sections inform and educate the public, conduct new construction plan reviews, perform fire code and life safety inspections, and investigate fires. Particular emphasis is directed toward those citizens who face a disproportionately high risk of death due to fire. These groups include the very young, the elderly, immigrant populations, and disabled persons.

Issues related to Department Performance

Fire Loss in Inspected Buildings: Efforts to minimize or eliminate fire loss in commercial, industrial, educational, and multi-family residential buildings are a key component to the community's risk management strategy. National studies suggest that an annual fire inspection program reduces fire loss. In order to ensure that all occupancies are inspected on a regular basis, the Fire Department assigns specific geographical inspection areas and/or occupancy types to individual Fire Prevention Officers or fire crews. Total Fire loss in inspected buildings has remained fairly constant over the last four years.

Number of annual fire inspections: In total, there are approximately 8,300 occupancies in the City of Bellevue and contract communities requiring annual fire and life safety inspections. The "fire company inspection" program utilizes on-duty firefighters to inspect less complex structures and occupancies. In 2005, Fire companies conducted 5,215 commercial occupancy inspections, an increase of 25.5% from 2004. The self-inspection program for low-risk occupancies accounted for an additional 726 inspections. In addition to Fire Company and self-inspections, the Department's Fire Prevention Officers are assigned to inspect more complex occupancies that represent significant life and safety hazards. In 2005, the Fire Prevention Division completed 3,119 inspections. Due to limited staffing in Fire Prevention and an increasing need to provide inspections for new construction projects, approximately 680, or 8% of all occupancies were not inspected in 2005. The Department continues to explore and implement efficiencies to complete all routine annual fire and life safety inspections.

City of Bellevue
2007-2008 Biennial Budget

Fire
Fire Prevention

Program Notes

The key performance indicators are expected to remain relatively constant over the biennium, although workload related to new construction projects is expected to increase. The resource needs to maintain service levels relative to fire and life safety inspections have not kept up with growth. Currently there are approximately 4,000,000 square feet of projects under construction, 7,000,000 square feet of projects in review and 13,000,000 square feet of projects in the design stage. When all of these projects are completed, the number of high rises in Bellevue will have more than doubled.

A number of management actions have been taken to stretch capacity. Actions taken include:

- Creating a Routine Inspection Task Force to examine how the department can best complete our routine inspections. The Task Force has completed its work and published a report which we believe will help in most efficiently and effectively completing our routine inspections.
- Initiating a multi-media based Fire Prevention training series targeting both Fire Department personnel and our customers. This form of delivery for training is more efficient, ensures consistency, and disseminates the information to a much wider audience.
- Hiring 3 additional employees to respond to the significant increase in work.

City of Bellevue
2007-2008 Biennial Budget

Fire Fire Suppression & Rescue

Program Statement

Fire Suppression and Rescue exists to control risk to life, property and community vitality, which may be threatened by fire or other emergency events, through the strategic deployment of resources and rapid response of personnel and equipment.

Summary of Services Provided

The Fire Suppression and Rescue program is designed to minimize loss of life and property. The program is delivered utilizing strategically placed staff and physical resources that extinguish fires and engage in physical rescue activities. Other activities include mandatory and specialized training, continuing education for all members, to maintain compliance with State and Federal safety standards, conducting annual fire/code enforcement and life safety inspections, educating the public, and providing basic medical life support.

Budgeted Cost Summary	FY 2005 Budget	FY 2006 Budget	FY 2007 Budget	FY 2008 Budget

Issues related to Department Performance

• **Emergency response times:** In 2005, the Department implemented several non-staffing mitigation measures to help slow the increase in response time. Despite these efforts, the Department still fell short of meeting the City Council adopted standard for response times. The use of the new mobile data terminals and automatic vehicle locaters have begun to stabilize after experiencing technical difficulties and should begin to provide more accurate data. A significant focus on turnout times was implemented in the Fall of 2005. Turnout times are reported out to each fire station captain and the platoon battalion chiefs for monitoring performance coupled with an internal effort to determine best practice for our fire stations that cross-staff a fire engine and Basic Life Support (BLS) unit. The Department experienced an immediate fifteen to twenty second improvement in the first 30 days, and the trend continues which is reflected in the 2005 actual. Travel time and percent of incidents where total emergency response time was six minutes or less also improved.

• **Percent of fires confined to room of origin:** Fires confined to room of origin is a standard by which all fire departments' performance is evaluated. This measure is influenced by a number of factors, which include fire protection systems, age of the structure, on-duty staffing levels, response times, etc. In 2005, there were 138 structure fires in the City of Bellevue and the contract communities. Ninety percent of these fires were confined to the room of origin, five percent better than our target of 85%.

• **Number of Fire service requests/unit responses generated:** A change in National Fire Incident Reporting System (NFIRS) reporting requirements is reflected in 2005 actual. In previous years all cancelled EMS alarms were accounted for in the 'fire services' category. The Department continues to experience a similar level of fire related services as previous years.

City of Bellevue
2007-2008 Biennial Budget

Fire Fire Suppression & Rescue

In 2005, the department continues its efforts to mitigate increases in service requests through three major programs: Public Education, injury and illness prevention, and referral to other types of assistance when medically appropriate.

Number of annual individual training hours: In 2005, annual individual training hours increased by approximately 27% to 37,274. The 27% increase can be attributed to: 1) the completion of recruit firefighter training for four new employees. A recruit academy was not held in 2004; and, 2) an increase in specialized training (i.e., hazardous materials response, and special operations) paid for by Homeland Security grant funds and other outside resources. The department continues to provide as much "in-service" fire company training as time allows.

Program Notes

The Department continues to not meet the target for percent of structure fire incidents with a total response time of 6 minutes or less, 90% of the time. However, this has not yet affected the department's ability to have good results in confinement of fires to room and/or structure of origin. The Department has implemented several steps to improve response time which includes installation of Mobile Data Computers and Automatic Vehicle Locators, revised dispatch protocols, revised standard operating procedures, and placing additional emphasis on monitoring crew performance relative to turn out times. During the 2007-2008 biennium, several additional steps will be taken to improve this performance including implementation of a Paging and Station Alerting System and improved Computer Aided Dispatch.

City of Bellevue
2007-2008 Biennial Budget

Fire

Additional Staffing for New Dedicated Aid Unit

Enhancement: Fire 00A

Enhancement Description

This request is to add one dedicated BLS medical unit to a fire station south of I-90. This strategic placement of an additional dedicated BLS medical unit will help to improve overall system-wide service levels. Eight (8) additional Firefighter FTE's are needed to staff the new two person unit on 24-hour basis, seven days a week. The proposed budget calls for hiring and training to begin in October 2007. The unit will be placed into service and fully operational in early January 2008.

In 2005, the Fire Department responded to 16,711 incidents, resulting in 27,363 unit responses. Currently all three fire stations south of I-90 are cross-staffed with only three Firefighters. If the emergency is a Basic Life Support (BLS) emergency medical response, all personnel assigned to these fire stations leave on the aid unit. Should a subsequent emergency call (fire or EMS) occur in the now empty fire station's response area, the next nearest available unit would respond to this incident. This results in an increased response time and may impact the positive outcome of the emergency.

Over the past 10 years the area south of I-90 has experienced significant population growth. At the same time, resources serving this area have remained static. Response times in this area are consistently higher than the rest of the City. In 2005, emergency response times to the area averaged almost one full minute more than the average response to the areas north of I-90. Service delivery obstacles south of I-90, not present in other areas of the City, include: difficult topography (hills, traffic calming devices, dead ends, etc...); greater distance to Overlake Medical Center; and, greater distance between fire stations.

Over the past five years, the Fire Department has taken several management actions to improve our overall response times. Most recently these actions included: changes to Standard Operating Procedures to improve turnout times and dispatch criteria and the implementation of the Mobile Data Computer/Automatic Vehicle Location system. While these actions have helped to slow the increase in response times, response times continued to increase and it is anticipated that they will continue to rise if additional resources are not added.

The addition of a new Aid Unit south of I-90, in combination with continued management of existing resources and implementation of the new Station Alerting and Paging system and Private Ambulance contract, will help to mitigate increasing response times. Department management projects that the implementation of these proposed actions would positively impact our efforts to meet the adopted six minute response time standard and may enable the Department to comply with the "Standard of Coverage".

State/Federal/Industry Mandates

In 2001, the Bellevue City Council adopted Resolution No. 6565 in place of National Fire Protection Association Standard 1710, and adopted the provisions of the Commission on Fire Accreditation International "Standard of Coverage" as the City of Bellevue's model for fire department resource deployment. The "Standard of Coverage" document includes a response time standard of 6 minutes or less for 90% of all Fire Department emergency incidents. Since adoption, the Department has yet to meet this standard. In 2005, the Department achieved a 6 minute or less response time for only 55% of all emergency incidents.

Goals and Objectives

The Fire Department's 10-year strategic plan has identified the need to add an additional dedicated aid unit (Basic Life Support) to service the growing emergency medical needs in the community and maintain current service levels.

Consequences of Not Funding

Emergency response service levels will continue to decline system-wide due to increasing response times and the inability of the Department to provide timely services to citizens in need.

Equipment Requirements

None.

City of Bellevue
2007-2008 Biennial Budget

Fire

ALS Data Analyst

Enhancement: Fire 04

Enhancement Description

The Fire Department is requesting a Data Analyst position to manage the reporting of EMS incident data, provide reports and incident data necessary to conduct medical Quality Assurance (QA) review, manage confidential medical records, and manage reporting requirements necessary for the Department to participate in regional and national pre-hospital medical research studies.

The King County EMS system is a regional system based on consistent medical care across all providers. Program growth is regionally governed and managed as identified in the King County EMS Strategic Initiatives, which is to focus on patient care, operational efficiencies, and planning for growth in demands for services.

The City of Bellevue has participated as a regional provider of ALS (Paramedic) services since 1972. Bellevue's ALS response area encompasses 300 square miles, serving a population of approximately 300,000. Bellevue Fire currently operates four paramedic units strategically located throughout this response area, both inside and outside the City limits of Bellevue.

Currently, due to staffing limitations, Bellevue is only able to report the minimum amount of data required by our contract with King County EMS. In addition, due to these same limitations, the Department has lacked the ability to develop and regularly report on EMS activities. Without regular reporting it is difficult for the Department to evaluate performance and service level trends.

The key job functions of this position include:

- Review 12,000 Medical Incident Report Forms and electronic medical incident RMS entries for accuracy, completeness and conformity to established medical reporting standards.
- Training 36 Paramedics and 160 Emergency Medical Technicians (EMTs) on updates to the King County EMS data reporting requirements to ensure consistency.
- Preparing and submitting monthly and annual technical statistical reports as required by King County EMS and the State of Washington.
- Preparing additional EMS response reports and/or statistical analysis as requested by the Fire Chief, EMS Division, Medical Program Director, King County EMS, and/or research partners.
- Assigned as Department EMS Records Custodian with responsibility for responding to all requests for EMS records in a timely manner.
- Manage EMS incident report filing and archiving.
- Attend quarterly King County and Washington State meetings regarding EMS data and reporting issues.
- Generate and submit monthly incident reports to Contract Cities.
- Generate and submit monthly electronic reports to King County Emergency Medical Services.
- Act as the DECCAN Application Specialist and assist the Fire Chief with EMS apparatus deployment modeling and forecasting EMS service needs.
- Provide incident data on patients with diabetes and hypertension to the King County EMS Medical Program Director for follow-up with private physicians.
- Tracking quality assurance (QA) inquiries from the Bellevue Fire Department Medical Director to paramedics and responses from EMS personnel.
- Provide Overlake Hospital Medical Center with incident information on Bellevue Medic One trauma incidents to meet required reporting to the State of Washington trauma registry.

State/Federal/Industry Mandates

The Federal HIPPA regulations and State Privacy Rules require each agency to maintain the confidentiality of personal health care information. In addition, each ALS agency in King County must identify a specific person to manage the confidential records. The Data Analyst will meet this need and assure Bellevue Fire Department conforms to all Federal HIPPA regulations. Currently an administrative staff member has been assigned these duties and does not have the workload capacity to remain abreast of all the changing practices and standards relative to patient privacy and HIPPA compliance.

City of Bellevue
2007-2008 Biennial Budget

Fire

ALS Data Analyst

Enhancement: Fire 04

Goals and Objectives

King County mandates each agency conducts quality assurance review of all medical incidents. Bellevue's Medical Director has identified QA data review as a critical function requiring immediate improvement. Due to lack of capacity, the Department is unable to provide this level of review for all incidents. In addition, King County also mandates the reporting of all Medical Incident Reporting forms (MIRF) data to a central data base at King County EMS. The Bellevue Fire Department is required to process the Medical Incident Report forms and transmit the data to King County electronically each month.

The King County Region 6 Trauma Council conducts regular data review on trauma care, which relies on accurate data from each EMS agency. The Trauma Council is a regional entity made up of representatives from the first responder community, physicians, and hospitals that provide an on-going quality assurance review of all trauma patients seen by first responders. The Trauma Council recommends each ALS agency provides a dedicated Data Analyst to improve the quality of the data provide to the Trauma Registry, which often times translates into field studies directed towards improving patient outcomes. An example would be the Resuscitation Outcome Study which was recently launched a trauma-based study evaluating hypertonic saline for severe trauma.

Consequences of Not Funding

Consequences of not funding this position include a continuing decline in the ability to provide all necessary medical data analysis and reporting due to increased reporting requirements, call volume, and on-going changes to reporting requirements. This information is necessary and utilized to implement new and/or revised medical procedures, improve patient care, and outcomes.

Equipment Requirements

There is no specific equipment identified for this budget proposal.

	FY 2007 Budget	FY 2008 Budget

City of Bellevue
2007-2008 Biennial Budget

Fire

ALS Operations MSO

Enhancement: Fire 03

Enhancement Description

The Fire Department is requesting an Emergency Medical Services (EMS) Operations Officer position to provide critical coordination and logistical support for Advanced and Basic Life Support (ALS and BLS) operations.

The King County EMS system is a regional system based on consistent medical care across all providers. Program growth is regionally governed and managed as identified in the King County EMS Strategic Initiatives, which is to focus on patient care, operational efficiencies, and planning for growth in demands for services.

The City of Bellevue has participated as a regional provider of ALS (Paramedic) services since 1972. Bellevue's ALS response area encompasses 300 square miles, serving a population of approximately 300,000. Bellevue Fire currently operates four paramedic units strategically located throughout this response area, both inside and outside the City limits of Bellevue.

In 2003, with the expansion of Medic 3 and Medic 14 to full-time units, the number of firefighter/paramedics in the ALS program increased by twelve (12), or 33%, to provide the additional staffing necessary for these units.

Historically, the Fire Department has relied heavily upon the on-duty Medical Service Officer (MSO) to assist with many of the administrative and logistical responsibilities of the ALS program. The MSO's primary responsibility is to supervise the on-duty paramedics and respond to emergency calls. With the increase in the number of paramedics assigned to each platoon, the MSO's capacity to assist with administrative and logistical tasks has been significantly reduced.

The position requested is essential to manage the increasingly complex daily EMS operations and provide logistical support for the Medic One program that can no longer be provided by the on-duty MSO. The ALS Operations MSO would be responsible for:

- Managing the ordering, stocking, distribution and inventory of controlled prescription medications. Audit the use of Class II Narcotics and maintain centralized documentation and records in conjunction with Overlake Hospital Medical Center Pharmacy.
- Coordinating the maintenance, testing and repair of EMS apparatus and medical equipment. There are 11 aid units, 7 medic units, 1 Medical Service Officer (MSO) vehicle, and 1 Medical Supply Unit (MSU).
- Coordinating the recovery of non-disposable medical equipment from area hospitals, clinics and fire districts.
- Plan, develop, implement and coordinate various EMS Division programs including High School DUI program, Stretcher Maintenance program, and Defibrillator Maintenance program
- Establish a program to track medical equipment failure and error rates.
- Chair the Fire Department's ALS/BLS Equipment & Apparatus Committees; recommend and develop proposals to improve apparatus and medical equipment and incorporate mandatory Federal and State safety requirements.
- Facilitate large scale EMS drills and Mass Casualty Incident (MCI) exercises with neighboring agencies.
- Track and inventory supplies and equipment acquired through Federal and State grants to ensure that grant requirements are met.

State/Federal/Industry Mandates

There are no specific State or Federal mandates related to this budget request. The mandates come from the City's agreement with King County EMS and our obligation to manage all logistical functions and EMS operations within our regional ALS Program.

Goals and Objectives

The King County Emergency Medical Services contract agreement with Advanced Life Support agencies outlines the responsibilities we have in managing program operations.

Consequences of Not Funding

Logistical support functions are a critical component in our ability to provide state of the art regional Advanced Life Support patient care. For example, in 2006, Bellevue Risk Management settled a citizen medical claim related to the Medic One Program. QA review of this incident and circumstances highlighted the need to provide greater oversight of our ALS operations.

As long as the City continues to provide Emergency Medical Services, there will always been some risk exposure. This exposure can be minimized by providing proper program support, oversight, and supervision.

City of Bellevue
2007-2008 Biennial Budget

Fire

ALS Operations MSO

Enhancement: Fire 03

Equipment Requirements

The EMS Operations Officer will require a vehicle, office computer, 800 MHz portable radio, cell phone, pager and standard personal protective equipment.

Additional Staff (FTE)	1.0	1.0

City of Bellevue
2007-2008 Biennial Budget

Fire

Ambulance Contract Administration

Enhancement: Fire 02

Enhancement Description

The Fire Department is in the process of developing an ambulance contract with a private ambulance provider for transport services to formalize our working relationship, develop ambulance performance standards, establish consistent and reasonable ambulance rates, and provide for private ambulance availability in Bellevue during disasters. An ambulance contract will not change Bellevue Fire Department's current transport policy: Medic One transports all Advanced Life Support patients and Bellevue Fire Department Aid Units will continue to transport Basic Life Support patients to local hospitals, when available. It is intended to have a contract in place prior to the end of 2006.

The proposed contract calls for the private ambulance company to pay the City of Bellevue a fee of \$3,000 per month to cover the Department's costs of administering this agreement; \$36,000 per year. The Fire Department will be responsible for monitoring Contractor's performance and compliance with the contract. Additional administrative support is essential to perform this task, as well as respond to citizen questions, complaints and/or concerns related to ambulance transport services. It is anticipated that this support could be performed by a 1040 employee or a private contractor.

State/Federal/Industry Mandates

There are no specific State or Federal mandates related to this budget request.

Goals and Objectives

The Ambulance Contract obligates the Bellevue Fire Department to liaison with the contractor and provides oversight to assure the contractor meets specific performance criteria. In addition, the Department is required to review ambulance response data to determine if liquidated damages are appropriate and evaluate any applicable exemptions.

Consequences of Not Funding

Equipment Requirements

There is no specific equipment required for this request.

	FY 2007 Budget	FY 2008 Budget

Additional Staff (FTE)	-	-

City of Bellevue
2007-2008 Biennial Budget

Fire

DSI/Fire Prevention Staffing Vehicle Costs

Enhancement: Fire 05A

Enhancement Description

This CBA has been prepared to provide for vehicle operating costs for one additional vehicle to support a Fire Prevention Division FTE. The FTE was authorized as part of a multi-departmental Development Services CBA.

State/Federal/Industry Mandates

The Washington State Building Code Act (RCW 19.27) mandates each jurisdiction enforce the International Fire Code (IFC) and International Building Code (IBC). These documents require that plans and other submittal documents for new construction be reviewed and inspected to determine compliance with codes and standards. In addition jurisdictions are mandated to regularly inspect these buildings after construction to verify that the structures and fire protection systems are maintained.

Goals and Objectives

A cornerstone of the Development Service Initiative (DSI) is a "fast, predictable, one-city" approach. To meet this goal, the Development Services Departments have established performance targets specifically relating to timely new construction plans reviews and inspections. In 2004, the Fire Department was able to complete 85% of all plans reviews within established performance targets. In 2005 due to the increase workload, the Department was only able to meet the performance target 78% of the time. 2006 year-to-date, performance has fallen to 73% of the time.

This request is consistent with the City's policies regarding the maintenance and replacement of vehicles.

Consequences of Not Funding

Without an assigned vehicle, the Fire Prevention Officers would not be able to complete assigned new construction and/or existing occupancies in a timely manner.

Equipment Requirements

None.

Fire

EOC Connectivity - ViPr System M&O

Enhancement: Fire 07

Enhancement Description

This request is for the on-going Maintenance & Operating costs associated with the ViPr, "virtual presence" video teleconferencing system.

ViPr is a "virtual presence" video teleconferencing system that is networked privately through the county and regional fiber optics system INET. As a new member to the Urban Area Strategic Initiative (UASI) community, City of Bellevue would have direct emergency management policy and operational communication and data access to King County Executive and ECC, City of Seattle Mayor and EOC, Washington State EOC and Governor's Office, Pierce County Executive and EOC, Snohomish County Executive and EOC, with additions to include Public Health – Seattle & King County Director and EOC. Additionally, this system allows for access into the existing District and Superior Court networks utilized on a daily basis. The ViPr system also provides a platform for access to four (4) channels dedicated to aviation video downlink from King County Sheriff's Office, Washington State Patrol, Snohomish County Sheriff's Office and Pierce County Sheriff's Office aviation assets (helicopters and fixed wing) for tactical and intelligence needs. Another feature this system provides is the capability to share documents over the network which could be utilized for visuals during video teleconferences. A gateway has also been established to allow for ISDN video teleconferencing systems such as PolyComm to link directly into ViPr enhancing communications interoperability.

For 2006, the City Manager has approved acceptance of grant equipment for ViPr, with the 2006 operating costs to come out of the General Fund Miscellaneous Non-Department (MND) fund. The City of Seattle has agreed to pay for the monthly service fees associated with the system through December 2007. The funds requested will pay for the on-going monthly service fees starting in January 2008, annual software maintenance and will fund a replacement account for the system.

State/Federal/Industry Mandates

The ViPr system has become the standard connectivity system for the UASI communities in Puget Sound.

Goals and Objectives

Within the Fire Department Strategic Plan these connectivity systems meet our core values of stewardship and innovation. These EOC Connectivity functions will enable the City to stay on the forefront of emerging approaches to emergency management, and create a response capability aligned with local, regional, state and federal expectations.

ViPr provides virtual presence communications for:

- Real-time multimedia intelligence briefings;
- Command and control communications;
- Information dissemination for real-time emergency management preparedness;
- Command, control and coordination for real-time emergency management response;
- Other federal, state and local government collaborative work.

Consequences of Not Funding

The City has a new EOC. In order for our EOC to be interoperable with the County and State EOCs, it is important for us to tie into these interoperable communication and information management systems. It is a standard for EOCs built in this era to have integrated technology systems to allow real-time situational and policy interaction at the local, state and federal level. This will be vitally critical when transportation infrastructure does not allow movement from one location to the next and a pandemic flu event that would necessitate social-distancing causing agencies to use video and teleconferencing and data network systems.

Equipment Requirements

The ViPr system is being purchased with remaining UASI funds managed by the City of Seattle. The City of Bellevue already has INET connection to New City Hall. Minor connection equipment will be installed by the IT Department to facilitate the use of the ViPr system in several locations in City Hall. The installation of the ViPr will be conducted by INET technicians from King County Information & Telecommunications System in coordination with the City's IT Department technicians.

City of Bellevue
2007-2008 Biennial Budget

Hotel/Motel Taxes

Program Outcome Statement

Meydenbauer Center provides an economic engine to the community by creating jobs, tax revenues, and commercial activity in the City. The Center strives to operate in a manner that maintains its competitive position in the marketplace maximizes local hotel room use to support the hotel industry and provides a facility for community events and performing arts while maintaining a self-supporting status.

Services and Accomplishments

The Hotel/Motel Tax Fund supports the City's economic and cultural development efforts by remitting transient occupancy tax collections to the Bellevue Convention Center Authority (BCCA) in support of Meydenbauer Center operations, by providing oversight of Meydenbauer Center and supporting Meydenbauer Center renovations activities.

Hotel/Motel Taxes

2007-2008 Work Initiatives

- Transfer hotel/motel tax to the BCCA pursuant to the Operating Agreement between the City and the BCCA.
- Act as liaison between the BCCA and the City.
- Annually update with BCCA staff the BCCA Finance and Insurance Plans.
- Monitor and report on BCCA financial activity and operations.
- Support Meydenbauer Center renovation activities.

Major Challenges for the Biennium

- Providing support to the Meydenbauer Center during the renovations planned for late 2006 and early 2007 which BCCA has determined are necessary to remain competitive in the current market.

City of Bellevue
2007-2008 Biennial Budget

Hotel/Motel Taxes Economic & Cultural Development

Program Statement

This program supports the City's economic and cultural development efforts by remitting hotel/motel tax collections to the Bellevue Convention Center Authority (BCCA) in support of Meydenbauer Center operations, by providing oversight of Meydenbauer Center, by acting as liaison between the City and the BCCA and by supporting Meydenbauer Center renovations activities.

Summary of Services Provided

Economic Engine

- One of the primary benefits Meydenbauer Convention Center provides to the community is economic impact. Events at Meydenbauer Convention Center bring people into the city which generates sales tax dollars for the region, stimulates employment, and increases business activity. Information obtained from the International Association of Convention and Visitors Bureaus (IACVB) is used to calculate the economic impact of Meydenbauer Convention Center activity. Based on the 2005 data the estimated economic impact attributable to Meydenbauer Convention Center activity was \$17.8 million in 2005, which was \$3.3 million above target.

Competitive Position in the Market Place

- Meydenbauer Convention Center's coverage ratio (ratio of operating revenues to operating expenses) for 2005 was 85%, exceeding its target of 82%. This rate compares favorably to the industry norm, which ranges from 65% to 75%.
- Meydenbauer Convention Center continues to achieve an exceptional customer service rating. Customers are pleased with staff, food and beverage services, as well as the quality of the facility. The 2005 rating met or exceeded the targets set for all aspects of customer service.
- The number of events held at the Meydenbauer Convention Center totaled 348 for 2005, exceeding the target by 7%. Several event categories met or bettered their targets, with the main Events category generating the largest increase over budget.

Community Events

- Attendance at the Meydenbauer Convention Center Theatre totaled 47,862 in 2005, which was 14% greater than budgeted. Performances, totaling 179, exceeded budget by 9%. The coverage ratio for 2005 activity was at 54% compared to 42% budgeted.

Maximizing Hotel Use

- Meydenbauer Convention Center generated 12,500 hotel room nights attributable to events held at the Center, representing a 69% increase over 2004 activity. This measure is based on actual room nights booked for specific conventions within a reserved block of rooms. This methodology does not capture room nights booked outside the block – such as bookings made through the internet, which are becoming more prevalent with the discount prices available.

Hotel/Motel Taxes Economic & Cultural Development

Issues related to Department Performance

Lodging Tax revenue collections continue to improve. The 2006 revenues are projected to exceed 2005 collections by 33% as a result of the addition of new hotels and increased activity. The 2007-2008 forecast projects revenues to exceed 2006 collections by 11% and 8% respectively due to new hotels and increased activity.

Program Notes

In June 2002, the City of Bellevue issued \$10.5 million in 30-year Long Term General Obligation (LTGO) bonds in order to redeem the original Bond Anticipation Note (BAN). The residual proceeds were held to finance the acquisition of a site for future expansion and/or to finance capital improvements. In June 2006 the City closed on the purchase; the property is adjacent to the Center and preserves the opportunity for future expansion of the Convention Center.

2007-2008 Biennial Budget**

Human Resources

Program Outcome Statement

Human Resources is committed to employees by providing outstanding customer service and stewardship of resources by attracting, selecting, and retaining a high performance, diverse workforce.

Services and Accomplishments

Human Resources (HR) provides services in Compensation, Health Benefits and Retirement, Employee Relations, Labor Relations, Staffing, Training and Organizational Development, HRIS/Technology, and HR Administration. HR roles include specialists and generalists, consultants, trainers, policy drafters and interpreters, service providers, administrators, facilitators and mediators, investigators, and historians in all service areas.

Compensation – The compensation system has been maintained and is current. The base salary compensation structure for all unrepresented classifications was adjusted by cost of living to maintain a competitive market position. Additionally, unrepresented classifications have been maintained so they accurately describe the current-day work activity performed in each classification.

