

DEVELOPMENT SERVICES DEPARTMENT
ENVIRONMENTAL COORDINATOR
450 110th Ave NE., P.O. BOX 90012
BELLEVUE, WA 98009-9012

OPTIONAL DETERMINATION OF NON-SIGNIFICANCE (DNS) NOTICE MATERIALS

The attached materials are being sent to you pursuant to the requirements for the Optional DNS Process (WAC 197-11-355). A DNS on the attached proposal is likely. This may be the only opportunity to comment on environmental impacts of the proposal. Mitigation measures from standard codes will apply. Project review may require mitigation regardless of whether an EIS is prepared. A copy of the subsequent threshold determination for this proposal may be obtained upon request.

File No. 14-138959-LD

Project Name/Address: Westridge Apartments

Planner: Sally Nichols

Phone Number: 425-452-2727/spnichols@bellevuewa.gov

Minimum Comment Period: October 23, 2014

Materials included in this Notice:

- Blue Bulletin
- Checklist
- Vicinity Map
- Plans
- Other:

ENVIRONMENTAL CHECKLIST

10/9/2009

Thank you in advance for your cooperation and adherence to these procedures. If you need assistance in completing the checklist or have any questions regarding the environmental review process, please visit or call Development Services (425-452-6800) between 8 a.m. and 4 p.m., Monday through Friday (Wednesday, 10 to 4). Assistance for the hearing impaired: Dial 711 (Telecommunications Relay Service).

INTRODUCTION**Purpose of the Checklist:**

The State Environmental Policy Act (SEPA), Chapter 43.21c RCW, requires all governmental agencies to consider the environmental impacts of a proposal before making decisions. An environmental impact statement (EIS) must be prepared for all proposals with probable significant adverse impacts on the quality of the environment. The purpose of this checklist is to provide information to help you and the City of Bellevue identify impacts from your proposal (and to reduce or avoid impacts from the proposal, if it can be done) and to help the City decide whether an EIS is required.

Instructions for Applicants:

This environmental checklist asks you to describe some basic information about your proposal. Answer the questions briefly, with the most precise information known, or give the best description you can. You must answer each question accurately and carefully, to the best of your knowledge. In most cases, you should be able to answer the questions from your own observations or project plans without the need to hire experts. If you really do not know the answer or if a question does not apply to your proposal, write "do not know" or "does not apply." Giving complete answers to the questions now may avoid unnecessary delays later.

Some questions ask about governmental regulations such as zoning, shoreline, and landmark designations. Answer these questions if you can. If you have problems, the Planner in the Permit Center can assist you.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. Include reference to any reports on studies that you are aware of which are relevant to the answers you provide. The City may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impacts.

Use of a Checklist for Nonproject Proposals: *A nonproject proposal includes plans, policies, and programs where actions are different or broader than a single site-specific proposal.*

For nonproject proposals, complete the Environmental Checklist even though you may answer "does not apply" to most questions. In addition, complete the Supplemental Sheet for Nonproject Actions available from Permit Processing.

For nonproject actions, the references in the checklist to the words *project*, *applicant*, and *property* or *site* should be read as *proposal*, *proposer*, and *affected geographic area*, respectively.

Attach an 8 ½" x 11 vicinity map which accurately locates the proposed site.

ENVIRONMENTAL CHECKLIST

4/11/2013

If you need assistance in completing the checklist or have any questions regarding the environmental review process, please visit or call Development Services (425-452-6800) between 8 a.m. and 4 p.m., Monday through Friday (Wednesday, 10 to 4). Assistance for the hearing impaired: Dial 711 (Telecommunications Relay Service).

BACKGROUND INFORMATION

Property Owner: Bellevue Westridge Limited Partnership

Proponent: GMS Architects

Contact Person: Patrick W. McBride

(If different from the owner. All questions and correspondence will be directed to the individual listed.)

Address: 1804-136th Place NE, Suite #1, Bellevue, Wa. 98005

Phone: (425) 644-1446

Proposal Title: Westridge Apartments

Proposal Location: 500-121st Place NE, Bellevue, Wa.

(Street address and nearest cross street or intersection) Provide a legal description if available.

Please attach an 8 ½" x 11" vicinity map that accurately locates the proposal site.

Give an accurate, brief description of the proposal's scope and nature:

1. General description: 31 unit apartment building, 3-5 floors, wood framed
2. Acreage of site: 3.58 acres
3. Number of dwelling units/buildings to be demolished: 1 recreation building
4. Number of dwelling units/buildings to be constructed: 1 apartment building
5. Square footage of buildings to be demolished: 2,000+/-
6. Square footage of buildings to be constructed: 30,681 sqft.
7. Quantity of earth movement (in cubic yards):
8. Proposed land use: Residential, zoned R-30
9. Design features, including building height, number of stories and proposed exterior materials:
3-5 stories with modulation, steps up hill, 40' height (midpoint of roof to average grade), "Hardie" siding, board & batten and shingles with stone accents.
10. Other
Juliet balconies, craftsman detailing, upper level terrace.

