Deputy Mayor Jennifer Robertson and Mayor Conrad Lee

The City Council has elected longtime councilmember Conrad Lee to serve as mayor for the next two years. Councilmember Jennifer Robertson was chosen deputy mayor, also during the council's first meeting of the year, on Jan. 2.

Lee, who was born in China and moved to Bellevue in 1967, is the first member of an ethnic minority to serve as Bellevue's mayor. Previously the deputy mayor, Lee takes over from Councilmember Don Davidson, whose two-year term as mayor concluded at the end of 2011.

"I'm grateful to the people of Bellevue and I am honored to be entrusted by my fellow councilmembers to be mayor," Lee said. "Bellevue is one of the most vibrant and diverse cities in the state and I am proud to represent and lead it."

Bellevue's seven councilmembers are elected at large and serve four-year, staggered terms. They, in turn, choose a fellow councilmember as mayor for a two-year term.

The mayor presides over council meetings and study sessions, helps set the meeting agenda, represents the city at public events, and acts as the primary spokesperson for the council. The council is responsible for approving budgets and setting policy for the city. Bellevue's city manager implements the policy and oversees the city's day-to-day operations.

Lee has served on the council since 1994, and was re-elected to a fifth term in 2009. His current council assignments include the Bellevue Botanical Garden Board, Bellevue Convention Center Authority Board, King County Regional Transit Committee and the Puget Sound Regional Economic Development District Board.

Lee earned a bachelor's degree in engineering from the University of Michigan and an MBA from the University of Washington. He has been a regional administrator of the U.S. Small Business

Administration, an engineer at Boeing and a project manager with Seattle's Solid Waste division.

Lee and his wife Winnie have two adult children, a son and a daughter.

Robertson was first elected to the council in 2009 to complete the two remaining years of Phil Noble's term. She was re-elected in November.

"I'm humbled to be chosen deputy mayor," Robertson said. "I'm looking forward to the council working together to keep Bellevue a wonderful place to live, raise a family and grow a business."

Robertson's council assignments include the King County Growth Management Planning Council Executive Committee, Puget Sound Regional Council Growth Management Policy Board, Bellevue Library Board Liaison, and Parks & Community Services Board Liaison.

An attorney, Robertson and her husband Scott have three daughters.

Stokes elected to council

Retired attorney John Stokes is the City Council's newest member, after defeating land-use attorney Aaron Laing by a razor-thin 54-vote margin in November's election.

King County Elections confirmed Stokes' victory in December, after a recount done by hand at the Elections office.

"I'm excited to take my seat on the council. It's an honor to serve," Stokes said after he was sworn in on Jan. 3. "Bellevue is a terrific city with dynamic residents. I look forward to taking up the challenges before us."

Stokes was serving on the Parks & Community Services Board and the Bellevue School District's fiscal advisory committee before his election to the council. A Bellevue resident since 1991, he replaces Grant Degginger, who stepped down after 12 years on the council.

State law required a hand recount because the difference between candidates was less than 150 votes.

Stokes' election was the only close contest among four council races. The incumbents dominated in the other races, with John Chelminiak and Claudia Balducci each collecting nearly two-thirds of the vote and Jennifer Robertson not even drawing a candidate.

With the East Link light rail project in the background of Bellevue's council elections, nearly 54 percent of the city's voters participated.

Council Corner

The everyday heroics of city staff

By Claudia Balducci

When I mentioned to my husband that I planned to write this edition of Council Corner on transportation issues, he said I was in a rut and needed to get out of it. He was right.

Because I represent Bellevue and the Eastside as a member of the Sound Transit Board, chair the Puget Sound Regional Council Transportation Policy Board and participate in the Eastside Transportation Partnership, I spend an awful lot of time thinking about transportation.

For this column though, I want to highlight another important topic that's close to my heart: the great work done by our city staff. I'm not talking about the dramatic, courageous efforts routinely turned in by our outstanding firefighters and police officers, though they are certainly deserving of our praise as well.

I'm talking about the everyday heroics turned in by our frontline staff. They're the ones who balance the books, maintain the computer systems, plow the snow off city streets, answer the phones and scores of other routine duties that make people's lives better. It's not flashy; it's just good customer service.

Since I can't pat every city employee on the back, I want to tell you about three of them who make a difference day in and day out, and share what others have to say about their work. Jeannie, Chad and Pam are representative of the fine job done by all city staff.

Jeannie Anderson

Connecting kids, families to services

One important function for city government is lending a hand to children and families. Jeannie Anderson, Program Coordinator for the Wrap-Around Services Program at Lake Hills Elementary School, reaches out to connect students and families to local services.

