

Management Brief

Date: November 8, 2007

TO: Transportation Commission

FROM: Paul Krawczyk, PE, PTOE, Project Manager

SUBJECT: Northup Way Design Report Update, CIP Plan No. PW-R-146

The purpose of this briefing is to inform the Transportation Commission of an upcoming **Open House** for the Northup Way Corridor Project on November 15 from 3:00 to 7:00 PM (see attached flyer).

As a reminder, the Northup Way Design Report recommendations will consider several elements of the 1996 Northup Way Corridor Study including:

1. Add sidewalks on both sides of Northup Way where missing.
2. Add bike lanes on both sides of Northup Way, connecting the State Route 520 Bike Trail to Lake Washington Boulevard.
3. Widen roadway to include a two-way left turn lane.
4. Add landscaped medians or trees along Northup Way.
5. Improve the sight distance, street lighting, and driveway approaches.
6. Determine if improvements are needed at the following intersections: Northeast 33rd Place, 108th Avenue Northeast, 116th Avenue Northeast and Bellevue Way.
7. Develop a phasing/implementation plan based on available funding and coordination with other projects on I-405 and SR-520.

Next Steps: After the public Open House, we will update the public and the Commission on our findings in a project newsletter. This project newsletter will include a proposed preliminary project plan for Northup Way.