- Training - In 2005–2006 training focused in meeting organizational business needs consistent with city-wide core values.
- Training was aligned to facilitate organizational change and enhanced through participant feedback.
- Continued with the Supervisory Pathways training program to reflect real-time HR issues and provide managers/supervisors with relevant skills they can use to effectively administratively manage their business process.
- Expanded the Employee Leadership Development program to a total of 11 modules and include skills that support business needs.
- Continued to enhance a comprehensive learning and development website and expanded the on-line registration for all HR training.
- Increased training program course catalog by 5%, 175 classes completed, 1,629 employees participated in the program
- Increased the use of the tuition reimbursement program participation by 25% in 2005 & 10% in 2006.
- Coordinated 14 Large Management Team Training Breakfast Networking events.
- Designed curriculum to assist the Development Services group in streamlining the performance management/improvement process.
- Facilitated 9 organizational development efforts in Team Vitality to City departments.

Organizational Development - Designed 17 employee development/career plans specifying competencies to be developed, showing linkage of competencies to business goals and measures, and individual growth goals and interests. Identified learning activities and outcomes needed to implement the plans, measures to evaluate the effective completion of the development cycle and specific support and guidance from managers to assure success.

Advanced Technology Changes – The following new technology initiatives were introduced by HR, with support from the IT Department as well as outside sources:

- JD Edwards (JDE) ERP – HR and Payroll went live June 16, 2005 as part of a city-wide update of Financial and HR/Payroll technology.
- Employee Actions – HR and Payroll reviewed and modified processes to work with changes produced by the JD Edwards implementation. A portal was created on the City's Intranet called 'Employee Actions' where process steps and an electronic email form allows employees and managers the ability to send data changes to HR and Payroll.
- JDE Reporting directory – HR and Payroll utilize the shared network drive 'S:' to securely post monitoring reports. This replaced manual printing and distribution by HR and Payroll of reports that departments utilize. Examples are Timekeeping hours audits, Employer Cost, Employee Roster, Upcoming and Overdue Performance Reviews, and Partially Benefited hours/date limits.
- JDE Upgrade to Enterprise One – JDE has been re-branded as Enterprise One and the upgrade will keep our technology current with future enhancements from Oracle, as well as create the platform to implement self-service for HR and Payroll.
- MEBT.ORG – Went live October 1, 2006. In response to MEBT participants, any employee, current or past, can log in to a website created in partnership with our third party vendor Trautmann. This website shows MEBT participants' daily account activity. In the past, participants had to wait at least a month past the end of every quarter to receive a statement of their account balance and performance.

Retirement:

- Performed a comprehensive review of service delivery, benefits and plan design for all seven MEBT cities. Developed short and long-term recommendations to reduce costs and improve services for participants;
- Changed to a new SAS 70-compliant data platform for the MEBT retirement system providing a higher level of internal control and data security and resulting in service enhancements including on-line and automated account information;

**City of Bellevue
2007-2008 Biennial Budget**

Human Resources

- Awarded a "clean" audit opinion for MEBT financial statements;
- Successfully transitioned over 600 accounts in the IRC Section 457 Deferred Compensation Program. Managed process to transition to a new vendor, Great-West Retirement Services;
- Implemented a loans program for Deferred Compensation participants;
- Increased the use of Retirement Planning Services through expanded services and expanded outreach;
- Continued to improve and expand the Retirement Education Program with updated training sessions and enhanced website information;
- Completed the PSERS implementation process and implemented a revised procedures manual;
- Implemented an improved system for calculating and tracking monthly fire pension payments;
- Assisted with complex actuarial studies to project future LEOFF I medical and Fire Pension obligations;
- Assisted with conversion to JD Edwards software.

Policies and Procedures Revisions – Updated, clarified, and/or finalized new policies in the Human Resources Policies and Procedures Manual.

Employee Benefits – The City of Bellevue has experienced some success in mitigating health care cost increases over the period from 2003 through 2006. Although health care costs continue to rise, these changes mitigated the increase by approximately \$2,500,000. The largest savings came from a change in physician networks and changes to the health plan.

The streamlined administration of health and welfare benefits continued, enhanced by efficiencies gained by electronic management of benefits data through Bellevue Online Benefits (BOB).

Benefit Program Compliance - In 2006, the self-insured employee medical benefits program was examined by the State of Washington Office of Risk Management. The examination performed tests of compliance with state laws and regulation and the City was found to be in compliance.

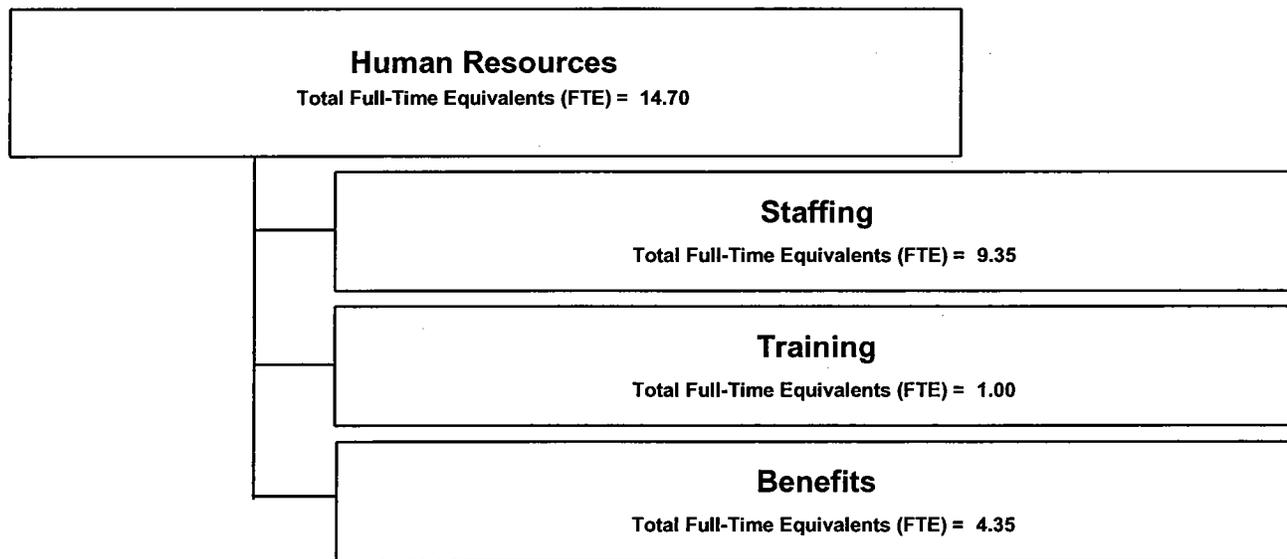

Communications – Created health and welfare benefit information packets for new hires. The contents are reviewed during the new hire orientation session, Bellevue Beginnings, which is held twice a month.

Wellness Program - the City's Wellness Program aimed at promoting healthy lifestyles and emphasizing the City's core value of "Commitment to Employees" continued in 2005 and 2006. Programs included Weight Watchers at Work; flu shots and health screenings at the benefit fair held in conjunction with the Employees Picnic.

Recruitment

- Handled a variety of recruitments, advertised in diversity publications, and worked with organizations that target minority candidates.
- Conducted five director-level recruitment processes in which appointments to the positions were made.
- Continued to work with Bellevue Community College during mock interviews with English as a Second Language students.

**City of Bellevue
2007-2008 Biennial Budget**

Human Resources

2007-2008 Work Initiatives

Compensation

- Continue to maintain a current system and perform market studies as directed.

Benefits

- Continue to study ways to slow down the rapid acceleration of health benefits costs.
- Plans for 2007 include moving the prescription drug business for the City of Bellevue's self-insured plan from RxAmerica to Medco.

Labor

- Complete negotiations on five labor agreements expiring in 2006 and three labor agreements expiring in 2007. Successfully implement the terms of the agreements.

Training, Organizational Development, and Communication

- Implement and pilot video streaming for compliance training offered via the Intranet.
- Enhance the long-term strategy for the career development of City employees, in conjunction with the citywide training group and departments.
- Deliver centralized all-employee and supervisory training programs, and evaluate for effectiveness and improve accordingly.
- Re-design the tuition reimbursement policy to enhance participation and explore raising the allocated limits due to rising tuition rates.
- Enhance the Management Leadership Training Program (MLTP) to include 10% leadership skills training.
- Develop a program for managers/supervisors to assist employees in mentoring opportunities.

Staffing and Employee Relations

- Regularly review, update and communicate changes to the Human Resources Policies and Procedures Manual.
- Track and analyze new hire trends, existing employee data, and turnover trends and communicate the results to appropriate personnel.
- Track various employee relations in order to analyze and compare with past practices as needed.
- Overhaul HR intranet utilizing the new City standard of the SharePoint product.
- Update the Online Job Application system to provide enhanced services to job applicants. Potential capability would include packaging the technology and marketing to other cities (eGov alliance model).
- Implement self-service functionality in Enterprise One (formerly JDE) for Employees and Managers.
- Ensure compliance with City's standard for securing private electronic HR/Payroll data.
- Policy and Procedures Manual and Civil Service Manual – Publish manuals utilizing electronic document management system to provide full text search capability, change tracking and storage of revised and original documents.

Retirement

- Evaluate and implement the Pension Protection Act.
- Evaluate and implement Phase II recommendations for benefits, plan design and governance resulting from a comprehensive review of service delivery, benefits and plan design for all seven MEBT cities.
- Continue to improve retirement education program and access to retirement resources.
- Continue to evaluate providing dental services for retired LEOFF I members.
- Evaluate fees and fee structures for the MEBT and IRC section 457 deferred compensation retirement plans consistent with Department of Labor requirements.
- Work with the Investment Advisory Committee and the MEBT investment advisor to evaluate alternate investments for MEBT.
- Evaluate benefit package for Survivor Life and Long-Term Disability.
- Continue to manage Request for Proposals and selection for 8 service providers and 12 investment managers to assure optimal service and cost for retirement program participants.

Major Challenges for the Biennium

- Ensure JD Edwards system is functioning to its fullest potential, self-service is implemented, and the online application
- Monitor and manage rising health benefits costs and present alternatives to help control costs.
- Ensure labor negotiations are conducted and agreements reached whenever possible.
- Oversee significant changes to any of the retirement programs and identify alternatives to minimize any administrative fees.
- Continue to provide excellent customer service in the areas of training and development, recruitment and selection, employee relations, and general support.

**City of Bellevue
2007-2008 Biennial Budget**

**Human Resources
Training**

Program Statement

It is the mission of Organizational Development and Training to provide the highest quality training and development opportunities to all City employees. These development opportunities enhance the core competencies critical to the continued success of the City of Bellevue and to the personal and professional development of each individual. We focus on providing tools, resources and services that help employees in their pursuit of continuous learning. We design, develop and deliver a broad array of programs that support leadership development and strategic culture change, as well as courses that improve technical and management skills.

Summary of Services Provided

This program includes all activities relating to providing centralized internal and external training, organizational development, and regular communications to employees.

Budgeted Cost Summary		FY 2005 Budget	FY 2006 Budget	FY 2007 Budget	FY 2008 Budget

# of hours spent delivering training sessions	#	Workload	312	300	375	375

Issues related to Department Performance

In 2005, 63 training classes were facilitated and/or coordinated providing employees training in the following disciplines: Employee Leadership Development, Manager/Supervisor Skills enhancement, Recognizing Workplace Harassment in a Diverse Workforce, Workplace Violence Prevention, Business Writing, Building Working Relationships and Career Development for a total of 750 registered participants. These programs continue to attract an audience and will continue to be a part of the training plan during 2006. In 2005 several challenges were encountered due to the pending move to New City Hall. Specifically, 16 programs were cancelled during the Fall while planning for the move and when the move was postponed rescheduling was not an option due to lack of training room availability.

Program Notes

Human Resources staff will continue to design, publicize, schedule, and deliver high quality, cost effective programs based on employee/management training needs. It is the mission of the organizational development and training process to provide the highest quality training and development opportunities to all city employees. Programs enhance the core competencies critical to the continued success of the City and to the personal and professional development of each individual.

City of Bellevue
2007-2008 Biennial Budget

Human Resources Staffing

Program Statement

The City strives to achieve a balanced workforce reflective of the gender, ethnic, and cultural mix of the local labor market. Activities are also undertaken to assure compliance with all applicable federal, state, and local laws, city policies and procedures, and union contracts.

Summary of Services Provided

This program includes recruitment and selection, equal employment opportunity & affirmative action, civil service, drug testing, employee leaves, policies and procedures interpretation, workforce planning, counseling/coaching managers and employees on employee relation issues, investigations, performance management, compensation administration, job description and classification reviews, internal and external salary surveys, data entry and verification, technology projects, all activities relating to labor relations (mediation, contract negotiations, interpretation, arbitration, and grievance administration), HR technology, and HR administrative support.

City of Bellevue
2007-2008 Biennial Budget

Human Resources Staffing

Issues related to Department Performance

The soft hiring freeze was lifted in the first quarter 2005 which resulted in a slight increase in recruitments. The slow increase did not reach the projected recruitment number because managers were still mindful of fiscal concerns and using savings from open positions. Even though the recruitments increased, it is interesting to note that the total number of applicants decreased. The reason for this applicant decline was primarily due to the job market shifting from an employer market to an employee market and most of the open positions for 2005 were professional or technical positions and 19% of these positions were limited term (LTE), which generally brings a smaller applicant pool.

Recruitment & Selection

In 2005, HR still had targeted 4 weeks to fill a vacancy. HR has control over when the recruitment process starts and we attempt to post a position within 24 hours after approval. Once the process starts, HR no longer has control over the duration of the recruitment, which is then in the control of the hiring managers. The average length of time to fill a position remained the standard 8 weeks for various departmental reasons, the most common being workload issues for hiring managers and staff.

Although the HR staff did not attend any job fairs in 2005 they did attend several diversity events where they spoke to and encouraged people to apply. A Senior HR Generalist is a member of a Diversity Task Force and regularly sends out job announcements through this network. We continue to run periodic announcements in diversity publications and focus on other less visible outreach efforts.

Compensation

Compensation-related work remained focused on providing comparable salaries and benefits to City employees. The City's compensation policies, procedures, and administration of compensation continue to adhere to the following organizational principles:

- Support the City's Core Values;
- Attract and retain employees to support the City's business strategy;
- Ensure internal consistency of job classifications;
- Pay fairly, but control costs;
- Continually build a high-performance culture.

Labor Relations

The City has eight labor contracts. All were settled short of arbitration during the last round of negotiations. Five will be expiring at the end of 2006 and the remaining three will expire at the end of 2007. For the 2006 contract negotiations, the escalating cost of providing health care and the associated cost containment measures needed by the City will continue to be the primary driver of talks.

Program Notes

The Human Resources Department will continue to work closely with both management and staff to foster a positive, accepting work environment which is effectively aligned with the City's strategic direction.

**City of Bellevue
2007-2008 Biennial Budget**

**Human Resources
Benefits**

Program Statement

The City of Bellevue's health and welfare and retirement benefit programs are strongly committed to excellence. Benefit programs are designed as part of an employment package intended to attract and retain employees with benefits that are reasonably competitive among comparable employers.

Summary of Services Provided

The health and welfare and retirement benefits programs provide to eligible employees of the City health insurance for medical, dental, vision, and life insurance, and retirement savings plan. This program also includes all activities relating to health benefits administration, retirement services administration, and oversight of the employee assistance and wellness programs.

Budgeted Cost Summary	FY 2005 Budget	FY 2006 Budget	FY 2007 Budget	FY 2008 Budget

City of Bellevue
2007-2008 Biennial Budget

**Human Resources
Benefits**

Issues related to Department Performance

In response to escalating health costs, the City has implemented health plan design changes. Employees will share a greater percentage of health insurance premiums in 2006, as well as paying more in the form of co-payments for services. HR staff carefully monitored medical claims experience in 2005. Evaluation of current benefits programs is ongoing to determine if new plan options would be effective in supporting cost containment efforts.

**City of Bellevue
2007-2008 Biennial Budget**

Information Technology

Program Outcome Statement

The mission of the Information Technology Department (ITD) is to use technology to enhance community participation and provide exceptional public service.

Services and Accomplishments

The service goals of ITD are:

- Bring City services to customers' doorsteps;
- Make information easily and broadly available;
- Promote active community involvement and participation;
- Facilitate affordable high-speed connectivity solutions throughout the community;
- Play a leadership role in utilizing technology to enable regional service delivery;
- Strengthen operational efficiencies;
- Leverage investments to improve the quality of service.

Awards:

- In September 2005, the City of Bellevue's television show, "It's Your City", received a 2005 Government Programming award at the 20th Annual National Government Programming Awards Ceremony from the National Association of Telecommunications Officers and Advisors (NATOA);
- In October 2005, the City received a "Gold Award" for our video "Destination Downtown" in the category Video/Film/Internal Communications from the MarCom Creative Awards (an international awards competition that recognizes outstanding achievement by marketing and communication practitioners). The video "State of the City" won an Honorable Mention in the category of Annual Report/Government;
- In November 2005, the City of Bellevue's television show, "It's Your City", received an award from the International Association of Emergency Managers (IAEM) for communications related to emergency preparedness, focusing primarily on earthquake preparedness;
- In December 2005, the "Downtown Bound" video won an Award of Distinction from the Communicator Awards. The Award of Distinction is awarded for projects that exceed industry standards in production or communication skills;
- In May 2006, the eCityGov Alliance was one of 18 finalists for the Harvard Innovations Award recognizing its efforts to collaborate on common and cross-boundary services;
- In June 2006, the Regional Fiber and Conduit Consortium received the Municipal Achievement Silver Award from the Association of Washington Cities for the partnership to expand the fiber network on the Eastside;
- In August 2006, the City of Bellevue's television show, "It's Your City" was awarded 1st Place in the Magazine Format Series category at the National Association of Telecommunications Officers and Advisors (NATOA) Government Programming Awards. The City of Bellevue story about the Cascade Water Alliance won an Honorable Mention.

Additional eCityGov awards and recognitions include:

- IG Innovations Award for MBP.com
- Government Technology, Best of the Web, honorary mention
- Finalist for WSA government award
- ICMA intergovernmental cooperation award

Information Technology Accomplishments:

Direct Public Service

- Created a City Wide Roster web application that allows businesses to apply for the City Wide Roster. The roster facilitates the ability to procure services from over 1000 pre-qualified vendors;
- Added online sports scheduling capability to Bellevue Parks Online to make it easier for teams and sports organizations to schedule venues;
- Launched the Real-Time Traffic Map to allow drivers to see current congestion of arterial roads and plan accordingly. This map is one of the first in the nation to show city arterial traffic;
- Implemented the Online Crime Map as a service to citizens and media showing where criminal activity happened in the City;
- Redesigned the City's website as a primary communication vehicle, to increase user satisfaction and to organize content around user needs rather than the city governmental structure.

Information Technology

Improved City Operations

- Detection Database – Created an application for the Tax Office that will help identify businesses that are not paying the City's B&O tax. Over \$350K has been collected to date;
- Videostreaming Training Module – Implemented "on demand" video training module that allows delivery, testing and tracking of training materials to fit the employee's schedule and avoid taking personnel out of service for training;
- Electronic Content Management – Provides electronic storage and retrieval of documents. This system went "Live" early 2005. Since that time over 550K documents have been scanned and are stored in the system. This represents over 48 document types including complete annexation history, contracts from 2003 forward, 50 years of Council & all Boards and Commissions minutes, over 5K ordinances, over 7K resolutions, etc;
- Enterprise Point of Sale – Implemented in August 2005, this system enhances customer service by facilitating payment for services in a variety of methods that are convenient for our customers. This system is also enabling the decentralization of our cashiering function, allowing customers to come to a single location to receive city services and make payments. This project is almost complete;
- ERP – The Payroll, Human Resources, and Timekeeping module was successfully implemented July 2005. This initiative eliminated a redundant time-keeping system, eliminated some redundant data entry, streamlined data flow between HR and Payroll eliminating redundancies and increasing accuracy of data, and improved security and internal controls through both process and system changes;
- GIS Analysis Projects –Updated 2005 Orthophotos and supported projects such as critical areas update, state of mobility study, georeference standards for electronic submission, and pipe age analysis to guide planning and decision making;
- Continued to add features and data layers to Mapster, the City's GIS self-service tool, so staff can query data and maintain data such as city-owned lighting;
- Upgraded desktops to Microsoft Windows XP and Office 2003 providing for improved security, enhanced tool set and functionality for electronic forms, and increased collaboration;
- Motor pool Reservation – Created an Intranet application that allows staff to reserve motor pool vehicles. This optimizes the use of the motor pool and allows a reduction of the number of vehicles at new City Hall;
- Multimedia Services – Successfully established multimedia services as the city-wide multimedia production and delivery resource for department content managers and message owners by providing state-of-the-art multimedia, facilities, equipment, and expert assistance from a single point of service in ITD;
- Completed implementation of the Public Safety Wireless system to allow wireless dispatch and automatic vehicle location. Over 100 Bellevue Police and Fire vehicles were installed with mobile computers. In addition, Fire vehicles in Kirkland, Redmond, Mercer Island, Woodinville, and Eastside Fire and Rescue received mobile computers through Homeland Security grant funding. This allows mutual aid response to be more effective.

IT Infrastructure

- After years of thorough planning, smoothly executed technology move into new City Hall in February 2006;
- Planned and moved 911 Communications Center into new City Hall in April 2006. Execution of move went as planned with no disruption to 911 call response;
- Implemented new Parking, Security and electronic signs systems for new City Hall.
- Disaster Recovery – made steady progress toward ensuring technology resources would be available post-disaster to assist the organization and community: updated and expanded back-up data and storage capabilities, updated and tested recovery plans for mission critical applications, etc.;
- Performed an independent security penetration test of the City's data network to find any security holes in our systems and firewalls. No vulnerabilities were found;
- Implemented a Storage Area Network to better manage file and e-mail storage and provide redundancy in the event of a failure;
- Installed a voice over IP (VoIP) phone system for 20% of the staff. VoIP allowed a phased move of staff to New City Hall prior to the move of the main phone system.

Regional Partnerships

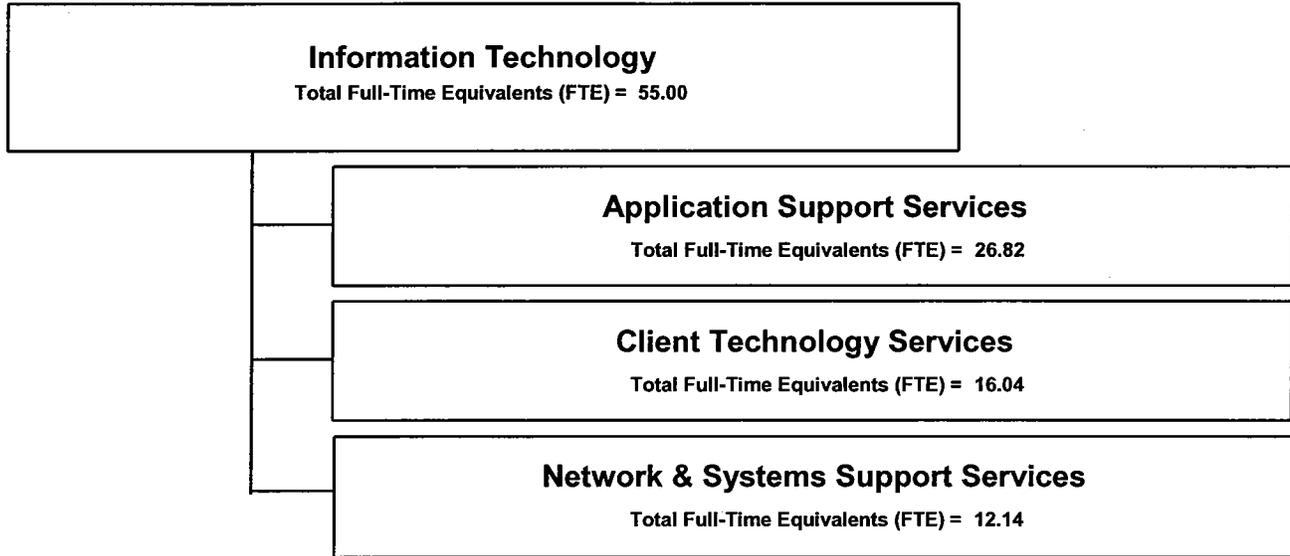

- The Regional Fiber and Conduit Consortium added additional members and expanded its regional reach – new members are the City of Renton, Renton School District and Bellevue Community College. They join the City of Bellevue, City of Kirkland, University of Washington, Bellevue School District, Lake Washington School District, Overlake Hospital and Evergreen Hospital. Work is underway to extend the fiber infrastructure south from the Bellevue City Hall to Renton City Hall and to connect BCC's two Bellevue campuses to the Bellevue City Hall data center;

City of Bellevue
2007-2008 Biennial Budget

Information Technology

- eCityGov Alliance accomplishments include:
 - MyBuildingPermit.com;
 - Launched Snohomish County on time and on budget;
 - Launched on-line permit status checking and listserv to better communicate with customers;
 - Completed real-time integration with three cities that reduces their staff's time to enter permit application information in their systems;
- MyParks and Recreation.com:
 - Launched online multi-city search functions in June 2005 with online registration;
 - NWMaps.net;
 - Made online mapping and related data available to the public in July, 2005.

City of Bellevue
2007-2008 Biennial Budget

Information Technology

2007-2008 Work Initiatives

Direct Public Service

- Incrementally deploy a city-wide wireless network that allows the City to improve connectivity for its mobile workers (Police, Fire, inspectors, field crews, etc.) as well as allows private sector business to deliver internet access to the public.
- Propose broadband solutions that create true choice and an open and competitive environment, that support major institutions, address needs of small and medium business, and respond to needs within neighborhoods.
- Continue to enrich websites and applications to provide relevant and timely information and communication with citizens.
- Improve service to citizens through the creation of an on-line self-service portal that will allow users to submit and track requests for service.
- Implement a system that will allow citizens to make on-line payments for Utility bills, view accounts on-line, etc..

Regional Partnerships

- Continue participation in the eCityGov Alliance to provide web applications that serve common customers across many jurisdictions. Planned projects include an on-line job application, a human services portal, business license portal, and adding additional on-line permit types. The organization will continue to add new cities and counties that enhance the value of the applications for existing partners and for the community of users.
- Plan and begin implementing the technology needed to support Northeast King County Regional Public Safety Communications Agency (NORCOM).
- Offer data center co-location services to regional partners to provide disaster recovery and backup facilities. This will result in greater regional resiliency in the event of a major catastrophe.
- Continue to expand the Eastside fiber network in partnership with neighboring cities, school districts, universities and hospitals.

Operational Efficiencies

- Implement an electronic content management system to ensure successful management of electronic records that complies with records retention rules.
- Upgrade our Maintenance Management system to facilitate operational best practices including: predictive maintenance, condition-based maintenance, failure criticality analysis, and annual work plans.
- Continue to improve the City's ERP system, primarily in the areas of self service (allowing employees to initiate and complete more transactions which improves efficiency), improved reporting (making it easier for managers to quickly monitor financial performance that is relevant to their area of control), and timekeeping (to eliminate some areas where we still have redundant data entry).
- Complete major upgrades of Microsoft Office, Windows and Internet Explorer to maintain high levels of security protection and minimize maintenance time and cost.
- Optimize IT operations through adoption of Information Technology Infrastructure Library (ITIL) best practices.
- Continue to institute security standards and practices that ensure compliance with credit card industry requirements, protect the City's critical data, and safeguard the City's technology infrastructure.

Major Challenges for the Biennium

- The accelerating economy increases demand for service, products and skilled employees in the market, which impacts pricing and recruitment making both more expensive.
- Intellectual property issues, mergers and acquisitions and the general volatility within and among technology companies present an ongoing challenge to accomplishing long term strategies in tactically efficient ways.
- The rapid pace of change within the technology industry and continued pace of innovation within the organization continue to require that IT remain agile and strategic in how we approach requests for service.
- Threats from spam, viruses, and hackers continue to grow and change rapidly. The focus on security is relentless.
- The desire to be "always connected" and to have access to business systems and needed information anywhere and anytime continues to push the boundaries of the City's network and ITD responsibilities.
- Institutions that are vital to the community's economic development future will need increasing access to affordable high-speed internet bandwidth in order to enable next-generation health care and education service delivery systems.