A city employee who started in 1995, Jeannie works in the Parks & Community Services Department and is critical in enhancing in- and out-of-school activities for children and families. For example, she helped establish an emergency rental fund for low-income families needing to relocate, and she helps children get access

to medical care, counseling and before- and after-school programs

Wrap-Around Services is a collaboration between the city, Bellevue School District and United Way. Other partners include the Boys & Girls Clubs of Bellevue, Big Brothers Big Sisters of Puget Sound, Hopelink, Latino H.E.A.T., the Lake Hills Neighborhood Association and Jubilee REACH Center.

When deep financial hardship threatened Robert Atkinson and his two children with homelessness, Jeannie helped connect them to after-school programs, counseling, clothing and dental assistance.

"We lost everything. Jeannie provided me and my family with real help and hope," Atkinson said. "She almost seemed to be one step ahead. It is people like her who make our world a better place, simply by taking the extra time to ensure that families are looked out for."

Chad Brown

Helping homeowners with drainage problems

Also important to the smooth operation of our city is making sure rainwater ends up in the right place. Chad Brown, a Stormwater Technical Specialist in the Utilities Department, spends much of his time providing customer service to residents with drainage issues.

After troubleshooting a reported problem, Chad and fellow crewmembers coordinate with Storm & Surface Water staff, who specialize in construction and maintenance of the drainage system. Recently he helped a resident who had flooding in his crawlspace because of improperly routed drainage from the roof.

Chad, a city employee since 2001, quickly concluded the house was not connected to the city's stormwater system and suggested the homeowner install a new drainage system from the home's gutters to the public right of way. Once this was done, Chad and a crew connected the private pipes to the city's stormwater system. Water no longer floods the homeowner's crawlspace or flows onto the street, where it can cause ice to form during cold weather.

"I was impressed with the refreshing eagerness to help, demonstrated by Chad and his colleagues," said Dr. Edward Kaiser, the homeowner. "They were pleasant to deal with, punctual, and clear in their communication. Overall, this experience exceeded my expectations and reflects well on the municipal government and all its employees."

Inspections help keep buildings safe

Other important city services that typically don't get much notice if they're done well are inspections. But the consequences of a poorly done inspection could be calamitous.

Pam Rosencrans has been a mechanical inspector in the Development Services Department for more than 20 years. She makes sure that equipment in commercial buildings - such as furnaces, refrigeration, exhaust fans and fire protection systems - function safely and comply with city codes.

Her customers and coworkers know her as efficient, hard-working and courteous - a problem solver who stays focused on the solution. Much of Pam's work in recent years has involved inspecting safety equipment in downtown high-rises.

One of those customers is Joel DeVille of Ocean Park Mechanical Inc., who has worked with Pam recently on projects involving complex systems and pressing timelines.

"Pam goes out of her way to be helpful. On one project, as we got closer to occupancy, I was quite sporadic in scheduling the inspections," DeVille said. "She would say, 'No problem. I'll make you the last stop of the day and call you when I'm on my way.' And she takes the time to go over every detail and make sure the work is absolutely up to standard. She always goes above and beyond."

These are just three examples of the incredible work city staff do every day. I appreciate their efforts.

Pam Rosencrans

Council Roundup

Plan for Eastgate redevelopment reviewed

The City Council on Jan. 17 looked at a plan that could refine land use and transportation conditions in the Eastgate-Interstate 90 corridor, possibly leading to a transit-oriented development with mid-rise offices and housing clustered around the area park-and-ride.

The draft Eastgate/I-90 Land Use and Transportation Project study was developed by an citizen advisory committee appointed in the fall of 2010. It envisions zoning provisions and infrastructure improvements over the next 20 years that would help ensure the South Bellevue stretch of office parks and neighborhood retail remains one of the city's major regional employment centers.

The 600-acre corridor spans the office and commercial areas on both sides of I-90, between the I-405 interchange and 161st Avenue Southeast (with a spur including the Lakemont highway interchange). It does not include the Eastgate annexation area, which is predominantly residential.

Problems that have emerged for the area include traffic congestion, limited capacity for offices and housing and a lack of amenities and character.

The project timeline anticipates the council receiving the final plan in the spring, with changes to the Comprehensive Plan and zoning pursued after that.

Feedback: Dan Stroh, Planning Director, 425-452-5255 or dstroh@bellevuewa.gov

Reduced staffing, fees to balance budget

The City Council on Dec. 12 approved a new fee for non-critical medical transports that will help narrow a \$6.5 million general fund budget gap, but were told that significant reductions also will be needed to fully balance spending and revenue.

