

MEMORANDUM

TO: Transportation Commission

FROM: Franz Loewenherz, Senior Transportation Planner [425-452-4077]

SUBJECT: 2008 Pedestrian and Bicycle Transportation Plan Project Prioritization

DATE: July 31, 2008

Direction Needed from Commission

At the July 31 Transportation Commission meeting staff is presenting the preliminary sidewalk project prioritization spreadsheets for the updated Pedestrian and Bicycle Transportation Plan and seeking preliminary indications of the Commission's own project priorities. A project map of the pedestrian projects has again been provided for your reference.

This meeting will be the third Commission meeting on project prioritization.

- June 26 meeting, staff looked to the Commission for direction on the ranking of the draft bicycle and trail prioritized project list.
- July 10 meeting, Commission provided direction on the ranking of the draft bicycle and trail prioritized project list.
- ***July 31 meeting, staff will look to the Commission for direction on the ranking of the draft pedestrian prioritized project list.***

Once the Commission completes prioritization, staff plans to bring Council a draft prioritized project list and supporting documentation at a study session later in the summer.

Background

On April 10, 2008, after months of technical review and public input, the Transportation Commission recommended a list of projects to include in the updated plan. This list of projects would result in 90 miles of additional sidewalks, 143 miles of bicycle routes, and 21 miles of trail facility improvements.

At its April 24, 2008 meeting, the Transportation Commission provided staff with direction on the prioritization framework to employ in evaluating the pedestrian, bicycle, and trail project lists it endorsed at its April 10 meeting. The prioritization effort relies on Geographic Information System (GIS) software to automate the evaluation process. By overlapping a series of maps, each representing one of several characteristics, then the cumulative intensity of all characteristics at a specific location can be determined (see attached bicycle and trail projects prioritization grid maps). The prioritization methodology, staff used is based on the Transportation Commission's policy direction; these include:

- Corridor Conditions – The corridor condition indicators include: (i) Collisions (average annual pedestrian and bicycle/vehicle collisions); (ii) Roadway Classification; (iii) System Linkage; and, (iv) Bus Stop Level Ridership (1/4 Mile Proximity)
- Destination Network – These are indicators of nearness to key walking and cycling destinations. These land use criteria are based on designations found in the Comprehensive Land Use Plan: (i) Park Proximity (ft.); (ii) School Proximity (ft.); (iii) Community Center/Social Service Proximity (ft.); (iv) Retail Proximity (ft.); (v) Major Employment Center; and (vi) Housing Density.

- Social Justice – The social justice analysis is based on information from the 2000 U.S. Census. Four social justice proxy factors are used to illustrate non-motorized facility demand based on demographic characteristics of the City of Bellevue. These factors include: (i) Vehicle Ownership (%); (ii) Below Poverty Level (%); (iii) Under 18, 65 or over (%); and, (iv) Minority Population (%).

At its July 10, 2008 meeting, Commission reaffirmed the importance of the GIS ranking in arriving at a recommended “high, medium, or low” priority scoring for each of the projects in the Pedestrian and Bicycle Transportation Plan. In the case of the bicycle projects, another significant determinant of Commission’s ranking was whether the project helped realize one of the primary bicycle corridors (five east/west, six north/south) that provide general bicycle mobility throughout the City. Other factors influencing Commission’s prioritization assessment were staff’s professional judgment and comments from the public input process.

The enclosed draft pedestrian prioritized project list includes the GIS priority rank column as a number from 1 to 238 for pedestrian projects. Of these 238 projects, 60 were segmented into two single-sided sidewalk projects (thereby resulting in 60 more projects than previously presented to the Commission).

At the April 3, 2008 Transportation Commission meeting, Commissioners commented on the financial challenges of concurrently implementing sidewalks on both sides of a street and suggested staff approach sidewalk prioritization and implementation in a phased manner (e.g., first on the east-side of the street and then on the west-side of the street). Responding to Commission direction, staff segmented pedestrian projects that would implement sidewalks on both sides of a street. To account for this change, the pedestrian project spreadsheet includes both a “project new #” and an “project old #” heading; under the “project new #” heading the side of street is denoted with a N, S, E, or W ending.