**City of Bellevue
2007-2008 Biennial Budget**

Information Technology Application Support Services

Program Statement

- Facilitate process improvements by consulting with departments to analyze their business processes and information requirements, identify opportunities for efficiency gain and service improvements.
- Partner with outside agencies including businesses and other governments to develop and implement solutions to achieve savings and improve service delivery for all. This includes application procurement and development as well as regional data coordination and sharing.
- Leverage technology to increase data accuracy, improve staff efficiency, and eliminate data redundancy.
- Work with departments to develop, prioritize, and establish information technology projects that support the City's business and service delivery strategies.
- Establish standards and policies for project management, applications procurement, implementation, development, and maintenance. Identify and address training and knowledge needs. Select tools for implementing new applications and develop repository of best practices for project management, system implementation, development, and maintenance.

Summary of Services Provided

This program is responsible for the procurement, development and ongoing maintenance of computer applications to ensure that consistent and cost-effective technologies are applied to the delivery of municipal services.

Issues related to Department Performance

New application initiatives and upgrades continue to be analyzed for potential use in a regional system.

- The emergence of new technologies that enable access to information and business processes from any device at any location and at anytime are adding complexity to the current environment. Web and wireless modules are increasingly common additions to traditional client-server applications. In addition, integration tools are needed to support business processes that span many applications. These systems require high levels of IT skill to implement and maintain. This reinforces the need to emphasize managing our technology portfolio from an enterprise perspective.

- The move to the New City Hall has limited our ability to provide proactive consulting services over the last biennium. This will be a focus area over the next two years in order to help departments make operations improvements.

City of Bellevue
2007-2008 Biennial Budget

Information Technology Client Technology Services

Program Statement

- Develop and maintain desktop-related standards and procedures that meet user needs, minimize costs, and are consistent with industry best practices.
- Establish a technology asset management function within Desktop Support Services that will track technology inventory, maintain a desktop financial portfolio, as well as house consolidated contract and licensing information.
- Provide desktop security that protects technology assets while optimizing use of automated tools.

Summary of Services Provided

Provides direct support and service for all automated desktop equipment. Service delivery goals include optimizing use while minimizing cost, maintaining and replacing equipment in the most cost-effective manner possible, and providing a secure environment within which the City can safely conduct business. Service delivery is structured around single point of contact. Services provided include development and maintenance of hardware/software standards, centralized procurement, trouble shooting/repair, installation, training, desktop management, security patching, upgrades and technology asset management.

Issues related to Department Performance

- Increases in the types of equipment and remote worker environments are adding complexities to the support environment.
- Increasing security requirements for data protection impact the costs associated with support and purchase of software and hardware.
- Increasing workload relating to the use of technology services for data analysis and web-enabled technology are putting pressure on existing support staff to meet departmental needs and critical deadlines.

*Normal problems encountered in the implementation of new systems are expected to impact overall customer satisfaction.

Program Notes

Total Life-Cycle Cost of Ownership is intended to capture fully-loaded enterprise costs of each personal computer. This information will be collected using an accepted industry standard methodology and be the basis for assessing the City's personal computer investments.

City of Bellevue
2007-2008 Biennial Budget

Information Technology Network & Systems Support Services

Program Statement

- Ensure resiliency in an 'always on' network relied on by critical infrastructure, operations and services.
- Address network storage, backup, and data protection needs.
- Explore and facilitate partnerships to leverage city assets and expand network options for schools and hospitals.
- Improve disaster recovery capabilities, plans, and procedures.
- Provide disaster recovery data center space for regional partners.

Summary of Services Provided

The City operates a complex voice and data communications system comprised of an internal telephone system, numerous central computers, and the cabling and equipment necessary for communications. This program is charged with the maintenance and operation of this network, security of City systems, and protection of electronic data.

Information Technology
eGov Project Management FTE

Enhancement: ITCBA03

Enhancement Description

Position Description:

Project Manager for on-going Alliance work programs, as well as a potential new project with the state. It is anticipated that 50% of the position would be dedicated to the business licensing project, and the remaining 50% would be dedicated to other Alliance projects:

- MyBuildingPermit.com
- MyParksandRecreation.com
- NWPProperty.net
- NWMaps.net
- Human Services Portal (in planning)

Justification:

The eCityGov Alliance adopted 2007 budget includes 50% funding for a project management position. Each Alliance partner city will be including the updated annual fee as part of their annual budget recommendations.

In addition to the proposed Alliance funding, the Governor's Office of Regulatory Assistance has included \$55,000 annually in the 2007-2008 budget to fund 50% of a project management position for the Alliance. The position would be responsible for coordinating work on the state's business portal project, specifically business licensing.

State/Federal/Industry Mandates

Goals and Objectives

The City of Bellevue is the IT and fiscal host for eCityGov Alliance, an interlocal agency. One element of that responsibility is providing resources in response to recommendations and funding provided through the Alliance Executive Board.

Consequences of Not Funding

The Alliance alternatives should this position not be funded would include:

- Reduction/elimination of project(s) scope and scale;
- State hired project manager (50% FTE) only;
- Find a resourcing alternative, such as contracting for the work through a third party vendor or an Alliance partner city;
- Find an Alliance partner city other than Bellevue willing to serve as the fiscal host.

Equipment Requirements

No capital outlay required

M&O Community Needs Ascertainment

Enhancement: 0900001

Enhancement Description

The current Comcast cable franchise will expire in July 2009. As part of the renewal process the City must undertake a Community Needs Ascertainment (CNA). The CNA includes assessing the legal, technical and financial abilities of Comcast to perform their responsibilities as a franchise holder. This entails surveying all stakeholders in the City, reviewing the plant of facilities, conducting an audit and holding community meetings. A one-time increase in budget authority was approved for the last audit period, performed in 2003.

State/Federal/Industry Mandates

The Federal Communications Commission's Telecommunications Act of 1996, establishes a 36 month window for a franchise renewal. The Act establishes guidelines for evaluating the cable provider and the CNA is the means to complete the evaluation.

Goals and Objectives

Consequences of Not Funding

The Federal Communications Commission's Telecommunications Act includes establishing guidelines for the franchise renewal process. By not conducting a CNA, the City loses its ability to justify the needs of stakeholders. If the City fails to conduct an audit, we would lose the opportunity to review years for underpayment. If the City opts not to renew our cable franchise and we are challenged in court, we would have no recognized basis for rejection.

Information Technology

M&O ECM Project

Enhancement: CCOCIP02

Enhancement Description

Ongoing M&O related to ECM Project. ECM is a bundle of integrated records management applications that provide structure and continuity to management of the City's information and records as well as providing business process improvement tools. M&O costs associated with this system include ongoing staffing for ITD systems operations (1 FTE) and for CCO business management and process improvement (.44 FTE). Additionally the M&O costs include software and hardware maintenance, software replacement, as well as 200 hours per year of specialized vendor services.

State/Federal/Industry Mandates

The City will be unable to meet State-mandated record keeping requirements for electronic records and will lose the opportunity to adopt an enterprise, cost-effective solution to address customer service and records management needs. Additionally, this system reduces legal risk (public disclosure/discovery and legal holds).

Goals and Objectives

This project furthers the City's ability to achieve the complimentary visions of "One City" and Service First through providing easy access to records and information by public and staff. It provides efficiencies in City operations by providing tools for business process management and interdepartmental collaboration and helps to achieve compliance with state and federal records laws. It aligns with the City's core values of exceptional public service, stewardship, and innovation.

Consistent with organizational values

- Non-"siloed" access to information (enterprise approach)
- High priority for working together (collaboration)
- Continuous improvement (Business Process Improvement - BPI, automated workflow)
- Information sharing between systems (integrations with JD Edwards, Amanda, GIS, Microsoft Office, etc. and federated search across all integrated systems)

Consequences of Not Funding

The current contract with the service provider (host) ends at year-end 2006, with the option to renew for one additional year. Should the City not continue the outsourced solution or buy the system and implement in-house, the current investment and all the electronic content in the repository will be lost. The City will be unable to meet State-mandated record keeping requirements for electronic records and will lose the opportunity to adopt an enterprise, cost-effective solution to address customer service and records management needs.

City of Bellevue
2007-2008 Biennial Budget

Miscellaneous Non-Departmental
Fire Academy Costs (funds held in MND)

Enhancement: Fire 06

Enhancement Description

The Fire Department's workforce is aging. Over the next five (5) years, 33% (73) of department employees will be eligible for retirement. This turnover will impact the department in the following areas: 1) Increased need for overtime to meet minimum staffing levels; 2) Increased hiring and recruitment expenditures; 3) Increased need for specialized training for new personnel assigned to the Lightforce companies at Fire Station 3 and Fire Station 7; and, 4) Increased need for employee development. Turnover will have a significant impact on the leadership of the organization and additional training will be necessary to prepare department personnel to assume new leadership roles.

In order to maintain current emergency service levels the Fire Department is requesting additional funds to pay for increased costs associated with hiring and initial training of replacement personnel.

To fill current vacancies, as well as projected vacancies due to anticipated retirements, the Fire Department will need to conduct two (2) Recruit Firefighter Training Academies per year beginning in 2007. It is likely that two Recruit Firefighter Training Academies will need to be held each year for the next several years to replace retiring firefighters who were hired during the 1970s and 1980s.

The Bellevue Fire Department has been conducting its own recruit academies since its inception in 1965. The expenditures associated with conducting one recruit academy is imbedded in the fire department budget. Anticipated retirements will likely require that we conduct two Academies per year to maintain minimum staffing levels. While other departments around the area and across the State utilize the State Fire Training Academy, Bellevue, like most of the other urban fire departments, recognize that additional training is necessary to address the issues of a more complex community and the need for more comprehensive Standard Operating Procedures.

The Bellevue Fire Department has a rich tradition of investing in the recruitment, hiring and training of its own employees. This early investment has paid dividends when viewing performance, the lack of regular major discipline problems, reduced liability and exposure for the City, and excellent support from the community. The ability for the Department to witness and closely supervise recruit firefighters from their first day of employment allows the Department to more accurately evaluate their suitability and professional abilities. To placate this responsibility to another entity would deny the organization the opportunity to monitor the professional development of the employees and impress the importance of culture, service and tradition that is done during the academy process.

The Recruit Firefighter Training Academy (Academy) is a comprehensive program involving 12 weeks of classroom and field exercises. The training is required to meet minimum State standards and prepare the recruits to provide essential fire department services to the public. Due to the size of these classes it is necessary to assign two full-time Officers and one Driver/Operator to the Training Division on a 40 hour week basis to teach the Academy. The instructors are re-assigned from their regular firefighting duties to the Training Division for the duration of the Academy. This requires overtime to 'backfill' for these Officers and Driver/Operator during their 3 month absence from 24 hour shift work.

In addition to overtime expenditures, the Department is requesting funding for the recruit selection process and uniform expenditures associated with the need to hire and train an increased number of personnel.

State/Federal/Industry Mandates

WAC 296-305 requires the Fire Departments to provide training for their employees commensurate with the duties they are expected to be engaged in on the fire ground.

Goals and Objectives

In order to maintain current emergency service levels in the Fire Department, additional funds are needed to pay for costs associated with hiring and initial training of replacement personnel. This is due to higher than normal anticipated levels of retirement, resulting in the need for an additional fire academy.

Consequences of Not Funding

Minimum staffing and service levels would need to be maintained by paying personnel at the overtime rate of pay. This would increase overall expenditures for fire department services.

Equipment Requirements

Uniforms, individual safety equipment, and SCBA face piece.

Office of Economic Development

Program Outcome Statement

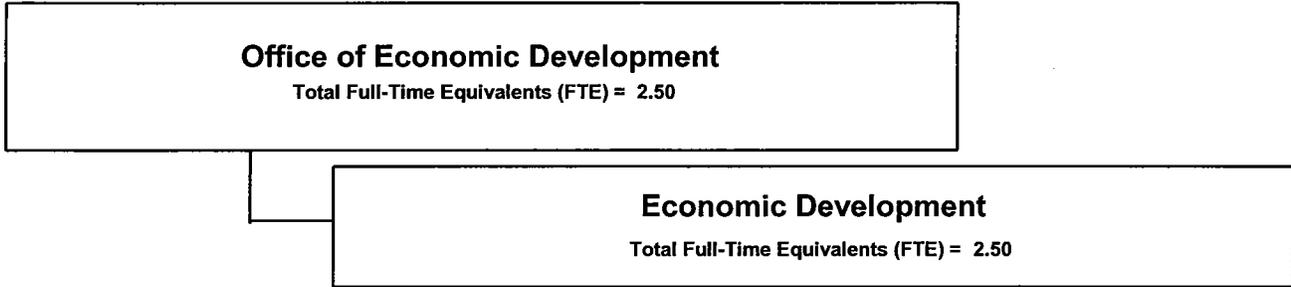

The Office of Economic Development seeks to enhance and further develop a thriving and sustainable Bellevue economy through targeted economic development strategies.

Services and Accomplishments

During 2005-2006, the Office of Economic Development:

- Handled over 150 business inquiries per year;
- Improved the liaison with Bellevue business organizations;
- Improved the liaison with regional economic organizations;
- Increased city sponsorships;
- Addressed the redevelopment of small neighborhood centers;
- Increased involvement in international trade programs;
- Met with the White House Commission on Asian Americans and Pacific Islanders.

Office of Economic Development

2007-2008 Work Initiatives

As a newly created office, the Office of Economic Development will seek to expand its capabilities by developing a:

- Tourism Action Plan;
- Integrated Marketing Action Plan;
- Small Business Outreach Program;
- International Trade Action Plan;
- Demographic and Economic Data Program;
- An Economic Development Grants Program;
- Internal Marketing Program;
- Improved economic development website.

In addition the Office will:

- Sustain good relationships with business economic development organizations and public economic development organizations;
- Continue business ombudsman services;
- Complete work on Lake Hills Center redevelopment, King County Solid Waste Factoria site, King County CBD Metro site, KG development, COSTCO development, 1020 theater, Newport Hills Center redevelopment, possible sports arena, Meydenbauer Bay waterfront project.
- Meet and exceed performance measures.

Major Challenges for the Biennium

The Office of Economic Development does not anticipate any major challenges for the biennium.

City of Bellevue
2007-2008 Biennial Budget

Office of Economic Development

Promote Business Growth

Enhancement: CMOCA01

Enhancement Description

This budget proposal includes resources for several economic development initiatives.

State/Federal/Industry Mandates

N/A

Goals and Objectives

Expansion of the role and activities of economic development is an initiative of both the City Council and City Manager. Stated goals include greater coordination of economic development activities with the private sector, and improved representation at the regional and local level. While there is no requirement resulting from interlocal agreements for economic development, expanded funding will allow for better participation and greater scrutiny of those interlocal agreements with such groups as the Trade Development Alliance, Enterprise Seattle, Puget Sound Regional Council, Economic Development District, Chamber of Commerce, Meydenbauer Center, Bellevue Downtown Association, Bellevue Economic Partnership and Bellevue Entrepreneur Center. This increased funding enables the Office of Economic Development (OED) to better implement the comprehensive plan policies relating to economic development. The goals relating to job and business opportunity, maintaining a strong tax base, leveraging Bellevue's locational and market advantages, and providing ED services will be better served with the proposed expanded funding.

Consequences of Not Funding

Other cities within the region have developed or are developing a variety of economic development programs.

2007-2008 Biennial Budget**

Parks & Community Services

Program Outcome Statement

Mission:

A healthy community through an integrated system of exceptional parks, open space, recreation, cultural and human services.

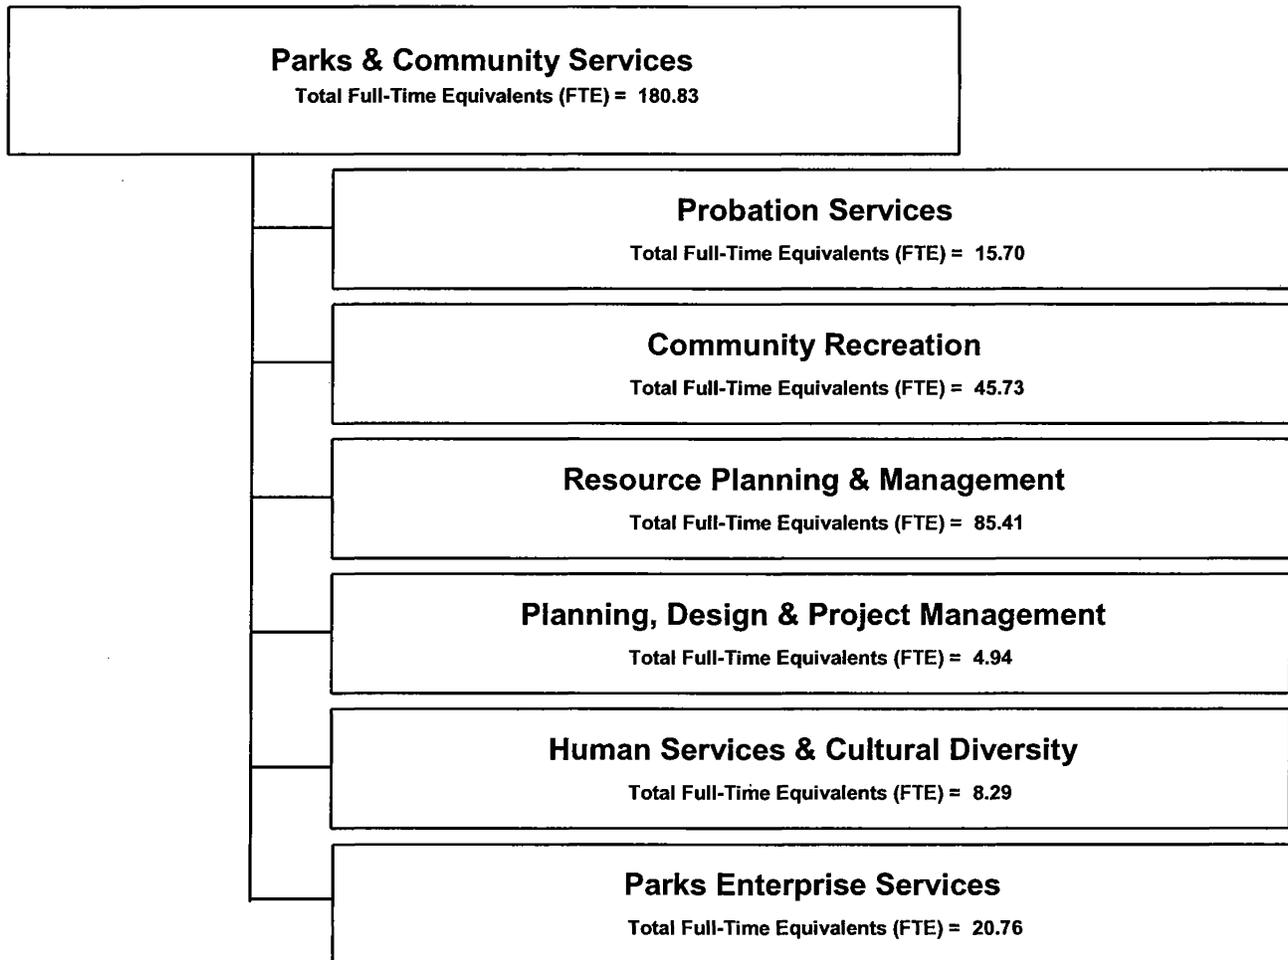

Goals:

- Plan, acquire, design, and develop a coordinated park system which satisfies the community's open space and recreation needs, and anticipates future park demands as the community grows and matures;
- Provide clean, safe, attractive and functional parks, open space, and recreation and municipal facilities while protecting the City's capital investments through ongoing maintenance and systematic renovation;
- Help reduce crime and antisocial behavior by providing/supporting prevention and intervention services such as domestic violence and sexual assault counseling, child abuse prevention, probation services, and youth programs such as day camps, after-school, and youth leadership programs;
- Work with the City's diverse population and community organizations to assist people in need of critical emergency services related to food, clothing, and shelter; transitional services related to housing, employment, and counseling; long-term assistance with care for low-income children; and services for the elderly and people with disabilities;
- Through partnerships and collaborations, provide Bellevue citizens with opportunities for recreation, socialization, skill development and education in order to enhance physical and mental health.

Services and Accomplishments

2005-2006 Accomplishments

- Department Accreditation and Gold Medal Award – In 2005, the Department completed the agency accreditation process and became one of 55 organizations nationwide that meet the professional standards of the Commission for the Accreditation of Parks and Recreation Agencies (CAPRA). In addition, the Department was awarded the prestigious Gold Medal Award by the National Recreation and Park Association (NRPA) for overall excellence.
- Human Services Needs Update and Regional Collaborations – In 2005-2006, the Department participated in the Eastside Human Services Forum in cooperation with other cities, the county, non-profit agencies, school districts, and healthcare organizations. Through the Forum, Bellevue monitored the work of the King County Task Force on Regional Human Services and provided regular input to the Task Force. In addition, the Human Services Division conducted another systematic and comprehensive update on the human services needs of Bellevue residents and served as lead in a pooled funding pilot project with six other Eastside jurisdictions.
- Key Property Acquisitions – In 2005-2006, the Department acquired key properties for future park development, including the purchase of the Yiu property at Meydenbauer Bay and the Wilburton property adjacent to the Bellevue Botanical Garden. These properties were acquired by leveraging City CIP funding with external funding sources. Grants of \$3.2 million offset 44% of City acquisition costs. The 450-acre Coal Creek Natural Area and the Surrey Downs site were added to Bellevue's parkland inventory through a transfer from King County.
- Capital Investment Program Plan Implementation – Capital Investment Program Plan projects completed during 2005-2006 include the construction of the South Bellevue Community Center, development of Lewis Creek Park and Meadow Wood Park, expansion of the Crossroads Community Center, and construction of skate facilities at Lakemont and Crossroads Parks.
- Business and Technology Initiatives – During 2005-2006, the Department worked with other e-Gov Alliance cities in an ongoing effort to improve access to parks and recreation services through web-based technology tools for citizens throughout the region.
- Controlled Operating Costs while maintaining High Citizen Satisfaction – The Parks & Community Services Department worked hard to manage its operating costs over the past two years in response to limited City resources. The Department balanced the need for providing high quality programs and maintaining the safety and function of park assets, while continuing to deliver high levels of citizen satisfaction with the overall quality (92%), appearance (95%), and usage (87%) of the parks system.

City of Bellevue
2007-2008 Biennial Budget

Parks & Community Services

2007-2008 Work Initiatives

- Capital Investment Program Plan Implementation – During 2007-2008, The Department will begin Phase One construction of the Mercer Slough Environmental Education Center. Other projects planned for the biennium include replacement of the existing turf sportsfields at Robinswood Park with synthetic surface, construction of the Highland Skate Park, and development of Ashwood Plaza. In addition, a targeted opportunity fund has been created to challenge donors to invest in the community and leverage City capital funding. Targeted Challenge Grant planning and development projects in 2007-2008 include the Ivanhoe Youth Theatre, a water play area at Crossroads Park, a Visitor Center at the Bellevue Botanical Garden, and feasibility analyses for an indoor aquatic center in Bellevue.
- Planning for the Future – Major planning initiatives in the next biennium include completion of master plans for the Meydenbauer Bay waterfront, Boeing/1-90 property, Bellevue Botanical Garden, Surrey Downs, and Ashwood Park. This planning effort represents a significant work effort over the seven-year CIP plan, but is an important step to define the community's preferred outcome for each site, identify external funding partners, and prepare for future funding availability.
- Wraparound Services – Wraparound Services is a term which means the health, human service, and recreation programs for children and families that utilize schools as a service delivery point and where services are strategically integrated into the educational system through a model of collaboration between the School District, the City, and other community organizations. This program plays an important role in the City's neighborhood vitality strategy, and a pilot program at Lake Hills Elementary was initiated in 2005. In 2007-2008, the Department will work with the Bellevue School District and other community organizations to evaluate the overall effectiveness of this service delivery model and prepare alternatives for sustaining and expanding this program on an ongoing basis.
- Regional Coordination – The changing regional landscape for parks, recreation, and human services presents both significant challenges and partnership opportunities over the next two years. In 2007-2008, the Parks & Community Services Department will work with our regional partners (state, county, other cities, school districts, and non-profit organizations) to discuss the implication of these trends, ensure that our resources are being utilized as effectively as possible, and explore opportunities for joint use agreements for the development and operation of facilities which could benefit all parties.
- Update Recreation Program Plan – In 2007-2008, the Department will update the Recreation Program Plan, including a review of the City's pricing structure and scholarship policy. The plan will incorporate four major user group plans, including plans for Seniors, Individuals with Disabilities, Youth and Teens, and the Bellevue Youth Theater.
- Human Services Needs Update – Every two years, the Human Services Division conducts a comprehensive update on the human services needs of Bellevue residents. This update will be done in the context of the changing funding environment for human services and will form the basis for developing human services funding recommendations in upcoming budgets.
- Economic Development - Based on the recommendations of our departmental strategic plan, we will work to integrate the department's mission of "creating a healthy community" with the City's overall economic development strategy.

Parks & Community Services

Major Challenges for the Biennium

- **Advancing the Parks and Open Space System Plan.** Given limited funding for new park development, virtually no major capital projects are feasible within the 2007-2013 CIP beyond the development of the Mercer Slough Environmental Education Center. In addition, available property acquisition funding will focus on the highest priority sites, including Downtown Bellevue and the most critical park connections. In order to make progress on the community needs identified in the Parks and Open Space System Plan, we need to continue to develop new financial tools and strategies, actively pursue regional partnerships or special parks taxing districts, and create new property acquisition mechanisms.
- **Human Services Funding.** During the 2007-2008 budget process, the Human Services Commission received new requests totaling approximately \$600,000 above available funding. These requests were primarily focused on emerging needs like homelessness issues and programs for immigrants and refugees, and are consistent with the findings from the most recent Census data and the Human Service Needs Update. These issues and funding challenges are not unique to Bellevue, and we will continue to work with the Human Services Commission and our regional partners to identify long-term funding mechanisms to meet the human services needs of the community.
- **Responding to Needs of Changing Community.** As recommended in the departmental strategic plan, we will continue to evaluate whether our current programs and services are still relevant to the needs of a changing community and are achieving the desired outcomes. As a result of this ongoing review, we will modify our program mix and shift resources as needed to ensure that our services remain relevant and effective.
- **Coal Creek Natural Area.** In 2005, King County transferred the 445-acre Coal Creek site to the City. While the 2007-2008 operating budget provides funding for the minimal maintenance of this natural area, the site is in a deteriorated state and will continue to decline. Parks staff will continue to work with other City departments and the broader community to keep this significant environmental asset available for limited public access.
- **Maintaining High Performance Standards.** The department will continue to evaluate the effectiveness and efficiency of our various service delivery models, including the mix of FTEs, temporary help, contract labor, and volunteers. While the 2007-2008 budget provides for two additional FTE staff by converting contract dollars into permanent staff, the department needs the ongoing flexibility to address new or growing workloads to ensure that the City is getting the best combination of efficiency, effectiveness, customer service, and performance.

City of Bellevue
2007-2008 Biennial Budget

Parks & Community Services Resource Planning & Management

Program Statement

The Resource Planning and Management program provides for the management and stewardship of City-owned parks and park facilities, general government buildings, and open spaces, trails, and arterial landscapes. This program includes the Resource Management, Facilities Management, and Natural Resource divisions. Services are provided in an environmentally conscious manner, and the department utilizes a combination of City staff and alternative service delivery models including contracts, inter-local agreements, partnerships and volunteers. This program provides functional and attractive parks and recreational facilities, and supports essential municipal facilities. In addition, this program provides environmental education and public outreach, manages sensitive open spaces, and protects capital investments while focusing on energy conservation and reducing liability exposure.

Summary of Services Provided

- Management, maintenance and program support for City-owned parks, open spaces, facilities and events.
- Stewardship to ensure the protection of the City's capital investments.
- Deliver direct services that compare favorably to private sector market and industry standards.

Parks & Community Services Probation Services

Program Statement

The Probation Services program provides misdemeanor probation and electronic home detention (EHD) services to adult offenders arrested within the City of Bellevue and referred by the judges at the King County District Court-Bellevue Division. Probation is an essential component of the criminal justice process, and the City works with community agencies and other law enforcement departments in creating programs to better serve the community. Primary services include: probation supervision, deferred prosecution evaluation and monitoring, electronic home detention, pre-sentence investigation reports, alcohol/drug assessments, pre-trial diversion, referral to community resources, collection of probation fees, domestic violence evaluations, monitoring payment of court ordered financial obligations, and recruitment and training of probation volunteers. Jail cost savings occurring because of this program are estimated at \$350,000 per year.