Actions taken by the council Monday were part of a state-required mid-biennial review of the city's 2011-2012 budget, which includes the general fund.

Because of the sluggish economy and lower tax revenues, the general fund deficit is projected to continue for some time.

To balance the general fund, the city will reduce spending by \$4.6 million, implement the transport fees totaling \$1 million, and refund \$800,000 from internal service funds to the general fund.

City Manager Steve Sarkozy and department directors already have reduced spending through staff cuts and dozens of smaller savings throughout City Hall.

Staff reductions will include the elimination of 17 full-time equivalent positions, six of which will involve layoffs, voluntary separations or voluntary retirements.

Feedback: Toni Rezab, Budget Manager, 425-452-7863 or trezab@bellevuewa.gov

Unique collaboration moves East Link forward

Bellevue and Sound Transit officials accept "Deal of the Year" awards from the Bellevue Downtown Association.

Following a unanimous vote by the City Council late last year to approve an agreement with Sound Transit, work on the East Link light rail project has shifted into an entirely new phase.

Since the November vote, efforts have moved from the public policy realm to the nuts and bolts of project design and engineering. The \$2.8 billion East Link project will extend light rail from Seattle, across Lake Washington, through Bellevue to the Overlake Transit Center in Redmond. Sound Transit expects passenger service to begin in 2023.

After extensive negotiations last year, Bellevue hammered out the agreement, called a memorandum of understanding (MOU), with the transit agency. It details how the city will help pay the cost of a downtown tunnel, where the light rail route will be located in Bellevue, and how land-use and permitting issues will be handled. A separate "transit way agreement" deals with responsibilities for the light rail right of way.

Throughout the lengthy environmental review process and the MOU negotiations for East Link, the council emphasized the need to

minimize light rail impacts on neighborhoods due to traffic, noise and visual appearance.

The MOU spells out how the city will make up to \$160 million worth of contributions, about half the additional cost of building a downtown tunnel, compared with the cost of a street-level route.

Because the city has a significant financial stake in East Link, the MOU calls for Bellevue and Sound Transit to launch a "collaborative design process" to reduce costs, comply with codes and regulations, and finish the complex project on time. The goal is to shave \$60 million off the city's share.

The unique partnership involves Bellevue and Sound Transit staff working closely on a design for the Bellevue portion of the project. Aspects of the collaboration will include engineering, permitting, private utility coordination and light rail station planning. The first meeting of this group was held in January at City Hall and attended by dozens of Bellevue and Sound Transit staff who will work together on the project.

"We're going to get this done right and save money in the process," City Manager Steve Sarkozy told the collaborative design group. "I'm confident we can make this (project) a success, not only for our region, but for the nation."

Throughout the collaboration process, which is slated for completion in early 2014 when the East Link design work is 60 percent complete, there will be opportunities for the public to see what's being planned.

Information about the project and upcoming meetings will be posted on Bellevue's website (<http://www.bellevuewa.gov/light-rail.htm>), where people can also sign up for "Alerts" to be notified when new information is posted. Information is also available on the Sound Transit website <http://projects.soundtransit.org/Projects-Home/East-Link-Project.xml>.

Paperless permitting catches on

Paperless permitting is catching on fast in Bellevue. Just three months after the city launched online review for mechanical, plumbing and electrical permits, nearly 30 percent of them are being processed that way.

While "simple" permits, which require no staff review, have been available online since 2002, making permitting paperless when plans are involved is a big step.

"It has definitely saved our company money in several different ways," said Darla Doll of Seattle-based contractor MacDonald Miller. "We don't have to pay a runner up to \$35 an hour to take our permits into Bellevue and then again to pick the permit up."

"The time it takes to fill out the online forms and upload the drawings is less than when I had to print off two sets of drawings, fill out the paper forms and then schedule a runner to take it the next day," Doll added. "I like the convenience of applying anytime, getting revision requests faster and being able to send in responses or changes so quickly."

Bellevue's Development Services Department is working hard to eliminate the need for paper, with plans to expand online review to all construction, fire protection, right of way, utility connection and land use actions by the end of 2013.

Paperless permitting provides customers and staff the benefits of a more efficient method of accessing city services. In October www.mybuildingpermit.com was reconfigured to allow for electronic applications and communication between city staff and the customer, eliminating

the need for paper forms, plans and documents.