The above change enabled GIS to arrive at numerical point rankings for sidewalks differentiated by side of the street. In some cases, the GIS ranking for a sidewalk segment will vary significantly depending on the side of the street being evaluated. By way of example, project old# S-870 is now segmented into S-301-N (GIS rank #47) and S-301-S (GIS rank #89). The GIS point difference for this project along Northup Way is associated with the different project limits of the two sidewalk segments; S-301-N extends from NE 33rd Place to 124th Avenue NE while S-301-S extends from Bellevue Way NE to 124th Avenue NE. This difference in project limits influences the relative point ranking of these two sidewalk segments.

To facilitate Commission’s assessment of the GIS point rankings for each of the sidewalk segments under consideration, staff grouped the project new #s together if they are associated with the same project old # (even if they have divergent GIS rankings). The pedestrian project spreadsheet is structured sequentially by the highest GIS ranking for a given two-sided sidewalk project. In the example above, the GIS rank of 47 for S-301-N places this project (along with S-301-S) among the top 50 highest ranked pedestrian projects. At the July 31 Commission meeting, staff will begin its review of the pedestrian projects with the 50 highest ranked GIS projects.

The pedestrian project spreadsheet also includes a column indicating whether the sidewalk project has an “associated bike project” along the same corridor as the pedestrian project and information on how the Transportation Commission ranked the associated bike project (“high, medium, or low” priority). Staff’s professional judgment and comments from the public input process are also provided to assist Commission in their prioritization of the pedestrian project list.