Estimated date of completion of the proposal or timing of phasing:
summer 2015

Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain.

Existing units to be repainted and re-detailed (battens added to existing stucco board).

List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal.

none

Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain. List dates applied for and file numbers, if known.

none

List any government approvals or permits that will be needed for your proposal, if known. If permits have been applied for, list application date and file numbers, if known.

clearing and grading, demolition, building, utilities, fire, transportation

Please provide one or more of the following exhibits, if applicable to your proposal. (Please check appropriate box(es) for exhibits submitted with your proposal):

- Land Use Reclassification (rezone) Map of existing and proposed zoning
- Preliminary Plat or Planned Unit Development
Preliminary plat map
- Clearing & Grading Permit
Plan of existing and proposed grading
Development plans
- Building Permit (or Design Review)
Site plan
Clearing & grading plan
- Shoreline Management Permit
Site plan

A. ENVIRONMENTAL ELEMENTS

1. Earth

- a. General description of the site: Flat Rolling Hilly Steep slopes Mountains Other
- b. What is the steepest slope on the site (approximate percent slope)?
8%
- c. What general types of soil are found on the site (for example, clay, sand, gravel, peat, and muck)? If you know the classification of agricultural soils, specify them and note any prime farmland.
gravily sandy loam

d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe.
no

e. Describe the purpose, type, and approximate quantities of any filling or grading proposed. Indicate source of fill.

Purpose of grading to to construct a new building on a existing multi family residential site. Grading will provide building pad for new construction and walkways. Total cut will be 2,336 cubic yards with no fill. If it discovered that site will need fill, a fill source statement will be submitted at that time.

f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.

Potentially, resulting from denuded soils during and immediately following storm events

g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)?

Existing impervious coverage is 54.7%. After construction total impervious coverage will be 57.8%

h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any:

A temporary erosion and sedimentation control plan will be implemented prior to construction. During construction, erosion control measures may include any of the following: siltation fence, siltation ponds and other materials which may be used in accordance with City requirements. At completion of the project, permanent measures will include stormwater runoff detention and water quality facilities as required.

2. AIR

a. What types of emissions to the air would result from the proposal (i.e. dust, automobile odors, and industrial wood smoke) during construction and when the project is completed? If any, generally describe and give approximate quantities if known.

approx. 42 additional cars on site.

b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe.
no

c. Proposed measures to reduce or control emissions or other impacts to the air, if any:

none

3. WATER

a. Surface

- (1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into.

There are no surface water bodies in the immediate vicinity of project site.

- (2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If Yes, please describe and attach available plans.

The project will not require such work.

- (3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material.

Not applicable

- (4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known.

Not applicable

- (5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

The site does not lie with in a 100yr floodplain.

- (6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge.

No, a public sanitary sewer system will be installed to serve dwellings

b. Ground

- (1) Will ground water be withdrawn, or will water be discharged to ground water? Give general description.

no

- (2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals...; agricultural; etc.) Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve.

Not applicable. The site will be served by sanitary sewers.

c. Water Runoff (Including storm water)

- (1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe.

Stormwater runoff from roadways and other impervious surfaces will be collected by yard drains and catch basins and tight lined into existing public storm-system. Maximum runoff is expected at .180 CFS.

- (2) Could waste materials enter ground or surface waters? If so, generally describe.

Unlikely. Potential materials entering ground or surface water may be ones associated with automobile discharges and landscape preparations. Pollutants generated during construction are suspended solids and trace petroleum hydrocarbons. Following construction sources include, roadway and landscaping chemicals.

- d. Proposed measures to reduce or control surface, ground, and runoff water impacts, if any:

A City approved storm drainage system will be designed and implemented to mitigate any adverse impacts from runoff.

4. Plants

- a. Check or circle types of vegetation found on the site:

- deciduous tree: alder, maple, aspen, other
- evergreen tree: fir, cedar, pine, other
- shrubs
- grass
- pasture
- crop or grain
- wet soil plants: cattail, buttercup, bulrush, skunk cabbage, other
- water plants: water lily, eelgrass, milfoil, other
- other types of vegetation

- b. What kind and amount of vegetation will be removed or altered?

Selected trees on the property will be retained to satisfy the City of Sammamish Tree Retention Requirements. Please refer to the Tree Retention Plan prepared by Core Design for specific tree retention information. The remainder of the site will be cleared for construction of dwellings and access/utilities.

- c. List threatened or endangered species known to be on or near the site.

No threatened or endangered species known to be on or near the site.

- d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any:

Proposed landscape plan will emphasis the use of native or drought resistant plants. Invasive species found on site will be removed to enhance existing vegetation, where retained.