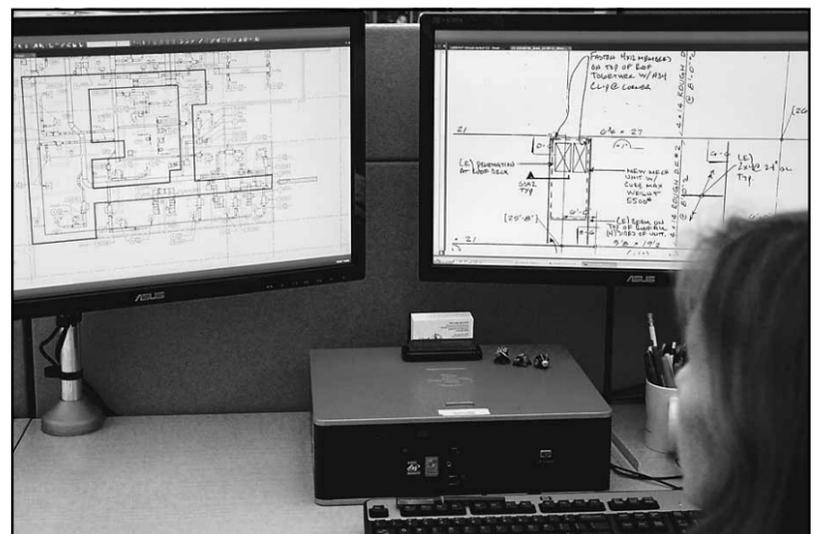

Bellevue is a founding member of the e-CityGov Alliance, a regional effort to provide government services through web portals including MyBuildingPermit.com. Bellevue now issues 72 percent of simple mechanical, electrical and plumbing permits online.

Bellevue went live paperless permitting for mechanical, electrical, and plumbing applications that require plan review in October, and Kirkland, Renton and Snohomish County now also offer the service. The other nine e-CityGov Alliance cities will begin offering paperless permitting later this year.

Staff is excited about being able to offer electronic plan review.

"It is very exciting to be part of the new wave of plan review," mechanical plans examiner Valerie Graber said. "The whole idea is a win-win. The reviewer and client can easily clarify and resolve problem issues while looking at the plans online. We will be able to work with clients in a more team-like environment."

Applying online reduces the costs for the applicant and the city, as well as reducing

City plans examiner Valerie Graber reviews plans on her computer.

impacts on the environment. The applicant no longer has to submit multiple copies of paper plans or drive to City Hall to apply only during business hours. City staff no longer have to store large rolls of plans or create and route paper files, and they can more easily access the application to reduce review time.

Specialized software allows electronic review of the PDF plans and provides the ability to place comments directly on the pages. Collaborating with surrounding jurisdictions to provide this service through a joint portal lowers the overall costs and provides a benefit to our common customers.

Born to be a paramedic?

Mike Lam at his graduation as a paramedic with his mother, Cu Ban, and sister, Marian Lam.

If a paramedic was ever born, not made, Mike Lam would be it.

Now providing advanced life support to patients in San Francisco, the Bellevue native owes his own life to paramedics who delivered him as a home breech birth 29 years ago. Lam is coming to Bellevue this month and will meet one of those paramedics, firefighter Marty LaFave.

LaFave received an email from Lam in December. He was surprised and pleased to find out that that baby from long ago, turning blue because he was coming into the world feet first, was living a full life, following in LaFave's own career footsteps.

Learning that Lam, the son of Laotian immigrants, had not only survived, but thrived "is the cherry on a great career cake," said LaFave,

who was just winding up a five-year stint managing Bellevue's paramedics when Lam contacted him.

On a new assignment as a battalion chief at Station 1 downtown, LaFave was a brand new paramedic at Bellevue in 1981, when he helped deliver Lam. At the time of Lam's birth, breech babies born at home had less than a 5 percent chance of surviving. Luckily for him, the firefighters and paramedics from Fire Station 2 had been trained to deliver babies coming out feet or rear end first.

LaFave remembered Lam's birth well. "I wondered how that case had come out. We had to resuscitate the child, and we wanted that newborn to have all the chances at a full life."

LaFave, then a recent graduate of Harborview Medical Center's paramedic program, recalls seeing two little blue feet and knowing Mike was trouble. After some careful tugging, significant manipulation and a little oxygen, the paramedics delivered a baby boy.

Three years after Mike's birth, he and his family moved to northern California. His mother shared the role firefighters played in his birth during his junior year in high school, when he was on a vacation in Bellevue.

After graduating from high school, Mike earned a degree in fire science and attended emergency medical technician school in northern California. After six years as an EMT, Mike studied to be a paramedic at the City College of San Francisco, graduating last year.

"That seems like a cool job," Lam said he thought when he was considering careers. "I wouldn't be here without those guys."

Marty LaFave

Volunteer honored for more than 5,000 hours of service

Sharon and Dallas Graham build shapes with lights for the Botanical Garden's Garden d'Lights event.