Summary of Services Provided

- Provide misdemeanor probation supervision and services to adult offenders.
- Monitor payment of restitution and court costs, and collect probation fees.
- Manage EHD program.
- Provide services through volunteers.

Parks & Community Services Community Recreation

Program Statement

The Recreation Services Program focuses on providing recreation, community services, and lifelong learning opportunities for youth, seniors, families, and people with disabilities of all ages. Youth Services are focused to meet the needs of the diverse youth in our community by providing opportunities for socialization, community involvement, leadership development, and education. Programs include Youth Link and Teen Services activities such as Ground Zero Teen Center and middle school latchkey care; general youth programs including youth team sports, skill-building, and skateboarding; school break day camps/child care; visual and performing arts; It's About Time for Kids Initiative; and Crossroads Community Center programs. Special Community Service programs include senior services, special events such as the 4th of July, and programs for individuals with either physical or developmental disabilities.

Summary of Services Provided

- Provide opportunities for socialization, community involvement, and education for youth 18 years and younger.
- Provide recreation, community services, and lifelong learning opportunities for seniors, families, and people with disabilities of all ages.

Program Notes

Youth programs contribute to the well-being of the community's youth and teens by providing a wide range of activities supervised by positive role models. Activities are structured to help build self-esteem and reduce the risk of antisocial behavior. Special Community Service programs make a positive contribution to the quality of life of seniors, people with disabilities, adults, and families living in our community. Opportunities for socialization are readily available through these activities, and are critical in maintaining the well-being of seniors and people with disabilities.

Parks & Community Services Planning, Design & Project Management

Program Statement

The Planning, Design & Project Management program helps create and maintain a coordinated park system consistent with the community's open space and recreation facility needs identified in the Parks and Open Space System Plan. Fundamental responsibilities include the planning, design and management of park and facility capital improvement projects; permit review of development projects; and augmenting available capital improvement funding with external grants and funding sources. The total program budget includes both the operating and capital funding to implement the Parks Capital Investment Program (CIP) Plan.

Summary of Services Provided

- Plan, design, and provide project management for park development and redevelopment projects.
- Review permit applications for development projects.
- Apply for and monitor grants for park acquisition and development.

Parks & Community Services Human Services & Cultural Diversity

Program Statement

The Human Services & Cultural Diversity program responds to the human service needs of the community by ensuring the development and maintenance of a responsive community-based social services system. This is done by constantly assessing needs, anticipating trends, collaborating with non-profit service providers, and funding appropriate services. The goal of this program is to assist residents to become or remain economically self-sufficient and productive, and/or to overcome times of acute personal or family crisis. In addition to presenting diversity education programs, the cultural diversity program assists business and non-profit agencies with increasing outreach to ethnic communities. This program budget includes both the administration and allocation of City Human Service funding and federal Community Development Block Grant funding.

Summary of Services Provided

- Provide the Council and Human Services Commission with information on the status of human service "safety net" and the human service needs of Bellevue residents.
- Facilitate the community's response to human services needs via collaboration and funding.
- Provide cultural diversity education assistance and referral, and plan related events and programs.

Program Notes

The Human Services and Cultural Diversity Program is able to leverage community resources to help meet the needs of low- and moderate-income residents. Funds are efficiently allocated, and contracted services are regularly monitored to assure contract compliance.

City of Bellevue
2007-2008 Biennial Budget

**Parks & Community Services
Parks Enterprise Services**

Program Statement

The Enterprise Services program offers high quality programs and services including golf, tennis, aquatics, adult sports, and facility rentals. These programs are fee-based and primarily self supporting, but attempt to accommodate all residents regardless of the ability to pay through the use of scholarships, sponsorships, and fee waivers. Additionally, a portion of each program is directed to individuals with special needs.

Summary of Services Provided

- Provide activities at Robinswood Tennis Center, Bellevue Aquatic Center, Bellevue Golf Course, Crossroads Golf Course, and through the Adult Sports League programs.
- Provide ballfield rentals, picnic rentals, facility rentals (Robinswood House, Winters House, Lake Hills Clubhouse), and boat launch.
- Provide programs that accommodate the needs of special populations, youth and seniors, including developmentally disabled tennis instruction, therapy programs at the Bellevue Aquatic Center, and special programming that benefits youth and senior populations.

FTE Conversion - Contract Administrator (1.0 FTE)

Enhancement: Parks018

Enhancement Description

Conversion Request – RM Contract Administrator (1.0 FTE)

We are requesting permission to convert contract dollars currently in our operating budget into a Resource Management Contract Administrator (1.0 FTE). This conversion would have no cost impact to the General Fund, and will improve our safety and accountability measures as identified below. This conversion is needed to provide adequate staff to maintain the growing number of contract sites in our Park system.

As our park system continues to grow, we are experiencing increased demand for assistance with contract administration, site inspections to hold contractors accountable, and increased need to improve public communication, information and management relative to our Integrated Pest Management (IPM) program throughout our park system. Over the past decade our park system has grown quite dramatically with the development of 23 additional parks such as Lattawood Park, Sixth Street Park, Sunrise Park, Lewis Creek Park, Eastgate Park & South Bellevue Community Center and others; the additions to existing sites such as Surrey Downs Park, Crossroads Community Park, the Downtown Park, etc., the addition of Utility sites under our landscape management, and sports field sites and responsibilities through our partnership with the Bellevue School District. The additional management and maintenance responsibilities associated with this growth has been undertaken predominantly through contracted services with private sector businesses, with no additional contract administration staffing to ensure effective accountability for ongoing maintenance or renovation work to protect the City's investments. The number of sites managed by our two contract administrators has increased from 52 in 1996 to 105 in 2006, essentially doubling in the last 10 years, with no new staff to support the growing workload.

Over the years we have worked diligently to improve and streamline our contract management practices and procedures. We have combined multiple sites into single contracts where feasible, which reduces clerical & administrative time. Resource Management's two Contract Administrators currently oversee more than 68 on-going annual maintenance contracts and numerous one-time contracts for repairs and services throughout a given year, coordinating with nearly 20 independent service contractors. Contract Administration includes contract development and bidding processes, site inspections to ensure effective quality control, contractor communications, and correspondence with contractors to ensure accountability for all aspects of work performance, and payment processing and approval. We are experiencing a shortfall with our ability to perform appropriate site inspections, plan and manage one-time improvements to our aging park system, and communicate appropriately with contractors to ensure quality of performance and hold contractors accountable for meeting maintenance and contract requirements.

The shortfall in available hours beyond the two current Contract Administrators leaves us vulnerable in ensuring effective accountability for services identified in the contracts. We need to ensure we get what we pay for, and we need to effectively manage our risks in our park system. Risks include not only typical safety concerns (tripping hazards, cleanliness and health concerns, etc.) but our ability to better manage our Integrated Pest Management (IPM) and Environmental Best Management Practices (EBMP) Programs. We are experiencing increased public scrutiny and interest in our pesticide application practices. In order to meet demands for responding to increased public comments and public information relative to our IPM and EBMP practices, with both in-house and contracted services, additional assistance is needed.

Therefore, in order to meet additional workload demands and the information management goals recently identified to City Council relative to our pesticide practices, we are requesting permission to convert contract dollars currently in our operating budget into a Resource Management Contract Administrator (1.0 FTE). This conversion would have no budget impact to the General Fund, and will improve our safety and accountability measures as identified above. If approved, benefits of this conversion include:

- Improved site management that will translate into higher citizen satisfaction with the overall quality, appearance, and safety of our park maintenance function.
- Increased ability to evaluate and implement performance-based contracting, which is an industry best practice that requires greater contract oversight than is currently available within existing staff.
- Improved management and reporting on pesticide use and environmental best management practices in our park system.

State/Federal/Industry Mandates

City of Bellevue
2007-2008 Biennial Budget

Parks & Community Services

FTE Conversion - Contract Administrator (1.0 FTE)

Enhancement: Parks018

Goals and Objectives

As stated in the Bellevue Parks and Open Space System Plan, beautiful and safe parks are an important element of Bellevue's pleasant environment. Predictably, maintenance, renovation, and park security are very high priorities of the Parks & Community Services Department. The citizens of Bellevue expect and demand a high standard of park management and maintenance.

Consequences of Not Funding

We will continue to experience a shortfall with our ability to perform appropriate site inspections, plan and manage one-time improvements to our aging park system, and communicate appropriately with contractors to ensure quality of performance and hold contractors accountable for meeting maintenance and contract requirements.

City of Bellevue
2007-2008 Biennial Budget

Parks & Community Services

Human Services - CDBG Loss

Enhancement: Parks015

Enhancement Description

Additional funds will be used to respond to the increased and unmet needs identified in the 2005-2006 Human Services Needs Update, as well as needs noted in the funding applications reviewed by the Human Services Commission.

State/Federal/Industry Mandates

Federal Community Development Block Grant (CDBG) funding to Bellevue is mandated; General Fund dollars for the Human Services Fund are not. Federal CDBG funding has decreased by 16% over the last three years and another significant reduction is anticipated for 2007. This will be compounded by a projected reduction in the program income generated by loans repaid to the City's Home Repair Program. With the required federal caps for public services spending, the City will need to shift funds from CDBG to the General Fund-Human Services Fund in order to continue funding critical programs providing employment assistance and ESL classes for immigrants and refugees, as well as a volunteer transportation program for frail older adults.

An additional investment to the Human Services Fund will permit the City to address a critical need in the continuum of services to immigrants, refugees, and older adults, as well as address other needs identified in the Human Services Needs Update.

Goals and Objectives

An additional investment in human services results in healthy communities and directly responds to Council's interest in neighborhood vitality. When residents' human needs are met, they become more productive employees and taxpayers, therefore having a positive impact on economic development, which is another Council area of interest.

Bellevue currently participates in pooled funding for 7 human services contracts with 6 other cities (Bothell, Issaquah, Kirkland, Redmond, Shoreline, and Woodinville) through a Memorandum of Understanding. The number of pooled funding contracts will likely increase in 2007-2008.

The proposal directly affects policies in the Human Services Element of the City's Comprehensive Plan, specifically Policy HS-4: Allocate funds and other resources, for services which address the full spectrum of community needs and meet the City's funding criteria by requesting program proposals from community-based non-profit agencies providing direct services to low- and moderate-income residents.

Consequences of Not Funding

The total amount requested for human services programs for 2007 is nearly \$2.7 million, an increase of \$608,400 over the amount funded in 2006. This includes requests from 16 new agencies/programs not previously funded totaling \$258,000. However, with the projected reduction in federal CDBG funds, the net increase available to address these requests is only \$34,000. With an additional \$20,000 to address the loss of CDBG funds, this still leaves a funding gap of nearly \$554,400.

The infrastructure, or safety net, of human services serving Bellevue residents has taken years to develop. Efforts must be made to prevent the erosion of this safety net because these interconnected systems will be difficult, if not impossible, to rebuild once they are gone.

How does this impact citizens?

Examples of consequences of not investing in human services:

- Bellevue residents who are homeless will experience worse health problems, mental health issues, and addiction;
- Bellevue youth who lack social and family support are more likely to engage in at-risk behaviors, e.g. violence, drug use, sexual activity, and school failure;
- Domestic violence victims in Bellevue are at significantly higher risk to develop medical problems, depression, psychological distress, eating disorders, and alcohol/substance abuse problems;
- Bellevue infants born to mothers under age 18 have increased risk of low birth weight, which triggers additional health and developmental problems.

Street Trees - Developer Mitigation

Enhancement: Parks009

Enhancement Description

This proposal will support the upkeep and maintenance of existing and future developer planted trees in the City street right-of-way at the locations listed below. Street frontage improvements are required by City code to be installed in the CBD public right-of-way. Included in this request are trees and landscaping at the Ida Terrace and McCormick Park extension and the CBD sites listed below. Street tree program maintenance and management activities include irrigation, routine pruning, fertilizing, integrated pest management, weeding, debris removal, hard surface maintenance and tree grate replacement. Irrigation expenses include system startup, shutdown, adjustments and repairs, as well as water costs.

State/Federal/Industry Mandates

Transportation Planning coordinates with various local, state, federal agencies to comply with transportation requirements. The City of Bellevue is required by the Federal Government, through the Clean Water Act and the Endangered Species Act to manage transportation systems in a responsible manner as it relates to the quality of the water.

Rezoning requirements identified City of Bellevue Ordinance 3024 that requires the Ida Terrace development to provide streetscape improvements as an extension to McCormick Park. This proposal includes funding to maintain the streetscape.

Trees and streetscape improvements are an important component of the downtown environment and associated transportation projects and are a requirement of the City's Land Use Code. Trees lessen negative visual and environmental impacts of building development, buffer the pedestrian from traffic, reduce storm water runoff, absorb air pollution particulate matter, and moderate temperatures which reduces the urban heat-island effect.

Goals and Objectives

Street trees and streetscapes are directly related to the City Manager and City Council initiatives to enhance and promote economic development, neighborhood livability, and environmental stewardship.

Improvements in the City's Central Business District are a priority with many city commissions and departments. Installation and maintenance of new streetscapes associated with development projects is essential in achieving high levels of community and neighborhood satisfaction.

The Comprehensive Plan states the importance of landscaping and other amenities, "Street corridors tie different parts of Bellevue together and should instill public pride through design." Streetscape related topics are addressed in the following sections of the Comprehensive Plan: Public Places; Public Art and Cultural Activities; Sidewalks; Walkways and Trails; Street Corridors; Transit Facilities; and Freeways.

Street Trees - Developer Mitigation

Enhancement: Parks009

Consequences of Not Funding

Failure to maintain street trees results in branches obstructing the safe passage of vehicles and pedestrians, and obscured visibility of traffic signs and signals.

It is City policy to maintain its capital investments.

Planning & Community Development

Program Outcome Statement

The mission of the Planning and Community Development Department (PCD) is to help create and sustain a quality natural and built environment and to guide growth and change in a manner which preserves and enhances the character of the community. PCD staff work with residents, businesses, elected leaders, and other departments to achieve Bellevue's potential as an outstanding city in which to live and work.

PCD accomplishes this mission through seven program areas: Building Review and Inspection, Land Use, Code Compliance, Comprehensive Planning, Community Development, Neighborhood and Community Outreach, and Housing. Mission-critical functions of the department are increasing satisfaction with neighborhood quality and planning for the City's future, providing timely and cost effective customer service, accomplishing an array of policy objectives established by Council and producing a safe built environment.

Goals of the department are:

- To assist the City Council and Planning Commission in establishing and implementing the Comprehensive Plan and to foster development that is consistent with the Plan;
- To administer construction codes that produce a safe, durable, efficient and accessible built environment;
- To support the development of strong and stable neighborhoods, and to strengthen the City's bond with neighborhoods through coordinated outreach programs and community partnerships;
- To enhance community problem-solving through mediation services and training;
- To provide meaningful ways for the public to be involved in land use decisions;
- To enforce codes and regulations effectively and fairly;
- To encourage the development of affordable housing;
- To represent the community's needs and views in regional planning and decision making;
- To provide citizens and governmental decision makers with accurate and useful information through surveys, forecasts, and data management;
- To collaborate in the development of projects and programs which contribute to Bellevue's economic vitality;
- To assist the City Council and City Manager in developing new programs and policies which respond to emerging community needs and issues.

Services and Accomplishments

LAND USE

Completed the Overlake Hospital Master Plan/ NE 10th Street Extension Environmental Impact Statement that preserved an essential east-west transportation corridor across I-405.

Adopted and implemented Land Use Code amendments to:

- Create the Medical Institution District Overlay that allowed for the redevelopment of the Overlake Hospital Medical Center and co-location of Group Health Cooperative;
- Implement initial Downtown Implementation Plan changes articulated in the Downtown Subarea Plan;
- Regulate the permitting of Temporary Encampments while assuring the health, safety and welfare of encampment residents and Bellevue citizens;
- Allow increased lot coverage in the Factoria -3 Land Use District to facilitate redevelopment;
- Update Critical Areas regulations in the land use code, Environmental Procedures Code and Clearing and Grading Code;
- Expand public noticing distances from 200/300 feet to 500 feet;
- Implement Development Services Initiative amendments to clarify codes and processes.

Amended the Environmental Procedures Code to implement the Temporary Encampment permit requirements and managed the cross departmental community outreach, application review and inspection.

Amended the Environmental Procedures Code and Clearing and Grading code to incorporate changes necessary to implement the Critical Areas amendments to the Land Use Code.

Amended the Sign Code to allow for increased signage for entertainment and public assembly uses in the Downtown.

Amended the enforcement provisions of the Bellevue City Code to implement the Bridle Trails Tree protection provisions and impose city-wide penalties for the removal of protected significant trees.

Amended the Nuisance Code to adopt standards for rodent infestations and control.

Planning & Community Development

Initiated Neighborhood Livability Action Agenda in collaboration with Neighborhood and Community Outreach.

Initiated amendments to the Sound Amplification Code to ease administration, to create predictable enforcement and to reduce neighborhood impacts.

BUILDING DIVISION

Implemented the provisions of RCW 64.55 regarding weather protection envelope requirements for multi-family housing, and provided training for the local design and construction community.

Worked with the Washington Association of Building Officials to achieve a common electrical code with the adoption of the 2005 National Electrical Code.

Delivered technical training for customers and staff working in 12 local cities and counties through the eastside Building Officials Partnership, including presentations such as contractor training for seismic bracing of suspended ceilings.

Provided ATC-20 (Applied Technology Council) post-earthquake building safety evaluation training to 30 City staff, and initiated cooperative planning with Facilities and Fire Department staff regarding updated procedures for post-earthquake safety evaluation of new City Hall.

Completed review, inspection, and occupancy of the following major projects:

- Lincoln Square Residential Tower and Retail Podium
- Bellevue City Hall
- Ashwood Commons I

Completed review and issued permits meeting the negotiated timeline commitments for several major projects including:

- Lincoln Square Office Tower
- Wasatch Washington Square
- Schnitzer Bravern
- Overlake Hospital South Tower
- Group Health at Overlake
- Lexus of Bellevue

Responded to the rapid growth in development activity with appropriate adjustments to staffing levels, use of consultants, and improvements to increase efficiency.

PLANNING DIVISION

Initiated intensive work on Bel-Red Corridor planning, supporting the project steering committee, developing land use and transportation alternatives, and taking these through the Draft EIS.

Worked in collaboration with the Transportation Department to begin planning for a Light Rail route from I-90 through South Bellevue, Downtown, and the Bel-Red Corridor.

Conducted a community process to identify a long-term vision and near-term implementation steps that will help cement the long-term vitality of the Crossroads Center, with results slated for adoption as part of the 2006 Comprehensive Plan update.

Worked to complete the Wilburton study, also slated for adoption in the 2006 Comprehensive Plan update; this study has been expanded to explore new potential east-west connectivity between Wilburton, Bel-Red, and Downtown.

Worked with a multi-department team to establish a long-term solution to siting Downtown bus-layovers, a key transit and urban design issue.

Initiated work on updating the Comprehensive Plan Utilities Element to incorporate Council direction to place additional emphasis on neighborhood compatibility when siting or expanding electrical facilities.

City of Bellevue
2007-2008 Biennial Budget

Planning & Community Development

Refined the Comprehensive Plan Amendment process to clarify and streamline requirements, while better meeting the intent of the Growth Management Act.

Produced the first-ever Bellevue Economic Profile, a comprehensive picture of Bellevue's economy and the trends shaping it.

Continued work to track and disseminate information about changing Bellevue demographics, through the new federal American Communities Survey.

Monitored and participated in key regional land use planning efforts, through support to the King County Growth Management Planning Council, and the 4-county Growth Management Policy Board Vision 2020 Update.

Completed a City-wide housing conditions survey of all 15,000+ housing units built prior to 1970.

Initiated the Neighborhood Fitness Program on the first of identified "clusters" of property maintenance concerns, bringing together a comprehensive set of tools to improve property conditions in these neighborhoods.

Continued coordination of final projects to be constructed with NIS-1 funding; continued to brief Lake Hills stakeholders regularly on project progress.

Completed the public process for design of the West Lake Hills Neighborhood Identity treatments, which are now moving forward for construction.

Designed and distributed the first-ever Language Resource Handbook, providing essential communication and resource tools for working with the 24% of Bellevue residents who are non-English speakers.

Worked with neighborhood stakeholders to update the plan for revitalizing the Lake Hills Neighborhood Shopping Center.

Managed the Neighborhood Liaison Team, which responded to a record 4,330 number of citizen contacts.

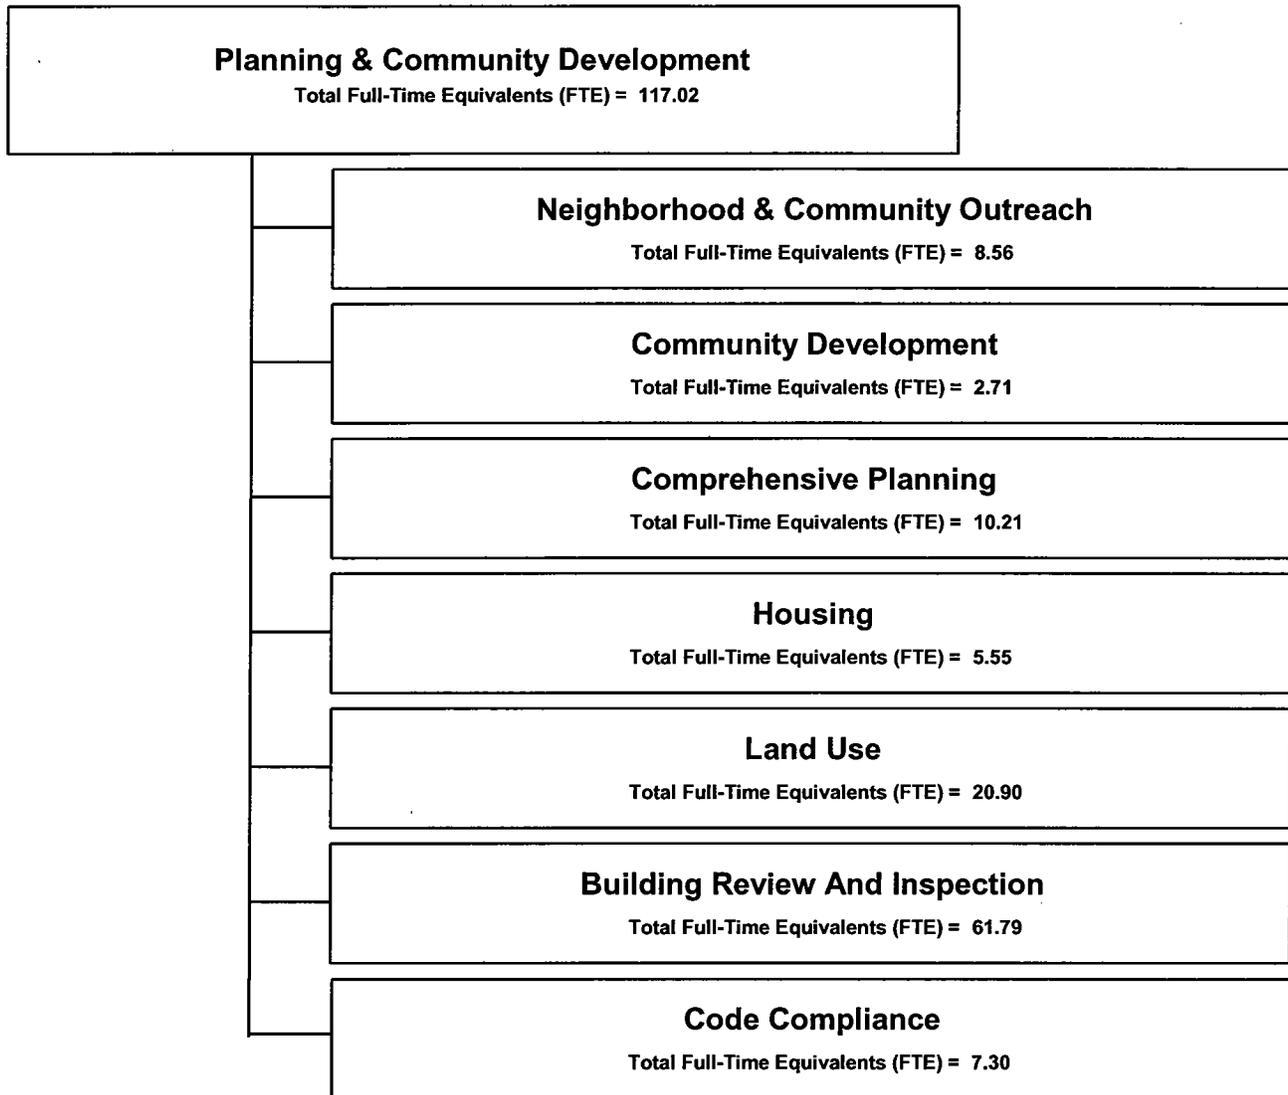

Completed Neighborhood Enhancement Program process for Northeast Bellevue, Bridle Trails, Northwest Bellevue, West Lake Hills, Crossroads, Wilburton, and West Bellevue – with over 3,000 active participants, responses to 551 action requests, and funding for 20 new projects valued at \$1.7 million.

Awarded 33 Neighborhood Match grants for collaborative neighborhood improvement projects.

Conducted training programs in basic mediation, conciliation, parent-teen mediation, and a variety of shorter negotiation and conflict resolution training, while admitting 34 new volunteers to the mediation program and graduating 6 volunteers from the full mediation practicum.

Handled a record 900 number of mediation calls, resulting in conciliations, mediations, and group facilitations, and maintaining a high mediation settlement rate of 74%.

Managed over 20,000 customers/year at Mini City Hall, which continues to be the front-line City contact for many East Bellevue residents, including those with special needs and limited English skills.

Planning & Community Development

2007-2008 Work Initiatives

The City of Bellevue's Planning and Community Development Department consists of the following Programs:

- Neighborhood and Community Outreach;
- Community Development;
- Comprehensive Planning;
- Housing;
- Land Use;
- Building Review and Inspection;
- Code Compliance.

The Neighborhood and Community Outreach program improves information flow and connection between the City, its residents, and businesses. Staff coordinates construction of neighborhood improvement projects and provides guidance and partners with community organizations.

The Community Development program identifies and develops partnerships with citizen groups and business organizations encouraging their involvement in the planning and design concept phases of capital projects for civic places. It also provides support for the Arts Commission.

The Comprehensive Planning program engages residents and other stakeholders, City Commissions, and the City Council in maintaining the City's Comprehensive Plan and guides the Plan's implementation.

The Housing program increases the supply of affordable housing to meet the City's needs for a diverse housing mix, and for consistency with the housing targets established in the Countywide Planning Policies.

The Land Use program assists the Planning Commission and City Council to foster development consistent with the Comprehensive Plan. Staff manage the discretionary review process and provide land use/zoning and other property information to citizens and businesses.

The Building Review and Inspection program implements construction code through review and inspection of projects and provides public information to a wide range of customers.

The Code Compliance program staff investigates and resolve neighborhood complaints and violations of City and State codes. Staff facilitates compliance and works to achieve positive results.

NEIGHBORHOOD PROGRAM

The City has had a strong on-going commitment to protect and enhance the quality of our residential neighborhoods. Recent work indicates that there are emerging issues requiring City attention. This work initiative involved the following component tasks:

Articulate a coherent neighborhood strategy - The City has many programs that directly or indirectly touch our neighborhoods. This effort will organize these many disparate activities so that they can be more easily described to those interested in neighborhood issues.

Neighborhood Action Plan - Implement the adopted Neighborhood Action Plan, focusing on improving property maintenance in identified target "clusters" and on infill/redevelopment pressures affecting other City neighborhoods.

Implement intervention actions targeted at problem properties - Recent work shows seven areas within the City with concentrations of properties having significant maintenance or code related issues. These actions may include:

- Homeowner assistance, where necessary to resolve problems;
- Communication with absentee owners;
- Targeted code enforcement, trash pick-up, and other similar actions;
- Provide support through human service agencies, police, and others;
- Other regulatory actions as necessary.

Implement actions to manage redevelopment occurring within neighborhoods - These actions will include regulatory and non-regulatory actions, including:

- A code amendment to prevent lot combination;

Planning & Community Development

- Analysis of impacts from 'mega' houses, possibly resulting in future land use controls;
- Development of design compatible retrofit ideas to stimulate property owner investment, and to guide design in established areas with distinctive character.

Continued efforts to encourage shopping center revitalization.