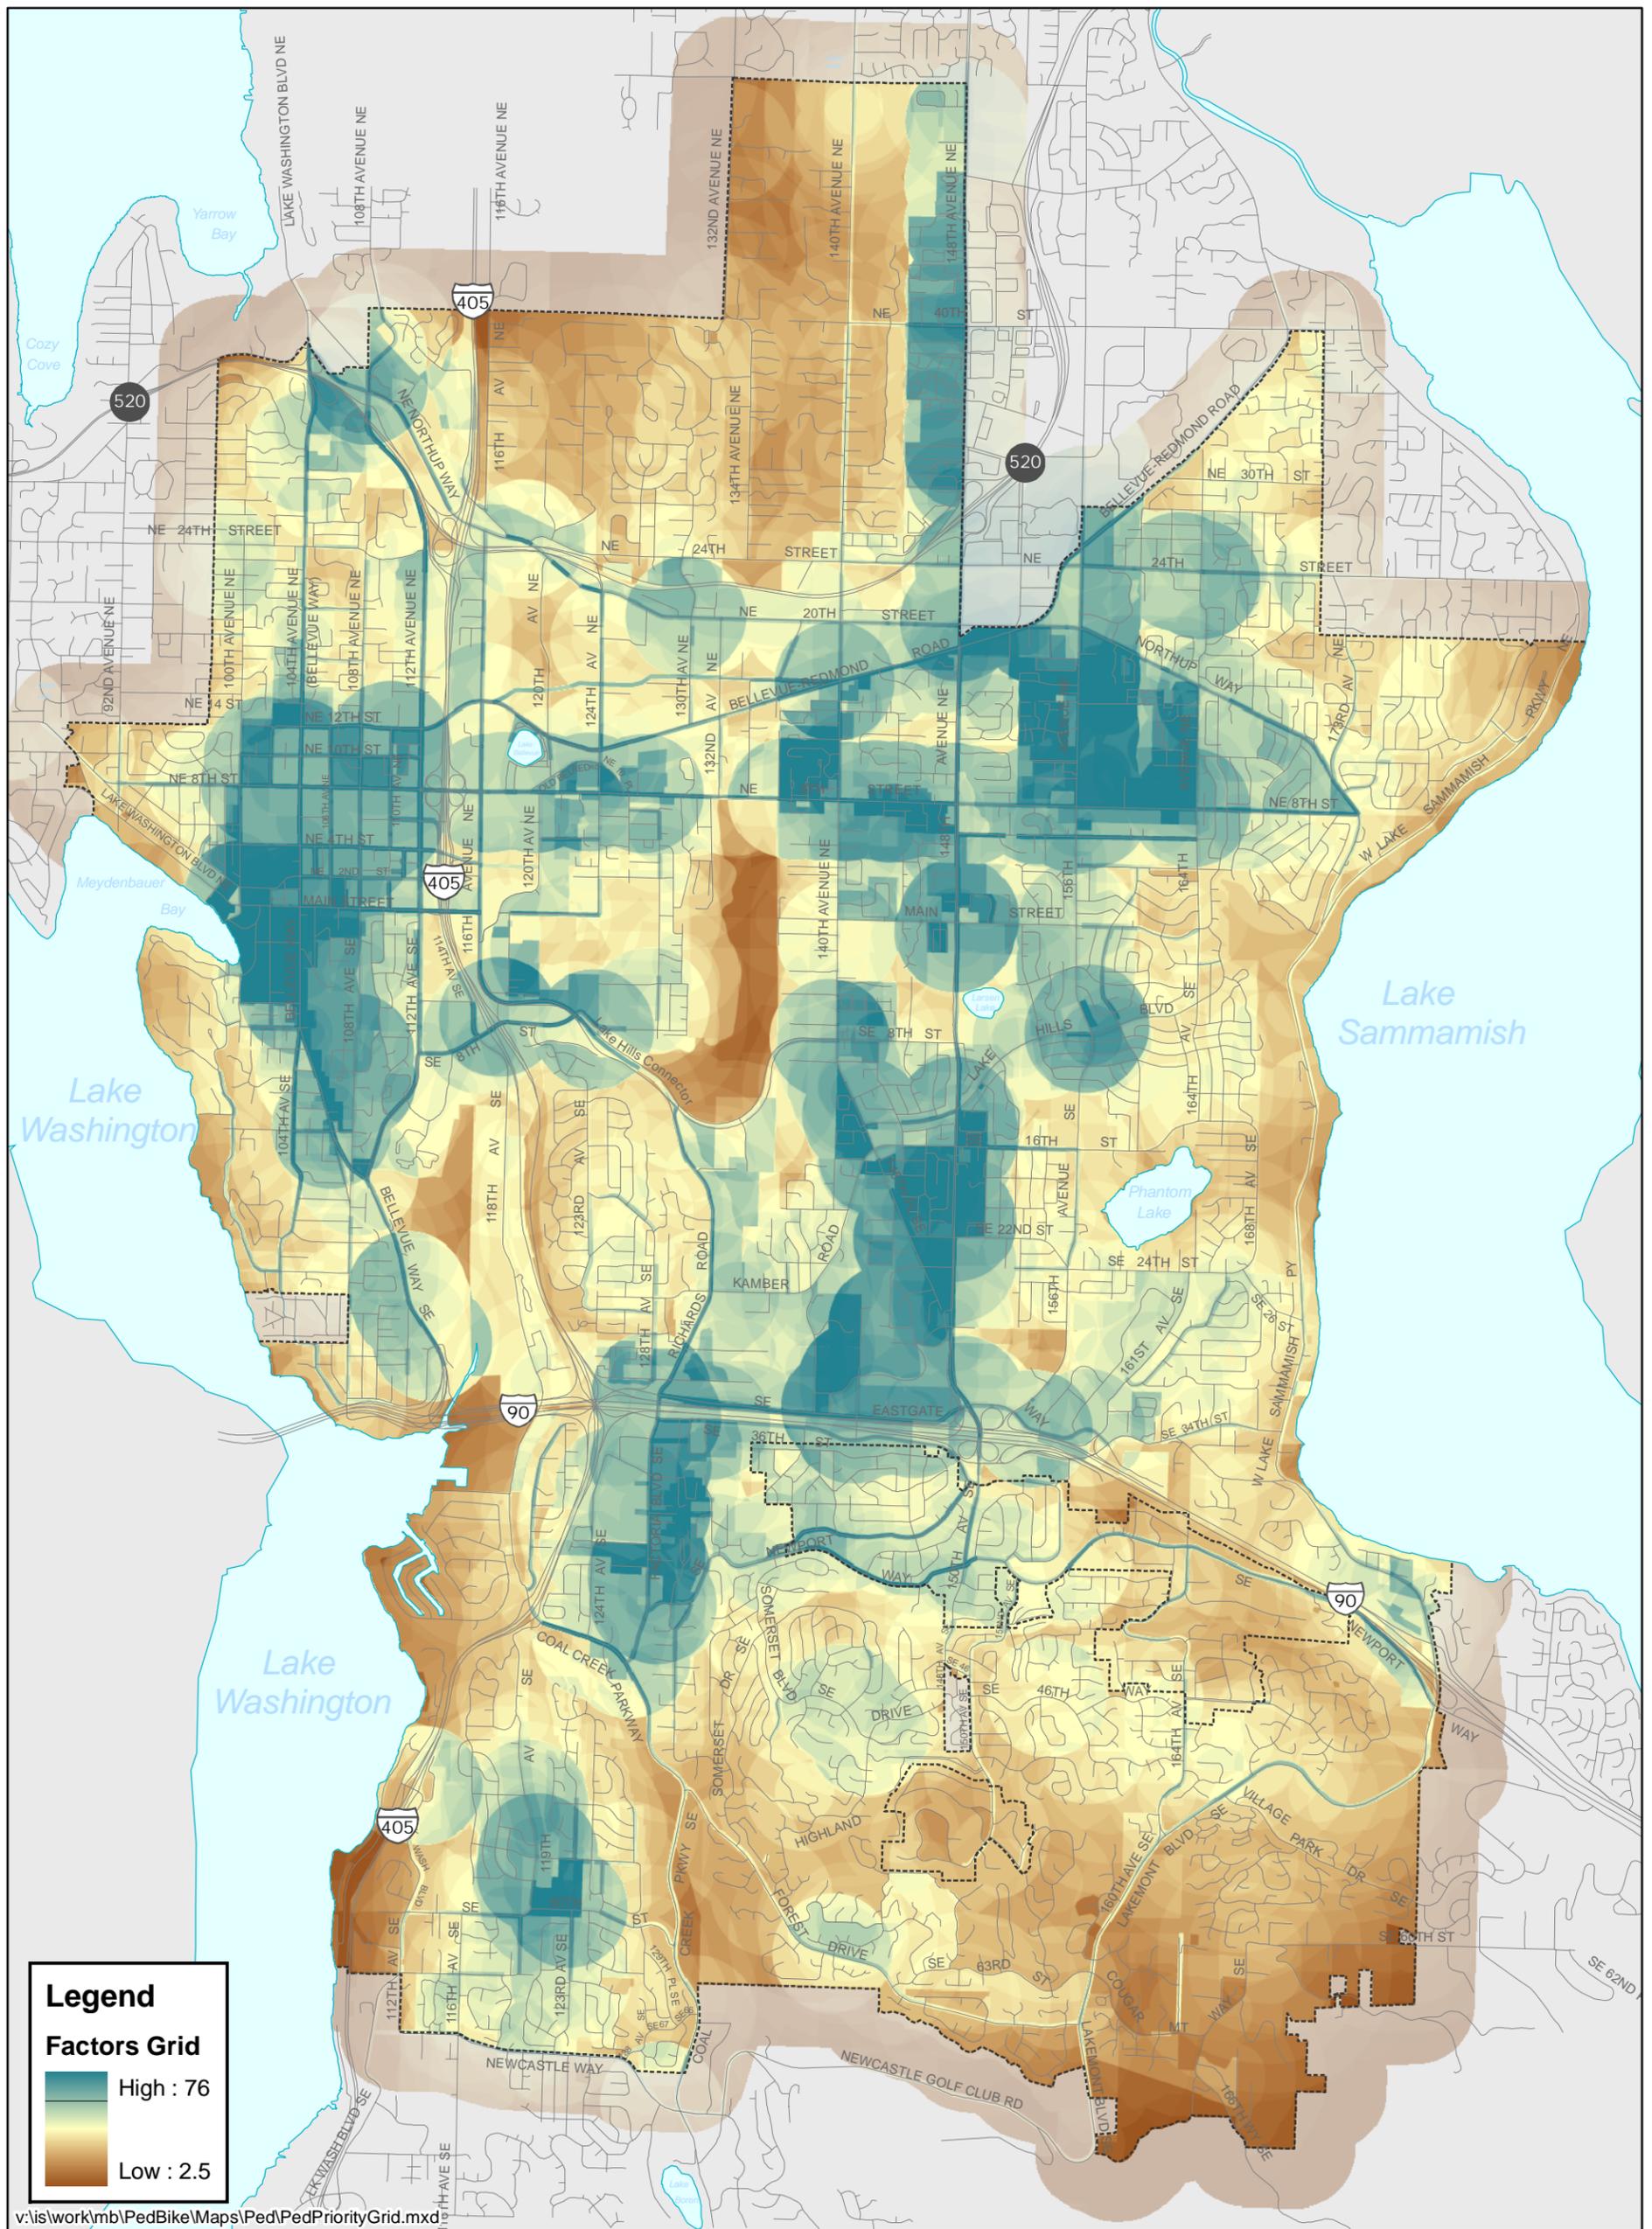

It should be noted that Commission’s priorities are NOT intended to represent a recommendation for projects’ inclusion in the 2009-2020 TFP or for funding in the 2009-2015 CIP. The Pedestrian and Bicycle Plan is a long-range transportation facilities plan, and it is important to recognize that projects will likely take many years (more likely decades) to be completed. Once the projects are prioritized, this will help frame the discussion of which subset of these projects should be included in the TFP and CIP; these discussions will occur in September and October.