The Bellevue Botanical Garden benefits from the labors of an army of dedicated volunteers, but Sharon Graham is remarkable even by their standards, giving 5,342 hours of service to the Garden over the last six years.

For pulling weeds, guiding tours and decorating for the annual Garden d'Lights event, Graham received the President's Call to Service award this month. She is one of 79 volunteers for the city to receive Presidential service awards.

Botanical Garden manager Nancy Kartes focused on Graham's work directing volunteers on Garden d'Lights, which draws hundreds of thousands of visitors to the Garden every winter.

"Under (Graham's) leadership, nearly 300 volunteers spend countless hours designing and building displays, teaching classes, installing and removing the displays, and performing various duties throughout the 36-night run of the event," Kartes wrote in a nomination.

"Sharon leads nearly every class and work party, coordinates all volunteers and leads the incredibly organized month-long work party to install the displays," Kartes added. "Then, she works every single night of the event!"

Graham and the other volunteers were honored by the City Council at its Feb. 6 meeting.

In addition to the President's Call award, which recognizes lifetime service, Graham received a Presidential gold award for putting in 1,259 hours at the Botanical Garden last year. Four other Garden volunteers put in at least 500 hours in 2011 to earn the gold award, including Nancy Daar (700 hours), Jan Lyon (720), Dallas Graham (Sharon's husband, 1,032) and Ruth Edwards (1,151).

Of the other 74 recipients, 66 earned bronze awards, for giving at least 100 hours of service, and eight received silver awards, for 250 to 499 hours of service.

Between them, all of the honorees volunteered for nine city programs or facilities, including: Eastside Amateur Radio Support (EARS); Fire Department Chaplain; Mediation; Master Naturalists; Canoe the Slough; Youth Link; Aquatics; Highland Community Center; and the Botanical Garden. Sixty of the honorees worked for the Botanical Garden.

Established in 2003, the President's Volunteer Service Awards are available to individuals, groups and families who have met or exceeded requirements for volunteer service and have demonstrated exemplary citizenship through volunteering. The President's Call is the highest award possible in the program.

The city has a vibrant volunteer program. In 2011, over 5,790 volunteers served 121,641 hours in 48 programs, delivering an estimated \$2.8 million worth of labor.

Information about volunteer opportunities, both with the city and with local nonprofit organizations, is available at <http://www.bellevuewa.gov/volunteer.htm>. To volunteer with the city, contact Shelly (425-452-5375 or Volunteer@BellevueWa.Gov).

Waterwise garden needs volunteers

The Waterwise Garden at the Bellevue Botanical Garden educates homeowners about gardening choices that conserve water and protect our lakes, streams and wetlands. Volunteers keep the garden blooming for visitors.

In return, volunteers:

- Learn natural gardening techniques they can use in their own gardens;
 - Get hands-on experience planting, soil building, composting and caring for plants through the growing season; and
 - Meet people who share an interest in gardening and being outdoors.
- Volunteer days are the first and third Wednesdays of each month, 1-3 p.m., from spring to fall. No experience is necessary - just a willingness to dig in and have fun growing. The Botanical Garden is at 12001 Main St.

To learn more, contact Patricia Burgess at pburgess@bellevuewa.gov or call 425-452-4127.

Waterwise garden volunteer Tia Scarce

City considers bus service improvements

What bus service improvements would you like to see in Bellevue? Where should the city add sidewalks or bus shelters to make it more convenient to use public transit?

With Bellevue continuing to grow in area, employment and population, the city would benefit from better bus service. While the city does not itself provide transit, it makes recommendations to King County Metro and Sound Transit based on the community's needs, and can make capital improvements that support bus routes.

The city develops recommendations and identifies projects in a long-term transit plan. The city is now updating its plan, and seeks resident input in an online survey.

The survey addresses the following issues and more:

- What do you need as a transit customer or what would entice you to ride transit?
- Would you like to be able to reach Seattle, Redmond or elsewhere more quickly?
- Do you wish your route's schedule was more reliable?
- Does your stop need better access by foot or bicycle?

Improvements have been made to transit service in Bellevue since the last plan was written, including the recent introduction of "RapidRide" buses, which have traffic signal priority, but there is more to do.

In the 2003 Bellevue Transit Plan, it was recommended that: 1) transit be improved both to and within Bellevue, 2) capital improvements support recommended transit services, and 3) we review and make recommendations concerning the transit-supportive policies in the city's Comprehensive Plan.