Initiate effort to catalogue public investments necessary to respond to livability issues – this includes sidewalk improvements and boulevard design.

Continued efforts to give voice to neighborhoods that do not have neighborhood associations.

ENVIRONMENTAL STEWARDSHIP

Support the City Manager initiative to clarify the City's environmental ethic, identify gaps in current performance, and develop strategic direction for the future. Activities to be developed include the following:

Gap analysis to identify what additional work needed for State mandated Shoreline update;

Finish geologic mapping for City;

Prepare critical area handbook to assist homeowners;

Retain outside consultants (when necessary) to perform peer review of single family critical area reports;

Establish data and monitoring of critical environmental resources;

Identify other environmental initiatives to advance the City's environmental program (i.e. Bel-Red urban stream initiative), identify linkages between existing and new environmental programs;

Explore green buildings initiative.

COMMUNITY DEVELOPMENT/ECONOMIC DEVELOPMENT

Support and compliment the marketing, recruitment, and retention efforts of the Office of Economic Development. Specific initiatives include:

Light Rail Planning: Work with Sound Transit and the Transportation Department to refine light rail routing alternatives and mitigation, and follow-through from the November 2007 vote.

Bel-Red: Complete the Bel-Red Corridor project, adopting a new land use and transportation vision for the study area, complete with implementing mechanisms, phasing and financial strategies.

Overlake/Bel-Red reconciliation: Work with City of Redmond to reconcile land use plans and forecasts for the two cities' respective planning areas, to ensure that land use, transportation, and public investments remain in sync.

Downtown Amenity Incentive System: Review and update the key incentive system in the Downtown zoning code, recalibrating it to today's economics and introducing new amenities from the Downtown Implementation Plan.

Advance the Downtown Implementation Plan livability initiative, including work on way-finding, mid-block connections, park acquisition, green/themed streets, and other livability features.

NE 6th Street Corridor: Clarify the vision and program for the NE 6th Street Corridor, testing the potential for additional design improvements, a people mover, light rail interface, remote parking garage, and other elements.

Meydenbauer Redevelopment Planning: Develop a land use vision for the area between the Downtown Park and the new waterfront park at Meydenbauer Bay.

City of Bellevue
2007-2008 Biennial Budget

Planning & Community Development

Eastgate: Update the Subarea Plan for the Eastgate area, together with the adjoining Eastgate potential annexation area.

Utilities Element: Update the Utilities Element of the Comprehensive Plan, consistent with Council direction to address neighborhood impacts of electrical facilities while maintaining a reliable power supply.

Housing Implementation: Implement the new housing policy direction adopted in the major update to the Comprehensive Plan, addressing housing affordability and diversity.

CODE AMMENDMENT IMPLEMENTATION

Land use code amendments are necessary to establish implementation strategies and regulatory frameworks for the following planning efforts:

- Wilburton Subarea;
- Crossroads Center;
- Bel-Red Corridor/HCT Planning;
- Downtown Subarea Plan District Character.

Amendments to the Land Use Code identified as necessary to achieve goals of the Neighborhood Livability Action Agenda.

Amendments to the Land Use Code as necessary to recalibrate the amenity incentives and ensure that the outcomes contemplated in the Downtown Subarea Plan are being achieved.

Amendments to the Land Use Code to include new regulations and incentives for innovative housing.

Amendments to the Sign Code to accommodate needs of Medical Institution District tenants.

Initiation of the Shoreline Management Act update mandated by the State.

Initiate Land Use Code Amendments to provide flexibility in the regulations of the Factoria 1 Land Use District. Necessary to foster development of anticipated growth that is economically viable in the current market.

Implement the Neighborhood Livability Action Agenda in collaboration with Neighborhood and Community Outreach.

Expansion of Code Compliance Officer competencies to facilitate City-wide property maintenance through non-code enforcement based assistance, education and coaching.

Continued proactive sign code enforcement.

Evaluation of sign code effectiveness in light of desired outcomes.

Participation in the inspection services improvement component of the Development Services Initiative.

DEVELOPMENT SERVICES INITIATIVE -- CONTINUOUS IMPROVEMENT

Continue to implement the DSI Inspection Services Improvement measures, while working with the Bellevue Downtown Association and developers to ensure that quality inspection services are delivered in a timely, efficient, predictable, and service-oriented manner.

Continue work on code modification to implement "do the right thing". Engage in a "quality of development assessment" to determine if we are getting what we want.

Develop a common Eastside Cities adoption and amendment proposal and present to Council for implementation of the 2006 International Codes.

Implement technology enhancements to better utilize GIS information, and to facilitate document exchange over the internet.

Planning & Community Development

Improve the inspection process, part of which includes wireless access for inspection services.

Complete review, inspection, and occupancy of the following major projects:

- Lincoln Square Office Tower;
- Avalon-Meydenbauer-Safeway;
- Wasatch Washington Square;
- Schnitzer Bravern;
- Bellevue Towers;
- Overlake Hospital South Tower;
- Group Health at Overlake;
- Lexus of Bellevue;
- Ashwood Commons II;
- Hanover 1020 Tower;
- Hine Tower 333 (former Bellevue Technology Tower);
- 1200 Bellevue Way Townhomes.

Major Challenges for the Biennium

- **High Capacity Transit**
The High Capacity Transit (HCT) system will link the I-90 corridor with south Bellevue, Downtown, and the Bel-Red corridor. It will create significant new transportation capacity and new land use opportunities in station areas, as well as potential impacts on Bellevue neighborhoods. At issue are matters such as route options to reduce neighborhood impacts in south Bellevue, tunneling, and the number and location of stations to serve Downtown.
- **Environmental Stewardship**
Bellevue has a long history of environmental stewardship, reflecting the strong values and preferences of the community. This arena is becoming increasingly complex as the City and its environs build out and become more dense, and as the inter-jurisdictional and regional scope of many environmental issues becomes apparent.
- **Neighborhood Strategy**
Bellevue has a basic array of successful neighborhood programs that form a foundation for quality neighborhoods and strong City-resident interactions. Neighborhood Liaisons, the Neighborhood Enhancement Program, Crossroads Mini City Hall, Neighborhood Mediation, and ongoing work with neighborhood associations are some of these key ongoing program areas. In recent years, the City has enhanced this foundation with new work in the area of neighborhood livability. One focus has been on older neighborhoods facing special challenges, through the Neighborhood Investment Strategy. A second focus involves preserving neighborhood character in the face of change, which can affect neighborhoods of any age.
- **Urban Design and the Great Place Strategy**
Great public places – great streets, great parks, great plazas and other gathering places —make some communities special. Done well enough, they delight the senses, invite people back for repeat visits, and make a community livable and memorable, even world class. Bellevue has a great start in the area of urban design, but we are missing many of the pieces needed to move to the next level. A number of livability/memorability improvements were identified in the DIP, and moving these forward will take the city center to the next level. City-wide, other key urban design/livability improvements await focused attention, particularly the “urban boulevard” concept in the Comprehensive Plan.
- **Development Services**
The recent upturn in development activity is projected to extend into 2008 and will continue to test the changes set in place with the Development Services Improvement (DSI) efforts to create a business model that provides fast, predictable, one-city services for the development community and city residents.

City of Bellevue
2007-2008 Biennial Budget

Planning & Community Development Neighborhood & Community Outreach

Program Statement

The mission of this program is to improve City/neighborhood engagement, protect and enhance neighborhood quality, and build neighborhoods' sense of community and problem-solving capacity.

Summary of Services Provided

To improve City/neighborhood relationships and build neighborhood capacity, this program:

- Improves information flow and connection between the City, its residents and businesses so plans and programs are more responsive to needs and desires;
- Coordinates the construction of neighborhood improvement projects; supports the development of strong and stable residential neighborhoods by providing information, coordination, and partnerships with community organizations;
- Fosters problem solving skills to strengthen relationships and decrease reliance upon City government intervention;
- Develops strategies as needed to address issues affecting neighborhood quality and stability.

Issues related to Department Performance

Per the most recent Performance Measures survey, the percentage of residents rating their neighborhoods good or excellent remained at a very high 90%.

Program Notes

This program will continue its emphasis on fostering City/neighborhood partnerships to maintain the outstanding quality of Bellevue neighborhoods. A newer focus is the Action Agenda that targets additional efforts on special issues affecting certain areas of the City. Special issues include property maintenance in some older neighborhoods, and infill/redevelopment pressures affecting other neighborhoods.

City of Bellevue
2007-2008 Biennial Budget

Planning & Community Development Land Use

Program Statement

The Land Use Division is responsible for executing the City Vision articulated in the Comprehensive Plan to sustain a quality natural and built environment that preserves community character and to foster development that is compatible with its surroundings, respectful of neighborhoods and economically viable.

Summary of Services Provided

The Land Use Planners assist Planning Commission and City Council in establishing and adaptively managing implementation strategies that are embodied in the land use code (as regulations and incentives) to foster development consistent with the Comprehensive Plan. The staff manages the private and public discretionary review process to optimize competing community goals and objectives. The staff provides meaningful ways for the public to be involved in land use decisions while administering the review process in a predictable manner and provide land use/zoning and other property information to citizens and businesses.

Meaningful opportunities for public involvement						
Avg weekly walk-in customers served by LU in the Permit Ctr	#	Workload	125	100	100	100

Issues related to Department Performance

Performance measures indicate that Land Use Program efficiency continues to improve and that public information demands are increasing. The baseline number of applications did not change dramatically, but there was a significant increase in the number of large complex projects submitted for review and projects managed by land use staff. Design reviews increased by 100% during the past biennium. Approvals were issued for "mega projects" such as the Washington Square Condominium Tower (Wasatch) and the Overlake Hospital South Tower Expansion. In addition, considerable time was spent on the Bravern mixed use project, Group Health Ambulatory Health Care Center, Bellevue Towers and scores of other complex projects that issued early in 2006.

Commercial development clients requested staff to negotiate more compressed timelines in order to time construction completion to meet increasing tenant space demands as vacancy rates continued to fall. At the same time, Land Use staffing resources were redeployed to the Critical Areas Update.

Program Notes

The measure of weekly customer demand met at the Land Use Zoning and Information desk was added to ensure that the public information component of the land use mission is not compromised as a result of permit review obligations.

City of Bellevue
2007-2008 Biennial Budget

Planning & Community Development Building Review and Inspection

Program Statement

The Building Division is responsible for the customer service orientated application of the construction and clearing & grading codes to sustain a quality natural environment and create a safe built environment.

Summary of Services Provided

The Building Division reviewers and inspectors provide public information to a broad range of customers, while performing services directly related to implementation of construction codes.

Cost of plan review per \$1,000 of construction valuation	ratio	Efficiency	1.70	4.00	4.00	4.00

Issues related to Department Performance

Timelines for single-family projects were extended during the 2006 workload peak of major projects in plan review, while negotiated timeline commitments on major projects were achieved for multiple and simultaneous applications.

Program Notes

- The target is to complete 80 percent of building permit application reviews within the DSI calendar timeline.
- The increased level of major project development has resulted in a corresponding increased demand for upfront services such as pre-application meetings.

City of Bellevue
2007-2008 Biennial Budget

Planning & Community Development Housing

Program Statement

The mission of this program is to increase the supply of affordable housing in Bellevue, so that the community maintains a full range of housing opportunities.

Summary of Services Provided

This program increases the supply of affordable housing to meet the City's needs for a diverse housing mix, and for consistency with the housing targets established in the Countywide Planning Policies. Results are achieved through the City's policy and Code framework, incentives, and direct subsidies. To achieve effective results, the City channels housing subsidies through the Eastside consortium ARCH, which evaluates funding proposals consistent with priorities set by the City Council.

Planning & Community Development Housing

Key Departmental Metrics	Unit of Measure	Type of Indicator	FY 2005 Actual	FY 2006 Target	FY 2007 Target	FY 2008 Target
Achieve County-wide housing targets						
Total affordable units created or preserved	#	Workload	18	176	176	176
Produce 110 new low income housing units per year	#	Effectiveness	51	110	110	110
Leverage use of Housing Fund dollars by at least 1:5	ratio	Efficiency	0.04	0.08	0.08	0.08
Average City cost per affordable housing unit	\$	Efficiency	7,462	17,500	17,500	17,500
Total projects funded	#	Workload	2	4	4	4
Increase # of units that meet needs of population at risk						
Meet target for new moderate income units	#	Effectiveness	10	78	78	78

Issues related to Department Performance

In 2005, the Housing Program did not meet the target for low-income housing production. While only one new project was funded in 2005, there is a huge demand for affordable housing. Several potential projects are in the works and may come forward to request funding in the coming biennium.

Program Notes

The coming biennium would appear to be an appropriate time to review the existing Housing Trust Fund priorities, which were adopted in 1998 and have not been visited in the intervening years. This review may refine the criteria to ensure that worthy projects are competitive.

Planning & Community Development Code Compliance

Program Statement

The Code Compliance section of the Land Use Division is responsible for enforcing the regulations that sustain a quality and safe natural and built environment and that preserve community character.

Summary of Services Provided

The Code Compliance Officers investigate and resolve neighborhood complaints and violations of City and State codes citywide. Staff aid in problem solving; facilitate substantial compliance and work to achieve positive results for all parties to a complaint or enforcement incident.

Budgeted Cost Summary	FY 2005 Budget	FY 2006 Budget	FY 2007 Budget	FY 2008 Budget

Use the civil violation process when needed						
Total Civil Violation hearings held	#	Workload	330	350	350	350

Issues related to Department Performance

This program is structured to reflect a philosophy that tailors the enforcement approach to the severity of the problem. Public health and safety issues and sign code enforcement are responded to proactively. Voluntary compliance is sought for the majority of non-emergency neighborhood complaints and code violations.

The increase in anticipated cases acknowledges that code compliance has undertaken a more collaborative working relationship with the Neighborhood and Community Outreach section of PCD. As a result, it is anticipated that officers will carry a load of non-traditional "cases" that will rely on diplomacy and encouragement to secure resolution rather than code authority. These "cases" will be handled by code compliance officers in addition to their traditional load of code violation cases.

In addition to the increase in the number of matters anticipated to demand code compliance officer attention, additional time will be spent on education and outreach. The initial focus of this effort will be property maintenance in several cluster areas. Code compliance will assist in issue identification through windshield surveys, formulate target profiles, and make proactive contact with property owners. The emphasis will be on enhancing awareness of neighborhood expectations, education and coaching to achieve desired property maintenance outcomes. Additional proactive enforcement will be utilized in the cluster areas and for repeated incidents of poor maintenance conditions.

To support the Neighborhood Livability Action Plan, the geographic areas assigned to code compliance officers has been realigned to correspond to the liaison/NEP boundaries. It is the expectation that officers will be collaborating with liaisons to address emerging neighborhood issues before they become a problem. In addition, the officers will target educational opportunities to the specific needs of neighborhoods and attend meetings held by neighborhood groups and homeowner associations in their assigned areas.

Program Notes

Council approved the addition of one 2-year LTE to collaborate with Neighborhood and Community Outreach in support of the Neighborhood Livability Action Agenda item focused on improving property maintenance in eight primary cluster areas. Educational techniques developed as part of this effort are anticipated to be applied on a case-by-case basis to property maintenance complaints raised citywide.

2007-2008 Biennial Budget

Planning & Community Development Comprehensive Planning

Program Statement

The mission of this program is to help the community establish and maintain a compelling vision of Bellevue's desired future, refining the vision and its implementation in the face of change.

Summary of Services Provided

This program engages Bellevue residents and visitors, other stakeholders, City Commissions, and the City Council in maintaining the City's Comprehensive Plan and guiding the Plan's implementation. The program collects and analyzes data and information to understand change, and develops adaptive strategies that help maintain the community vision. Key foci include: demographic and economic data analysis and forecasting; land use, growth management and economic development planning; neighborhood planning; annexation; and special studies.

Issues related to Department Performance

The latest performance measure survey shows that the key measure "satisfaction with the job the City is doing in planning for the future" was exceeded. Nonetheless, the current period of heightened development activity, along with a number of ambitious planning initiatives, presents a number of challenges to maintaining these high satisfaction levels.

Program Notes

A number of significant planning initiatives are now underway that will significantly affect the City's future for years to come. These are spread throughout many areas of the City.

City of Bellevue
2007-2008 Biennial Budget

Planning & Community Development Community Development

Program Statement

The Community Development program builds capital projects to accomplish the City's vision, and supports the arts through commissioning capital art projects, assisting local art organizations, and funding arts programs. Capital projects in this program often require integrated efforts of multiple departments, involving public and private partnerships.

Summary of Services Provided

The Community Development Program identifies and develops partnerships with citizen groups and business organizations encouraging their involvement in the planning and design concept phases of capital projects for civic places. Staff organize workshops to establish broad community involvement and coordinate the development and construction of civic capital projects.

The Community Development Program also provides support for the Arts Commission by planning for and commissioning temporary and permanent art works placed in public spaces as components of civic construction. Small grants and technical assistance are provided to local arts groups. Staff develop and recommend cultural policies and conduct long-term cultural planning for the City as well as coordinate with regional partners to strengthen and increase resources for local arts.

Total contract dollars managed of products accomplished	\$	Workload	1,399,000	730,000	500,000	750,000

Issues related to Department Performance

Much of the Community Development Program's resources over the 2005-2006 Biennium were focused on the design and construction of the New City Hall as well as the development and implementation of the Cultural Compass.

Program Notes

The Public Art Program has historically been funded through an annual allocation of \$400,000 per year. Actual expenditure levels may exceed this annual allocation, as it did in 2005, when reserves are spent on larger projects or several small projects. Conversely, annual capital expenditures may be less than the annual allocation.

**City of Bellevue
2007-2008 Biennial Budget**

**Planning & Community Development
Enhanced Funding for Planning Services**

Enhancement: PCDCBA06

Enhancement Description

Current professional planning capacity is fully consumed in planning projects underway, including the Bel-Red study, Crossroads, Wilburton, Utilities Element/electrical facilities, and HCT planning; and projects that are about to move forward, including the Downtown Incentive System, NE 6th Corridor planning, and Neighborhood Character. A number of high priority projects are queued up for staff resources to become available. While some of these projects can wait for existing staff to free up, other projects there will see significant lost opportunities if they do not move forward in the near term. These include:

- The Meydenbauer Bay Connection, where some property purchases and development plans will be moving forward soon. City planning may leverage the private investment consistent with the City's vision, but the planning needs to happen soon or the opportunity will be lost;
- Accelerated work on the Eastgate Subarea Plan Update. Failure to do so could preclude development opportunities on the King County transfer station site;
- Work on the Environmental Stewardship Initiative, a multi-departmental effort. Among other drivers, this project relates to the Council's programmatic expectations from the recently adopted Critical Areas Ordinance;
- Work with other departments on a long-term (20 year) Capital Investment strategy that prioritizes multiple long-range City investments and explores a broad range of potential funding strategies. This work should be completed in 2007, prior to the City's next biennial budget update.

In order to complete these high-priority projects and the current workload, approximately \$100k/year is needed. The specific delivery method for providing this work remains to be defined.

Land Use Code - Amendment Backlog

Enhancement: PCDCBA07

Enhancement Description

On March 20, 2006, PCD presented the proposed 2006 Land Use Code Amendment schedule to Council for information and discussion. During that meeting, the Council observed that several of the listed amendments had been carried forward from previous years because they had not been accomplished as scheduled. Clearly the growing backlog of proposed land use code amendments represents an undesirable service level degradation, and Council requested that we look for ways to address the problem.

This request is for approval of one-time consultant contract funds in the amount of \$100,000. This one-time expenditure would enable Land Use to meet the Council's expressed desire for PCD to find ways to move queued amendments expeditiously through the process during the 2007-2008 budget period.

Legitimate issues surface that preclude our ability to make forward progress on scheduled work program items. Examples of unanticipated work program additions include land use code amendments to govern temporary encampments, facilitate mid-block retail exemptions, and allow for the sale of the MPOS bonus associated with City Hall and permit high rise and entertainment district signage. These types of demands and opportunities will continue to occur and will continue to require our immediate attention to capture the benefits of the regulatory change. In addition, state-mandated code updates are required to meet specific deadlines or the City can lose access to available grant funds. As a result, our ability to process scheduled amendments is compromised.

The proposed \$100,000 expenditure will enable staff to offset the impacts created by unanticipated code amendments and staff redeployments to address state mandates. This strategy will ensure that we continue to make progress on the important projects included on the scheduled 2007-8 work program. Refer to Attachment A for a list of scheduled code amendments.

This strategy would also provide the capacity needed to initiate the "Doing the Right Thing" phase of the DSI project. Without the requested expenditure, our past practice of staff redeployments to special code amendments and state mandated amendments (such as the Shoreline Update that must be initiated in 2007) will continue. This practice has compromised our ability to initiate code maintenance efforts necessary to remove inefficiencies, take advantage of process improvements and make substantive changes necessary to ensure that the code is achieving desired outcomes. Additional capacity is needed to make headway on the code.

Without this one-time infusion of resource capacity, Land Use will simply continue to chip away at scheduled amendments as time allows. The Land Use Division will remain focused on development review service delivery and will have little capacity to support desirable or opportunity-related code amendments that help attain the City vision and help ensure Bellevue maintains its competitive development advantage in the region.

Police

Program Outcome Statement

The Bellevue Police Department's Mission Statement is "Providing a safe environment through community involvement and innovation." It strives to achieve this mission by adherence to its Guiding Principles:

- **Respect:** We begin by treating others as we would like to be treated. We are fair and considerate in what we do.
- **Integrity:** We are honest, ethical, steadfast and always strive to do the right thing. We lead by example.
- **Accountability:** On all levels we take responsibility for our actions and decisions.
- **Service:** We are active and committed to providing exceptional service to our communities through teamwork, innovation, and education.

Services and Accomplishments

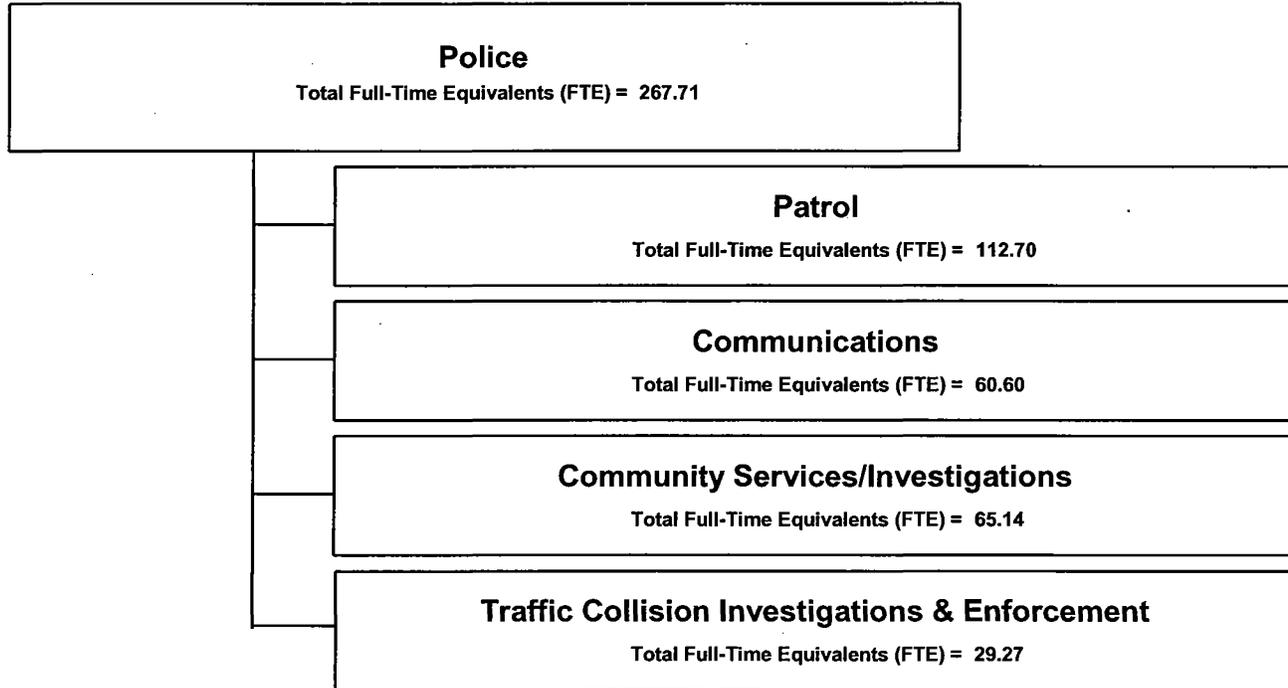

The Bellevue Police Department consists of four major divisions that serve the community: Police Patrol, Community Services and Investigations, Communications (Dispatch functions), and Traffic Collision Investigation and Enforcement. Each in different ways helps to assure a safe environment in not only the City of Bellevue but in surrounding communities as well.

The following are the major 2005-2006 accomplishments for the Department:

- The Department used existing technologies and communication channels to take more opportunities to educate Bellevue citizens, the business community, and other agencies on the successful achievements of the department in areas of public safety, reductions in crime, and community participation;
- The citywide website was improved enhancing the ability for citizens to quickly access the Police Department electronically. A third substation opened this year at the downtown transit station. A new field reporting system for Police mobile wireless computers has been selected and the scope of work and contract negotiations are in process which will enhance an officer's ability to document information and quickly share information throughout the organization;
- The Department established an Office of Professional Standards (OPS) to address both internal and citizen complaints and ensure continued national accreditation. All complaints are tracked through OPS and any of a serious nature are investigated by this office. This helps to ensure fair treatment in disciplinary matters. The office tracks all proofs in preparation of the next accreditation and works on policy revisions as needed;
- The Department drafted a comprehensive policing policy for the downtown sector, especially with regard to "vertical policing", i.e. high-rise residential units that are being built in the downtown core. This policy report has been delivered to Police and other City staff members for their consideration;
- The Department explored the possibility of equipping patrol officers with defibrillators. The commander of Personnel Services Unit researched and prepared a thorough report and recommendation to senior management. Senior management concurred that the financial and training impact could not be justified at this time;
- A new program for burglar alarm administration, including a new ordinance that includes annual registration fees, an accelerated false alarm fee schedule, and provisions for other fees was examined, with the intention of reducing the number of false alarms throughout the City;
- The Department continued to explore funding sources for necessary technology, equipment, and training to meet the challenges in the coming years. Identification of suitable grant opportunities continued. The federal Bryne grant was cut by nearly 60% in 2004 but rebounded to nearly 100% for the 2005-2006 budget cycle. This grant helps fund positions in the Eastside Narcotic Task Force. Through a regional partnership, a new surveillance van will be purchased to be used regionally. Personnel have taken advantage of federally funded training opportunities specifically in the area of disaster preparation and prevention.

2007-2008 Work Initiatives

Major Work Initiatives for 2007/2008:

- Further define our principles/core values. Weave the guiding principles into all of our processes. Recruiting, hiring, ethics, leadership and communication training to improve professionalism and service to the community;
- Implement effective technology, maintain training and ongoing evaluation of technology. Technology that is user friendly, useful in crime identification and reduction;
- Effectively evaluate and manage growth and change. Ensure BPD is on the leading edge of best police practices (CALEA) and responds effectively to the change in the community ensuring BPD continues its high level of service by regularly evaluating the work we do and move/increase resources as needed;
- Continue the long range budget planning process, researching outside funding opportunities/regional partnerships.

Major Challenges for the Biennium

The Department continues to actively research the potential long-term impacts of the planned growth in Bellevue's Central Business District and other Eastside business corridors, which could result in unprecedented growth in "vertical" neighborhoods (urban condominiums and apartments). How to adequately police these new neighborhoods will be a challenge for the Department in the coming years. There are likely to be subtle yet measurable increases in calls, responses, and resources allocated, wholly dependent upon the rate of growth in these vertical neighborhoods, their rate of occupancy, and the crimes reported in these sectors.

**City of Bellevue
2007-2008 Biennial Budget**

**Police
Patrol**

Program Statement

The Police Patrol department will continue its community-oriented patrol tactics that enhance the quality and quantity of police contacts with citizens as well as identify and solve community problems that contribute to the erosion of community security and safety. The department also will maintain its practice of continuing to recruit, hire, and develop top quality personnel at all levels who demonstrate potential in the community-oriented police philosophy.

Summary of Services Provided

The Patrol division is designed to maximize public safety by providing timely response to calls for assistance, and active, visible patrol of the City. Patrol uses tactics that are designed to enhance the quantity and quality of community contacts which contribute to community safety and security.

