

Bellevue Botanical Garden Master Plan Update

PLANNING TASK FORCE MEMBERS AND DESIGN CONSULTANT

12/2007

A seven member "Planning Task Force" was created, comprised of three city staff and four Bellevue Botanical Garden Society (BBGS) members. The Task Force's responsibilities include:

- Gather information and relay information received from internal and external sources to task force, consultant, and Project Manger.
- Provide input, recommendations, background information as required throughout planning update process.
- Attend regular meetings and share task responsibilities and assignments for specific project needs, updates to constituents, and information gathering.

In April of 2007, through a competitive public process, the Task Force selected JGM Landscape Architects as the successful design firm to assist the City in the Master Plan Update. Beginning in June, and over the past six months, the Task Force and JGM have met regularly to discuss the broad range of Master Plan topics and issues.