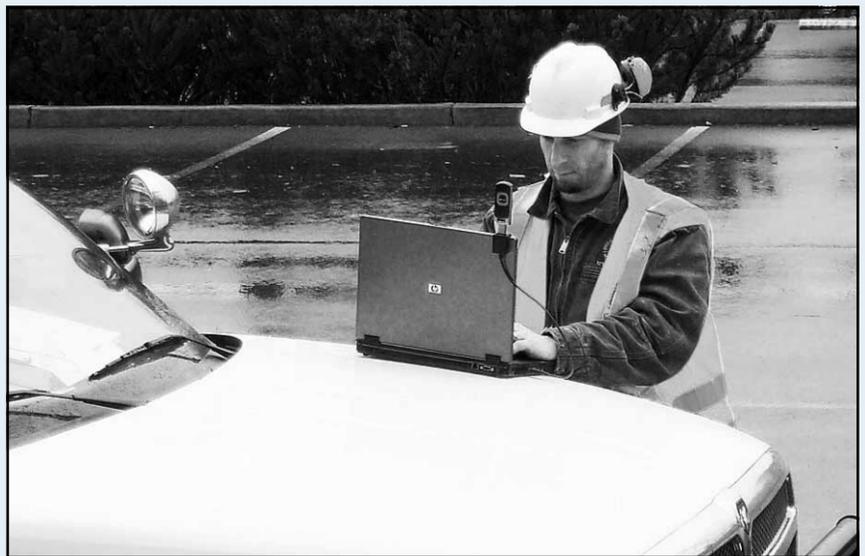

The updated plan, to be called the Bellevue Transit Master Plan, will identify how the city can address these three key areas through 2030. Help shape what recommendations are made.

The online survey and additional information are available at: www.bellevuewa.gov/bellevue-transit-plan.htm. You can also contact transportation planner Franz Loewenherz at 425-452-4077 or Floewenherz@bellevuewa.gov.

A number of downtown Bellevue restaurants (including Daniel's Broiler, Purple and El Gaucho) have donated gift certificates to encourage participation in this survey. The names of survey participants will be included in a random drawing, with winners receiving gift certificates.

Data tracking boosts efficiency

Wastewater worker Mark Buntich enters data into a laptop after completing work in the field. To ensure efficiency, Utilities water and sewer field crews do more than inspect and repair pipes, pump stations and other infrastructure.

At the end of each day, crews take out laptop computers or sometimes just pen and paper, and document the work they did, how much time it took and what parts and materials they used.

"To operate our systems in the long term, we need to understand and track where failures occur and what it takes to fix them," Utilities Operations Manager Joe Harbour notes. "We can't do that without accurate data."

"A lot of folks just want to turn wrenches and fix things, and they don't see tracking widgets as action-oriented," Harbour said. "But over time inputting data has become part of our culture."

Transportation needs identified

Long before the city adds turn lanes, bike shoulders, sidewalks and other improvements to Bellevue streets, they are typically included in a long-term list of projects, the Transportation Facilities Plan.

The city is updating the TFP, and seeking resident input through an online survey (at www.bellevuewa.gov/transportation-facilities-plan.htm) and a series of open houses, 4:30 to 6:30 p.m. in the following locations:

- Thursday, Feb. 23, City Hall, 450 110th Ave. NE, Room 1E-108; and
- Tuesday, Feb. 28 Highland Community Center, 14224 Bel-Red Road.

A 12-year plan of projects recommended by the Transportation Commission and approved by the City Council, the TFP is the first step toward a project being built. Funding is allocated when a project is added to the city's seven-year Capital Investment Program Plan.

The last update of the TFP included the years 2009-2020. The city is now developing the new 2013-2024 TFP. Transportation planners will review projects currently in the plan and add new ones.

Broad project needs are captured in the city's Comprehensive Plan, which outlines visions for land use and transportation over a 20-plus-year span. Projects are introduced in the Comprehensive Plan as part of plans for areas of the Bellevue or components of the transportation system. Such plans have been drafted in recent years for the Bel-Red and Eastgate-Interstate 90 corridors.

The prioritized list of projects developed for the TFP will be used to update the Capital Investment Program (CIP) Plan, a process that will start by late spring. The new CIP budget is expected to be adopted by the end of the year.

For more information, please contact Mike Ingram at 425-452-4166 or Mingram@bellevuewa.gov.

It's Your City • February 2012 - Page 5

A horse and his boy. Colin Rabitoy, is the caretaker at Kelsey Creek Park, but this horse may have other ideas.

The Twin Valley Dairy in the mid-1940s. Image courtesy the Eastside Heritage Center. (Duey Collection.)

Which came first? Caden Pong, in a Little Farmers class, might be taking sides on this issue.