Issues related to Department Performance

While the Police Patrol department's published goal is to respond to 100% of critical emergency calls within 6 minutes (from the time of dispatch to arrival on-scene), it also maintains an internal target of 3.5 minutes when possible. In 2005, average response time was 4.5 minutes.

The percentage of Bellevue citizens who feel safe or moderately safe while walking in their neighborhood has consistently been in the 90% range, reflecting the quality of overall police services in the community. In addition, in 2005 86% of respondents in a police survey reported that the services they received during a police interaction was good or excellent. While this fell short of the target of 88%, it still shows an overwhelming majority of citizens who are satisfied with the job the department is doing.

**Police
Patrol****Program Notes**

Bellevue continues to be a safe city with overall crime decreasing gradually. In 2005, total Part One crimes (Homicide, Rape, Robbery, Aggravated Assault, Burglary, Larceny, MV Theft, and Arson) decreased 3.5% over 2004. Through aggressive targeting of problem areas and known criminals, vehicle crimes (such as thefts, prowls, and car strips) have slowly been decreasing. Even though Bellevue experienced its first homicides in six years in 2005, overall violent crimes slightly decreased. With the establishment of the Office of Professional Standards in 2005, citizen complaints and internal investigations will increase, because all complaints from any source or for any reason are tracked, investigated, and resolved. Finally, the challenges posed by the growth in the downtown business district, where new retail, commercial, and residential units are being built at a record rate, may require the department to re-think how it handles policing downtown Bellevue.

City of Bellevue
2007-2008 Biennial Budget

Police Communications

Program Statement

Continue to plan for and employ up-to-date technology. Strive to meet all state, county, and municipal standards for answering calls for service and time to dispatch. Continue to explore regionalization of dispatch services among Eastside and Northside jurisdictions.

Summary of Services Provided

The Bellevue Communications Center is a regional 911 dispatch center, serving two police stations and 14 fire departments, serving a citizen population of approximately 640,000 in a 1,200 square mile area. It is the mission of the Center to receive calls for service and dispatch the necessary emergency response.

Issues related to Department Performance

The King County E-9-1-1 agency requires that 90% of 9-1-1 calls be answered within ten seconds. In 2005, 96% of all calls received by the Bellevue Communications Center were answered within ten seconds, thus exceeding the standard set by the County, resulting in the full revenue distribution to the City of Bellevue. This occurred despite a 3% increase in the number of incoming calls, from 167,504 in 2004 to 172,933 in 2005.

City of Bellevue
2007-2008 Biennial Budget

**Police
Communications**

Program Notes

The Bellevue Communications Center continues to be challenged by staffing concerns. Attrition is sometimes significant and filling vacancies, especially because of extensive training of new hires, results in excess overtime by current staff.

Combining the Police and Fire dispatch services from several Eastside and Northside cities and districts into a single location is a proposal which will continue to be examined in 2007. A regional group of Fire and Police agencies have been exploring the creation of a regional dispatch center which is now being referred to as NORCOM. The project has tentative acceptance from various staff personnel, and the recommendation is to go forward to each agency's elected officials. The goal is to provide a higher level of service for the public while at the same time realizing significant cost efficiencies.

City of Bellevue
2007-2008 Biennial Budget

Police Community Services/Investigations

Program Statement

- Increase investigations leading to arrest and charging of suspect(s) committing violent crimes, including domestic violence.
- Enhance ability to identify suspects committing crimes through collection of evidence and addition of fingerprints to AFIS database.
- Reduction of crime through police/community partnerships, education, and problem solving
- Seek honest and effective feedback from the community.
- Maximize resources with respect to criminal investigations in order to maintain a Part One Violent/Property Crime clearance rate that exceeds both the State and National averages.

Summary of Services Provided

The Community Services division manages, evaluates, and delivers community-oriented police services through a police/community partnership. This partnership jointly identifies community safety issues and applies innovative problem-solving strategies in an effort to maintain safe and vital neighborhoods. A primary focus is to better serve Bellevue's youth, families and neighborhoods. The division includes downtown bicycle officers, community station officers, crime prevention officers, and school resource officers.

The Police Investigations division provides investigation and timely resolution of reported incidents that require long-term and/or community-sensitive attention. This program is implemented through the specialized units of Person Crimes, Property Crimes, Fraud/White Collar Crimes, Special Investigations (Eastside Narcotics Task Force) and Crime Analysis and Prevention.

Through a combination of quality criminal investigations, forensic analysis of evidence, and interaction with our customer base, the CSS/Investigations program improves the Police Department's ability to manage, evaluate, and deliver law enforcement and community-oriented police services.

Police
Community Services/Investigations

Issues related to Department Performance

Part One violent crime clearance increased four percent in 2005, from 65% in 2004 to 69% in 2005. Violent crime remained very low in 2005, with 1.48 violent crimes reported per 1,000 population. Also, a total of 4,711 Part One property crimes were reported in 2005, down from 4,890 in 2004, a decrease of 4%.

In part due to specific efforts by detectives directed at motor vehicle thefts and crimes, the number of car thefts in 2005 decreased from 608 in 2004 to 567 in 2005. Bellevue was the only regional jurisdiction that showed a decrease in the number of vehicles reported stolen.

Customer satisfaction surveys continue to indicate a high satisfaction rate among the community for the quality of police services they receive. A large percentage of Bellevue citizens continue to feel safe or moderately safe while walking alone in their neighborhoods or in the downtown business district, both in daytime and after dark.

The Police Department has begun to implement a downtown policing plan that has analyzed the police responses downtown, along with call load, response times, and citizen panel input. This will allow the department to more efficiently respond to citizen concerns and to develop strategic plans. In June 2006, Sound Transit completed construction of a Downtown Transit Station Police substation, which should contribute to the overall downtown policing strategy.

Program Notes

In 2006, the Community Services and Investigations units were combined for the purposes of performance measure tracking, allowing for more meaningful and measurable outcomes. Most of the measurements are new, so there are no prior performance measures to portray alongside the current ones.

Also in 2006, the Investigations unit completed a years-long project to upgrade its criminal forensics facility, purchasing several state-of-the-art forensics tools using Federal grant funding and City of Bellevue capital funds. Case clearance rates are expected to increase as the lab becomes fully functional in 2007.

The Community Services unit's main focus will continue to be the partnership with neighborhoods and businesses in preventing crime and in education. Community substations in Factoria, Crossroads, and Downtown provide visible neighborhood presence, and the Department's School Resource Officers (SRO's) are on-site at the Bellevue School District's four high schools, one transitional school, and the district's middle schools.

City of Bellevue
2007-2008 Biennial Budget

Police Traffic Collision Investigations & Enforcement

Program Statement

The Traffic department will continue to emphasize neighborhood traffic safety using enforcement, traffic engineering, and community involvement. Authorized by the City Council in 2002, the Neighborhood Action Team unit within Traffic Enforcement focuses its attention in specific neighborhoods in the City that citizens have reported problems in, usually neutralizing those problems (speeding, lack of adherence to signage, etc.) in a short period of time.

The unit is also continuing its partnership with Bellevue's Transportation department to provide coordinated flagging services on local construction projects.

Using state-of-the-art computer hardware and software, the Traffic Collision and Investigation unit can rapidly and accurately determine the causes of major traffic collisions that involve injury.

Summary of Services Provided

The Traffic division has the primary role of ensuring as much as possible the safe and efficient flow of vehicular and pedestrian traffic throughout the City. The Traffic unit is responsible for providing traffic services to the community, with the primary purpose of reducing the number of motor vehicle collisions as well as protecting the livability of our neighborhoods through traffic enforcement. This involves educating the public about traffic laws and good driving habits. It also involves the active and appropriate enforcement of traffic laws, conducting high-quality collision investigations and interacting with the Courts, traffic engineers, and other organizations involved in the pursuit of traffic safety.

Total DUI arrests	#	Workload	234	400	300	300

Issues related to Department Performance

In 2005, 25% of all traffic collisions in the City of Bellevue resulted in injury, above the target of 24%. While there were more traffic-related injuries in 2005 compared to 2004 and 2003, the total number of collisions has decreased or stayed flat over the same period. Traffic enforcement efforts, including targeted programs at DUI enforcement, seat belt enforcement, and school zone speeding enforcement, have reduced overall collisions but so far have had no effect on injury-related collisions. The Department is examining different ways to affect and hopefully reduce injury-related traffic collisions.

2007-2008 Biennial Budget

Police
Traffic Collision Investigations & Enforcement

Program Notes

The Traffic Program provides a vital and necessary service to all who use Bellevue's streets. The primary goal is to provide this service in the most efficient and effective manner possible. It will continue to evaluate its service delivery methods and strategy to ensure that the maximum results can be achieved at the lowest possible cost.

Transportation

Program Outcome Statement

The mission of the Transportation Department is to provide a safe and efficient transportation system that supports livable neighborhoods and a vital economy in partnership with the community.

Services and Accomplishments

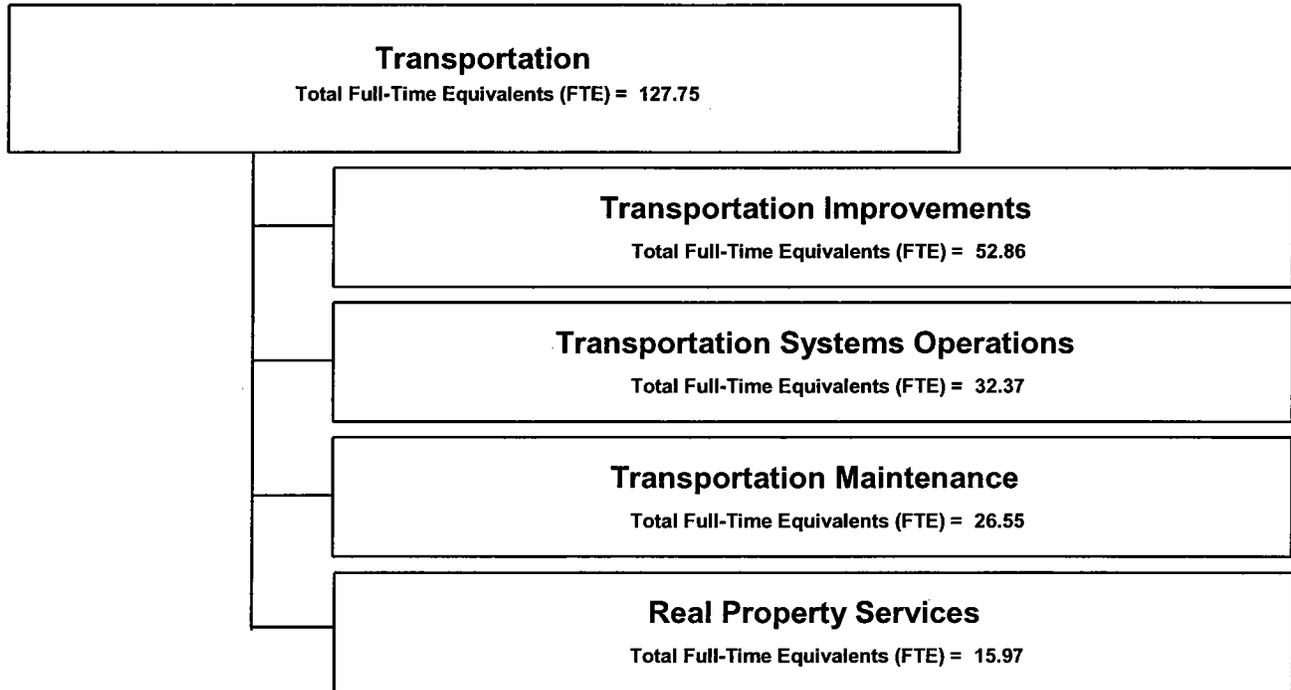

The Transportation Department consists of four major divisions: Planning, Capital Projects, Traffic Management and Streets Maintenance. The planning division forecasts future transportation conditions, identifies facility & service needs and coordinates with regional transportation providers to ensure Bellevue's interests are served. The capital projects division designs and constructs transportation system projects and provides developer and franchise utility inspection services. The traffic management division operates and maintains the City's traffic signals & street lighting system and provides neighborhood education and project implementation services, development review and right of way use permitting support, and general engineering and downtown parking monitoring services. The streets maintenance division maintains roadways, walkways, bikeways, trails, traffic devices, pavement markings, signs, and roadside vegetation.

Accomplishments:

- Advanced identification of a preferred long-term land use and transportation vision for the Bel-Red corridor planning efforts by establishing a Steering Committee, selecting a consultant team, developing various Transportation alternatives in conjunction with businesses and property owners, initiating an Environmental Impact Study (EIS) and soliciting public feedback through 15 public meetings where a number of alternatives were proposed;
- Selected a preferred design alternative for West Lake Sammamish Parkway with strong community support;
- Supported Council in the selection of light rail and the I-90 route as the preferred HCT alternative;
- Successfully advocated and secured \$80 million in funding for the NE 10th extension project and \$250 million for the I-405/SR 520 ramp braid funding through the State Legislature, in conjunction with partnering agencies;
- Effectively partnered with WSDOT and other agencies to complete the Environmental Assessment for the Downtown to Newport Hills I-405 Nickel project;
- Filed approximately 30 grant applications requesting over \$50 million and resulting in the award of over \$12 million in outside funds to supplement the Transportation Capital Investment Program budget;
- Improved transit mobility in Bellevue by completing a \$150 million freeway interchange project, Access Downtown, with HOV ramps in partnership with the WSDOT, Sound Transit, FHWA and the Transportation Improvement Board;
- Completed Stage 1 design, acquired all necessary right of way, and initiated construction for the NE 10th Street Extension project in coordination with Overlake Hospital, Group Health Cooperative and the WSDOT;
- Achieved the City's 2005-2006 traffic improvement goals to protect neighborhoods and improve mobility by designing approximately 68 and constructing approximately 73 capital projects;
- Successfully managed Downtown traffic during the recent construction boom enabling residents and visitors to enjoy Bellevue services while maintaining construction schedules;
- Implemented early actions from the City's Intelligent Transportation Plan and improved emergency management, traffic flow, and communications by installing 18 new traffic cameras and 13 miles of new fiber optic cable as part of the federally funded Homeland Security Project;
- Worked with fourteen neighborhoods, developing and/or constructing traffic calming projects to address citizen concerns with vehicle speeds, non-local traffic and pedestrian safety. In addition, responded to over 750 calls, letters and emails from citizens regarding neighborhood traffic concerns;
- Improved traffic flow and communications by upgrading and seamlessly co-locating the Traffic Management Center with the Eastside Communication Center at New City Hall;
- Improved resident and commuter access to traffic information by implementing an on-line real time traffic map for Bellevue arterials;
- Streamlined permitting processes to facilitate timely permit delivery.

Transportation

2007-2008 Work Initiatives

- Finalize the preferred land use and transportation future for the Bel-Red corridor and begin implementation of the adopted vision including reconciliation of Bellevue's and Redmond's plans for Bel-Red and Overlake improvements.
- Initiate an implementation strategy for the Downtown Plan and coordinate transportation efforts and initiatives in downtown, such as Great Streets, NE 2nd design, the 106th/108th couplet, and future planning of the NE 6th pedestrian corridor.
- Support major economic development initiatives, such as Meydenbauer Center expansion, redevelopment in the Wilburton area, and other special projects.
- Construct Stage 1 of NE 10th Street in cooperation with Overlake Hospital, Group Health & WSDOT and continue to support WSDOT in implementing Stage 2 of the NE 10th Street project.
- Coordinate with state and federal agencies and provide environmental and design support of the NE 8th to SR 520 Braided Ramps (TPA) project to improve regional access to I-405 at NE 10th.
- Continue to provide leadership and work collaboratively with Sound Transit, King County, Seattle and Eastside communities to aggressively plan the East Link corridor to further implement the City's Regional Mobility Interest Statement and future HCT Interest Statement.
- Advance Bellevue's regional transportation objectives for the I-90, I-405 and SR 520 corridors and identify potential city supporting actions, including:
 - Advocate for additional I-405 access ramps in downtown Bellevue consistent with I-405 Corridor EIS work, the Downtown Implementation Plan, NE 10th/Overlake project and surrounding area circulation plans;
 - Continue to support the planned construction of SR 520 Bridge Replacement and HOV Project consistent with City Council and Eastside cities preferred alternative and the SR 520 Bridge Replacement and Corridor interest statement.
 - Support Sound Transit and WSDOT in Phase 1 construction of the critical cross-lake I-90 Two-Way Transit/HOV project (R8A);
 - Provide leadership and advocacy for new transportation funding via regional and statewide funding efforts.
 - Ensure the County's Transit Now Program responds to Council's clear interest in achieving urban services levels for the City and Eastside. Pursue a downtown circulator and other community enhancement projects consistent with the Transit Now ordinance;
 - Ensure the County's Six-Year Plan Update reflects City priorities and capital investments as articulated in the City's 2003 Transit Plan.
- Closely monitor projected workforce levels and take proactive measures to respond to increases in workload resulting from an increase in CIP funding for the 2007-2013 timeframe, city support on regional projects, and/or additional revenue dedicated to transportation needs.
- Initiate a new CIP program to document, track, prioritize and implement major maintenance projects as a result of aging infrastructure.
- Continue to implement improvements resulting from the interdepartmental Development Services Improvement initiative.
- Begin planning for the replacement of the central traffic computer, including the communication network requirements.
- Actively manage downtown development by balancing the demand for the City's right of way with the impacts on the citizens who live, work and shop in downtown.
- Continue supporting citywide efforts to implement new tools and processes to increase customer satisfaction, operational efficiency, and compliance with federal and state regulations.

Transportation

Major Challenges for the Biennium

Significant reductions in transportation funding relative to project needs beginning in 2003 has meant fewer key projects are being funded and implemented. The department has identified well over \$250 million of unfunded needs in the next 6-12 years. While this level of funding may be unrealistic, the needs, and in some cases the community expectations, are high. Current unfunded needs include neighborhood protection and investment projects, economic development projects, regional 'Mega-Projects', and projects that are not fully funded for implementation, such as West Lake Sammamish Parkway, but have gained strong community support. With limited resources secured for the 2007-2013 CIP update, it will be increasingly difficult to deliver projects meeting customer needs.

The City is also changing due to the transition to an urban center with significant increases in downtown employment, housing and street level retail. Downtown right of way management and traffic system operations are two key areas that are challenged from this growth. A comprehensive evaluation of downtown right of way management issues is needed to ensure land use policies, development standards, traffic standards and parking enforcement activities support the long term growth of the City.

Workload to operate the transportation system has increased significantly over the last few years due to system growth in overall size as well as implementation of Intelligent Transportation System (ITS) technologies. Staff is constantly challenged to maintain current service levels while simultaneously implementing effective traffic solutions. An increase in staffing levels will be necessary in the next biennium in order to effectively manage transportation traffic operational goals.

Planning for the Bel-Red Corridor was initiated in 2005 to develop alternative future development scenarios for the Bel-Red Corridor. This partnership effort will identify opportunities for economic development and will be closely coordinated with Sound Transit Phase II planning activities. Two primary goals of this work are to gain consensus of a preferred alternative and to better define the associated transportation improvements. Depending on the outcome of this study, the City may also partner with the City of Redmond to update the Bel-Red/Overlake Transportation Study.

Regional planning efforts will continue to advance Bellevue's regional transportation objectives for the I-90, I-405 and SR 520 corridors and provide leadership for Sound Transit, Seattle and Eastside communities to aggressively plan for Phase II Sound Transit improvements. The City will support WSDOT's construction of I-405 widening projects through Bellevue, assist Sound Transit in initiating the East Link EIS and selection of a preferred alternative, and coordinate with WSDOT to implement the I-405, SR 520 Braid project. These activities will require extensive inter-departmental coordination, technical support, and significant community outreach efforts. Staffing resources will be devoted to support these efforts to ensure Bellevue's interests are reflected and protected.

**City of Bellevue
2007-2008 Biennial Budget**

Transportation Transportation Improvements

Program Statement

Maintain mobility for residents, shoppers, and commuters through a balanced system of transportation alternatives supporting the City's land use vision, reducing auto dependency, and protecting neighborhoods from transportation impacts.

Summary of Services Provided

This program area provides for planning, design, development and construction of City owned transportation facilities; coordination with other jurisdictions to provide transit and regional facilities; and major repairs to existing facilities

Issues related to Department Performance

The Department's efforts over the past several years continue to pay dividends. Improvements to the initial project scoping and needs analysis phase resulted in efficiencies in project design. Moreover, the focus on the Project Delivery Roadmap clearly defines roles and responsibilities of the project team, develops formal team charters, and improves coordination of the project team members and stakeholders. These initiatives continue to lead to a significant improvement in the ability of the department to deliver its' program. In addition, improvements have also been implemented focusing on constructability reviews during the design phase to improve the quality of our construction contracts.

The economy in the region has quickly rebounded from the downturn of the past few years. The economic rebound coupled with major cost increases for the materials needed to construct transportation, as well as other, projects in the region meant 2005 saw an increasing number of bids received exceeding the engineers estimate. This was especially apparent on the 150th Avenue SE project, which was 15% over the engineers estimate. Because of the extremely high bids on the 150th project, and the limited additional funding available from King County for this project, all bids were rejected, the project's scope was reduced, and ultimately the project was re-bid and awarded in 2006.

It is impossible to foresee all the issues associated with a particular construction project prior to implementation, particularly issues associated with underground work. However, focus on constructability reviews throughout the design process minimizes cost increases between bid award and construction contract completion. The total percent of variance between the actual construction costs from the original construction contract was -0.4% in 2005 yet had averaged 5% from 2001-2004. The focus on the Project Delivery Roadmap and constructability reviews are key factors in this success.

Transportation

Transportation Improvements

Based on the projects for which the design phase was completed in 2005, final design costs were 19% of their respective construction contract amounts. This reflects a 4% favorable variance from the performance measure target of 23%. Design costs include any consultant costs, city staff time, and other miscellaneous costs such as printing and advertising. In addition, workload levels were higher than anticipated in both design and construction, 36 and 35 vs. targets of 25 and 22 for design and construction, respectively. This is a reflection of the higher number of smaller scale neighborhood projects resulting from transportation related projects in the Neighborhood Enhancement Program (NEP) and Neighborhood Traffic Calming Program (NTCP) projects.

The Transportation Department prepares a transportation concurrency "snapshot" annually and reports to the City Council on how transportation capacity is keeping up with permitted land development. The January 10, 2006 report to Council indicated that CIP projects contribute significantly to congestion reduction, reducing overall failed intersections from four to three, bringing the Newcastle Mobility Management Area (MMA) into compliance with its level of service (LOS) standard with 8% reserve capacity, and improving the reserve capacity in 8 other MMAs. All of the 13 MMAs in the City meet their LOS standards as set in the adopted Comprehensive Plan, assuming completion of the CIP. The range of reserve capacity available (to accept further traffic growth) in the 13 MMAs is from 8% to 39%. The percentage of areas achieving concurrency is 100%.

Program Notes

- Transportation Improvements is the largest program in the Transportation Department. The majority of the funds budgeted in this program are for Capital Investment Program projects.
- Targets reflect a decrease in Transportation funding for capital projects.
- A 1.0 LTE was added in late 2005 to address increased permit workload and special projects such as the impact fee update and the Development Services Initiative process improvement projects.

City of Bellevue
2007-2008 Biennial Budget

Transportation Transportation Systems Operations

Program Statement

Effectively and safely operate and maintain the City's transportation system.

Summary of Services Provided

The System Operations program is responsible for the efficient and safe operation of the roadway system, cost effective maintenance of the traffic signal and street lighting systems, and improved system safety. This is achieved through the design and implementation of engineering solutions to traffic problems, educating citizens about traffic impacts in neighborhoods, and improving traffic flows through traffic system adjustments and enhancements.

# of accident locations reviewed per FTE	#	Efficiency	45	45	-	-
# of high accident locations reviewed/scoped/designed	#	Workload	45	45	-	-

Issues related to Department Performance

The Neighborhood Traffic Calming Program continues to see increases in citizen requests for addressing excessive vehicle speeds and cut-through traffic. With an extensive public process, it is appropriate to expect at least two to three major traffic calming projects being constructed within a calendar year. In 2005, six projects were constructed and five more were in development or design compared to five and seven in 2004, respectively.

Program Notes

None

City of Bellevue
2007-2008 Biennial Budget

Transportation Transportation Systems Operations

- The number of traffic accidents at intersections and mid-block locations are affected by annexations and increased traffic volumes within the City. Without design and implementation of engineering solutions targeted to high accident locations, the number and cost of traffic accidents would be significantly higher.
- Accident rates at locations where accident reduction projects have been implemented are analyzed before and after project implementation. This data is used in conjunction with average accident cost data obtained from the National Safety Council to calculate annual accident cost savings.
- Neighborhood Traffic Control requests (excluding requests for Residential Permit Parking Zones) may be satisfied through project design and implementation or through targeted outreach and education.
- The number of signals operated by the City increases due to annexations, as new signals are installed for CIP projects or when The City assumes operating responsibility for WSDOT signals.
- An increase in downtown development and City construction projects resulted in an increase in the number of traffic signal timing patterns performed in 2005.

City of Bellevue
2007-2008 Biennial Budget

Transportation Transportation Maintenance

Program Statement

Provide clean, attractive streets, walkways, and bikeways while minimizing the City's liability and preserving the transportation infrastructure.

Summary of Services Provided

Maintenance program services include maintenance of a roadway system condition inventory; targeted pavement overlays; fast and effective response to system hazards; routine roadway, walkway, bikeway, bridge and rockery maintenance; routine street cleaning; snow & ice removal; and roadside vegetation control.

Issues related to Department Performance

The economy in the region has quickly rebounded from the downturn of the past few years. The economic rebound coupled with major cost increases for the materials needed to maintain and preserve transportation infrastructure meant 2005 saw an increasing number of bids received exceeding the engineers' estimate. This was especially apparent on the 2005 Overlays contract which was 21% over the engineers' estimate. As a result, the Overlay contract focusing on downtown streets was awarded but a second contract focusing on neighborhood streets was delayed and combined with the 2006 overlay contract.

**City of Bellevue
2007-2008 Biennial Budget**

Transportation Transportation Maintenance

According to the 2005 Customer Satisfaction survey, the City's street cleaning efforts continued to result in a high degree of satisfaction by Bellevue citizens. Satisfaction ratings, over the last 5 years, have been 95% or higher. This high satisfaction rating is primarily due to the establishment of sweeping route assignments and sweeping frequency levels of service which we apply based on system use. (For example, we apply a higher level of service for bike lane routes.)

The economy in the region has quickly rebounded from the downturn of the past few years. The economic rebound coupled with major cost increases for the materials needed to maintain and preserve transportation infrastructure meant 2005 saw an increasing number of bids received exceeding the engineers' estimate. This was especially apparent on the 2005 Overlays contract which was 21% over the engineers estimate. As a result, the Overlay contract focusing on downtown streets was awarded but a second contract focusing on neighborhood streets was delayed and combined with the 2006 overlay contract.

Residential pavement ratings were on target for 2005. Pavement ratings normally fluctuate over a two year period. Pavement is surveyed every two years establishing a baseline condition rating. This baseline information is combined with results of pavement improvements made to streets over the course of two calendar years. No adjustment is made for the deterioration of pavement in the second year of the pavement assessment cycle. This results in a measure that fluctuates within a 5% variance over a two year period.

The number of pothole repair requests per lane mile was at an all time high in 2005. This is due to a service level change in 2003 that significantly reduced the number of permanent paving repairs, replacing them with temporary spot improvements. The intent of this service level change was to reduce maintenance costs by waiting until the annual overlay program came through and performed permanent repairs. Unfortunately, the result was an increase in the frequency of temporary mitigation repairs necessary to keep the system operational and an increase in customer requests for repairs. This level of service change also did not result in significant cost savings as planned. In 2007-2008, this service level will be changed to begin performing permanent paving repairs at the pre-2003 Service Level as requested by customers.

