 ENVIRONMENTAL COORDINATOR
 450 110th Ave NE., P.O. BOX 90012
 BELLEVUE, WA 98009-9012

OPTIONAL DETERMINATION OF NON-SIGNIFICANCE (DNS) NOTICE MATERIALS

The attached materials are being sent to you pursuant to the requirements for the Optional DNS Process (WAC 197-11-355). A DNS on the attached proposal is likely. This may be the only opportunity to comment on environmental impacts of the proposal. Mitigation measures from standard codes will apply. Project review may require mitigation regardless of whether an EIS is prepared. A copy of the subsequent threshold determination for this proposal may be obtained upon request.

File No. 15-118406-GD

Project Name/Address: Bellefield Residential Park Sediment Pond
 Cleaning/1330 Bellefield Park Lane

Planner: David Pyle

Phone Number: 425-452-2973

Minimum Comment Period: August 20, 2015

Materials included in this Notice:

- Blue Bulletin
- Checklist
- Vicinity Map
- Plans
- Other:

BELLEFIELD PARK CONDOS POND SEDIMENT REMOVAL

There are two ponds, the upper pond will be referred to as pond "A" and the lower as pond "B". During low precipitation summer months the ponds are replenished by pumping in water from Mercer Slough.

The pump will be turned off to allow the water to drain from the ponds.

Straw bales and a silt fence will be installed in two locations, the first will be at the outlet of pond B and the second location will be at the outlet of pond A to keep sediment from moving downstream to Mercer Slough.

A school of fish was seen at the entry location of pond A, this area will be isolated so these fish can be netted and safely moved to the Mercer Slough. Any other fish located will also be netted and safely moved to Mercer Slough.

After the circulation pump is turned off and the water has subsided in pond A, the Innovac employees will place a 6" rubber hose in to the pond causing very little damage if any to the shoreline vegetation.

Using a 6" trash pump to pump the slurry into a Baker tank or using our vacuum trucks to vacuum the material into the trucks straight way, the employees will move around within the pond area directing the slurry into the hose.

Any living creatures, "fish, eels, shellfish, crayfish, etc..." will be carefully removed and set free in Mercer Slough.

When the sediment is successfully removed from pond A, the equipment will be moved downstream to pond B.

The process will be repeated in pond B as in A.

The goal is to reestablish the original grade in the ponds as when they were first established.

When all of the sediment in both ponds is removed, the pump will be turned back on filling the ponds. Water will build up and the straw bales will remain until any sediment settles to the bottom. Only then will they be removed.

All sediment material will be hauled off to a proper disposal facility.

ENVIRONMENTAL CHECKLIST

10/9/2009

Thank you in advance for your cooperation and adherence to these procedures. If you need assistance in completing the checklist or have any questions regarding the environmental review process, please visit or call Development Services (425-452-6800) between 8 a.m. and 4 p.m., Monday through Friday (Wednesday, 10 to 4). Assistance for the hearing impaired: Dial 711 (Telecommunications Relay Service).

INTRODUCTION

Purpose of the Checklist:

The State Environmental Policy Act (SEPA), Chapter 43.21c RCW, requires all governmental agencies to consider the environmental impacts of a proposal before making decisions. An environmental impact statement (EIS) must be prepared for all proposals with probable significant adverse impacts on the quality of the environment. The purpose of this checklist is to provide information to help you and the City of Bellevue identify impacts from your proposal (and to reduce or avoid impacts from the proposal, if it can be done) and to help the City decide whether an EIS is required.

Instructions for Applicants:

This environmental checklist asks you to describe some basic information about your proposal. Answer the questions briefly, with the most precise information known, or give the best description you can. You must answer each question accurately and carefully, to the best of your knowledge. In most cases, you should be able to answer the questions from your own observations or project plans without the need to hire experts. If you really do not know the answer or if a question does not apply to your proposal, write "do not know" or "does not apply." Giving complete answers to the questions now may avoid unnecessary delays later.

Some questions ask about governmental regulations such as zoning, shoreline, and landmark designations. Answer these questions if you can. If you have problems, the Planner in the Permit Center can assist you.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. Include reference to any reports on studies that you are aware of which are relevant to the answers you provide. The City may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impacts.

Use of a Checklist for Nonproject Proposals: *A nonproject proposal includes plans, policies, and programs where actions are different or broader than a single site-specific proposal.*

For nonproject proposals, complete the Environmental Checklist even though you may answer "does not apply" to most questions. In addition, complete the Supplemental Sheet for Nonproject Actions available from Permit Processing.