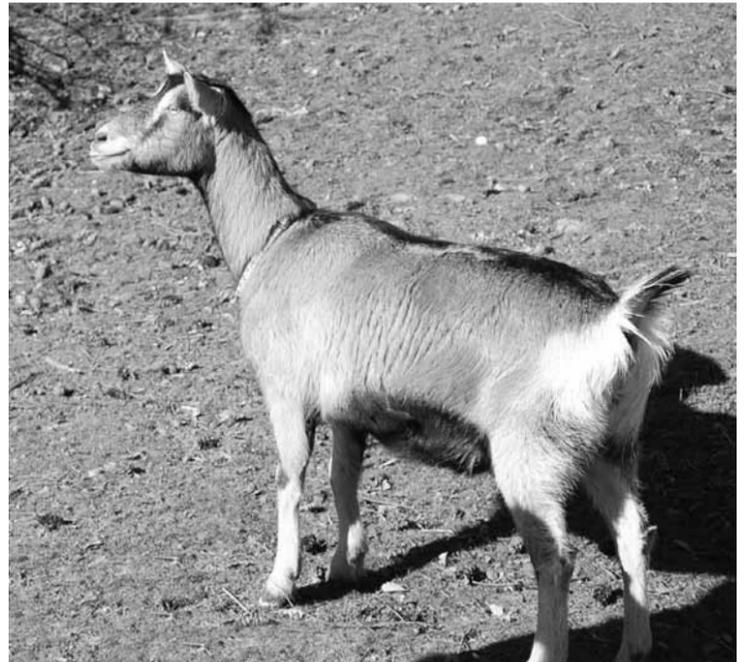

Farm park is window to another era

Among Bellevue's many parks, Kelsey Creek is unique, reminding visitors of an era when Old McDonald and many of his neighbors had a farm. The park features picturesque barns and a host of farm animals, including horses, sheep, goats and chickens.

Visitors can amble the grounds any day and see cows and horses grazing in their pastures. Young people can get up close and personal with animals, in classes or as after-school volunteers. The site really was a farm, purchased by the city in 1968 from the Duey family.

In 1921 W.H. Duey and his family moved to Bellevue from Mount Vernon and cleared the land for a dairy farm, which supplied Eastside homes with up to 300 quarts of milk a day. The Dueys called their business Twin Valley Farm because it was located on a high spot between two small valleys. Draft horses were used for farm work and Mrs. Duey drove the delivery truck.

The south barn, built by the Dueys in 1933, is now home to the animals. The Dueys' house is used for farm programming and day camps. Kelsey Creek Farm is open year-round, with animals on display generally from 9 a.m. to 3 p.m. daily. Call 425-452-7688 for more information.

Julia Capozzi, in a Little Farmers class, pets a sheep. The sheep and his friends will be shorn at the annual Sheep Shearing event this spring.

Citywide Projects Update

Throughout the city, there are many projects in various stages of development. This update includes all projects with an estimated budget of \$100,000 or more, sorted by neighborhood. If you have questions, please contact the project manager.

Mudslide closes arterial

A section of West Lake Sammamish Parkway Southeast closed to vehicles since a Jan. 22 mudslide undercut the roadway, is expected to reopen in March or early April. The current detour will remain in effect during the closure.

No one was hurt in the mudslide but four properties were damaged. The cost for the road construction work and repair of a broken water main is estimated at more than \$500,000.

Although it has not been determined whether the water main break caused the mudslide or the mudslide caused the water main break, the city has acknowledged responsibility and will help owners restore their properties. Those costs are not yet known.

"Our crews plan to work as quickly as possible to reopen a roadway that is safe and stable for all," said Dave Berg, Bellevue's Transportation Director. "A few more variables need further discussion; however, this time frame is doable."

When the steep slope gave way on the east side of the Parkway, the material under the roadway slid down the hill. What remained of the road was a section of concrete panels with nothing but air beneath them. Since then, significant progress has been made to remove the unsupported roadway and haul out more than 30 dump truck loads of dirt and debris.

West Lake Sammamish Parkway will remain closed from Northeast Second Street at Northup Way to Southeast 26th Street. From the south end, drivers will be detoured to Southeast 26th Street, leading to 168th and 164th avenues Southeast. From the north end, drivers will be detoured to Northup Way and Northeast Eighth Street. Local access only is permitted between Northeast Second and Southeast 26th streets.

Preventing car prowls

The Bellevue Police Department provides crime prevention tips throughout the year. Here are a few tips to prevent car prowls:

When leaving your vehicle, lock all the doors and roll up all the windows.