Program Notes

- Roadways are rated on a scale from 0-100, with 100 being a new surface. Roadways are typically a candidate for maintenance when a score reaches 50 for arterial streets and 30 for residential streets. Additional information about the City's pavement rating system is included in the annual State of Mobility Report, available through the Transportation Department.
- The survey measures satisfaction with arterial sidewalks. Residential sidewalks are repaired by the City but not cleaned. Residential sidewalk maintenance is a shared responsibility of the homeowner, City contractors, and multiple City departments. Current funding levels allow for cleaning of arterial sidewalks only once each year. The timing of the survey may influence the level of satisfaction.
- The amount of concrete & asphalt sidewalk repairs may vary each year depending on the condition assessment results.
- Cost per lane mile resurfaced varies according to the type of street resurfaced. Arterials need thicker overlays and tend to require more expensive repairs than residential streets. The 2005 overlay contract focused exclusively on downtown arterials.
- Targets in 2007 & 2008 reflect a restoration to the 2002 service level for this activity.
- Less traction sand was applied to the roadway in 2005 due to an increase in de-icing chemical use, reducing the cost per lane mile for street sweeping.
- Improvements to the sign inspection program in 2005 resulted in a higher percentage of minor sign repairs and a lower percentage of complete sign replacements, lowering the average maintenance cost per sign over time.
- In 2007-2008, the area of roadway repaired service level will be changed to begin performing permanent paving repairs at the pre 2003 Service Level as requested by customers.

**Transportation
Real Property Services**

Program Statement

Ensure the integrity of real property transactions and the City's land survey control network.

Summary of Services Provided

The program provides technical services to City Departments for surveying and real estate transactions that enable departments to plan and implement City projects and programs. Accurate survey data supports the community, property owners and City departments. Activities include efficient and cost effective property acquisition services, establishing and maintaining the survey control network, and providing project support services to City departments.

Issues related to Department Performance

No issues to report.

Program Notes

- The Survey Control Network contains land survey reference markers which provide control points for surveys performed by both City and private surveyors. This system of accurate and documented control points significantly reduces the cost of survey services to City Departments and private citizens.
- Property acquisitions include total properties, partial property rights for Transportation and Utilities projects, and rights to enter on private property for survey, engineering and construction purposes. Property acquisitions may be outsourced to consultants during periods of unusually high workload levels.
- A temporary reduction in 2005-2008 capital transportation funding will result in redirection of staffing efforts to other real property related work items, such as real property inventory, property appraisals, project scoping and project design issues. Real Property staffing was been reduced by .85 FTE to address the reduction in funding.

City of Bellevue
2007-2008 Biennial Budget

Transportation

Pothole Patching

Enhancement: TRCBA116

Enhancement Description

The goal of the roadway repair program is to prevent spot failures of the roadway infrastructure from further deterioration. The budget for repairing small sections of roadway that were failing was reduced in the 2003-04 budget with the intent that pothole repairs performed by City streets maintenance staff using cold mix asphalt would be adequate until roadways were overlaid through the pavement management program. This reduction failed to achieve this outcome and we have instead seen a decrease in both customer satisfaction and the condition of neighborhood streets. Customer requests for pothole repair have increased from 95 in 2002 to 725 in 2005. The latest budget survey shows a marked decline in conditions of neighborhood streets, down from 59% to 50%.

Street Maintenance followed the direction given when this cut was taken until, for safety reasons (and applying good stewardship) other program service levels were temporarily reduced to partially restore this service. If this practice is continued, other infrastructure will show similar deterioration.

This program and the overlay program are not redundant, the overlay program is designed to handle entire roadways that have served their useful life and require total resurfacing. This program handles roadways that are in good overall condition but require spot repairs due to causes such as sub-base failure, water intrusion or root intrusion.

State/Federal/Industry Mandates

None. However, consideration under SAFETEA-LU gives priority for funding to agencies that have instituted system preservation plans and practices. (Reference Federal Public Law 109-59 Section 1117 Transportation, Community, and System Preservation Program).

Goals and Objectives

Maintaining the roadway infrastructure promotes neighborhood livability by protecting the City's infrastructure investment. Transportation is a still high priority for citizens as shown in the recent performance survey results.

Consequences of Not Funding

Pothole complaints, pavement deterioration, and damage claims will continue to increase if the service level is not restored. The overall customer satisfaction of roadway conditions is expected to continue to decline.

Transportation

Signals System Non CIP M&O

Enhancement: TRCBA115

Enhancement Description

The transportation system infrastructure grows due to three main drivers; City sponsored CIP improvements, annexations, and developer improvements. Ongoing operation and maintenance costs result from adding new facilities to the system. This proposal focuses on system growth due to development and citizen requests.

Three significant developer constructed projects were completed in 2004-2006 resulting in added infrastructure to the Transportation system. The Eastgate Direct Access project, Eastgate Park and Ride and Lincoln Square development projects resulted in the addition of five traffic signals, twelve street lights, three service cabinets, three audible pedestrian systems and one traffic camera. In addition, approximately 70 street lights were installed citywide in residential areas due to development and citizen requests. The addition of these facilities necessitates additional ongoing M&O in the Signals and Street Lighting operating budgets. The total ongoing cost increase associated with these facilities is estimated to be \$30,000 per year.

State/Federal/Industry Mandates

N/A

Goals and Objectives

Recognizing the growth of the infrastructure and providing funding to maintain and operate new facilities ensures continued delivery of high quality services.

Consequences of Not Funding

The level of service delivery for existing traffic signal and street lighting maintenance and operations activities will degrade if more facilities are added to the system without sufficient funding to pay for the added cost.

Equipment Requirements

Transportation

Snow & Ice Response

Enhancement: TRCBA119

Enhancement Description

As new anti-icing and de-icing methods became more widely used around the country, the City began testing a new de-icing measure to assess effectiveness, cost and environmental impact. This measure has proven to be effective in controlling ice and snow and is more beneficial to the environment. Demand from citizens for anti-icing and de-icing service has increased significantly in recent years, especially in neighborhoods more difficult to access during inclement weather. Minor additional funding is needed if the program is to be expanded to increase de-icing effectiveness, application frequency, provide better services to harder to reach neighborhoods, and respond to additional conditions such as freezing fog.

This proposal includes funding for application equipment to be attached to existing 4 wheel drive vehicles allowing de-icing activities to extend into more difficult to reach neighborhoods during weather events. Additional funding is necessary for environmentally friendly chemicals, replacement of existing and proposed equipment and a minor amount for overtime during weather events to allow staff to better respond to snow & ice events.

State/Federal/Industry Mandates

N/A

Goals and Objectives

Snow & ice control activities are visible services promoting neighborhood livability and safety.

Consequences of Not Funding

Citizens in higher elevations will not be served by de-icing activities and the City will have only limited ability to respond to other adverse weather conditions such as freezing fog because the current equipment does not fit on a 4-wheel drive vehicle. Sanding and anti-icing activities will continue at the current level and serve the higher elevations.

Equipment Requirements

An applicator with a useful life of approximately 5 years that fits one of the four-wheel drive vehicles is necessary to reach higher elevations during instances of freezing fog or accumulated ice. Ongoing funding for replacement of new and existing application equipment is also necessary to maintain & increase service levels.

Utilities

Program Outcome Statement

Bellevue Utilities provides exceptional service to the public by providing:

- a reliable supply of safe, high-quality drinking water that meets all the community's water needs;
- a reliable wastewater disposal system that ensures public health and safety and protects the environment;
- a surface water system designed to achieve fishable and swimmable waters and control damage from storms;
- a convenient and unobtrusive solid waste collection system that contributes to a healthy and pleasing cityscape in an environmentally sensitive way;
- timely, cost-effective equipment maintenance and asset management services to City departments.

Services and Accomplishments

Bellevue Utilities consists of the following divisions: Engineering, Resource Management and Customer Service, and Operations and Maintenance (O&M). Engineering plans and builds the City's water, sewer and storm drainage systems and provides project review and construction quality control for development projects. Resource Management and Customer Service provides billing services for customers, develops rates and budgets, provides contract management service for the collection of solid waste, and provides resource conservation services and education to customers. O&M performs inspections, repairs, and preventive maintenance to insure reliable operation of water, sewer, and surface water systems. O&M maintains the City's street and walkway systems, under the budget direction of the Transportation Department. Additionally, O&M provides maintenance and asset management services for vehicles, and for specialized mechanical, electronic and communication equipment in support of all City functions.

The following are the major 2005-2006 accomplishments:

- Invested \$13.7 million in utility infrastructure improvements, via the Utility Capital Investment Program (Water, Sewer & Storm Drainage), including:
 - Continued renewal and replacement of aging or under-capacity water, sewer & storm drainage pipelines;
 - Continued seismic retrofit of water storage reservoirs;
 - Continued water quality upgrades at drinking water storage reservoirs;
 - Replaced the East Creek culverts at Kamber Road, to reduce flooding frequency and improve fish passage;
 - Initiated a flood control program to reduce flooding of structures throughout the city;
 - Completed the first major project to replace a culvert at SE 6th Street on Sturtevant Creek;
 - Initiated a program to replace aging large volume commercial water meters;
 - Initiated the Coal Creek Basin capital projects as stipulated in the settlement agreement.
- Enhanced the Asset Management Program, including:
 - Continued development of renewal and replacement criteria and condition assessment programs for each utility, to prudently manage utility infrastructure assets;
 - Performed failure and claims reduction analyses for three utilities – Water, Wastewater, and Surface Water.
- Continued implementation of water supply action plan which provides a vision and direction for achieving Bellevue's long-term water supply needs through Cascade Water Alliance, including:
 - Completed an agreement for the sale of wholesale water between Tacoma and Cascade for water supply;
 - Completed transfer of the Bellevue Pipeline to Cascade;
 - Continued design of Tacoma/Eastside and North Segment pipelines;
 - Completed new interlocal agreements among members;
 - Continued negotiations for purchase of Lake Tapps and progress toward the Lake Tapps water right;
 - Continued development of Cascade's long-term Conservation Plan;
 - Entered into a Memorandum of Understanding with King County regarding water supply planning and began implementation through planning committees;
 - Entered into a Memorandum of Understanding with Pierce County regarding future management of Lake Tapps;
 - Completed first bond sale of \$55 million;
 - Completed Transmission and Supply Plan;
- Participated in Department of Ecology's development of National Pollution Discharge Elimination System (NPDES) Phase II permit requirements. Managed stormwater programs to meet anticipated permit conditions.
- Investigated methods to reduce costs of proposed new flood control (detention) requirements of the State Stormwater Manual, including investigation of low impact development techniques that will work in Bellevue.
- Finalized and approved Water Resource Inventory Area 8 (WRIA 8) Salmon Conservation Plan as part of regional watershed planning. Plan approved by Council on June 21, 2005 and, with 100% local jurisdiction ratification, has been submitted to the Shared Strategy for Puget Sound Salmon Recovery and federal agencies.
- Continued participation in regional waste export system planning as part of the Metropolitan Solid Waste Management Advisory Committee.
- Completed the final draft of the Water Comprehensive Plan Update. Expect to submit to Council for adoption in 2007.
- Implemented the Water Telemetry System upgrades.

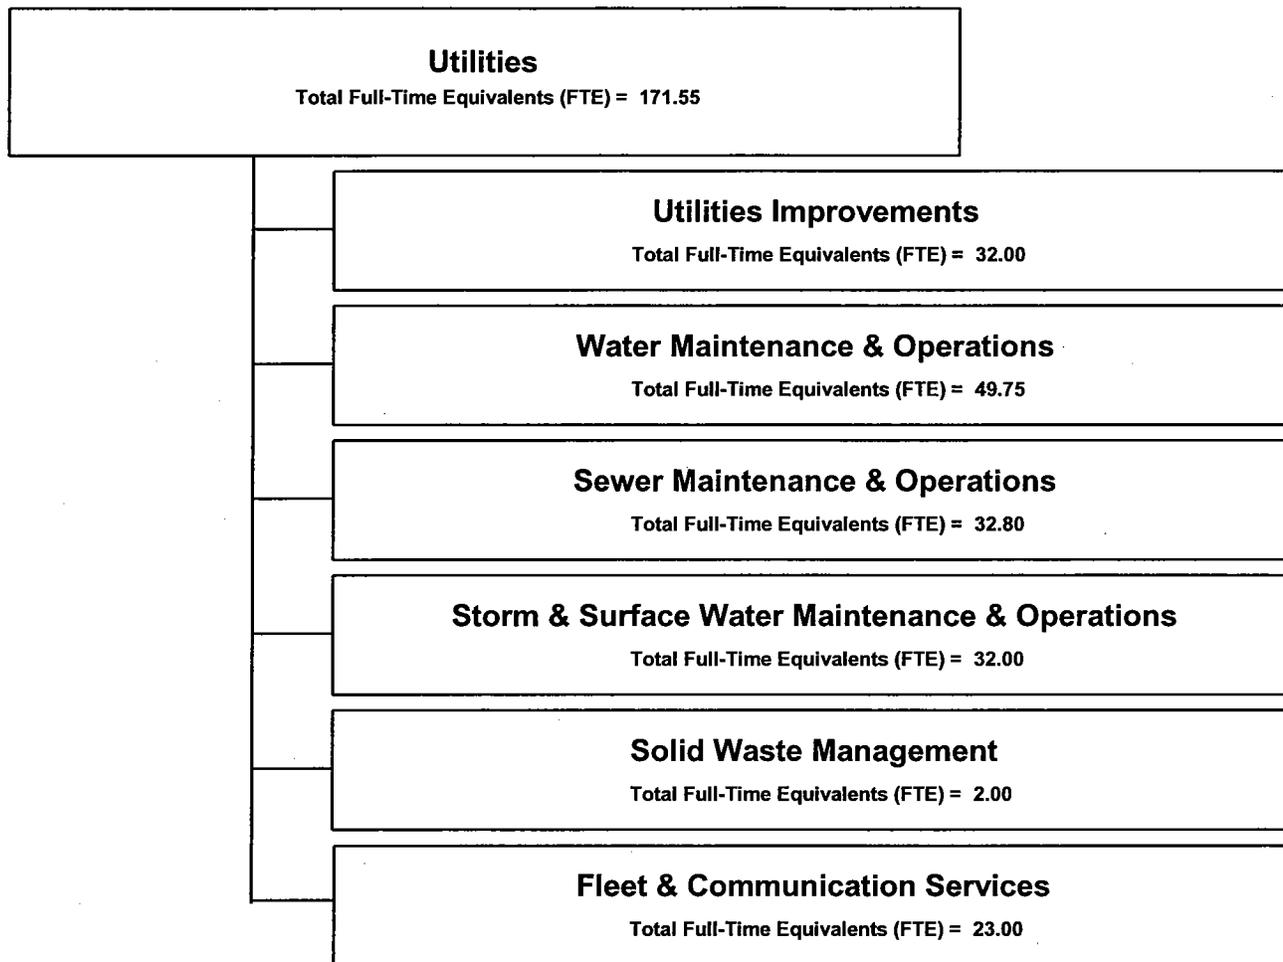

**City of Bellevue
2007-2008 Biennial Budget**

Utilities

- Developed and distributed annual Drinking Water Quality Report required by the Environmental Protection Agency. Maintained 100% compliance with all state and federal drinking water quality regulations.
- Continued work on developing long range plans for local water conservation program consistent with anticipated new state requirements. Completing the Conservation Potential Assessment in 2006 with Cascade Water Alliance was the first step to creating the plan. New finalized state requirements are anticipated late in 2006.
- Successfully improved Bellevue's Federal Community Rating System score from a Class 6 to a Class 5 community. As a result, Bellevue is in the top 3% of communities participating in this federal floodplain management program nationwide, and our citizens are eligible for a total 25% reduction in federal flood insurance premiums.
- Assumed operations and maintenance of King County Water District #1 (Yarrow Point) effective 1/1/05, providing water service to 211 customers.
- Negotiated Mutual Aid Agreement with Bellevue School District for sharing resources in an emergency.
- Continued commercial account meter reading improvements resulting in \$550,000 in additional revenues.
- Produced a video about the Cascade Water Alliance which received an Honorable Mention at the National Association of Telecommunications Officers and Advisors (NATOA) Government Programming Awards on August 25, 2006.

Utilities

2007-2008 Work Initiatives

2007-2008 Major Work Initiatives are:

- Implement the Updated Utility Capital Investment Program (Water, Sewer & Storm Drainage). For 2007 & 2008, this includes over \$19.0 million in utility infrastructure improvements. Major projects include:
 - Continue renewal and replacement of aging or under-capacity water, sewer & storm drainage pipelines and associated structures, including accelerated replacement of beyond-service-life pressure reducing valves, and improvements at the BelRed Water Supply Inlet;
 - Continue seismic retrofit of water storage reservoirs;
 - Initiate a 10+ year program for retrofit of water pump stations and continue ongoing efforts to retrofit sewer pump stations throughout Bellevue;
 - Continue to make water quality upgrades at drinking water storage reservoirs;
 - Complete projects to improve water quality treatment capacity at existing stormwater detention ponds;
 - Construct flood control projects to reduce flooding of structures throughout the city;
 - Continue a program to replace aging large-volume commercial water meters;
 - Continue design and construction of capital projects in the Coal Creek Basin, as stipulated in the settlement agreement;
- Continue work on long-term strategy to respond to increased operations and maintenance requirements mandated by regional, state and federal environmental mandates (e.g., Safe Drinking Water Act, Endangered Species Act, National Pollution Discharge Elimination System).
- Continue the development of the Asset Management Program, including renewal and replacement criteria and condition assessment programs for each utility, to prudently manage investments in utility infrastructure.
- National Pollution Discharge Elimination System (NPDES):
 - Continue to manage stormwater programs to meet NPDES Phase II permit conditions;
 - Represent Phase I and II jurisdictions in Ecology's Stakeholder NPDES Monitoring Committee to improve permit requirements. Caucus with other Phase I and II jurisdictions.
- Comprehensive Plans:
 - Complete environmental review, formal approval and adoption of the Water Comprehensive Plan by Bellevue, King County, and Washington Department of Health;
 - Initiate the Stormwater Comprehensive Plan Update;
 - Initiate the Wastewater Comprehensive Plan Update.
- Continue implementation of the Cascade Water Alliance action plan including:
 - Finalize design and review under the State Environmental Policy Act (SEPA) and begin construction of Tacoma/Eastside and North Segment pipelines;
 - Finalize purchase of Lake Tapps.;
 - Finalize water right for Lake Tapps;
 - Begin conceptual design of treatment and transmission facilities for Lake Tapps;
 - Finalize and implement long range conservation plan;
 - Finalize and implement, if appropriate, county-wide water supply plan.
- Develop and finalize new interlocal agreement for Salmon Recovery Plan implementation in Water Resource Inventory Area 8 (WRIA 8). Participate in Plan and regional salmon recovery implementation efforts as directed by Council.
- Continue participation in regional waste export system planning and Solid Waste Comprehensive Plan update as part of regional solid waste management activities.
- Customer Billing Enhancements:
 - Complete the final phases of the Utilities Customer Service Information System implementation;
 - Add utility information and billing capability to the City's interactive voice response system. This will facilitate utility bill payments by telephone.
- Develop local water conservation program in compliance with finalized Water Efficiency Rule (new state requirements) in conjunction with Cascade Water Alliance.
- Develop a "Low Impact Development Manual" which identifies emerging storm water management techniques which will work in Bellevue, and include them in the Utility Engineering Standards.
- Continue to enhance Water, Wastewater and Surface Water system condition assessment, preventive maintenance and corrective maintenance activities through innovative methods (e.g., specialized video inspection applications, specialized cleaning equipment, trenchless point repair equipment).
- Support the environmental permitting efforts for the I-405 corridor and SR 520 Washington State Department of Transportation (WSDOT) projects.
- Participate in planning and needs assessment in preparation for the Electronic Communication Services (ECS) move to the Bellevue Service Center.

Utilities

Major Challenges for the Biennium

- Sewage treatment charges from METRO will increase in 2007 and are being driven by higher debt service resulting from increased capital costs (including the Brightwater treatment plant).
- Water costs from the Cascade Water Alliance (Cascade) have increased based on Cascade's current capital program, debt service related to its first bond sale, and 2007-2008 operating costs. The increases incorporate incremental decisions reviewed with Council during 2006, including the Tacoma water purchase agreement and pipeline design and construction activities.
- Regional water resource decisions may be made over the next biennium that could have significant programmatic and cost implications for Bellevue Utilities. These efforts include county-wide water supply planning, regional salmon recovery planning, and state Puget Sound protection and recovery. Utilities will monitor regional water resource activities and participate in regional issues, as directed by Council.
- Local Capital Investment: Since adoption of the last budget, the economic outlook and forecasted construction inflation have changed significantly. Utilities staff have updated cost estimates and critically reviewed the adopted Capital Investment Program (CIP) to determine appropriate revisions to programs and projects. The 2007-2013 Capital Investment Program Plan presents these detailed changes.

City of Bellevue
2007-2008 Biennial Budget

Utilities Utilities Improvements

Program Statement

The focus of the Utility Improvements program is to plan and implement investment in capital facilities to assure the continued availability of reliable Utility systems.

Summary of Services Provided

Continued investment in utility capital infrastructure. The program is designed to protect the existing utility infrastructure investment, to optimize system performance and reliability, and to ensure cost effective system expansion. Program Elements include system planning and analysis; development, design and construction of the Capital Investment Program (CIP); and project review and construction quality control of development projects.

2007 - 2008 Initiatives are:

- Complete the update of the Water Comprehensive Plan;
- Initiate Stormwater and Wastewater Comprehensive Plans;
- Document the Asset Management Program for utility infrastructure, and define specific objectives to be implemented over time;
- Invest \$19 million in utility capital infrastructure in 2007 and 2008;
- Develop and/or update hydraulic models of major stream systems;
- Continue mandatory audit of federal Community Rating System program for floodplain management;
- Continue to implement the Coal Creek Basin capital projects as stipulated in the settlement agreement.

Issues related to Department Performance

The FEMA Community Rating System ranking affects the cost of flood insurance premiums for the citizen of Bellevue. Communities are ranked on a 10-point scale, with 1 being the best. As recommended in the 2004 FEMA audit of Bellevue's flood management policies and practices, Bellevue was awarded an improved rating (moved the rating from a 6 to a 5) for 2005, which resulted in a 25% flood insurance premium reduction, and places Bellevue in the top 3% of participating communities nationwide.

The cost of system planning per \$ million of asset value increased in 2007 and 2008 to more fully account for Utility Planning initiatives. System planning costs include staff salaries and consultant services. Prior to 2006, planning costs for some stream-related studies and activities, and staff associated with the asset management program, were not fully captured.

Development activity increased in 2005; continued growth is expected in 2006.

City of Bellevue
2007-2008 Biennial Budget

Utilities Utilities Improvements

Program Notes

The focus of the Utility Improvements Program is to plan and implement investment in capital facilities to assure the continued availability of reliable Utility systems. Progress towards meeting this goal is measured in part by evaluating the percent completion of planned Utility capital investments for the year, and total dollars spent for Utility capital projects over the period. While the Utilities' target completion rate for planned capital investment is always 100%, many factors can prevent achievement of that goal. In 2005, 82% of planned capital spending (includes unspent 2004 carry-forward funds and 2005 budget, and is adjusted for project savings) was completed, reflecting an investment of \$7.0 million. Major 2005 CIP accomplishments, and reasons for project delays, are explained below for each Utility.

The Water Utility expended 61% of the water capital improvements budget, and completed 100% of the total number of projects planned for completion in 2005. Total water expenditures were over \$2 million. Program accomplishments included:

- Completed work on several small diameter main replacement projects, including some larger projects bid in previous years (W-16);
- Completed one water service extension (W-68);
- Completed improvements to the Factoria Reservoir, and relocation of a deep main at the S. Bellevue Community Center (W-69).

Some projects were delayed, including replacement of the Rosemont Asbestos Cement (AC) Water main (W-87), to honor a neighborhood request for coordination with other private utility work in order to minimize the time of construction impact; and reservoir water quality upgrades (W-92) at the Clyde Hill 465 reservoir to facilitate coordination with other pump station upgrades planned at the site. The first phase for two new programs, Replacement of Large Commercial Water Meters (W-98) and Service Lines & Saddle Replacement (W-99) were designed, and will be bid in 2006.

The Wastewater Utility expended 70% of the sewer capital improvements budget, and completed 100% of the number of projects planned for completion in 2005. Total wastewater expenditures were just over \$1.1 million. Significant accomplishments included the following:

- The release of an RFQ for pre-design of 5 pump stations (S-16);
- Implementation of two major trunkline repair contracts, and work in anticipation of upcoming Transportation projects(S-24);
- Construction of one sewer extension constructed, and several others in preliminary design (S-30);
- Predesign work to select the most cost effective solution at the proposed bogline lift station site (S-50).

The Storm Water Utility expended 91% of the storm capital improvements budget; and completed 113% of the number of projects planned for completion in 2005. Total storm expenditures were just over \$3.8 million. Accomplishments included the following:

- Initiated a flood control program to reduce flooding of structures throughout the city. Completed the first major project to replace a culvert at SE 6th Street on Sturtevant Creek;
- Completed the Richards Creek Culvert Reconstruction project (D-71, D-90, D-81, D-86);
- Initiated the suite of projects in Coal Creek, associated with the 2004 settlement agreement. Specifically, design of overbank stormwater outfall improvements (D-98 & D-99), preparation of the programmatic EIS (D-100), and Coal Creek stabilization work (D-69);
- Early completion of the 116th Ave SE Outfall in Newport Hills (D-76);
- Implementation of several infrastructure repair contracts throughout the city, many ahead of planned street overlays (D-64);
- A stream channel modification project near Ardmore Park (D-86).

**City of Bellevue
2007-2008 Biennial Budget**

**Utilities
Water Maintenance & Operations**

Program Statement

Protect, maintain, operate, and administer the City's water system for the purpose of providing a reliable supply of safe drinking water.

Summary of Services Provided

Utilities Water Maintenance and Operations efforts aim at protecting, maintaining, and operating the City's water system to provide a reliable supply of safe drinking water. Programs and services include the maintenance of adequate water pressure, fire, and consumption flows and quality throughout the system; efficient and effective emergency repairs and services; monitoring the system and supply for, and ensures compliance with, all state and federal drinking water standards for public water systems; and administering programs which ensure the wise and efficient use of water.

2007-2008 Initiatives are:

- Continue support for Cascade Water Alliance (Cascade) efforts to meet current and future demands for clean, safe water, through effective management of current supplies and development of new water supply;
- Continue implementation of a comprehensive system-wide drinking water quality plan;
- Continue water quality and conservation programs and meet requirements of the new water efficiency rule;
- Continue production of the federally mandated Consumer Confidence Report;
- Complete the final phases of the Utilities Customer Service Information System implementation;
- Continue development of asset management program elements including: asset inventory, condition assessment, residual life, life cycle costs, levels of service, risk, maintenance planning, repair and replacement, and funding strategy.

Utilities

Water Maintenance & Operations

Issues related to Department Performance

The provision of high-quality service to our customers is a central objective of all Utility programs. Customer surveys help us measure and track customer satisfaction. The Department's satisfaction rating of customers who said that they were fairly to very satisfied with the Bellevue Utilities Department was 92% in 2005.

Historically the valve survey program targets 50% of all valves (4,180 valves each year). 2005 performance fell short of this target primarily due to high turnover of temporary staff. The cost increased in 2005 due to a combination of higher hourly rates paid for temporary staff and added costs to train staff due to higher turnover rates. The 2007/2008 targets reflect the leveling of this cost.

Continued progressive operations, maintenance and monitoring of the water system and supply provide customers with water that meets or exceeds all state and federal drinking water standards.

In 2005, more than 2,400 backflow devices were added to the system. This increase in backflow devices resulted in less than the target number of inspections.

Aging infrastructure continues to impact costs and the number of claims paid out. While the number of water main breaks predicted for future years is based on an average, less predictable are claims for dig-ups, vehicle accidents, etc. Maintenance costs and claims can be expected to increase as systems begin reaching the end of their reliable service life.

Water system sampling projections for 2007-2008 reflect anticipated additional sampling requirements for disinfection by-products per federal Safe Drinking Water Act requirements.

Customer information requests for water conservation programs fluctuate depending on summer water supply status and forecast, as well as on special regional conservation programs being offered.

Customers receive water that meets or exceeds regulatory requirements. There were no violations of state or federal drinking water quality standards or monitoring and reporting requirements in 2005. The Cross Connection Control Program continued to canvass the City for previously unidentified cross connections (connections that could potentially contaminate the public water system). Combined with the continued economic development in the commercial areas, the effort resulted in the identification and control of over 1,000 additional cross connections.

One method the Utility uses to measure reliability of its services is the number of unplanned water service interruptions per 1,000 service connections. Interruptions in 2005 were 1.57 per 1,000, which represents a 28% reduction from the 2004 rate and well below the 2005 target of 3.0. This consistently low rate is due to ongoing pipe replacement and proactive maintenance practices.