For nonproject actions, the references in the checklist to the words *project*, *applicant*, and *property or site* should be read as *proposal*, *proposer*, and *affected geographic area*, respectively.

Attach an 8 1/2" x 11 vicinity map which accurately locates the proposed site.

BACKGROUND INFORMATION

Property Owner: Bellefield Park Condos HOA

Proponent:

Contact Person: Bob Brotan
(If different from the owner. All questions and correspondence will be directed to the individual listed.)

Address: ¹³³⁰ ~~HOA~~ Bellefield Park Lane

Phone: 206-718-6900

Proposal Title: Bellefield Condo Pond Sediment Removal

Proposal Location: ¹³³⁰ ~~HOA~~ Bellefield Park Lane
(Street address and nearest cross street or intersection) Provide a legal description if available.

Please attach an 8 1/2" x 11" vicinity map that accurately locates the proposal site.

Give an accurate, brief description of the proposal's scope and nature:

1. General description: See attached Narrative
2. Acreage of site: ~~614~~ 614,547 S.F.
3. Number of dwelling units/buildings to be demolished: 0
4. Number of dwelling units/buildings to be constructed: 0
5. Square footage of buildings to be demolished: 0
6. Square footage of buildings to be constructed: 0
7. Quantity of earth movement (in cubic yards): Estimated at 250-400 CY
8. Proposed land use: NO change
9. Design features, including building height, number of stories and proposed exterior materials:
N/A
10. Other
N/A

Estimated date of completion of the proposal or timing of phasing:

Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.

List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.

Construction/Excavation Narrative - SEE Attached

Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain. List dates applied for and file numbers, if known.

Sound Transit East Link E-320

List any government approvals or permits that will be needed for your proposal, if known. If permits have been applied for, list application date and file numbers, if known.

Please provide one or more of the following exhibits, if applicable to your proposal. (Please check appropriate box(es) for exhibits submitted with your proposal):

- Land Use Reclassification (rezone) Map of existing and proposed zoning
- Preliminary Plat or Planned Unit Development Preliminary plat map
- Clearing & Grading Permit Plan of existing and proposed grading Development plans
- Building Permit (or Design Review) Site plan Clearing & grading plan
- Shoreline Management Permit Site plan

A. ENVIRONMENTAL ELEMENTS

1. Earth

a. General description of the site: Flat Rolling Hilly Steep slopes Mountains Other

b. What is the steepest slope on the site (approximate percent slope)?

30%

c. What general types of soil are found on the site (for example, clay, sand, gravel, peat, and muck)? If you know the classification of agricultural soils, specify them and note any prime farmland.

Peat/Muck

d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.

NO.

e. Describe the purpose, type, and approximate quantities of any filling or grading proposed. Indicate source of fill.

N/A

f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.

N/A

g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?

NO change

h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any:

Bmp's - See Narrative

2. AIR

a. What types of emissions to the air would result from the proposal (i.e. dust, automobile odors, and industrial wood smoke) during construction and when the project is completed? If any, generally describe and give approximate quantities if known.

EMISSIONS from combustion engines - construction equipment.

b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.

NO.

c. Proposed measures to reduce or control emissions or other impacts to the air, if any:

NONE

3. WATER

a. Surface

(1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.

Yes. Alcoa creek. Flows to West channel near Slough.

(2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If Yes, please describe and attach available plans.

Yes

Bellefield Residential Park
Sediment Pond Cleaning

15-118406-GD

- (3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.

250-400 Cy.

- (4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.

Yes. See Narrative

- (5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

NO.

- (6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.

None planned

b. Ground

- (1) Will ground water be withdrawn, or will water be discharged to ground water? Give general description.

NO.

- (2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals...; agricultural; etc.) Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.

None.

c. Water Runoff (Including storm water)

- (1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.

N/A

- (2) Could waste materials enter ground or surface waters? If so, generally describe.

NO.

d. Proposed measures to reduce or control surface, ground, and runoff water impacts, if any:

None.

4. Plants

a. Check or circle types of vegetation found on the site:

- deciduous tree: alder, maple, aspen, other
- evergreen tree: fir, cedar, pine, other
- shrubs
- grass
- pasture
- crop or grain
- wet soil plants: cattail, buttercup, bulrush, skunk cabbage, other
- water plants: water lily, eelgrass, milfoil, other
- other types of vegetation

b. What kind and amount of vegetation will be removed or altered?

Some wetland plants may be impacted.

c. List threatened or endangered species known to be on or near the site.