- Hide your valuables out of sight.
- If you place your valuables in the trunk, do this prior to arriving to your parking spot.
- Park in well-lit areas, preferably where there is high pedestrian traffic or parking attendants.
- Use your alarm.
- Consider purchasing a security alarm system that is not only audible, but has the ability to page you if the alarm is activated.
- Park inside your garage and make sure and close the garage door.
- If you are unable to park inside a garage at night, consider installing motion sensor lighting that can illuminate your vehicle and the area around it when activated.
- Record the serial numbers of all valuables routinely used or left inside the vehicle, including stereos, amplifiers, radar detectors, GPS units and cellular telephones.

Father and son plant trees at the City of Bellevue Arbor Day-Earth Day event.

Electric car charging network expands

With demand taking off for public electric vehicle charging stations at City Hall, four more have been added there and 10 have been installed at other city facilities. The charging stations were installed in October and November at:

- City Hall (2 each in visitor and employee lots)
- South Bellevue Community Center (2)
- Crossroads Community Center (2)
- Crossroads Park (2)
- Downtown Park (2)
- Odle Middle School (2)

In November 2010 two electric vehicle charging stations were installed in the City Hall visitor lot, and those locations have seen increased use in recent months. Most electric vehicle drivers do the bulk of their charging at home, but use public charging stations to supplement and travel further distances.

While Bellevue currently doesn't charge for the electricity from any of its public charging stations, the city may implement a fee of \$2 to \$4 per charging session in the spring. The usage fee, consistent with those at charging stations in neighboring cities, will cover the cost of the electricity and station maintenance.

SEASONAL

Crossroads Par 3 Golf Course

Opens March 1

15801 NE 15th Street

An excellent beginner and family course that takes about an hour to play. The holes range in length from 63 to 107 yards.

425-452-6885 or www.myparksandrecreation.com

www.myparksandrecreation.com

Stations can be activated (and paid for) through the use of a key-fob swipe card issued by the ChargePoint charging network. These cards can be obtained online in advance or at the charging location by calling a toll-free number. Electric vehicle drivers can easily locate public-use charging stations through dashboard GPS displays in the vehicles.

The charging stations, funded by the Western Washington Clean Cities Coalition and the American Recovery and Reinvestment Act, automatically track information, allowing the city to better understand usage patterns, estimate reductions in petroleum use and track other benefits. The use of electric vehicles rather than cars with internal combustion engines provides an opportunity to reduce air pollution from Bellevue's largest single emissions sector - transportation.

According to the city's Development Services Department, 40 permits have been issued for commercial and single-family residential charging stations so far this year. To date, more than 10,000 electric vehicles have been sold in the U.S.

Details about public charging stations in Bellevue are available at www.bellevuewa.gov/electric-vehicles.htm.

Neighborhood forums focus sharing responsibility

Bill Grace

Bellevue's popular neighborhood forums series returns in 2012 with a three-part program focused on sharing responsibility for the common good. The opening forum will be Wednesday, Feb. 29, 7-9 p.m., at City Hall.

All three forums are free. Participants may register for the whole series or for a single forum. An RSVP is requested to jellenhorn@bellevuewa.gov. For more information, contact Neighborhood Outreach staff at 425-452-6836.

Common good explained

Bill Grace, director of Common Good Works, will offer an address focusing on his vision for stewardship and communal responsibility. He will ask Bellevue residents to

look at how they can ensure a healthy community for themselves and for future generations.

Grace will help residents reach deeply into their shared values and will push them to care for themselves and their community, based on stewardship of the common good. Grace is author of the recently published book, "Sharing the Rock," which will be available for purchase and signing at the forum.

Following Grace's inspirational keynote, participants will have dessert and small group discussions encouraging reflection on the common good as an important message for the times.

Second forum addresses community needs

On Thursday, March 29, 7-9 p.m. at City Hall, a second forum will focus on key issues in Bellevue, such as providing housing for all members of the community and caring for at-risk youth.

An expert panel will share information that participants will use to delve deeper into the issue of their choice. As a theme, panelists will address how the concept of multi-generational involvement plays out in their subject area.

Third forum encourages action

Participants are encouraged to move from intention to action at the third forum, scheduled for Thursday, April 19, 7-9 p.m., at City Hall. Bill Grace will lead an interactive hands-on workshop where participants can contribute ideas, identify projects and join with others to move forward on work for the common good.

Neighborhood Outreach staff will be on hand at the workshop and as an ongoing resource to help with projects and to provide resources and referral.

Neighborhood Forums, which drew sellout audiences in 2011, are made possible this year with the support of several community organizations and your local market, which will provide dessert at each forum.