Program Notes

Efforts within this program are aimed at the protection, maintenance, and operation of the City's water system to provide a reliable supply of safe drinking water.

Preliminary data indicates that overall, customers continue to be extremely efficient with water use.

Costs in 2005 associated with "Environment Division" are related to an internal reorganization of the Department and are spread to other costs centers.

City of Bellevue
2007-2008 Biennial Budget

Utilities Sewer Maintenance & Operations

Program Statement

Protect, maintain, operate and administer the City's sewage disposal system in a manner which ensures public health and safety and protects the environment.

Summary of Services Provided

Utilities Sewer Maintenance and Operations efforts aim at protecting, maintaining and operating the City's wastewater infrastructure in a manner that ensures the health and safety of the public and protects the environment. Programs and services include the maintenance and operations of wastewater collection and pumping systems to assure continuous and reliable service.

2007-2008 Initiatives are:

- Continue to enhance Wastewater preventive maintenance activities through innovative methods;
- Continue development of asset management program elements including: asset inventory, condition assessment, residual life, life cycle costs, levels of service, risk, maintenance planning, repair and replacement, and funding strategy;
- Complete the final phases of the Utilities Customer Service Information System implementation;
- Continue participation in policy amendments to, and tracking implementation of, the Regional Wastewater Services Plan.

City of Bellevue
2007-2008 Biennial Budget

Utilities Sewer Maintenance & Operations

Issues related to Department Performance

The provision of high-quality service to our customers is a central objective of all Utility programs. Customer surveys help us measure and track customer satisfaction. The Department's satisfaction rating of customers who said that they were fairly to very satisfied with the Bellevue Utilities Department was 92% in 2005.

A method used to measure service reliability is the number of public wastewater system backups per 1,000 connections. Although there is variability from year to year in actual occurrences, a long-term analysis shows an upward trend due to the aging wastewater infrastructure. The Utility continues to concentrate preventive maintenance efforts on known problem areas, and focuses on renewal and replacement of system components approaching the end of their useful life.

The actual cost per foot of sewer pipe cleaned in 2005 is lower than the 2006 target, and is closer to what is expected in 2007 and 2008.

Use of Pump Operations staff to backfill other positions as well as injuries to key crewmembers caused a reduction in pump station inspections. Also, an increase in the number of lakeline locates (which are difficult to plan for and often time-consuming) hindered staff from meeting regular pump station inspection and maintenance schedules. The 2005 planned control upgrade had to be postponed until 2006 due to the unanticipated loss of key technical staff, which contributed to the low costs.

Crews were able to focus inspections on critical sewer lines in close proximity to each other. As a result, higher footage totals were achieved. The average cost per foot of sewer pipe cleaned was significantly less than projected totals in 2005. This was due to concentrating cleaning efforts in known problem areas. The targets for average cost per foot of sewer pipe inspected and jet cleaned are lowered for 2007/2008, to mirror trends.

Industrial Waste costs increased in 2005 because mitigating impacts of grease discharges to the aging sewer system are a higher priority with economic development in commercial areas. The number of industrial waste pretreatment systems certified decreased in 2005 because some major re-development projects initiated that year eliminated multiple, smaller point of application pretreatment systems in-lieu of single, larger combination systems.

The plan to inspect 5,000 manholes in 2005 was scaled back due to temporary vacancies, staff injuries, and other competing priorities such as emergency sewer pipe repairs. The manhole inspection accomplishments in 2005 were a continuation of the 2004 scheduled inspection.

Additions to preventive maintenance cleaning schedules and support of increased video inspection levels were recommended by a consultant study. As a result, the 2007/2008 targets are increased for "feet of sewer pipe cleaned and inspected". This will be accomplished through a re-prioritization of more discretionary work.

Program Notes

Efforts within this program are aimed at the protection, maintenance and operation of the City's wastewater infrastructure in a manner that ensures the health and safety of the public and protects the environment. Bellevue strives to maintain and operate wastewater collection and pumping systems to assure continuous and reliable service.

Costs in 2005 associated with "Environment Division" are related to an internal reorganization of the Department and are spread to other costs centers.

**City of Bellevue
2007-2008 Biennial Budget**

**Utilities
Storm & Surface Water Maintenance & Operations**

Program Statement

Protect, maintain, operate, and administer the City's natural and developed storm and surface water system for the purpose of providing fishable and swimmable water, and a system which minimizes damage from storms.

Summary of Services Provided

Utilities Drainage Maintenance and Operations efforts are aimed at protecting, maintaining, and operating the City's natural and developed storm and surface water systems to provide fish a safe habitat, to provide waters suitable for swimming, and to provide a system that minimizes storm damage while ensuring water quality protection, flood control, and compliance with state and federal requirements. Programs and services are designed to protect water quality, enhance habitat, control flooding, and comply with state and federal requirements.

2007-2008 Initiatives are:

- Continue work on a long-term strategy to respond to increased operations and maintenance requirements resulting from regional, state and federal environmental mandates;
- Continue development of asset management program elements including: asset inventory, condition assessment, residual life, life cycle costs, levels of service, risk, maintenance planning, repair and replacement, and funding strategy;
- Manage storm water programs to meet National Pollution Discharge Elimination System (NPDES) Phase II permit conditions;
- Complete the final phases of the Utilities Customer Service Information System implementation;
- Participate in WRIA 8 Salmon Conservation Plan implementation as part of regional watershed planning;
- Evaluate new State storm water technical requirements as mandated.

Issues related to Department Performance

The provision of high-quality service to our customers is a central objective of all Utility programs. Customer surveys help us measure and track customer satisfaction. The Department's satisfaction rating of customers who said that they were fairly to very satisfied with the Bellevue Utilities Department was 92% in 2005.

In 2005, inspections of storm drainage pipes revealed that less pipes required cleaning than planned. Therefore, less feet of pipe were cleaned, resulting in a completion percentage below target.

City of Bellevue
2007-2008 Biennial Budget

Utilities
Storm & Surface Water Maintenance & Operations

The increase in the target of private structures inspected in 2007 and 2008 reflects the addition of private drainage systems to the program from new development and re-development projects. The cost per private structure inspected will decrease slightly in 2007 and 2008 from 2006 projections as the number of structures inspected continues to increase.

As catch basins age, the extent of needed repairs and therefore costs to repair them increases driving up the unit costs and reducing the number that are completed.

In 2005, Bellevue once again incurred no violations under the Clean Water Act. Utility programs were in compliance with federal and state Clean Water Act requirements.

Catch basin and pipeline cleaning are performed as part of the routine system-wide cleaning of the storm drainage system. Video inspection of pipelines is proving to be a cost effective asset as part of the condition assessment program. Pipeline cleaning costs were lower in 2005 than the previous year, and were well below the 2005 target. This was primarily the result of no longer encountering a significant number of locations where roots were obstructing drainage pipes. Cost in 2006 are expected to be consistent with the historic trends.

Program Notes

Bellevue's approach to stormwater management has evolved over a period of almost 30 years. From its inception, the City adopted an open stream corridor philosophy. Thus, where appropriate, the City's Stormwater Utility, through its regulatory framework, has attempted to preserve open stream systems with their associated riparian corridors.

Efforts within this program are aimed at protecting, maintaining, and operating the City's natural and developed storm and surface water systems to provide fish a safe habitat, to provide waters suitable for swimming, and to provide a system that minimizes storm damage while ensuring water quality protection, flood control, and compliance with state and federal requirements.

Costs in 2005 associated with "Environment Division" are related to an internal reorganization of the Department and are spread to other costs centers.

City of Bellevue
2007-2008 Biennial Budget

Utilities Solid Waste Management

Program Statement

Utilities Solid Waste Management focuses on providing contract management services for waste collection and disposal, and recycling collection and processing. It also focuses on providing educational services to customers for the purpose of promoting the conservation of resources.

Summary of Services Provided

Provide management services to customers for the purpose of disposing of solid waste, minimizing costs and environmental degradation, and conserving resources. Under contractual arrangements, Allied Waste Services of Bellevue collects residential, multifamily and commercial garbage/recyclables/yard debris, as well as provides city-wide litter control, service to City facilities and special drop-off collection event services. City-managed technical assistance projects include: commercial recycling and waste prevention programs, household hazardous waste prevention and recycling projects, special recycling collection events, public education/outreach and participation in the Northwest Natural Yard Days program.

2007-2008 Initiatives are:

- Continue to manage contract services;
- Participate in regional waste export system planning and Solid Waste Comprehensive Plan update as part of regional solid waste management activities;
- Implement enhanced recycling outreach and education programs consistent with the Department's integrated resource conservation approach.

City of Bellevue
2007-2008 Biennial Budget

Utilities
Solid Waste Management

Issues related to Department Performance

The provision of high-quality service to our customers is a central objective of all Utility programs. Customer surveys help us measure and track customer satisfaction. The Department's satisfaction rating of customers who said that they were fairly to very satisfied with the Bellevue Utilities Department was 92% in 2005.

Single-family residential customers recycled 65% of their waste in 2005. This is one of the highest single-family recycling rates in the nation. This measure exceeded the City's target of 60%. The multifamily recycling rate remained at 15% in 2005, the same as in 2003 and 2004. The flat line in multifamily recycling rates follows a national trend.

The Administrative Costs as a Percentage of Contractor Revenue measure is a ratio of City expenditures on solid waste to contractor revenues, therefore as contractor revenues decrease, the overall figure increases. Yard debris collected in 2005 increased due to high yard debris generation, the inclusion of food waste with the yard debris, and new weekly collection frequency.

The tons of business and multifamily garbage collected decreased in 2005, which is likely due to the effectiveness of the new solid waste contract and economic factors.

City of Bellevue
2007-2008 Biennial Budget

Utilities
Fleet & Communication Services

Program Statement

The focus of the Fleet & Communication Services program is to safeguard the City's investment in equipment and to support service delivery to Bellevue's citizens by providing timely, cost-effective maintenance and asset management services to City departments.

Summary of Services Provided

Provide timely, cost-effective maintenance and asset management services to City departments for vehicles, specialized mechanical equipment, radios, and electronic equipment needed to support City functions. Safeguard the City's investment in equipment through asset management, maintenance, and repair services. Manage the City's fuel system in a cost effective manner to meet customer needs and comply with applicable regulations. Provide motor pool services for customer's temporary transportation or construction needs.

2007-2008 Initiatives are:

- Continue to evaluate changes in equipment technology and develop processes that will maximize their benefits.
- Implement project to co-locate Fleet & Communications operations at the BSC.
- Continue to train Fleet & Communications staff to learn and maintain technical skills necessary to effectively service specialized equipment.

Budgeted Cost Summary	FY 2005 Budget	FY 2006 Budget	FY 2007 Budget	FY 2008 Budget

Utilities Fleet & Communication Services

Issues related to Department Performance

The City continues to do a good job of maintaining its vehicles and mechanical equipment. This allows for a high number of vehicles and mechanical equipment in service, resulting in a 92% in-service rate. This is a drop from the previous year, by 4 percentage points, and was due to an increased workload from our customers. Fleet Operations is reviewing what resources will be needed to get the in-service rate back above 95%.

Customer service for the Communication section remains high, with a 2005 survey result of 100% customer satisfaction rating.

In the "average maintenance cost per mile for light duty vehicles" category, cost per mile decreased due to an increase in "miles driven" and due to a proactive preventative maintenance program.

In 2005, Fleet had significant unplanned work for Public Safety, resulting in a backlog of work and increased downtime. The increase in downtime also impacted customer satisfaction, resulting in an 85% customer service rating. Resources are being evaluated to decrease downtime and increase customer satisfaction. As the number of vehicles (including heavy and light duty) and radios continues to grow, it will be challenging to maintain service levels without additional resources.

Radios are being built with a high degree of reliability, which has reduced the overall amount of repairs and services. Both the quality of the radios, and the technician's work, have achieved a very high level of customer satisfaction.

Program Notes

The New City Building (NCB) Comprehensive Finance Plan adopted by Council calls for City reserves to temporarily fund the debt service payment on the 2004 NCB bonds. As part of this plan, the City is budgeted to borrow \$3.9 million from MERF's replacement reserves in 2008.

After the NCB Comprehensive Finance Plan was adopted, the City identified one-time resources resulting from the planned change at year end 2007 from a cash budgeting basis to modified accrual. During the May 2006 budget retreat, Council earmarked a portion of these resources to reduce borrowing from reserves. Once reserve balances are restated in January 2008, a portion of the additional reserve balance (\$8m) will be used to reduce reserve borrowing. The budgeted loan from MERF's replacement reserves will then be negated as part of the 2007-2008 Mid-Bi Budget update.

Utilities

MERF/EERF: Fleet & Communications Rate Model

Enhancement: UTCBA04

Enhancement Description

Develop a new rate model for MERF and EERF rate development utilizing up-to-date tools and methodologies. The first Fleet & Communications Rate Model was developed in 2002 for the 2003-2004 budget.

Partly due to the original design and partly due to modifications added over time by both the consultant and in-house staff, this model has become overly complex and extremely cumbersome to use. Furthermore, the model does not lend itself to responding to sensitivity and other analyses desired by staff and management without additional programming.

THIS REQUEST IS FOR ONE-TIME FUNDS.

State/Federal/Industry Mandates

None.

Goals and Objectives

Increases Stewardship (financial and infrastructure).

Consequences of Not Funding

Increased costs as old rate model is difficult to use. Additionally, there is a higher potential for inaccuracy over time.

Other alternatives considered and why rejected:

- a. Identify resources in-house. With workload at its highest level ever, none were identified.

Equipment Requirements

Utilities

MERF: Alternative Fuel Study

Enhancement: UTCBA01

Enhancement Description

Engage a consultant to study potential alternative fuels and other environmentally friendly technologies (e.g. electric vehicles).

THIS REQUEST IS FOR ONE-TIME FUNDS.

State/Federal/Industry Mandates

At present, there are none. An item of note is that there is a federal requirement for federal and state fleets to comply with more stringent clean air requirements.

Goals and Objectives

The City is a participant in the Puget Sound Clean Air Coalition and actively pursues options for using new technologies and cleaner fuels in its fleet. This study would engage a consultant to lay a foundation for alternative fuel options and costs, along with a recommendation on implementation.

Consequences of Not Funding

Potentially higher costs, air quality issues, and further reliance on foreign oil.

Other alternatives considered and why rejected:

- Do not do the study. This has zero cost impact.
- Study over a number of years. This will spread out the costs. Additionally, it will not yield the results in a timely fashion.

Equipment Requirements

	FY 2007 Budget	FY 2008 Budget

MERF: Fleet FTE - Mechanical Services Technician

Enhancement: UTCBA05

Enhancement Description

Fleet is requesting the addition of a Mechanical Services Technician FTE in 2007. The City's fleet is currently managed with the preventative maintenance model, an automotive industry best management practice. Due to a 40% growth in the fleet over the last decade, it will be difficult to maintain current service levels and preventive maintenance industry standards without an additional FTE. This could ultimately result in reduced direct service delivery to Bellevue's residents, as equipment spends more time out of service.

- Since 1992, the size of the fleet grew 40%, while staff levels remained constant.
- The City's current equipment-to-staff ratio is 88:1, 31% higher than comparable jurisdictions.
- Fleet is currently behind on 1,000 hours of preventative maintenance work orders per year, 200 hours of repairs per year, and 300 hours of up-fits for new vehicles per year.

Preventative maintenance, which includes the routine inspection of equipment, catches problems before they become major. This results in less equipment downtime from repairs and a longer useful life for equipment.

- Bellevue saves several hundred thousand dollars a year in reduced replacement costs thanks to longer equipment life.
- The frequency of preventative maintenance could be decreased, but more time between check-ups could potentially increase long-term costs and equipment downtime.
- Contracting for additional services was considered, but it would also increase costs, especially since we would have to transport equipment in addition to managing the increased contracting workload.

Background

The City's fleet of vehicles and equipment has grown 40% since 1992, with staff resources remaining constant in the same period. This growth has caused a situation where equipment cannot be managed and maintained in a quality manner following automotive industry best management practices (BMPs). The impact of this growth is:

- Increased workload for fleet technicians as the fleet grows in number and complexity. Repairs take longer, even with efficiencies over the last few years (a list of these efficiencies is available);
- Backlog of preventative maintenance work orders representing over 1000 hours per year;
- Backlog of repair work orders representing almost 200 hours per year;
- Backlog of new vehicle up-fits and surplus of old vehicles representing 300 hours per year.

The impact on Fleet's customers is increased costs, increased down time of their equipment (and therefore potential reduction in the effectiveness of services delivery to the citizens), and decreased ability by Fleet to handle special requests.

Problem Background:

1. Fleet growth.

As noted above, the city's fleet has grown over 40% since 1992. At the same time, the staff resources have remained constant (see table below).

-Total Technicians:

1991: 10
2005: 10

-Total Equipment:

1991: 645
2005: 877

-Total Equipment to staff ratio:

1991: 64.5:1
2005: 87.7:1

Average Equipment to staff ratio for other jurisdictions (2006): 66.3:1

City of Bellevue
2007-2008 Biennial Budget

Utilities

MERF: Fleet FTE - Mechanical Services Technician

Enhancement: UTCBA05

As noted in the info above, the City's equipment to staff ratio is 32% higher than the comparable jurisdictions. This means that Bellevue's mechanics are responsible for 20 more pieces of equipment than the average jurisdiction surveyed. Available comparison data with other jurisdictions is available.

To meet this gap, the Fleet organization has employed many efficiencies. Additionally, the 2004 Fleet Alternative Services Study indicated that Fleet is providing the correct mix of in-house and contracted services.

2. Backlog of preventive maintenance work orders (and the impact on cost).

Fleet is currently behind over 1000 hours on preventive maintenance work orders. Why is this a major problem? For most of its existence, the Fleet Industry has practiced a reactive maintenance model. In this model, equipment is fixed when it breaks, and minor items are often deferred. The consequences of this model are longer down time, costlier repairs, and shorter useful life for the equipment. During the 1990s, the Industry embraced the preventive maintenance model. In this model staff takes a proactive approach to maintenance, wherein they inspect vehicles on a routine basis, catching problems before they impact the customer and fixing them before they become major repairs. Additionally, significant problems are not deferred for a later time ... they are taken care of immediately. The benefits of this model are increased use of equipment (decreased downtime), less long-term costs, and longer useful life.

It is important to note that in the American Public Works Association accreditation program for fleets, a preventive maintenance program is a vital criterion. This component is also present in the Fire, Police, and Parks Departments' accreditation processes.

As mentioned above, there are a number of significant benefits to this model:

- Increased use of equipment. This benefit has become increasingly important to Fleet's customers. As the fleet grows and Fleet is unable to finish work in an effective manner, the impact is on our customers' service delivery.
- Less long term costs for equipment. Preventive maintenance programs, once fully established, have the potential to reduce maintenance costs on all classes of equipment.
- The benefit of a longer useful life cannot be understated. The average life of an automobile or pickup truck in the reactive maintenance model in the city was 7-8 years. The goal for the preventive maintenance model is 10 years. Assuming Fleet can continue to get two additional years and that the cost of a new vehicle is \$20,000, the city will avoid \$500 per year per vehicle in increased replacement costs. Looking at light duty equipment only (439 pieces of equipment), that would be a cost avoidance of \$219,500 annually. Additionally, there are benefits of reducing the workload associated with purchasing, new service and salvage efforts needed to bring new equipment into the fleet.

3. Backlog of repair work orders.

Fleet is currently behind almost 200 hours per year on repair work orders. Why is this a major problem? This has a direct affect on customer service delivery. Down time of their equipment leads to reduction in the effectiveness of services delivery to our citizens.

4. Other effects:

- Fleet is hindered in the ability to proactively work with customers and meet their special needs;
- The workload has created a stressed group of employees. They have been working on the issue, and have created very efficient processes. Even with this success, the affect on employee morale is note-worthy;
- The City's fleet continues to grow un-checked (from a maintenance perspective);
- Fleet may not be able to meet future accreditation efforts.

5. Influencing factors (in addition to fleet size).

- Bellevue's Business Model: Fleet's role is to support the city's operating departments. This means supporting many business lines. Each business line adds a unique degree of complexity, and this translates into increased workload. As an example, Police has changed its specification for motorcycles. This means fleet staff must take on the roles of equipment planner, engineer, fabricator, and quality control. Another example is the Fire fleet, which in the last year include specialized equipment for an air truck and a mass casualty unit. Like Police above, this requires a complex degree of expertise

**City of Bellevue
2007-2008 Biennial Budget**

Utilities

MERF: Fleet FTE - Mechanical Services Technician

Enhancement: UTCBA05

that translates into additional workload. This type of complex specialization occurs with all customers and, even when contracted out, must be managed by the organization.

- Customer Business Practices: Customers' business practices have led in the direction of specialization, not standardization. This creates a workload issue, although it improves customer's efficiencies and effectiveness.
- Fuel Sites: have grown from two in 1992 to eleven sites in 2006.
- New Technologies in Fleet: Technologies used in the automotive field have changed at a drastic pace. Automakers are striving to use the latest, greatest technology, not only to improve their product but also to stay competitive in the marketplace. While this may improve the equipment performance, it increases the need for on-going training (impacts include cost of training and time away from the shop) and makes diagnostic work more complex.
- New Customer Technologies: Customers want to take advantage of their own industry's technological changes. This often relates to the vehicles (to either power and/or house these applications). An example is Police cars that are now powering many different types of technical tools (mobile data terminals; cell phones; tracking devices; automatic door opening devices for K-9 units, etc.).
- Regulatory Measures: regulatory measures are increasing at a fast pace. They include regulation on fuel, hazardous wastes, and most importantly automotive safety. All these impact Fleet's work load.

THIS REQUEST IS FOR ONGOING FUNDS

State/Federal/Industry Mandates

None

Goals and Objectives

Supports all council priorities related to operating department's goals.

Consequences of Not Funding

Increased downtime of vehicles; decreased customer service; increased maintenance cost per mile.

Other alternatives considered and why rejected:

Over the last five years, Fleet has managed an effort to analyze and improve business processes. During this time many improvements have been implemented to improve service delivery. Among the areas reviewed are shop utilization, safety, tools & equipment, service improvement, and the use of contract services.

Additionally, Fleet has looked internally across the scope of the Fleet & Communications operation, and has re-organized to better manage the flow of work in the shop and the use of vendor support for contract services.

1. Reduce Services: In this option, Fleet would re-engineer services to handle workload only, using a prioritization method that addresses critical workload issue first. This was rejected because it would shift responsibility, and cost, to our customers. A list of suggested service changes is available.
2. Contract Additional Services: This would increase costs, especially since the City would have to pay the outside contractor to transport the equipment. Fleet would still require additional staff to manage the increased contract workload. This could also lead to increased downtime for customers due to the extra time needed for transport to the vendor.
3. Increase preventive maintenance "frequency" considerably beyond industry standards. This will potentially increase long term costs and downtime.

Equipment Requirements

Utilities

MERF: Fleet Utilization Study

Enhancement: UTCBA02

Enhancement Description

Engage a consultant to study city-wide fleet utilization and service needs to assist in long-term fleet reductions. This may involve best practices; "right-sizing" the fleet; and maximizing the city's motor pool.

THIS REQUEST IS FOR ONE-TIME FUNDS.

State/Federal/Industry Mandates

None

Goals and Objectives

This meets the financial stewardship goals and is a best management practice for municipal fleets.

Consequences of Not Funding

Missed opportunity to control costs and increased potential for continued decrease in air quality.

Other alternatives considered and why rejected:

1. Not doing study.
2. Doing study in-house. Fleet does not currently have the expertise or the capacity.

MERF: Fleet Warranty Management Program

Enhancement: UTCBA06

Enhancement Description

The Fleet Warranty Management program will help Fleet to take better advantage of the warranties offered by automotive and parts manufacturers. The program will be developed with the help of a consultant and a limited term employee (LTE). By taking better advantage of its warranties, the City will receive more cash reimbursements, no-charge repairs and free replacement parts. Total savings should cover all operating costs by year end 2008. If savings do not cover operating costs, this program will be discontinued.

Background

Warranties are legal agreements (implied or expressed) designed to demonstrate that a company stands behind their product. These warranties are not free as they are built into the purchase price.

Warranty management programs are designed to take advantage of many different types of warranties offered by automotive and parts manufacturers. They are common place in the fleet industry. Taking advantage of the many different types of warranties, however, is labor and data intensive. If set up properly, a warranty management program can yield revenues and/or reduced costs far above the cost of the program.

A "recovery goal" is a good benchmark to determine the effectiveness of a warranty program. The industry standard seems to be between 5% and 10% of the dollars spent purchasing vehicles each year (\$50,000 to \$100,000 per \$1,000,000) and may be recovered in cash reimbursements, no charge repairs, or free replacement parts (source: Public Fleet Managers Association). There are other advantages as well. It reduces down time (no shuttling vehicles back and forth to get repairs done, or waiting for a shop to schedule repairs), helps to maintain an even workload (recalls and recommended repairs can be scheduled during the shop's slow times), as well as reducing maintenance costs (by taking advantage of warranty roadside assistance, and receiving reimbursements for repairs).

Currently, the City takes advantage of only a small portion of the potential benefits of warranties. There are two areas where the City receives income, or avoids costs, on warranty issues. The first is on new equipment that has a general warranty on parts and labor. In this case, we are flagged when the vehicle is under warranty, and we then pursue, time permitting, avenues of recovery. Systems are limited, since only one warranty can be tracked per asset. The second area is the purchase of new parts. Warranty recovery on these is realized only when staff memory is fresh on the purchase and the failure occurs within that "memory window". Both of these could be characterized as "low hanging fruit". Fleet is aware of the potential, but limited resources have prevented the organization from investigating opportunities, creating systems and process, and managing these systems and processes on a day-to-day basis.

Investment Proposal

This proposal has two phases. In the first, Fleet proposes to use a warranty consultant to study the fleet, assess probable returns and, assuming the report indicates that recovery potentials exist, create an action plan for implementation. The cost of this is estimated at \$18,000. This is approximately three weeks of consultant time and travel/expenses. This work would be performed by the middle of 2007.

In Phase 2, Fleet proposes a limited term employee be hired for one and a half years to develop the program as suggested by the consultant and implement it. This includes the development of policies, procedures, systems, vendor agreements, data structures, and specification modifications. After this is developed, the LTE would manage the warranty program and evaluate its success. Additionally, they would assess the City's long-term resource needs for maintaining it. This phase would include the purchase of a computer and office furniture. The cost is estimated at \$37,000 in 2007 and \$71,000 in 2008. Labor cost is based on entry level G25 plus 25% benefits.

State/Federal/Industry Mandates

None

Goals and Objectives

By providing vehicles and equipment to the City, Fleet is supporting Council's priorities related to Operating Departments' goals.

City of Bellevue
2007-2008 Biennial Budget

Utilities

MERF: Fleet Warranty Management Program

Enhancement: UTCBA06

Consequences of Not Funding

Missed opportunity to reduce costs.

Alternatives considered and why rejected:

- Consulting only. Cost of \$18,000. This will identify the opportunity, but does not give supply the resources to execute these opportunities.
- Reduce services and shift existing resources. None could be identified without impacts to customers.

Water: Automated Meter Reading Study

Enhancement: UTCBA07

Enhancement Description

Consultant contract to perform analysis of the current state of automated meter reading technology and a cost benefit analysis tailored to Bellevue Utilities. This study will assess whether there are efficiencies to be gained. Depending on the results of the study, Utilities may bring forth an automated meter reading implementation proposal for Council's consideration during the 2009-2010 budget process.

Currently using old technology to read meters.

Meter reading technology has advanced to include remote meter reading via drive-by wireless and fixed base wireless technologies. These technologies allow the water meter to transmit the meter readings to a data logger. This investment evaluates the current state of meter reading technology, identifies implementation issues and stakeholders in the process and builds a business case (cost/benefit analysis) for the Utility on the potential use of automated meter reading (AMR) technology. While implementing AMR represents an innovative solution to a necessary task, this investment's deliverable works to insure that an AMR implementation would be an efficient use of Utility funds.

The funding for this request will come out of excess operating reserves and will not impact rates.

State/Federal/Industry Mandates

N/A

Goals and Objectives

Consequences of Not Funding

Potential gains in efficiency will not be identified if not funded and meter reading processes will continue essentially as they exist today.

The costs to implement AMR represent a long-term capital commitment by the Utility. This analysis requires resources and expertise that the Utility does not currently have on staff.
