SUBJECT: Pedestrian and Bicycle Program Progress Report 2009

In February 2009, the City Council approved a new Pedestrian and Bicycle Transportation Plan. The 2009 Plan includes 435 projects that when built will yield 90 miles of sidewalk, 144 miles of bikeway, and 20 miles of trail facility improvements.

Every year the City advances the implementation of the pedestrian and bicycle network as envisioned in the Ped/Bike Plan. Projects do not always construct the full design specifications detailed in the Ped/Bike Plan due to limited budgets or neighborhood opposition. However, progress toward completion of the non-motorized network is often a direct result of citizen involvement, innovative designs, and creative funding solutions.

Attached is a year-end update on progress made in implementing the Pedestrian and Bicycle Plan. No action is required at this time.