5. ANIMALS

- a. Check or circle any birds and animals which have been observed on or near the site or are known to be on or near the site:
- Birds: hawk, heron, eagle, songbirds, other:
 - Mammals: deer, bear, elk, beaver, other:
 - Fish: bass, salmon, trout, herring, shellfish, other:
- b. List any threatened or endangered species known to be on or near the site.
none
- c. Is the site part of a migration route? If so, explain.
no
- d. Proposed measures to preserve or enhance wildlife, if any:
none

6. Energy and Natural Resources

- a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy need? Describe whether it will be used for heating, manufacturing, etc.
electricity will be used for all energy needs.
- b. Would your project affect the potential use of solar energy by adjacent properties? If so, generally describe.
no
- c. What kinds of energy conservation features are included in the plans of the proposal? List other proposed measures to reduce or control energy impacts, if any:
The project will meet or exceed state energy requirements.

7. Environmental Health

- a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur as a result of this proposal? If so, describe.
no
- (1) Describe special emergency services that might be required.
none
- (2) Proposed measures to reduce or control environmental health hazards, if any.
none
- b. Noise
- (1) What types of noise exist in the area which may affect your project (for example, traffic, equipment, operation, other)?
traffic noise, fairly remote

- (2) What types and levels of noise would be created by or associated with the project on a short-term or long-term basis (for example, traffic, construction, operation, other)? Indicate what hours noise would come from the site.

modest increase in vehicular noise.

- (3) Proposed measures to reduce or control noise impacts, if any:
none

8. Land and Shoreline Use

- a. What is the current use of the site and adjacent properties?

residential

- b. Has the site been used for agriculture? If so, describe.

no

- c. Describe any structures on the site.

8, 2 -2 1/2 story apartments plus a recreation building.

- d. Will any structures be demolished? If so, what?

The recreation building and pool will be demolished.

- e. What is the current zoning classification of the site?

R-30

- f. What is the current comprehensive plan designation of the site?

Bel Red GC

- g. If applicable, what is the current shoreline master program designation of the site?

none

- h. Has any part of the site been classified as an "environmentally sensitive" area? If so, specify.

no

- i. Approximately how many people would reside or work in the completed project?

35-55

- j. Approximately how many people would the completed project displace?

none

- k. Proposed measures to avoid or reduce displacement impacts, if any:

none

- l. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any:

none, project is compatible.

9. Housing

- a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing.
31 mid-income
- b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing.
none
- c. Proposed measures to reduce or control housing impacts, if any:
none

10. Aesthetics

- a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed?
40' (mid-roof to average grade)
- b. What views in the immediate vicinity would be altered or obstructed?
none
- c. Proposed measures to reduce or control aesthetic impacts, if any:
Lodge/craftsman style detailing and massing, existing buildings on site will be repainted and detail added.

11. Light and Glare

- a. What type of light or glare will the proposal produce? What time of day would it mainly occur?
none
- b. Could light or glare from the finished project be a safety hazard or interfere with views?
no
- c. What existing off-site sources of light or glare may affect your proposal?
none
- d. Proposed measures to reduce or control light or glare impacts, if any:
Low glare craftsman style site lights to be used.

12. Recreation

- a. What designated and informal recreational opportunities are in the immediate vicinity?
Bellevue Botanical Garden and Wilburton Hill park are several blocks to the south, Glendale Country club to the east.
- b. Would the proposed project displace any existing recreational uses? If so, describe.
Existing recreation building is to be demolished.
- c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any:
Proposed building will have an exercise room as well as a patio and upper floor terrace and play areas.

13. Historic and Cultural Preservation

- a. Are there any places or objects listed on, or proposed for, national, state, or local preservation registers known to be on or next to the site? If so, generally describe.
no
- b. Generally describe any landmarks or evidence of historic, archeological, scientific, or cultural importance known to be on or next to the site.
none
- c. Proposed measures to reduce or control impacts, if any:
none

14. Transportation

- a. Identify public streets and highways serving the site, and describe proposed access to the existing street system. Show on site plans, if any.
NE 5th Street
- b. Is site currently served by public transit? If not, what is the approximate distance to the nearest transit stop?
The site is One and one half blocks from a rapid ride station with close by connection to the Bellevue transit
- c. How many parking spaces would be completed project have? How many would the project eliminate?
150 required and provided, spaces eliminated by reconfiguration will be made up.
- d. Will the proposal require any new roads or streets, or improvements to existing roads or streets, not including driveways? If so, generally describe (indicate whether public or private).
no
- e. Will the project use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe.
no
- f. How many vehicular trips per day would be generated by the completed project? If known, indicate when peak volumes would occur.
- g. Proposed measures to reduce or control transportation impacts, if any:
none

15. Public Services

- a. Would the project result in an increased need for the public services (for example: fire protection, police protection, health care, schools, other)? If so, generally describe.

Additional residents could marginally increase fire and police services, smaller apartments are not likely to attract many families with children.

- b. Proposed measures to reduce or control direct impacts on public services, if any:
none

16. Utilities

- a. Circle utilities currently available at the site: electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system, other.

water, sanitary, storm, electric, gas, refuse

- b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed.

Water, sanitary, storm and electric are required and on site.

Signature

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.