None.

d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:

Restoration of pond fringe vegetation

5. ANIMALS

a. Check or circle any birds and animals which have been observed on or near the site or are known to be on or near the site:

- Birds: hawk, heron, eagle, songbirds, other:
- Mammals: deer, bear, elk, beaver, other:
- Fish: bass, salmon, trout, herring, shellfish, other:

b. List any threatened or endangered species known to be on or near the site.

None known

c. Is the site part of a migration route? If so, explain.

No.

d. Proposed measures to preserve or enhance wildlife, if any:

Preserve vegetation

6. Energy and Natural Resources

a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy need? Describe whether it will be used for heating, manufacturing, etc.

b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.

n/a
n/a

c. What kinds of energy conservation features are included in the plans of the proposal? List other proposed measures to reduce or control energy impacts, if any:

n/a

7. Environmental Health

a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur as a result of this proposal? If so, describe.

n/a

(1) Describe special emergency services that might be required.

n/a

(2) Proposed measures to reduce or control environmental health hazards, if any.

n/a

b. Noise

(1) What types of noise exist in the area which may affect your project (for example, traffic, equipment, operation, other)?

N/A

(2) What types and levels of noise would be created by or associated with the project on a short-term or long-term basis (for example, traffic, construction, operation, other)? Indicate what hours noise would come from the site.

N/A

(3) Proposed measures to reduce or control noise impacts, if any:

N/A

8. Land and Shoreline Use

a. What is the current use of the site and adjacent properties?

Residential

b. Has the site been used for agriculture? If so, describe.

NO

c. Describe any structures on the site.

Residential

d. Will any structures be demolished? If so, what?

NO

e. What is the current zoning classification of the site?

R-3.5

f. What is the current comprehensive plan designation of the site?

SF-M

g. If applicable, what is the current shoreline master program designation of the site?

N/A

h. Has any part of the site been classified as an "environmentally sensitive" area? If so, specify.

yes- stream and wetland

i. Approximately how many people would reside or work in the completed project?

N/A

j. Approximately how many people would the completed project displace?

N/A

k. Proposed measures to avoid or reduce displacement impacts, if any:

N/A

i. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:

N/A

9. Housing

a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.

N/A

b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.

N/A

c. Proposed measures to reduce or control housing impacts, if any:

N/A

10. Aesthetics

a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?

N/A

b. What views in the immediate vicinity would be altered or obstructed?

N/A

c. Proposed measures to reduce or control aesthetic impacts, if any:

N/A

11. Light and Glare

- a. What type of light or glare will the proposal produce? What time of day would it mainly occur? *N/A*
- b. Could light or glare from the finished project be a safety hazard or interfere with views? *N/A*
- c. What existing off-site sources of light or glare may affect your proposal? *N/A*
- d. Proposed measures to reduce or control light or glare impacts, if any: *N/A*

12. Recreation

- a. What designated and informal recreational opportunities are in the immediate vicinity? *N/A*
- b. Would the proposed project displace any existing recreational uses? If so, describe. *N/A*
- c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any: *N/A*

13. Historic and Cultural Preservation

- a. Are there any places or objects listed on, or proposed for, national, state, or local preservation registers known to be on or next to the site? If so, generally describe. *NO*
- b. Generally describe any landmarks or evidence of historic, archeological, scientific, or cultural importance known to be on or next to the site. *NONE*
- c. Proposed measures to reduce or control impacts, if any: *NONE*

14. Transportation

- a. Identify public streets and highways serving the site, and describe proposed access to the existing street system. Show on site plans, if any. *N/A*
- b. Is site currently served by public transit? If not, what is the approximate distance to the nearest transit stop? *N/A*
- c. How many parking spaces would be completed project have? How many would the project eliminate? *N/A*

d. Will the proposal require any new roads or streets, or improvements to existing roads or streets, not including driveways? If so, generally describe (indicate whether public or private). *N/A*

e. Will the project use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.

Trucking/hauling of sediment for disposal.

f. How many vehicular trips per day would be generated by the completed project? If known, indicate when peak volumes would occur.

0

g. Proposed measures to reduce or control transportation impacts, if any:

None.

15. Public Services

a. Would the project result in an increased need for the public services (for example: fire protection, police protection, health care, schools, other)? If so, generally describe.

No.

b. Proposed measures to reduce or control direct impacts on public services, if any:

NONE.

16. Utilities

a. Circle utilities currently available at the site: electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other.

electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system

b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

NONE.

Signature

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

Signature *Tom Duber* Date Submitted *7/13/2015*
