

East Link Extension

Construction Alert

March 18, 2016

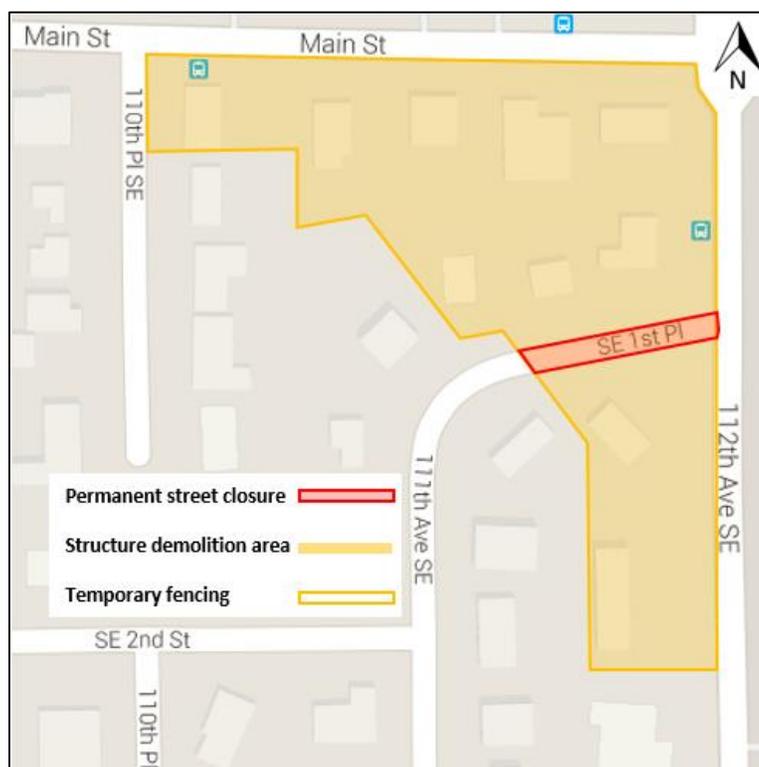

Permanent closure of SE 1st Place as early as Friday, March 25, followed by demolition of structures in April

Construction is set to begin as early as **March 25** on East Link's downtown Bellevue tunnel contract. The first phase of the work, located at the south portal site (pictured below), includes the permanent closure of the portion of SE 1st Place at 112th Avenue SE, along with installation of temporary fencing and erosion control. Once these activities are completed, Sound Transit's contractor will begin preparing structures for demolition. Demolition of the existing structures should begin in April, with tree removal and site grading following shortly thereafter.

What to expect:

- Work hours between 7 a.m. and 6 p.m., M-F (occasional Saturday work may occur).
- A safe and secure work site.
- Contractor employee parking located outside of neighborhood streets.
- The adjacent sidewalk along both 112th and Main Street will be closed during this phase of activity. Pedestrian detours will be posted.
- Intermittent lane closures on 112th and Main Street with advance notice.

Sound Transit's contractor will work throughout this spring and summer preparing the site for tunneling, which will likely begin this fall, after a temporary sound wall is built around the south portal site.

در مورد مسیر پیشنهاد شده برای پروژه ترانزیت سبک راه اهتی در کینگ شرقی با شماره 1-800-823-9230 در ساعات کاری تماس بگیرید برای گفتگو با سوند ترانزیت.

East Link is an important piece of the regional mass transit system approved by voters in 2008. This 14-mile light rail line will benefit local communities and support regional growth with fast, frequent and reliable light rail service, connecting Seattle to the Eastside's biggest population and employment centers. The project builds on the Link light rail line running between Sea-Tac Airport and downtown Seattle and the University Link line that opens March 19, 2016. East Link is part of Sound Transit's light rail extensions being built north, south and east of Seattle.