Once the Commission completes the recommendations on the prioritized project list, staff will begin pulling together a complete, comprehensive updated plan for the Commission’s final review prior to making your

recommendation to City Council. The final document will reflect the Commission's work to date on the revised policies, updated project list, and priorities. Commission will have a final opportunity to review and revise the document prior to it being finalized; this review is expected to occur in the fall.

Please note the above schedule is presented as a suggested approach and should not be regarded as definitive; staff look to the Commission for guidance on recommended modifications to the project timeline. If you have questions prior to the meeting please contact me.

Neighborhood Sidewalk Project: construct curb, gutter and 6' sidewalk on the east side of the street	225		Neighborhood Sidewalk Project: 150th Ave SE - SE 46th Way to south city limits	2	2	150th is awful - even for walking...neighborhoods are cut off.
S-938.1	S-424-N	Shoreline Dr SE (Lake Washington View Trail)	SE Shoreland Pl to SE 5th St	Add a 5 foot-wide sidewalk on the north side of Shoreline Drive SE (Lake Washington View Trail) from SE Shoreland Place to SE 5th Street where not complete.	224			3	2	This should be considered a very high priority project as it is being used by many people all the time. It is challenging enough to walk in darkness on a narrow road way, and if you add the fact that there is no street lights, no sidewalk on either side, and a very curvy, steep and narrow roadway, it is indeed a very dangerous experience.
S-814	S-461-E	153rd Ave SE (Summit)	152nd Pl SE to SE 53rd St	Add a 5 foot wide sidewalk on the east side of 153rd Avenue SE from 152nd Place SE to SE 53rd Street.	226			3	3	
S-814	S-461-W	153rd Ave SE (Summit)	152nd Pl SE to SE 53rd St	Add a 5 foot wide sidewalk on the west side of 153rd Avenue SE from 152nd Place SE to SE 53rd Street.	227			3	3	
S-809	S-460-W	136th Pl SE	136th Place SE trailhead to Highland Drive	Add a 5 foot sidewalk on the west side of 136th Place SE from the 136th Place SE trailhead to 134th Avenue SE.	229			3	3	
S-809	S-460-E	134th Ave SE/136th Pl SE	136th Place SE trailhead to Highland Drive	Add a 5 foot sidewalk on the east side of 134th Avenue SE and 136th Place SE from the 136th Place SE trailhead to Highland Drive.	231			3	3	
S-848	S-373-S	SE 60th St	170th Ave SE to eastern city limits	Add a 6 foot-wide sidewalk and a 4 foot-wide planter strip on the south side of SE 60th Street from 170th Avenue SE to eastern city limits.	230			3	3	
S-848	S-372-N	SE Cougar Mountain Way	161st Ave SE to 164th Ave SE	Add a 6 foot-wide sidewalk and a 4 foot-wide planter strip on the north side of SE Cougar Mountain Way from 161st Avenue SE to 164th Avenue SE where not complete.	238			3	3	
S-966	S-362-N	Lake Washington Blvd SE at I-405	I-405 overpass	Add a 6 foot wide sidewalk and a 4 foot wide planter strip on the north side of Lake Washington Boulevard SE at the I-405 overpass.	236			3	3	
S-837	S-305-N	NE 40th St	140th Ave NE to 142nd Pl NE	Add a curb, gutter, and separated pathway or sidewalk where physical constraints exist, on the north side of NE 40th Street from 140th Avenue NE to 142nd Place NE. (shared lanes and planter strip where feasible) - Neighborhood Sidewalk Project: construct curb, gutter, and 6' sidewalk on north side of NE 40th Street from 140th Avenue NE to east of the 14500 block. Wide curb lanes. Planter strip where feasible.	237		Neighborhood Sidewalk Project: NE 40th St - 140th Ave NE to 14500 block	1	2
